**Subject:** Tobin school designs - feedback

I live a block from the Tobin and enjoyed seeing the current schematic designs for the new schools. I wondered if the height of the buildings could be increased to four stories to increase open spaces for additional playing fields? I imagine there might be a zoning restriction limiting height, but I think a taller building in that location would not significantly impact the feel of the adjacent houses. Overall, the site plan seemed overly constrained for bus lanes and playing fields and an additional story might open up the overall site.
