

***Commonwealth Of Massachusetts  
Massachusetts Department of Transportation  
Cambridge Common Project***

- *The Cambridge Common Project was shut down for this past winter due to the severe weather conditions.*
- *As part of this project, full depth construction has been completed on a portion of Massachusetts Avenue. New traffic signals are being installed and Flagstaff Park is approaching 100% completion. This will included a new drainage system, and a new 10foot wide multiuse pathway.*
- *The project has an anticipated completion date of October 24, 2015 and the work is being done in phases in order for the public to have continuous use of sections of the park during the reconstruction.*
- *Newport Construction resumed work on the project last week where they installed ten (10) concrete light pole foundations inside the fenced area for the new lighting system.*

*Periodic updates to follow*
