A photograph of a golf course green at sunset. The sun is low on the horizon, creating a warm orange and yellow glow. The sky is filled with soft, pinkish-purple clouds. In the foreground, a green flagstick stands on the right side of the green. The background is filled with silhouettes of trees and bushes. A white text box is overlaid on the left side of the image.

Land Scape Initiatives

A photograph of a brown and white dog sitting in a field of fallen autumn leaves. In the background, there is a golf course with green grass, a paved path, and several trees, some with autumn foliage and others evergreen. A large tree trunk is visible on the right side of the frame. The sky is overcast.

Golf Course Staff are in the process of reviewing all buffer zones and searching for iconic natural elements to ensure zones are called out without sticking out.

Audubon Cooperative Sanctuary Program (ACSP)

Who can join: parks, cemeteries, museums, schools, universities, and other types of businesses

ACSP is an education and certification program that helps organizations and businesses protect our environment while enhancing their bottom line. Participating organizations create a plan and work toward goals in the categories of Outreach and Education, Resource Management, Water Quality and Conservation, and Wildlife and Habitat Management.

[Click here for more information about ACSP.](#)

ACSP for Golf

Who can join: golf courses

ACSP for Golf is a widely recognized and highly-regarded education and certification program that helps protect our environment and preserve the natural heritage of the game of golf. Golf courses are guided through projects in the categories of Environmental Planning, Wildlife and Habitat Management, Chemical Use Reduction and Safety, Water Conservation, Water Quality Management, and Outreach and Education.

What is the Audubon Cooperative Sanctuary Program for Golf?

The Audubon Cooperative Sanctuary Program for Golf (ACSP) is an environmental education and certification program that helps golf courses protect the environment, preserve the natural heritage of the game of golf, promote environmental sustainability and gain recognition for their efforts. Through collaborative efforts begun in 1991 with the United States Golf Association, membership in the ACSP has steadily grown to include approximately 2,000 golf courses in the United States and three dozen countries worldwide.

How does it work?

The ACSP assists each golf course member to determine its environmental resources and any potential liabilities, and then develop a plan that fits its unique setting, goals, staff, budget, and schedule. Audubon International provides information and guidance to help golf course personnel with six key environmental components:

- Site Assessment/Environmental Planning
- Wildlife and Habitat Management
- Chemical Use Reduction and Safety
- Water Conservation
- Water Quality Management
- Outreach and Education

"The strongest part of the certification process is that it forces us to rethink our methods and manner of conducting business. It challenges our "status quo" by directing our thoughts and actions toward environmental awareness and changes our definitions of responsibility."

- Nancy Miller, Golf Course and Grounds Superintendent, Maple Leaf Golf & Country Club, FL
