

Save the Alewife Brook

Environmental Health is Community Health

January 5, 2023

Brian Kubaska, Massachusetts Water Resources Authority
Catherine Daly Woodbury, City of Cambridge
Lucica Hiller, City of Somerville

Dear Mr. Kubaska, Ms. Woodbury, & Ms. Hiller,

Thank you for welcoming public comments about the Plan to Eliminate Sewage Pollution in Alewife Brook, as well as your many combined decades of dedication to improving water quality in the Boston Harbor. It would be impossible to find a more experienced and knowledgeable group to lead the Alewife Brook Cleanup.

Save the Alewife Brook is a growing grassroots environmental group with supporters in the communities along the Alewife Brook, including Somerville, Cambridge, Arlington, Belmont, and Medford. We formed our organization to raise awareness about the unsafe condition of the Brook, and to advocate for an end to combined sewer discharges. We envision a Brook that is safe to live near, an environmentally healthy community resource, not one that is hazardous because it is used as an overflow sewer. We are especially concerned about existing health impacts of sewage pollution on the Environmental Justice populations who live within the Alewife's 100-year flood plain.

Save the Alewife Brook will submit to MassDEP our comments about the Future Typical Year Combined Sewer Overflow modeling. Please know we deeply appreciate your initial efforts to include Climate Change projections in the new CSO planning and performance assessment model, through the invaluable expertise of the highly esteemed Doctors Ghosh and DeGaetano. Keep in mind, however, that the public is outraged that the Alewife Brook experienced 51 million gallons of metered CSO sewage pollution discharge in 2021. Your answer to the public's concern was that 2021 was a wet year. The public expects a new CSO planning and performance compliance model that reflects actual Alewife Brook sewage pollution discharges during wet years like 2021, going into the future.

Less than one year ago, Save the Alewife Brook created a Petition to End Alewife Brook Sewage Pollution. We have collected hundreds of signatures from residents in Cambridge and Somerville — over 900 customers across the MWRA's system, demonstrating a strong public desire to protect the Alewife Brook as a safe, natural resource. We submit the petition and signatures collected to date in response to your call for public comment following the December 15, 2022 Public CSO Planning Meeting, #2.

Sincerely,

David White Kristin Anderson David Stoff Gwendolyn Speeth

Petition to End Alewife Brook Sewage Pollution

We demand the following:

- Elimination of all Combined Sewer Overflows (CSOs) to End Sewage Pollution
- Separated Sewer Systems to keep Sewage out of Stormwater
- A Safe, Beautiful, Fishable Brook for the Residents and for Wildlife
- New Green Infrastructure on State Land for Stormwater Cleaning
- New Grey Infrastructure to Reduce Flooding in the Face of Climate Change

During some major storm events, the Alewife Brook floods into the parks, yards, and houses of area residents in Environmental Justice Communities. The flood water contains hazardous sewage that is discharged from the active CSOs owned by Cambridge, Somerville, and the MWRA. Climate change, with its wetter rainy seasons, more intense storms, and sea level rise, is expected to increase the severity and frequency of these events.

Furthermore, the MWRA's sewer infrastructure is failing to meet capacity during many rain events, causing hazardous sewage pollution discharges. In fact, the rate of sewage discharge is increasing exponentially with increase in rainwater, making this a Climate Change Emergency.

Therefore, we demand that the cities of Cambridge, Somerville, and the MWRA completely stop discharging sewage pollution into the Alewife Brook. We also demand that the Commonwealth of Massachusetts invest in urgently needed improvements to the Amelia Earhart Dam and to the Draw Seven Park along the Mystic River, so the area is resilient to the effects of flooding due to Climate Change.

Signatures collected as of January 4th, 2023:
