

2017

# CAMBRIDGE BENCHMARKING REPORT

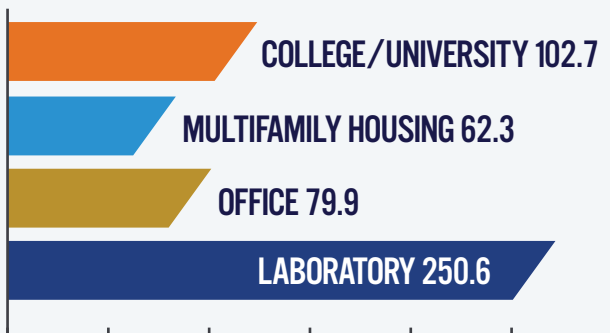

## REACH IN CAMBRIDGE

**Compliance rate** based on number of buildings reporting in 2017

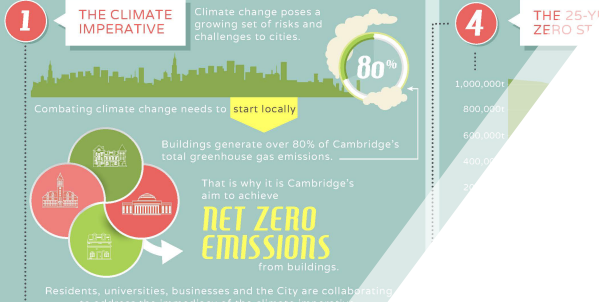

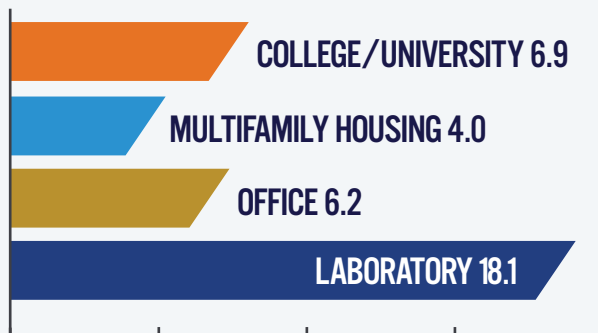

## MEDIAN SITE ENERGY USE INTENSITY

Energy use intensity is the ratio of annual energy use to square feet within a property. It reflects the overall efficiency performance of each property type.

## GHG INTENSITY (KGCO<sub>2</sub>E/FT<sup>2</sup>)

GHG intensity demonstrates the per square foot impact of a property type on emissions of CO<sub>2</sub> equivalent greenhouse gases.

## CAMBRIDGE NET ZERO ACTION PLAN

Cambridge is working to achieve **carbon neutrality by 2050** through energy efficiency improvements, renewable energy production, and carbon offsets or credits
