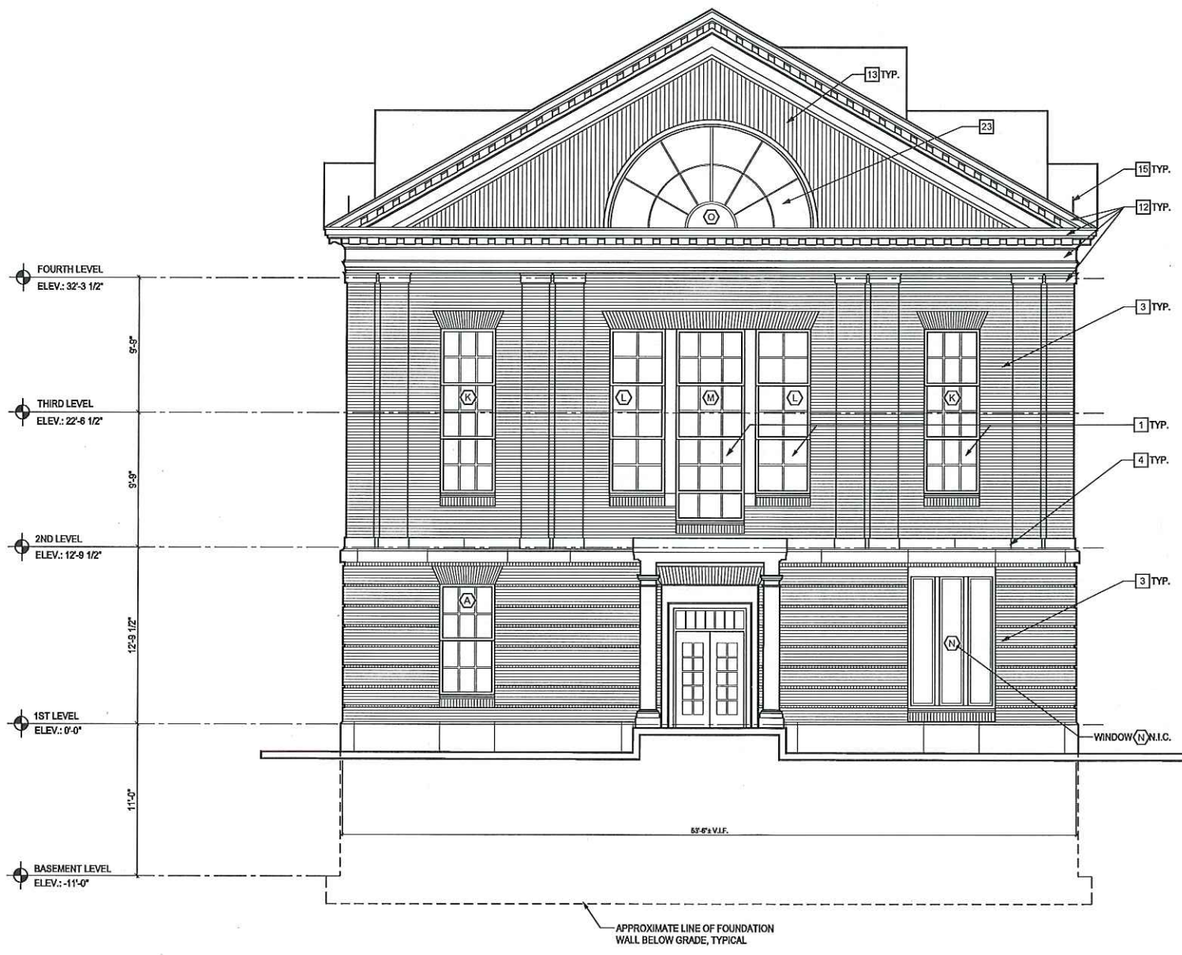
Harvard University Precedents

01: Exterior Scope

North Elevation



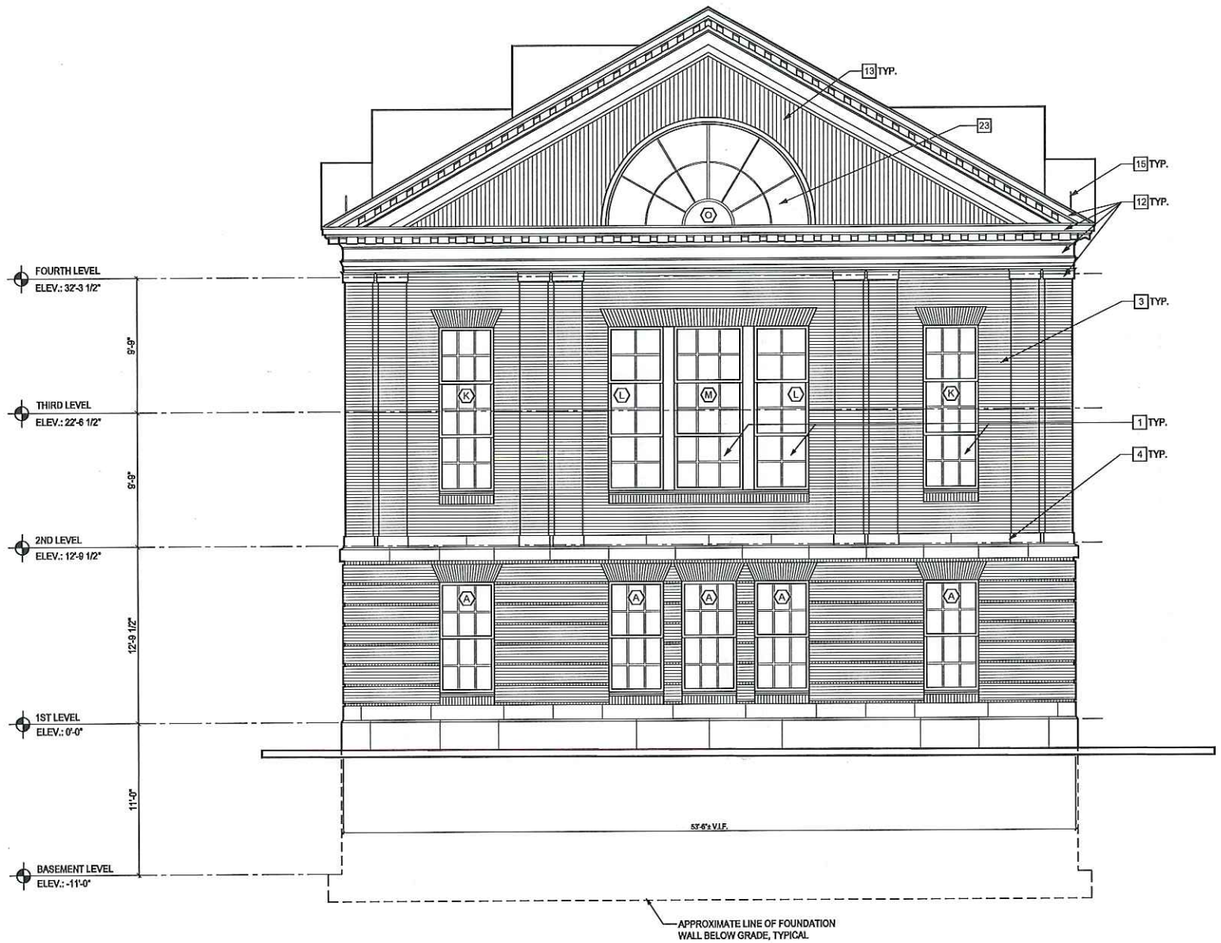
Scale 3/32" = 1'-0"

NOTES & KEY NOTES:

1. AT WINDOW TYPES A, B, C, E, F, G, H, K, L, & M:
   RESTORE WINDOWS, TYPICAL:
   A. REMOVE AND DISPOSE ALL EXISTING WOOD BRICK MOLD TRIM.
   B. REMOVE ALL EXISTING WOOD WINDOW SASH. REPAIR AND RESTORE SASH IN-SHOP.
   C. STRIP AND REMOVE ALL EXISTING PAINT FROM ENTIRE WINDOW.
   D. APPLY WOOD EPOXY CONSOLIDANT AND PATCH WITH WOOD EPOXY PUTTY. WHERE WOOD IS COMPLETELY DETERIORATED REPLACE SECTION WITH DUTCHMAN REPAIR OR ENTIRE WOOD COMPONENT TO MATCH EXISTING SIZE, SHAPE, AND PROFILE.
   E. PRIME AND PAINT ALL RESTORED WOOD WINDOWS.
2. AT WINDOW TYPE D:
   REMOVE AND DISPOSE OF EXISTING ALUMINUM-CLAD WINDOWS AND REPLACE WITH NEW INSULATED ALUMINUM FIXED WINDOWS TO MATCH EXISTING, TYPICAL.
3. CUT OUT 100% OF EXISTING BRICK MORTAR JOINTS AND POINT WITH NEW MORTAR TO MATCH EXISTING COLOR AND TEXTURE, TYPICAL.
4. CUT OUT 100% OF EXISTING JOINTS AT MARBLE MASONRY AND REPLACE WITH NEW MORTAR, TYPICAL.
5. CUT OUT 100% OF EXISTING JOINTS AT GRANITE MASONRY AND REPLACE WITH NEW MORTAR, TYPICAL.
6. REPAIR CRACKS IN GRANITE FOUNDATION WALL STONES AT LOCATIONS MARKED BY THE ARCHITECT IN THE FIELD, TYPICAL. APPROXIMATELY 100 LF OF CRACK REPAIR.
7. REMOVE EXISTING CRACKED OR BROKEN BRICK AT LOCATIONS MARKED BY THE ARCHITECT IN THE FIELD, TYPICAL. REPLACE APPROXIMATELY 150 BRICKS.
8. APPLY MASONRY CONSOLIDANT TO ALL EXISTING MARBLE SURFACES, TYPICAL.
9. APPLY BREATHABLE MASONRY PENETRATING WATER REPELLENT TO ALL BRICK AND STONE MASONRY SURFACES, TYPICAL.
10. REMOVE EXISTING STEEL LINTELS BELOW MONUMENTAL WINDOWS, ABOVE CASEMENT WINDOWS, AND REPLACE WITH NEW PAINTABLE HOT-DIPPED GALVANIZED STEEL LINTELS, ZINC-COATED COPPER THROUGH-WALL FLASHING, SELF ADHERED MEMBRANE FLASHING, COLOR-COATED ALUMINUM WINDOW SILL PANNING, AND RELATED SEALANTS, TYPICAL.
11. REMOVE EXISTING ROTTED EXTERIOR WOOD TRIM AND REPLACE WITH NEW WOOD WITH DUTCHMAN REPAIR TO MATCH EXISTING, TYPICAL. APPROXIMATELY 120 SF OF DUTCHMAN REPAIR. QUANTITY MAY INCREASE ONCE THE EXISTING PAINT IS STRIPPED DOWN TO BARE WOOD.
12. STRIP, REPAIR, SEAL, SAND, PRIME AND PAINT EXISTING EXTERIOR WOOD TRIM, TYPICAL.
13. SCRAPE, EPOXY REPAIR AND DETERIORATED WOOD, PRIME AND PAINT EXISTING WOOD PANELING, TYPICAL.
14. REMOVE AND DISPOSE OF EXISTING INDIVIDUAL BROKEN SLATE SHINGLES AND REPLACE WITH NEW SLATE SHINGLES TO MATCH EXISTING, TYPICAL. REPLACE APPROXIMATELY 125 SHINGLES.
15. INSTALL CONTINUOUS METAL 3-RAIL-PIPE SNOW GUARDS, TYPICAL.
16. EXISTING TAB-STYLE SNOW GUARDS TO REMAIN, TYPICAL.
17. RE-SOLDER OPEN OR DAMAGED EXISTING LEAD-COATED COPPER DORMER ROOFING, TRIM, GUTTERS AND RED COPPER DOWNSPOUTS, TYPICAL. CONTRACTOR SHALL REVIEW ALL SEAMS AND REPAIR ANY DAMAGED LOCATIONS, APPROXIMATELY 75 LF OF COPPER SEAM REPAIR.
18. CUT AND REPOINT 100% OF EXISTING BRICK MORTAR JOINTS AT ALL FACES OF EXISTING MASONRY RETAINING WALL. CLEAN AND APPLY BREATHABLE MASONRY CLEAR SEALER TO ALL BRICK AND STONE SURFACES, TYPICAL.
19. PATCH EXISTING MORTAR WASH AT BRICK SILL AND COAT WITH LIQUID-APPLIED EPOXY COATING, TYPICAL AT ALL WINDOW OPENINGS.
20. REMOVE EXISTING BROKEN SLATE SHINGLES AND REPLACE WITH NEW SHINGLES TO MATCH EXISTING, TYPICAL. REPLACE APPROXIMATELY 125 SHINGLES.
21. PROPOSED MATERIAL LIFT
22. AT WINDOW TYPE O; STRIP AND REMOVE EXISTING PAINT, AND PRIME AND REPAIR

01: Exterior Scope

South Elevation



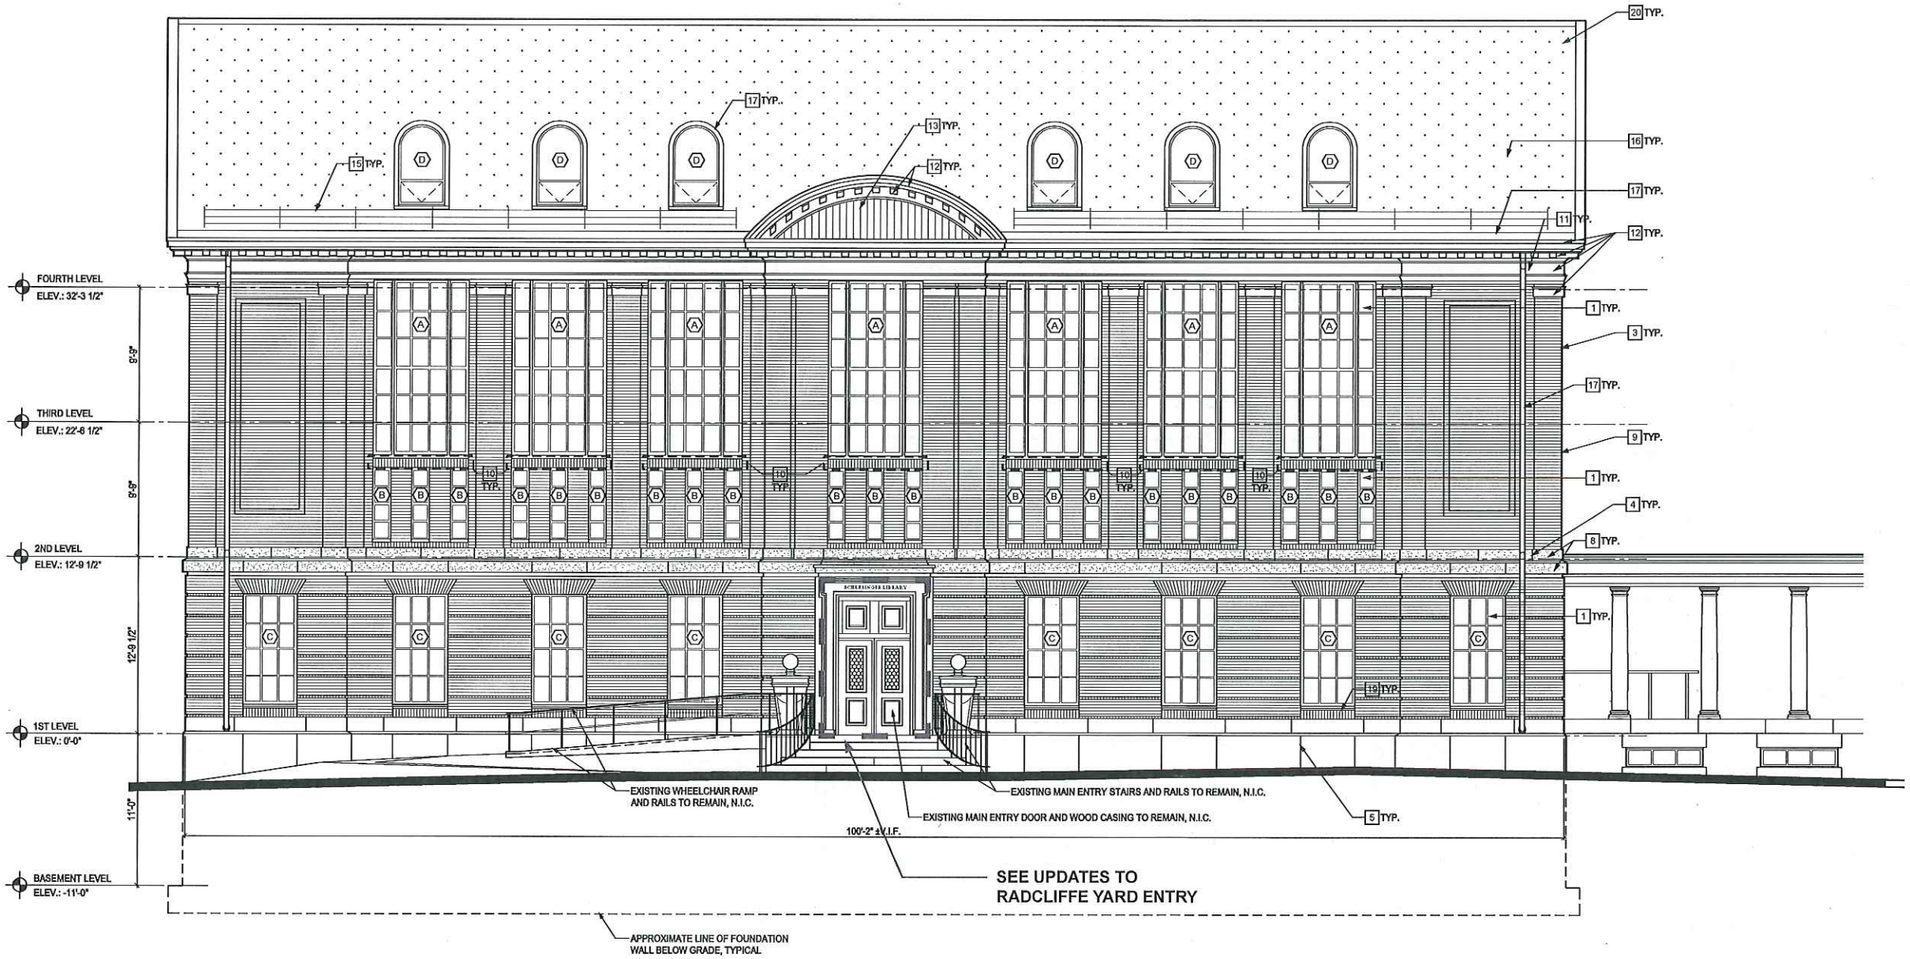
Scale 3/32" = 1'-0"

NOTES & KEY NOTES:

1. AT WINDOW TYPES A, B, C, E, F, G, H, K, L, & M:
   RESTORE WINDOWS, TYPICAL:
   A. REMOVE AND DISPOSE ALL EXISTING WOOD BRICK MOLD TRIM.
   B. REMOVE ALL EXISTING WOOD WINDOW SASH. REPAIR AND RESTORE SASH IN-SHOP.
   C. STRIP AND REMOVE ALL EXISTING PAINT FROM ENTIRE WINDOW.
   D. APPLY WOOD EPOXY CONSOLIDANT AND PATCH WITH WOOD EPOXY PUTTY. WHERE WOOD IS COMPLETELY DETERIORATED REPLACE SECTION WITH DUTCHMAN REPAIR OR ENTIRE WOOD COMPONENT TO MATCH EXISTING SIZE, SHAPE, AND PROFILE.
   E. PRIME AND PAINT ALL RESTORED WOOD WINDOWS.
2. AT WINDOW TYPE D:
   REMOVE AND DISPOSE OF EXISTING ALUMINUM-CLAD WINDOWS AND REPLACE WITH NEW INSULATED ALUMINUM FIXED WINDOWS TO MATCH EXISTING, TYPICAL.
3. CUT OUT 100% OF EXISTING BRICK MORTAR JOINTS AND POINT WITH NEW MORTAR TO MATCH EXISTING COLOR AND TEXTURE, TYPICAL.
4. CUT OUT 100% OF EXISTING JOINTS AT MARBLE MASONRY AND REPLACE WITH NEW MORTAR, TYPICAL.
5. CUT OUT 100% OF EXISTING JOINTS AT GRANITE MASONRY AND REPLACE WITH NEW MORTAR, TYPICAL.
6. REPAIR CRACKS IN GRANITE FOUNDATION WALL STONES AT LOCATIONS MARKED BY THE ARCHITECT IN THE FIELD, TYPICAL. APPROXIMATELY 100 LF OF CRACK REPAIR.
7. REMOVE EXISTING CRACKED OR BROKEN BRICK AT LOCATIONS MARKED BY THE ARCHITECT IN THE FIELD, TYPICAL. REPLACE APPROXIMATELY 150 BRICKS.
8. APPLY MASONRY CONSOLIDANT TO ALL EXISTING MARBLE SURFACES, TYPICAL.
9. APPLY BREATHABLE MASONRY PENETRATING WATER REPELLENT TO ALL BRICK AND STONE MASONRY SURFACES, TYPICAL.
10. REMOVE EXISTING STEEL LINTELS BELOW MONUMENTAL WINDOWS, ABOVE CASEMENT WINDOWS, AND REPLACE WITH NEW PAINTABLE HOT-DIPPED GALVANIZED STEEL LINTELS, ZINC-COATED COPPER THROUGH-WALL FLASHING, SELF ADHERED MEMBRANE FLASHING, COLOR-COATED ALUMINUM WINDOW SILL PANNING, AND RELATED SEALANTS, TYPICAL.
11. REMOVE EXISTING ROTTED EXTERIOR WOOD TRIM AND REPLACE WITH NEW WOOD WITH DUTCHMAN REPAIR TO MATCH EXISTING, TYPICAL. APPROXIMATELY 120 SF OF DUTCHMAN REPAIR. QUANTITY MAY INCREASE ONCE THE EXISTING PAINT IS STRIPPED DOWN TO BARE WOOD.
12. STRIP, REPAIR, SEAL, SAND, PRIME AND PAINT EXISTING EXTERIOR WOOD TRIM, TYPICAL.
13. SCRAPE, EPOXY REPAIR AND DETERIORATED WOOD, PRIME AND PAINT EXISTING WOOD PANELING, TYPICAL.
14. REMOVE AND DISPOSE OF EXISTING INDIVIDUAL BROKEN SLATE SHINGLES AND REPLACE WITH NEW SLATE SHINGLES TO MATCH EXISTING, TYPICAL. REPLACE APPROXIMATELY 125 SHINGLES.
15. INSTALL CONTINUOUS METAL 3-RAIL-PIPE SNOW GUARDS, TYPICAL.
16. EXISTING TAB-STYLE SNOW GUARDS TO REMAIN, TYPICAL.
17. RE-SOLDER OPEN OR DAMAGED EXISTING LEAD-COATED COPPER DORMER ROOFING, TRIM, GUTTERS AND RED COPPER DOWNSPOUTS, TYPICAL. CONTRACTOR SHALL REVIEW ALL SEAMS AND REPAIR ANY DAMAGED LOCATIONS, APPROXIMATELY 75 LF OF COPPER SEAM REPAIR.
18. CUT AND REPOINT 100% OF EXISTING BRICK MORTAR JOINTS AT ALL FACES OF EXISTING MASONRY RETAINING WALL. CLEAN AND APPLY BREATHABLE MASONRY CLEAR SEALER TO ALL BRICK AND STONE SURFACES, TYPICAL.
19. PATCH EXISTING MORTAR WASH AT BRICK SILL AND COAT WITH LIQUID-APPLIED EPOXY COATING, TYPICAL AT ALL WINDOW OPENINGS.
20. REMOVE EXISTING BROKEN SLATE SHINGLES AND REPLACE WITH NEW SHINGLES TO MATCH EXISTING, TYPICAL. REPLACE APPROXIMATELY 125 SHINGLES.
21. PROPOSED MATERIAL LIFT
22. AT WINDOW TYPE O; STRIP AND REMOVE EXISTING PAINT, AND PRIME AND REPAIR

01: Exterior Scope

East Elevation



Scale 3/32" = 1'-0"

NOTES & KEY NOTES:

1. AT WINDOW TYPES A, B, C, E, F, G, H, K, L, & M:
   RESTORE WINDOWS, TYPICAL:
   A. REMOVE AND DISPOSE ALL EXISTING WOOD BRICK MOLD TRIM.
   B. REMOVE ALL EXISTING WOOD WINDOW SASH. REPAIR AND RESTORE SASH IN-SHOP.
   C. STRIP AND REMOVE ALL EXISTING PAINT FROM ENTIRE WINDOW.
   D. APPLY WOOD EPOXY CONSOLIDANT AND PATCH WITH WOOD EPOXY PUTTY. WHERE WOOD IS COMPLETELY DETERIORATED REPLACE SECTION WITH DUTCHMAN REPAIR OR ENTIRE WOOD COMPONENT TO MATCH EXISTING SIZE, SHAPE, AND PROFILE.
   E. PRIME AND PAINT ALL RESTORED WOOD WINDOWS.
2. AT WINDOW TYPE D:
   REMOVE AND DISPOSE OF EXISTING ALUMINUM-CLAD WINDOWS AND REPLACE WITH NEW INSULATED ALUMINUM FIXED WINDOWS TO MATCH EXISTING, TYPICAL.
3. CUT OUT 100% OF EXISTING BRICK MORTAR JOINTS AND POINT WITH NEW MORTAR TO MATCH EXISTING COLOR AND TEXTURE, TYPICAL.
4. CUT OUT 100% OF EXISTING JOINTS AT MARBLE MASONRY AND REPLACE WITH NEW MORTAR, TYPICAL.
5. CUT OUT 100% OF EXISTING JOINTS AT GRANITE MASONRY AND REPLACE WITH NEW MORTAR, TYPICAL.
6. REPAIR CRACKS IN GRANITE FOUNDATION WALL STONES AT LOCATIONS MARKED BY THE ARCHITECT IN THE FIELD, TYPICAL. APPROXIMATELY 100 LF OF CRACK REPAIR.
7. REMOVE EXISTING CRACKED OR BROKEN BRICK AT LOCATIONS MARKED BY THE ARCHITECT IN THE FIELD, TYPICAL. REPLACE APPROXIMATELY 150 BRICKS.
8. APPLY MASONRY CONSOLIDANT TO ALL EXISTING MARBLE SURFACES, TYPICAL.
9. APPLY BREATHABLE MASONRY PENETRATING WATER REPELLENT TO ALL BRICK AND STONE MASONRY SURFACES, TYPICAL.
10. REMOVE EXISTING STEEL LINTELS BELOW MONUMENTAL WINDOWS, ABOVE CASEMENT WINDOWS, AND REPLACE WITH NEW PAINTABLE HOT-DIPPED GALVANIZED STEEL LINTELS, ZINC-COATED COPPER THROUGH-WALL FLASHING, SELF ADHERED MEMBRANE FLASHING, COLOR-COATED ALUMINUM WINDOW SILL PANNING, AND RELATED SEALANTS, TYPICAL.
11. REMOVE EXISTING ROTTED EXTERIOR WOOD TRIM AND REPLACE WITH NEW WOOD WITH DUTCHMAN REPAIR TO MATCH EXISTING, TYPICAL. APPROXIMATELY 120 SF OF DUTCHMAN REPAIR. QUANTITY MAY INCREASE ONCE THE EXISTING PAINT IS STRIPPED DOWN TO BARE WOOD.
12. STRIP, REPAIR, SEAL, SAND, PRIME AND PAINT EXISTING EXTERIOR WOOD TRIM, TYPICAL.
13. SCRAPE, EPOXY REPAIR AND DETERIORATED WOOD, PRIME AND PAINT EXISTING WOOD PANELING, TYPICAL.
14. REMOVE AND DISPOSE OF EXISTING INDIVIDUAL BROKEN SLATE SHINGLES AND REPLACE WITH NEW SLATE SHINGLES TO MATCH EXISTING, TYPICAL. REPLACE APPROXIMATELY 125 SHINGLES.
15. INSTALL CONTINUOUS METAL 3-RAIL-PIPE SNOW GUARDS, TYPICAL.
16. EXISTING TAB-STYLE SNOW GUARDS TO REMAIN, TYPICAL.
17. RE-SOLDER OPEN OR DAMAGED EXISTING LEAD-COATED COPPER DORMER ROOFING, TRIM, GUTTERS AND RED COPPER DOWNSPOUTS, TYPICAL. CONTRACTOR SHALL REVIEW ALL SEAMS AND REPAIR ANY DAMAGED LOCATIONS, APPROXIMATELY 75 LF OF COPPER SEAM REPAIR.
18. CUT AND REPOINT 100% OF EXISTING BRICK MORTAR JOINTS AT ALL FACES OF EXISTING MASONRY RETAINING WALL. CLEAN AND APPLY BREATHABLE MASONRY CLEAR SEALER TO ALL BRICK AND STONE SURFACES, TYPICAL.
19. PATCH EXISTING MORTAR WASH AT BRICK SILL AND COAT WITH LIQUID-APPLIED EPOXY COATING, TYPICAL AT ALL WINDOW OPENINGS.
20. REMOVE EXISTING BROKEN SLATE SHINGLES AND REPLACE WITH NEW SHINGLES TO MATCH EXISTING, TYPICAL. REPLACE APPROXIMATELY 125 SHINGLES.
21. PROPOSED MATERIAL LIFT
22. AT WINDOW TYPE O; STRIP AND REMOVE EXISTING PAINT, AND PRIME AND REPAIR
