THURSDAY, MARCH 19, 2015

POLE AND CONDUIT COMMISSION MEETING

ELLEN WATSON: Good morning. We're in

the meeting of the Pole & Conduit Commission.

Today is Thursday, March 19, 2015, it is 10:07

a.m.

We are in the Michael J. Lombardi

Building, 831 Massachusetts Avenue, Basement

Conference Room.

Hearing items today are Andrea Jackson,

Chair, Bill Dwyer, Superintendent of Streets, and

Steve Lenkauskas, City Electrician. We ask if

you have any electronic devices, you silence them

and you keep the back door free and open.

CHAIR ANDREA JACKSON: We are going to

matters a little bit out of order. What I would

like to know by a show of hands, how many

residents do you have here to testify this morning?

Just one? Two?

Which petition are you here on ma'am?

GALINA SHYNDRIAYEVA: 516 Green Street.

The -- you put the -- not.

CHAIR ANDREA JACKSON: If you could come forward. It is hard for us to hear with the air. Please come forward.

If you could please state your name for the record. What is your name?

GALINA SHYNDRIAYEVA: Galina Shyndriayeva.

CHAIR ANDREA JACKSON: Can you spell it, please, your first and last name, please.

GALINA SHYNDRIAYEVA: G-A-L-I-N-A. Last name S-H-Y-N-D-R-I-A-Y-E-V-A.

CHAIR ANDREA JACKSON: Not even going to try to say it.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Disclose to mine.

CHAIR ANDREA JACKSON: We'll call you back. Which petition are you here for?

GALINA SHYNDRIAYEVA: With my family we decide not to change because we have already pole view from indoor. If you put --

CHAIR ANDREA JACKSON: Hold on one second. Let me see what you have, that would be helpful for me. Just the letter.

GALINA SHYNDRIAYEVA: (Complying.)

CHAIR ANDREA JACKSON: Thank you.

So if I could have the record reflect she's here on the Crown Castle petition. Specifically I'm looking at the abutter's notice to her, Pleasant Street, Franklin Street, Highland Ave, Green Street, Hancock Street, Hancock Street.

So if you give me one moment. I just

need to know where the other gentleman is. You can go back to your seat. We are going to take these towards the end, if that's okay.

Sir, if you can come forward, please.

Good morning.

JAMES KOGER: Hi.

CHAIR ANDREA JACKSON: If you could state your name for record.

JAMES KOGER: James Koger, K-O-G-E-R.
444 Franklin Street.

CHAIR ANDREA JACKSON: You are also here for Crown Castle?

JAMES KOGER: That's right.

CHAIR ANDREA JACKSON: Give us a few minutes. We are going to take a couple items first and then come back to the Crown Castle. Thank you.

Are there any other residents here?
Seeing none, we're going to start with Comcast

this morning.

ANTHONY VATALARO: Good morning.

CHAIR ANDREA JACKSON: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Good morning.

First Comcast petition is for 181 Mass. Ave from existing Comcast manhole on Osborn Street trench 32 feet westerly in the public way ending at the property line of 181 Mass Ave, installing one, four inch conduit. This will include the removal and replacement of one sidewalk panel.

ANTHONY VATALARO: That's for new service for 181 Mass. Ave.

CHAIR ANDREA JACKSON: You said that's for new service?

ANTHONY VATALARO: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't have any issues with that.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Public Works doesn't. We already met with them.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I

make a motion to approve pending all typical conditions, DPW permits, site visit.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

SPOF regulations.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

SPOF regulations.

ANTHONY VATALARO: Is there a --

CHAIR ANDREA JACKSON: Let me finish with

the motion. Second.

All those in favor signify by saying aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: Aye.

ANTHONY VATALARO: Is there a date set

for the moratorium lift?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: If

it doesn't snow Friday.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

It's a case-by-case right now but we're looking probably next week. Next week sometime.

CHAIR ANDREA JACKSON: Maybe.

ANTHONY VATALARO: Playing it by ear.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Move ahead with -- in your case move ahead with your permitting, submit the permit application and it will be ready to go.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Next item is Comcast for 240 Sidney Street, from existing pole line on Allston Street, trench 35 feet in the public way to the property line of 240 Sidney Street, installing one, four inch conduit.

This will include the removal and replacement of one sidewalk panel.

ANTHONY VATALARO: This is also new

service.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

That new development?

ANTHONY VATALARO: New residential
building.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I,
again, don't have anything.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Public Works has no issues on that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On
motion to approve, all typical conditions, SPOF,
DPW permits, and any traffic permits.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
And a site visit.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And
a site visit.

CHAIR ANDREA JACKSON: Motion's been
made. Second.

All those in favor signify by saying aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

Comcast again. 33 Cottage Park Avenue from existing pole 728 No. 2 on Whittemore Avenue, trench 29 feet in the public way to property the line of 33 Cottage Park Avenue installing one, four inch conduit.

This will include the removal and replacement of one sidewalk panel.

ANTHONY VATALARO: This is, again, new service for the new complex that's going in there.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Right.

I believe we had NSTAR last month, and this street was recently paved. Are you able to go on the sidewalk?

ANTHONY VATALARO: Whittmore was?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Whittmore at that end, yeah.

ANTHONY VATALARO: Yeah, I mean we could go on the side of Muldoon (phonetic) and pave. I think that property extends further up. If Muldoon is not, maybe we could cross there.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you go the next -- I believe the poles are on the opposite side of the street.

ANTHONY VATALARO: There's a pole line here on Muldoon (phonetic), I could cross to the property here (indicating).

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That might make sense where NSTAR, or whatever source, is already coming down a riser on that pole.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That would enable you to stay off the newly-paved

street.

ANTHONY VATALARO: Right and I'm sure there's new sidewalks there too.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yeah, there's a new sidewalk there and newly-planted trees and things like that.

ANTHONY VATALARO: So do you want me to resubmit this?

CHAIR ANDREA JACKSON: Continue this one.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yeah, you are gonna have to.

ANTHONY VATALARO: Resubmit a new drawing?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yeah.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yeah.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Maybe a site visit and take a quick look at it.

I move to continue.

CHAIR ANDREA JACKSON: Second.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Comcast at 600 Technology Square from existing pole 19 on Washington Street trench 291 feet in the public way to the property of 600 Technology Square installing one, four inch conduit.

This will include the removal and replacement of three sidewalk panels.

I don't have any issues or concerns.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I don't think so either.

Public Works is okay with this as it is.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Okay, a motion to approve with all typical conditions, SPOF, site meeting and all permits.

On the motion?

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Comcast. 1050 Mass. Ave from existing Comcast sidewalk vault trench 41 feet westerly on Mass. Ave installing one, four inch conduit ending at the private line of 1050 Mass. Ave.

This will include the removal and restoration of the brick sidewalk.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Public Works is okay with this one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I

have no issues.

Move to approve. All typical conditions,
SPOF regulations, permits, and site meeting.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

Comcast. 9 Beech Street from existing
Comcast manhole at the intersection of Beech and
Orchard Street, trench 77 feet in the public way
southwesterly on Beech Street ending at the
private property line of 9 Beech Street
installing one, four inch conduit.

This will include the removal and

restoration of the brick sidewalk.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Give me a second on this one, if you would. I'll check my notes.

Still one conduit, Anthony, on this one?

ANTHONY VATALARO: Yes. It is for service for the church there. It is just gonna be drop service, underground.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Isn't there a tree there, or you going by a tree?

ANTHONY VATALARO: I think there is.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

It might push it out a little further into the street because of the root system, but I don't see any.

ANTHONY VATALARO: We actually tried to obtain an easement from the neighbor out back because that's where the telephone goes, and we weren't able to. This was the only -- this was

the last resort basically.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

That's an electric trench in that street. You will be right next to an electrical trench, you don't show it here, and I can't remember what side the water main is on. I don't know if it is between the electrical trench and where you want to go. You may have issues.

ANTHONY VATALARO: Do you want to do --

do you want me to do an engineered drawing?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

How urgent is this? Is this something we can look at together because that may be the best bet and come back.

ANTHONY VATALARO: We have time.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Maybe we should continue this to the next month and we'll get to that. That will become an important issue if we can't get it between the

tree root, the water main and electrical trench.

You're gonna to be delayed for another couple months, so why not look at it now.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: A motion to continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Motion to continue.

CHAIR ANDREA JACKSON: Motion's been made.

Seconded.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Comcast. 100 Putnam Avenue from existing pole 411/32 on Kinnaird Street trench nine feet in the public way to the property of line of 100 Putnam

Avenue installing one, four inch conduit.

This will include the removal and replacement of two sidewalk panels.

This is the service to feed the new school?

ANTHONY VATALARO: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
I have seen it, but I got the wrong plan on this one. I got Muldoon Street (phonetic).

ANTHONY VATALARO: So do I.

CHAIR ANDREA JACKSON: Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
I have seen a plan on. Public Works is fine with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Motion to approve with all typical permits, site visit.

CHAIR ANDREA JACKSON: Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CHAIR ANDREA JACKSON: I'm going to
abstain on this. My daughter attends the school.

ANTHONY VATALARO: Site visit is with the
DPW?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: For
all of those.

ANTHONY VATALARO: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yes.

ANTHONY VATALARO: With Mr. Chasen
(phonetic).

SUPERINTENDENT OF STREETS WILLIAM DWYER:

No, probably with Jeya. There's a different -- these are all different projects. It will be assigned to different engineers and inspectors.

ANTHONY VATALARO: But initially with Jeya with all of these?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yes.

ANTHONY VATALARO: Thank you.

CHAIR ANDREA JACKSON: Ma'am, if I can have you come to the front, please. If you can have a seat. May I see your letter, please.

(Complying.)

CHAIR ANDREA JACKSON: May I?

You can't tell me yet. We have to get it on the record. We have to make sure we are on the right petition.

I'm going to need you to speak up because it is hard to hear with the air and we can work through it. So you are here on petition AF004

and I will let you call it, the agenda item.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Okay. Just to jump down to Green Street, this would be Node N047, which is the forth -- this one here is for Crown Castle in regards to Green Street for new equipment attached on existing fiber optic pathway at pole 44/23 on Green Street known as Node N047.

Would you tell us your concern or your comment on it?

GALINA SHYNDRIAYEVA: Yeah. I brought the pictures and this is pole from indoor and we decided, the family, if you change will be worse from view indoor. Our condominium will be appraised down because of the view will be different.

CHAIR ANDREA JACKSON: So that's the view your window?

GALINA SHYNDRIAYEVA: Yeah, right now.

If you change, it will be worse.

CHAIR ANDREA JACKSON: May I see, please?

GALINA SHYNDRIAYEVA: (Complying.)

CHAIR ANDREA JACKSON: Is this a picture
in your living room?

GALINA SHYNDRIAYEVA: Yeah, from living
room.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I
don't know what the pole number is but that
pole --

CHAIR ANDREA JACKSON: Is that a
different pole?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
That may be an attachment of cable only and the
device would be on pole 23, which I'm not sure --
Kosta, could you take a quick look at this?

CHAIR ANDREA JACKSON: If you could
please identify yourself for the record.

KOSTA JOVANOVIC: Good morning.

Kosta, K-O-S-T-A J-O-V-A-N-O-V-I-C, with
Crown Castle.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
(Forwarding.)

CHAIR ANDREA JACKSON: The record can
reflect he's looking at a picture submitted by
the resident of a pole on Green Street, and the
question is whether or not it is the same pole in
which the equipment Crown Castle is proposing to
add additional equipment to.

KOSTA JOVANOVIC: It doesn't appear to be
the same pole because the picture we submitted
with the petition does not have a transformer on
it, and the one that the resident has shown us
does have one.

GALINA SHYNDRIAYEVA: It is different.
It is 516 Green Street. 516 Green Street.

KOSTA JOVANOVIC: Here is Green Street.
Is it more this way?

GALINA SHYNDRIAYEVA: Next building down,
Green Street.

KOSTA JOVANOVIC: Maybe on this side?

GALINA SHYNDRIAYEVA: I don't know.

KOSTA JOVANOVIC: Here?

CHAIR ANDREA JACKSON: So if the record
can reflect, they are looking at a map to
determine where the resident lives.

It is just that when we go back to look
at the minutes I need to make sure I'm capturing
what the side conversation is.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It
looks to me like the pole in question where the
device would be installed is the second parcel in
from Hancock heading east. Which property are
you showing in that picture?

KOSTA JOVANOVIC: Is it this property or
further this way?

GALINA SHYNDRIAYEVA: I don't know

exactly. 516 Green Street.

CHAIR ANDREA JACKSON: Are you near
Hancock?

GALINA SHYNDRIAYEVA: Yes, next building
from Hancock.

CHAIR ANDREA JACKSON: So between Hancock
and Bay Hill?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Towards Harvard Square?

GALINA SHYNDRIAYEVA: Like this
(indicating) down.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yep.

GALINA SHYNDRIAYEVA: To Green Street.
This corner, ours next, a round building.

CHAIR ANDREA JACKSON: The round
building?

GALINA SHYNDRIAYEVA: A round building.

CHAIR ANDREA JACKSON: All right then.

KOSTA JOVANOVIC: The photographs don't match. We wouldn't be able to install a transformer pole.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yes. The pole you are showing has transformers on it and other gear.

It does not match the picture which Kosta showed, which only -- it shows a different pole with no equipment on it currently.

The type of equipment that would be installed, Kosta, if you could show her the diagram of what you are proposing?

KOSTA JOVANOVIC: Uh-huh.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Which is the type of antenna that would be going on that pole, and in fact, there's not -- and it is not the pole that you are showing there.

KOSTA JOVANOVIC: This box and on top we've got an antenna.

GALINA SHYNDRIAYEVA: Here?

KOSTA JOVANOVIC: No.

GALINA SHYNDRIAYEVA: Different?

KOSTA JOVANOVIC: Different.

GALINA SHYNDRIAYEVA: Nothing to do with
this pole?

KOSTA JOVANOVIC: No.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
What was your address again?

GALINA SHYNDRIAYEVA: 516 Green Street.
516.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I
would like to make a motion that we continue this
portion of the petition pending a further
clarification that it is not in front of 516 of
that the picture that the resident brought in.

CHAIR ANDREA JACKSON: Okay. Motion's
been made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: So we are not going to take any action on it today. We want to go back and confirm the pole is a different pole. So you are all set for this morning.

GALINA SHYNDRIAYEVA: Okay. Thank you very much.

CHAIR ANDREA JACKSON: Thank you very much. Thank you for coming in.

GALINA SHYNDRIAYEVA: Thank you.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

CHAIR ANDREA JACKSON: Sir?

Good morning.

JAMES KOGER: Hi.

CHAIR ANDREA JACKSON: Again, state your name for the record, please.

JAMES KOGER: James Koger, 444 Franklin Street.

CHAIR ANDREA JACKSON: If I can take a look at your letter. I want to see what notice it is. 004, this is the one you are concerned about?

JAMES KOGER: Yeah.

CHAIR ANDREA JACKSON: So Node 016.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So within the same petition on Franklin Street an extension of an aerial fiber from pole 5 on Franklin Street easterly to pole 243/48 an attachment of new equipment on pole 823 known as Node N016.

CHAIR ANDREA JACKSON: Jill, so you know, we are we are on the bottom of Page 12, last item on Page 12.

Sir, if you want to tell us your concerns, please.

JAMES KOGER: My question here --

CHAIR ANDREA JACKSON: If I can get you to speak up. It is hard to hear.

JAMES KOGER: How loud do you want me to speak?

CHAIR ANDREA JACKSON: I don't need you to yell at me.

JAMES KOGER: My concern here is that this is a new system here in this sentence right here "existing phone or cable service should not be impacted" and I question that.

What we have on Franklin Street is poles that carry eight kilovolt high-tension, 240-volt distribution, telephone, TV, and at least one other fiber optics system I know.

There's a whole wrath of wires. It's kind've disordered because over the years this system has been added and that system had been added. Trucks come down the street and rip out

the wires. I would say, on average, there's a visit by a bucket truck once a week at least.

I am -- my house is located right next to pole No. 238/54, and if I understand this, the wire would run past my house again and would require another visit from the bucket truck.

Now, my main concern here is what's been happening with the tree and the lack of maintenance by the various companies that have put wires up.

In July of this year, we had a short circuit, the eight kilovolt line short circuited through a tree to the ground, and I want to tell you if you have never been next to a short circuit like that, it will change your opinion of electricity. You don't want to -- you don't want it to be near you. That I can tell you. It was really scary. That happened twice in one day.

And this tree has had to be trimmed at least three times in the last four years for various reasons. And the tree trimming has been haphazard and poorly done, so in a couple years later it has to be done again, and I believe that the trimming hasn't been done per specification for safety reasons because of the high voltage lines.

So if we have other new company, Crown Castle, putting another line in there, it is just gonna complicate the system. I have no problem with an existing fiber optic line being put in if the wires are being properly maintained.

It is a dangerous situation we have.

Besides the short circuit last July, the tree has damaged my house, and I can't seem to get the City to properly maintain it, if it is the City. I don't know who is responsible for maintaining the tree. I don't know if it's the

pole owner because every time something like this happens, we get, Oh, call so-and-so, call so-and-so and you get a run around and nothing happens.

So I have safety concerns here and I have concerns that this new equipment is gonna effect existing equipment and will cause more visits, more congestion on the street. Those are minor concerns, but the safety issue and tree trimming are probably the major concerns.

So that's my concerns with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The tree is in the public way on the sidewalk, it is not overhanging from a private property? It is in the street?

JAMES KOGER: Yes. It should never have been planted there. It was planted directly underneath the high-voltage wires. It grows right into it and then pretty soon short

circuits.

CHAIR ANDREA JACKSON: What number Franklin Street is that where the tree is at?

JAMES KOGER: The tree is in front of 444 Franklin Street. It is right next to pole 238/54.

The short circuit happened about four feet away from where the pole supports the high-tension lines.

CHAIR ANDREA JACKSON: Okay.

JAMES KOGER: It knocked out power for about most of Putnam, Franklin and Green Street for about five hours in July.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: When tree trimming is done, because of the pole lines, it is typically done by the utility, and it is done under the supervision of the City arborist. Otherwise, if the trees are being pruned, not around wires, or for any other

reasons, typically it is supervised by the City arborist.

JAMES KOGER: The problem is, it keeps growing back and the wires -- the tree limbs grow through all the wires and pull the telephone wires out of the buildings.

The wire are rubbing against it is constantly. It needs to go in my opinion but...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The tree itself?

JAMES KOGER: The tree needs to go.

I don't know why you would plant trees underneath a power line anyway. They should be on the other side of the street where there's no lines. I don't know. And besides, it's the north side of the street, not the south side of the street. It's stupid.

CHAIR ANDREA JACKSON: Thank you for coming in.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

While we have this petition --

CHAIR ANDREA JACKSON: Kosta, if you would you come forward.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: As a new petition, we will need to make further review of this petition if you are going forward just the same, so I would move we continue this portion of the petition also.

CHAIR ANDREA JACKSON: Motion's been made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: We are going to move onto -- keep Crown Castle together and do them all at once.

So we're going to move onto NSTAR with their new petitions and I'll get you that page.

CHAIR ANDREA JACKSON: NSTAR, or now Eversource. Rindge Ave, southwesterly from manhole 2014 approximately 250 feet east of Middlesex Street, a distance of about five feet of conduit.

The reason for this work is to provide service to 33 Cottage Park Avenue.

I don't believe these meet.

JACQUI DUFFY: It should be for 134.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So it was also sent out incorrectly?

JACQUI DUFFY: We'll pull that one back.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yep.

So motion to table or to continue?

CHAIR ANDREA JACKSON: Continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Motion to continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Second Eversource for Mass. Ave at and
southeasterly from manhole 547 at Washburn Avenue
a distance of about nine feet of conduit.

Installing one new manhole to be known as 29998.

This work is necessary to provide a
system upgrade and improvements.

JACQUI DUFFY: This is the one you asked

us to move onto Mass. Ave now.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Where the bus shelter was?

JACQUI DUFFY: We were on Washburn and you wanted us to go down further. It is on page -- continuation one is on Page 3.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Originally you were proposing to put on Washburn Avenue and we asked you to move it onto Mass. Ave?

JACQUI DUFFY: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

A few months ago?

JACQUI DUFFY: Last month. It is continued and it is on there again. I don't know what happened. If you look, it is on Page 3 or something and then again it is down here.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

There wasn't enough room on the sidewalk?

SUSAN BARROSO: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: We originally asked to put it on the sidewalk or in the sidewalk?

SUSAN BARROSO: And we put it on the sidewalk.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It shows it in the street, I believe.

JACQUI DUFFY: I must not have had room because John Sutton (phonetic) went out there. Must not have had room.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I think there was a site meeting on this one to deal with the issue of the sidewalk.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: There was an issue with the sidewalk?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yes. I think this will be fine where they placed it. If you are gonna have any issues, you will

have it with your own conduit that's in the curb line in the street, so worse-case scenario, or best case, they will be dealing with their own obstructions.

Move forward with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't have any issues either.

So make a motion to approve pending all typical permits, DEP site visit and SPOF.

CHAIR ANDREA JACKSON: Motion's been made and seconded.

All those in favor signify by saying aye.

CHAIR ANDREA JACKSON: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: Just to be clear, the petition that's on the top of Page 7 that says "continued, first time," is the same petition that's listed on the bottom of Page 9 as

a new petition?

JACQUI DUFFY: Yes.

CHAIR ANDREA JACKSON: They are one and the same?

JACQUI DUFFY: Yes.

CHAIR ANDREA JACKSON: The motion was made on the continued petition?

I want to make sure the record correctly reflects it or does the work reflect what is in the new petition?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The work reflects what is in the new petition.

So I would say we approve the new one.

CHAIR ANDREA JACKSON: Approve the new one?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Correct.

CHAIR ANDREA JACKSON: So in terms of the petition that was continued, that just needs to

be tabled.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Or
denied?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Denied.

CHAIR ANDREA JACKSON: So let's do that
one so at least that way it is clear.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On
Page 7 for Massachusetts Avenue, northerly from
manhole 547 at Washburn Avenue, a distance of
about 29 feet of conduit installing one new
4x6x6x6 manhole to be known at 29998. This work
is also necessary to provide system upgrades and
improvements.

Just to make note, this was for a manhole
to be installed on Washburn Avenue and I make a
motion to deny.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: Moving on to Eversource for Richdale Avenue, northeasterly from pole 585, No. 5, approximately 204 feet west of Upland Road, a distance of about eight feet of conduit.

The reason for this work is to provide service to 17 Richdale Avenue.

JACQUI DUFFY: It should be 15 Richdale.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I have 17 also. I think a site plan --I have a site plan that encompasses both addresses.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I didn't get a site plan.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Well, I got this from another -- the developer,

so...

CHAIR ANDREA JACKSON: So the work is actually at 15?

JACQUI DUFFY: Yes.

SUSAN BARROSO: 15-17.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is it 15-17?

SUSAN BARROSO: We have 15 in our records but...

SUPERINTENDENT OF STREETS WILLIAM DWYER: Good question.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I might have --

SUPERINTENDENT OF STREETS WILLIAM DWYER: The site plan I have is 15 to 33, that's how large it is.

SUSAN BARROSO: Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

That's what we have from another plan that was submitted through them for a demolition permit.

CHAIR ANDREA JACKSON: Everything we received in said 17.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

If you need to do something different, let's do something different.

I just brought this for reference, so I knew what was going on.

ELLEN WATSON: Is goes from 15 to 45.

The next one after 15 is 45 assessed addresses.

It is a warehouse.

CHAIR ANDREA JACKSON: Thank you.

So it is up to you if we have to continue it because of the address.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Are you good with that?

Are you good with your site visit thus

far?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes. DPW is fine with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: We

move to approve with all typical conditions.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Approved for 15.

Eversource, Cottage Park Avenue,

southerly from pole 178/6 approximately 231 feet

south of Massachusetts Avenue a distance of about

three feet of conduit.

The reason for this work is to provide

service to 35 Cottage Park Avenue.

JACQUI DUFFY: It is five duplex homes going in.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
One second.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It says primary service to a transformer on site?

SUSAN BARROSO: Two transformers.

JACQUI DUFFY: Two.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Okay. All on their property?

JACQUI DUFFY: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
The question I had with this one is on the Rindge Ave -- not to jump ahead, but your Rindge Ave submission, it makes a comment the reason for the work on Rindge Ave is to service 33 Cottage Park.

JACQUI DUFFY: Yes, I think she copied it by mistake, so...

SUPERINTENDENT OF STREETS WILLIAM DWYER:

It would be an awful long service.

JACQUI DUFFY: So Rindge we're gonna do over.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Okay, but that leads me to think that this 33 Cottage Park Avenue needs some assistance from some other place.

JACQUI DUFFY: No, she must have just copied it for Rindge.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

So ...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So the Rindge Ave petition is?

JACQUI DUFFY: Redo.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

But this Cottage Park Avenue is?

JACQUI DUFFY: Good.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Self-reliant on its own?

SUSAN BARROSO: Yeah.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Is it coming from the pole?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

There's a pole. It is going -- that's private pole and that's Cottage Park Avenue, which is a dead end.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

We can move forward with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I

make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded. You have to make your conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All

typical conditions, site visit with DPW.

CHAIR ANDREA JACKSON: Motion's been

made. Seconded.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: That's it for you.

JACQUI DUFFY: Thank you.

CHAIR ANDREA JACKSON: Sir, you are done
but you are more than welcome to stay.

JAMES KOGER: I was interested in what is
going on.

CHAIR ANDREA JACKSON: Sure. Stay. No
one ever wants to stay to listen what we do, but
that's fine.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Harvard University. Good morning.

RICHARD GALLAGHER: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This is a continued petition from last month for
Harvard University. The university's petition to

build a new conduit system from 1414 Mt. Auburn Street to 8 Story Street on Mt. Auburn Street to the Taubman Building on Bennett Street. I believe this was continued for submission of a common trench application.

RICHARD GALLAGHER: Yes. We have been in contact with the License Commission and got a list of potential providers who sent letters to all of those providers, and any results that we received back from them we have shared it was with Dana at the Commission as they arrived back from the providers, and we have had no interest from any other providers in seeking to participate in this, but one thing I did find out that I think is very helpful, we found out yesterday that -- and it kind works well with our timeline -- is that the project plans on doing a significant amount of repaving associated with this building.

The conduit, and I some plans here, go from -- or the proposed conduits go from the Harvard Kennedy School, which is between the Charles Hotel, and coming up, and we have a permit from the DCR for that portion because that's DCR property coming up from the Taubman Building. So that permit is in hand.

The project is proposing to repave Bennett Street from the intersection at Eliot to the intersection at University. They are going to repave the MBTA bus way and they are also repaving from the MBTA tunnel entrance down Mt. Auburn Street to University Ave as well.

So the only portion of this project that we're looking to do that is not part of the repaving is the work on Story Street and a little section of Mount Auburn in front of 124.

I met with those folks yesterday and we're working to coordinate work that they have

going on, on site and probably had their contractor do the conduit placement while they were doing all the drainage work and work on the MBTA property at the same time.

So I think that makes this project a lot simpler in that once that we are all done, then the repaving gets done and it is a nice new surface.

From my understanding, they are looking to do that work in June. So we are hoping to get an approval and get this started as soon as possible, if that works with what you folks have on your agenda.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
So you've worked out the installation with the contractor on site now, is that what you said?

RICHARD GALLAGHER: We met with Tishman.

Tishman is the general contractor that is working for Carpenter & Company, which are the

owners, and we met with them and went over -- the bus way is a pretty congested area. There's a lot of high voltage and there's an MBTA substation there. There are limited paths. They are going to be doing new sidewalks and drainage very soon. They are actually starting the curb work on Monday.

So we're trying to coordinate with them to have our conduit placed while they are doing this work so there's one trench, there's one activity, and then it is closed out.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So the application has been completed for being a lead for the common trench and no other participants?

RICHARD GALLAGHER: No one expressed any interest.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do we have all that on file?

RICHARD GALLAGHER: I sent that to --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All the major carriers from the list?

RICHARD GALLAGHER: Yes. I have copies of that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All of that is on file.

RICHARD GALLAGHER: I have copies of the letters sent if you want.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Especially where the street is now gonna be repaved, we don't want anyone else coming, especially on of those carriers, coming back to dig because they will be denied.

RICHARD GALLAGHER: We reached out to all of them, and as we were getting the information back from them, I shared it with the gentleman I think it is --

ELLEN WATSON: Dana?

RICHARD GALLAGHER: Yeah. He gave me the list of carriers and we sent all of their responses back so...

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
With that condition being met, I would move to approve pending all DPW, SPOF or site visit, if needed. If it still needed, a site visit?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
We would have a site visit take place with this.

RICHARD GALLAGHER: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
We will definitely have a site visit. It'll come under the umbrella of the inspection for that project itself.

RICHARD GALLAGHER: Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
With one of our engineers.

CHAIR ANDREA JACKSON: So a motion's been made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Thank you.

RICHARD GALLAGHER: Thank you very much.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Lighttower. Chestnut Street and Magazine Street starting at utility pole 34, place 190 feet of one, four inch conduit, communication conduit to utility pole 146/33.

I believe this petition was -- has been continued pending a full route and licensing.

BILL CONWAY: The license is still pending. With the weather it has been delayed, so if we can continue that to next month.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Okay. On the request of the petitioner to
continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second that.

BILL CONWAY: That would also apply to
the other one on the Pleasant Street Extension
because it is part of the same license.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Okay.

CHAIR ANDREA JACKSON: We need to make
two separate motions. So do the first one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The
first one, the motion was made to continue for
Chestnut Street and Magazine Street.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Lighttower. Also for 640 Memorial Drive starting at utility policy 102/85 place approximately 117 feet of four inch schedule 40 PVC communication conduit to the rear of the building at 640 Memorial Drive at the request of the petitioner. Move to continue this petition also.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Anything else for Lighttower?

HERB BERTONI: We have 35.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Gotcha.

For 790 Memorial Drive starting at utility pole NT/NT place 10 feet of one, four inch communication conduit to telecommunication manhole located at 790 Memorial Drive/Pleasant Street Extension.

BILL CONWAY: I would like to continue because we are waiting on the license as well.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: At the request of the petitioner, once again move to continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Lighttower in regards to 1035 Cambridge Street starting at a Level 3 manhole 0202 place approximately 251 feet of one, four communication conduit to proposed hand hole to be placed on private property at 1035 Cambridge Street.

BILL CONWAY: This is one you asked us to break in the middle of the formation, the Level 3 formation rather than going all the way down Cambridge to the manhole.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Right.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yes.

HERB BERTONI: We did revise the plan and have a letter from Level 3 approving that.

So that's all been approved, and here is a letter.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Do you have a sketch on that?

HERB BERTONI: (Forwarding.)

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Thank you.

HERB BERTONI: I have another one if
Steve wants to take a look. You can keep those.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I
have enough paper. Someone has to carry it out
of here.

You are going to cut a Y into that? A
proposed Y into it?

HERB BERTONI: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
200 feet to --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You
are going to Y the inch-and-a-quarter all the way
back to your hand hole? Because I know there was
talk earlier about changing it to four inch.

HERB BERTONI: It will be a four inch,
inside of that will be the two

inch-and-a-quarters.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Move forward.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Make a motion to approve with all the typical conditions.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: Motion's been made and second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

HERB BERTONI: Thank you.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Thank you.

Phoenix Communication. A continued petition at Third Street install one, four inch PVC conduit for 75 feet on Third Street from a Level 3 manhole, 0515-1200 to Verizon manhole 26/534. I think it was continued for clarification and also to investigate if there was a closer route or get of that intersection.

JAKE MCADOO: I found some Verizon holes they are quite a bit further. One was 271 feet from the nearest Level 3 manhole. The other one is 212 feet and they would require crossing Main Street.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Your line -- your proposal is the yellow line?

JAKE MCADOO: The yellow line.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
That's coming northerly out of Level 3 line?

JAKE MCADOO: Correct.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

And the four, five red dots, are they hand holes?

JAKE MCADOO: That's when you draw the line, it just puts the red dots in.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The original proposal was at Third Street, correct?

JAKE MCADOO: That's correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And this was an option?

JAKE MCADOO: These are just the -- these are going back towards the Longfellow.

These options may not be reasonable because there is two existing splices in the Level 3 hole and in the Verizon hole. They are gonna tie those together to roll all the traffic off in the MBTA tunnel.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I'm missing something. I'm not quite getting it.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The original was to cross over here.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Do you have a plan in front of you? I looked at this and it doesn't jive.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The original petition shows they are going from a Level 3 manhole over to a Verizon manhole. I would believe that's the cross over?

JAKE MCADOO: Yes, that will take out the traffic off the MBTA cable that's being removed.

SUPERINTENDENT OF STREETS WILLIAM DWYER: This was the original?

JAKE MCADOO: That's the original. And this was just showing there were holes that are further away and that's why there's only this option.

SUPERINTENDENT OF STREETS WILLIAM DWYER: So what is does this show?

JAKE MCADOO: You requested that I show that there wasn't any closer options to connect the two systems.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Well, the goal was to try to have you tie into Level 3 duct on Third Street, and there's gonna be duct. I imagine there's gotta be duct in there that's available.

JAKE MCADOO: On Third Street?

SUPERINTENDENT OF STREETS WILLIAM DWYER: The Level 3 system.

JAKE MCADOO: To tie into on Third Street?

SUPERINTENDENT OF STREETS WILLIAM DWYER: That's what I was hoping you would find.

JAKE MCADOO: We are tying -- we still have to cross the intersection.

SUPERINTENDENT OF STREETS WILLIAM DWYER: It seems there's more than this last time.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe we had --

SUPERINTENDENT OF STREETS WILLIAM DWYER: I don't have that drawing.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is the petition from last month. It was a smaller version of course. This was in the packet.

So, to be clear, you are coming -- currently you are in the Level 3?

JAKE MCADOO: Correct. And the Verizon system.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You are in both?

JAKE MCADOO: We are tying the two together so we can roll the traffic out.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The reason being that you want to get out of the Level 3 while the bridge is being reconstructed.

JAKE MCADOO: They actually have a cable in the Level 3 system they have already placed where they relocated it, but they have a cable in the MBTA tunnel and we need --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you are going to remain in Level 3?

JAKE MCADOO: Correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Alleviating the traffic and the Verizon duct going across the bridge?

JAKE MCADOO: Nope. We're gonna put all the traffic on that, that is currently in the MBTA tunnel and that will continue down Broadway.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I recall that the idea was not to have you do any excavation on Third Street because there's so much traffic in there already as far as traffic -- not vehicle traffic, but communication traffic and lines and utility traffic, and a Level 3 is

very high in that intersection, so it would be unlikely you would be able to install that.

So now you come with this?

JAKE MCADOO: These were just to prove that this was the shortest option. And this is not reasonable because there's no splices there and there's no second pathway.

SUPERINTENDENT OF STREETS WILLIAM DWYER: So when push comes to shove, you're telling me that's the option that you have?

JAKE MCADOO: The only option. I don't know -- there was talk about bicycle traffic and I don't know if it is something you want to do at night.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: How long a duration you think you will to be out there working?

JAKE MCADOO: It should be a day or two.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

My issue is that you should try to do some test pits. You probably are not going to get that conduit in the ground.

JAKE MCADOO: Because it is so busy?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes. I'm not sure if there's something you can do further north on Third Street to alleviate some of it.

JAKE MCADOO: There isn't. That's the issue.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I don't see them being able to get through that intersection, Steve. That's my major issue.

There's nothing, as far as you can tell, there's nothing that connects, that is existing, that is empty that you can use to connect into the two structures?

JAKE MCADOO: There's not a connection there currently.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Further down Third Street towards Binney?

JAKE MCADOO: There's a connection there but they don't have a path in the Verizon and there's no splice up there, so they would have to get a second path if they did that and they'd have to pull another cable. I know they are looking to get this done by May.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

That Verizon formation in the Third Street sidewalk, have you done testing in there or any kind of roping, rod roping in that?

JAKE MCADOO: I have not. We're actually not allowed to do that. Verizon has to do that.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Is that the same duct bank that supposedly had 40 or 50 conduit in it from years ago?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the Verizon side?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

There's a large duct there.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

There's a large duct on the east side of Third Street in the walk. It's been there a long time.

JAKE MCADOO: It is a four-to-six month process to allow them to license another duct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You don't think they would be able to get through there once they start opening, is that your concern?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yeah, that's my concern.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

What happens if you start out there and can't the question across?

JAKE MCADOO: We restore it, and I don't

know what the other option would be yet. It would be -- I don't know if that would have to be further away and someone would have to sit down with Verizon and -- I don't have their network map to give you that information, but this is the solution that they came up with.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: How many cables -- is this temporary or permanent?

JAKE MCADOO: Permanent.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It will be permanent?

JAKE MCADOO: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I don't know. And you still don't show the -- you still don't show the Level 3.

JAKE MCADOO: They are the ones that are --

SUPERINTENDENT OF STREETS WILLIAM DWYER: That's not doing it justice.

JAKE MCADOO: It's a large duct.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
There's 80-something duct in there. You should
give a scale, a relative scale, that shows you
the size of that path in there or that formation
in there.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
What size cable are you doing?

JAKE MCADOO: A 432, I believe.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Is this redundancy or for primary?

Is this for redundancy or something --

JAKE MCADOO: This would be a primary.
Basically what they needed to do is lower the
traffic that was in the MBTA tunnel onto the
Verizon system to bring it down Broad Street, and
they will connect back to the Verizon CO, central
office, in Boston.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Who is the work being done for?

JAKE MCADOO: Verizon business.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

So Verizon business doesn't own the Verizon cable on Third Street?

JAKE MCADOO: That's Verizon Core. They are different. You think they would be able to just hop in there.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

You would think.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So

it is more -- it's not that it couldn't be done, it's more of a time constant?

JAKE MCADOO: Correct.

They do have the existing splices there.

That's what they are really trying to do.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I can't see it being done. Someone needs to do more homework here. There is so much conduit in

that area.

JAKE MCADOO: You are concerned about that Level 3 system? Or the Verizon system?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
The other conduit. That's been opened up several times in my duration here. I know it's just -- I can't see getting through there even with a small piece of conduit. You are going to be about 3, 4 inches from the top of the street and that's not considered safe.

JAKE MCADOO: Is it something we can have a site meeting and go over it, meet out there?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
You could. You obviously -- I'm not going to stop you doing that if you want to call that. You need to do some more homework and have the plan showing what is relative out there as far as what is in the street and start with that.

JAKE MCADOO: Add the sizes and make the

lines bigger?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Okay.

JAKE MCADOO: We can do that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The largest concern is depth, right?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes.

JAKE MCADOO: Which I'm sure gas and electric are deep.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Level 3 had to work around the utilities at the time, which included NSTAR Gas and NSTAR Electric, so they split their formation however they had to make things work.

JAKE MCADOO: To get through there.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

By them doing that, they pretty much took up five vertical feet.

JAKE MCADOO: We won't actually be crossing the Level 3 system. We'll be going directly into the manhole.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
I see that, what you are showing here anyway.

We should continue this and have a meeting with this company.

We might as well use the time of the folks at DPW as opposed to everybody's time here to make a decision like this. I mean...

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Okay.

CHAIR ANDREA JACKSON: Motion to continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Make a motion to continue to next month and more research, be it plans updated or approved test pit possibly, but something in the nature of --

JAKE MCADOO: With test pits, is it

something that needs to be approved?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: A
test pit?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Some site exploration.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You
may want to explore crossing over. I know
there's a time restraint, but Verizon being
Verizon, they may escalate something if it is
urgent enough and get the traffic off the bridge
to move that project along.

JAKE MCADOO: We can explore that option.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Both those duct banks are quite large and go the
extent of the Third Street, and there should be
-- if you get your licensing in order and
expedited, you may be able to do something
further down where you can get across the
intersection.

CHAIR ANDREA JACKSON: Motion's been made to continue.

Is there a second?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Verizon. This is for a location for approximately 241 feet of underground conduit to be located within the public way of Green Street and Blanche Street from existing Verizon manhole 35/323A located at intersection of Sidney Street.
Place approximately 221 feet of underground conduit on Green Street in a

northerly direction to intersection of Blanche Street; thence place approximately 20 feet of underground conduit on Blanche Street to private property.

You are participating in the build now?

EVERETTE BRYAN: Pardon?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You are participating in the common trench?

EVERETTE BRYAN: That's correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you are not actually installing the conduit, you are participating in the trench?

EVERETTE BRYAN: Yes, in that location and permission to break into the manhole.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So this petition is actually just to connect the two manholes at the corner of Sidney and Green the cross over from the common trench into the Verizon manhole?

EVERETTE BRYAN: Yes, there's only one manhole with Verizon. We will be connecting into that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You are coming out of the common trench, picking up your conduit, and extending it to manhole 323A and that will complete your path into the new building at 300 Mass. Ave.

EVERETTE BRYAN: That's correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And that was for one conduit or two conduits?

EVERETTE BRYAN: Place one, four inch PVC connection for the manhole at Sidney Street. One. So there's only one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: There would be a second one in there for City use. We would like to extend that one into that Verizon manhole.

EVERETTE BRYAN: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you will, in fact, be extending two, four-inch conduits from the common trench into that manhole 323, which will then extend all the way into 300 Mass Ave.

EVERETTE BRYAN: Correct.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Public Works is fine with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So I make a motion to approve pending all typical conditions and permits and coordination with the common trench lead company.

CHAIR ANDREA JACKSON: Motion's been made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

EVERETTE BRYAN: Do I understand we won't need a site visit on that?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
A what, I'm sorry?

EVERETTE BRYAN: A site visit.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
You definitely will.

EVERETTE BRYAN: Okay, who coordinates that?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Jeya Niranjan.

EVERETTE BRYAN: Does he coordinate that site meeting?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yes.

EVERETTE BRYAN: I need to be in touch with him about it?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Page 14, which is the last page, this is for Verizon also. From existing Verizon manhole 195A-2 located approximately 30 feet easterly from the intersection with East Street, place approximately 120 linear feet of conduit to the existing Verizon pole 222/5.

Is this in relation to getting that cable off the street?

EVERETTE BRYAN: It's in relation to removing the pole line that's in the way of the project, and we had revised this down.

If you recall, we did have a piece of conduit going to a pole on Glassworks Avenue, turns out we did not have any services in the building that that was proposed to serve, and we took our equipment out and so that was eliminated from this petition. So this is the only thing we petition for on the project.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is all that cable coming down?

EVERETTE BRYAN: All the cable will come down and the pole will come down, yes. They are meeting this morning and they are waiting for your decision.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I move we approve all typical conditions as before, site visit, and permits.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Thank you.

(Short Recess Taken.)

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Crown Castle good morning.

KOSTA JOVANOVIC: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Okay. Start right on the first page. One of the continued petitions A006 is the packet. And I brief there were two remaining N057 and N020.

KOSTA JOVANOVIC: Correct. And the thing that turned out to be on that is -- in one sentence they included two poles where most of the poles we're extending fiber optics to them. And on these two the fiber optics is on the pole and they are going to splice into what's there and then install the equipment on those poles.

We're asking for a grant of location to install equipment on pole 230/7.5 on Elm Street and also at pole 23 on Berkshire Street. Two

separate locations.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So for Node N057, that is just to add equipment on pole 7.5, is that correct? 230/7.5, that's the pole in the corner?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I move to approve this one.

CHAIR ANDREA JACKSON: Just on that one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the N057, which is the corner of Elm Street on pole 230/7.5.

CHAIR ANDREA JACKSON: Motions's been made. Second.

All those in favor signify by saying aye.

CHAIR ANDREA JACKSON: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Within that same packet for Node N020, that same condition, existing fiber, you are putting equipment on that pole?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I do have a concern with the comp space and installing that antenna where it is going to be the resident side right in front of that three family.

KOSTA JOVANOVIC: Uh-huh.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is there any -- it will be directly in front of those windows.

CHAIR ANDREA JACKSON: We're looking at --

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
N020.

You have a primary up there.

KOSTA JOVANOVIC: Yeah.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is there another location in the area you can get a pole top or something not directly in front of the window?

KOSTA JOVANOVIC: We'll take a look.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I think we need to. It will come back once someone -- it's unlike a transformer, it is still swinging out and closer.

Do you have a distance requirement from a building when you install a side mount?

KOSTA JOVANOVIC: No, not that I know of.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yeah, I would move to continue this one to either find another location or at least to discuss what the options are because I don't think that -- I think there will be an issue with this in the long run.

KOSTA JOVANOVIC: We will try and find an

alternate.

CHAIR ANDREA JACKSON: This for the one
is on Berkshire N020.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
That's correct. That would be the remaining
petition in that packet that's continued.

CHAIR ANDREA JACKSON: And, again, on the
first agenda item?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yes.

CHAIR ANDREA JACKSON: Do you want to
make a motion?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I
make a motion to continue.

CHAIR ANDREA JACKSON: That's for
Berkshire Street N020?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
That's correct.

CHAIR ANDREA JACKSON: Motion's been

made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On
the second packet. AF001.

CHAIR ANDREA JACKSON: I'm sorry?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
AF001. The first one is for Hammond Street, an
extension of aerial fiber beginning at the
intersection of Hammond and Gorham Street
westerly to pole 322/10 and then continuing and
new conduit to Oxford Street.

Then southerly along Oxford Street and
new conduit to a metal guy pole at the southwest
corner of the intersection of Oxford and Everett
Streets.

Also installation of equipment on a new metal guide pole replacement Node N069.

That's the one that is the -- the length of Oxford Street.

CHAIR ANDREA JACKSON: N069?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Yes, N069.

You can take a look at that.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I thought I had all of them.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe one of the recommendations is we only needed a shadow or a city conduit between the hand hole and the pole, not the guy pole, as, I think, that was noted earlier.

KOSTA JOVANOVIC: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

This wasn't from last -- a continuation of last month, was it?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It was.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Okay.

CHAIR ANDREA JACKSON: On the cover page it will say AF001. It is towards the back.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is the second continuation, and the original continuation was to approach the utilities, and the second continuation was a concern about the excavation.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I think that section of the street is newly paved and there was a concern right there. The first one would be noted that no other utility -- no existing utilities there you can use that are conduits that are available?

KOSTA JOVANOVIC: That's correct.

When we do the conduit investigation, it

would show up on a plan when we do the drawings.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

What line are you tying into on Hammond Street?

KOSTA JOVANOVIC: It's coming down off
the pole.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Okay, you are going to be subject to SPOF
regulation as far as repaving that street or a
SPOF fee associated with that. And there are
only two lines?

KOSTA JOVANOVIC: Two, four inch.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I
make a motion to approve pending all SPOF
regulations, DPW permits, site visits.

CHAIR ANDREA JACKSON: Again, this is
just for Node N069?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
That's correct.

CHAIR ANDREA JACKSON: Motion's been

made.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Within the same packet AF001, for Node location
N067, Magnolia Avenue, an extension of aerial
fiber from pole 211/5 on Line Street westerly
crossing Roberts Road to pole 19-3 on Baldwin
Street and attachment of equipment on pole 19-3
to be known as Node N067. Is that the Somerville
extension?

KOSTA JOVANOVIC: Baldwin Street is in

Somerville coming off Smith Ave.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do you have a clarification on that, Kosta, as far as Baldwin Street?

KOSTA JOVANOVIC: Top of Page 2.

Originally we were gonna go aerial along Magnolia Avenue and then we decided to go underground to avoid a situation at No. 41 that the resident had a crowded pole there.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Correct.

KOSTA JOVANOVIC: So we're coming from Smith Ave in Somerville crossing over Line Street and coming over to pole 9 on Magnolia Avenue and then going aerially from pole 9.

CHAIR ANDREA JACKSON: That's not what it says though.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It doesn't actually -- it is on Magnolia Avenue,

towards Roberts Road and you are crossing Roberts Road to Baldwin Street, which is not seen on it, and attached to the equipment on pole 3.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I can't seem to find it.

KOSTA JOVANOVIC: I can refer to it here.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This is the second time this was continued also and I believe we had a resident in that was concerned, but the larger concern for me is within the record of naming Baldwin Street and not naming where that second Node is going. I think the original was to dig to here, and we had an issue with -- I am upside-down here. This resident was in. So Crown Castle, rather than digging to 111, they proposed to dig to 9 eliminating the overhead that they would be installing here.

CHAIR ANDREA JACKSON: Dig to go

underground?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

From Somerville over to 9.

Did Somerville approve their section?

KOSTA JOVANOVIC: I got it last Thursday.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

That's been approved.

CHAIR ANDREA JACKSON: Where is Baldwin
Street?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Calls for a Node on Baldwin Street.

ELLEN WATSON: There's no Baldwin Street,
Cambridge or Somerville that I can find on the
map.

KOSTA JOVANOVIC: Where are you reading
Baldwin?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On
your petition.

KOSTA JOVANOVIC: Top of Page 2, items 1

and 2.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Right in the top of your packet marked AF001,
it's actually the acceptance which would be
signed, the form, on the -- it goes Francis
Street, Hammond Street, Hammond Street, Magnolia
Avenue, and I'll read it again, it's Magnolia
Avenue extension of aerial fiber from pole 211/5
on Line Street westerly, crossing Roberts Road to
pole 19-3 on Baldwin Street and attachment of
equipment on pole 19-3.

Where are you showing node NO67 within
your records?

KOSTA JOVANOVIC: 67 is in Emmons Place.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

So --

KOSTA JOVANOVIC: I think what happened
was, when we changed the language in the
petition, we didn't make the corresponding change

in the acceptance.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I'm wondering, were the abutters notices sent out to residents on Emmons Street, or was it sent to Baldwin Street?

KOSTA JOVANOVIC: The notices --

CHAIR ANDREA JACKSON: I don't have the copy of the letters that were sent.

KOSTA JOVANOVIC: I have abutters on Magnolia Avenue, Roberts Road, Magnolia Avenue Trowbridge, and also Emmons Place. So the route is the same but it is just a combination of aerial and underground.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: My concern is the record is naming Baldwin Street more than the route is.

I wanted to be sure that the abutters were notified on Emmons Street which it seems they have.

KOSTA JOVANOVIC: Emmons Place shows up on my list.

Can we move to modify the acceptance to match the petition language and I think that will straighten that out?

CHAIR ANDREA JACKSON: This is going underground. I remember correctly that particular Node was in front of a window, is that correct?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Not on that.

CHAIR ANDREA JACKSON: Not on 67?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't believe so. I believe 67 is on Emmons, which I believe is -- that's a pole top.

KOSTA JOVANOVIC: Yes, Emmons is pole top. It will be going on the top of the pole.

CHAIR ANDREA JACKSON: I get it is going on the top. My concern, I guess, is that pole is

already a mess, it is rather unsightly, and then to add something else to it, I'm just -- I'm putting my head in that's my home, is that what I would like to see everyday.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is that pole on the list to be replaced and cleaned up?

KOSTA JOVANOVIC: It would be on the list to be cleaned up but not replaced. I can give you a little report on where we are with that.

SUPERINTENDENT OF STREETS WILLIAM DWYER: What is the status? What is your report?

KOSTA JOVANOVIC: As of last Friday, 231 poles have been surveyed, 117 were found with no make ready and 114 do have some make ready.

18 poles out of the 231 will need to be replaced. 14 of them due to safety concerns, and 4 to make room for our equipment.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

You don't have a particular location?

KOSTA JOVANOVIC: This location --

SUPERINTENDENT OF STREETS WILLIAM DWYER:

That's overall, right?

KOSTA JOVANOVIC: I know that the Node pole is not going to be replaced.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

What other options do you have?

KOSTA JOVANOVIC: It's a pole that's just in a little cul-de-sac. It would be hard to find something to replace it.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

What is -- the extent of the equipment put on that pole, typical like everything else?

KOSTA JOVANOVIC: Pole top and a equipment box that is 13 inches that matches the whole profile.

CHAIR ANDREA JACKSON: That's the typical installation.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Then the antenna and Node on top.

KOSTA JOVANOVIĆ: Pole top antenna. It is eight-inches wide.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

When you set up your equipment, how much cleaning up is done?

KOSTA JOVANOVIĆ: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do your installers do any of the clean up or do you just mount your equipment and move stuff around? This pole here doesn't have any make ready work --

KOSTA JOVANOVIĆ: No.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
-- on it.

KOSTA JOVANOVIĆ: I don't know if it does or not. It looks to me like it does from the photograph. I know that it doesn't need to be

replaced.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So there may be some work on there, some make ready work on there, that would clean it up?

KOSTA JOVANOVIC: That would be my opinion, yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: We could approve it pending make ready work.

KOSTA JOVANOVIC: We would have to have the make ready work complete before we could start the installation so that's already taken care of.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you would -- more than likely it would be an improvement from what is there now, once they do the clean up and make ready work, and then hang your equipment and it should be a cleaner installation.

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I would move to approve pending all make ready work to be done prior to the installation to improve the condition of the wires on the pole.

CHAIR ANDREA JACKSON: Motion's been made. Second.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second, yup.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Within the same packet for Node N068, Roberts Road extension of aerial fiber from pole 13 on Roberts Road, southerly to pole 762/1 on Roberts Road and attachment of equipment on pole 762/1 to

be known at Node N068. This one here is actually at the corner of Adam Terrace and that's a pole top. That one looks pretty clean.

I make a motion to approve pending same conditions prior any make ready work but it does look pretty clean.

CHAIR ANDREA JACKSON: NO 68.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Yes.

CHAIR ANDREA JACKSON: Motion's been made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This one here is on Page 3, AFF02, this is for Node N061, extension of fiber optic cable in new

conduit from Level 3 manhole 0510-0203 on Cambridge Street the Pole 510/59 1/2 on Norfolk Street, 335 feet, then aerial along Norfolk street with attachment of equipment to pole 510/59.

I did have a call from a resident that had some concern of the pole which is directly in front of her house.

Can we move that down two poles to pole 55, which a cleaner pole, it is the last pole at the end of that dead end?

KOSTA JOVANOVIC: I'll ask them to look at it.

They are all spaced, so that they -- they all depend on each other and when you move one thing, you may create a weak spot or you may have some duplication depending on what direction you are going again.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Within 100 feet?

KOSTA JOVANOVIC: I'll ask them to look at it.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Okay, I move to continue to explore moving it down two poles to pole 55, that's with regard to Node N061, AAF02.

CHAIR ANDREA JACKSON: Motion's been made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

KOSTA JOVANOVIC: That was move to 57?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: 55.

AF002, this is Node N063, extension of fiber optic cable from new conduit from Level 3 manhole 0515-0202 on Cambridge Street to pole

166-75A on Columbia Street, 277 feet, then aerial along Columbia Street with attachment of equipment to pole 166/79 Node N063. This is all excavation of Cambridge Street. The previous one also. I should have brought it up.

KOSTA JOVANOVIC: We need to come out of that the duct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The Level 3 duct?

KOSTA JOVANOVIC: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: You come right of the duct formation on Cambridge Street?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You have existing duct in that duct bank?

KOSTA JOVANOVIC: We're leasing fiber from another company.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Would you be able to Y out of that duct bank that another utility proposed today?

Do you have a sketch of that, Kosta, what you want to do?

KOSTA JOVANOVIC: I have for 65.

CHAIR ANDREA JACKSON: 63.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

N063.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

You are proposing to do some excavation, right?

You are running from Cambridge Street to

Columbia, right? All I see here is Cambridge to Tremont.

KOSTA JOVANOVIC: That's for 64.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This is the previous petition?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Right.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is

there any excavation on 63?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I'm not showing in the packet. I'm not showing --

SUPERINTENDENT OF STREETS WILLIAM DWYER:
It says aerial to Columbia Street with attachment to pole.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't believe there's excavation.

For Node N063, is there any excavation?

KOSTA JOVANOVIC: I'm showing there is on this overlay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't have a sketch or show it in the --

KOSTA JOVANOVIC: I don't see it here in the packages, again. Can we continue that one?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yeah.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: In packet AF002 for Node N063. I move to continue.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This is N064. Extension of fiber optic cable and new conduit from Level 3 manhole 0515-0204 on Cambridge Street to pole 672/31 on Tremont Street, 244 feet, then aerial to the Cambridge City Lane.

This brings up the same question about Y-ing into a duct bank rather than digging down the street. I don't believe we have an excavation on this one.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I do.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You
do, okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I think Andrea had one too.

Kosta, do you have a copy of this in
front of you?

KOSTA JOVANOVIC: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

A pole on Tremont Street right into Cambridge
Street, they could probably Y into the duct
formation that Level 3 has on Cambridge as
opposed to making a -- I don't know what they
have, 110-degree bend here, a sweep, and then
running down into the Level 3 chamber. I'm not
seeing the need to do that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do
you have a copy of that in the packet, the street

picture of that pole? I don't seem to have it in mine.

KOSTA JOVANOVIĆ: 63.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: 63 or 64? 64.

I seem to have the others but not 64.

KOSTA JOVANOVIĆ: You know why? Because it is in Somerville.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you are coming out of the duct bank in Cambridge going down Norfolk and then going overhead into Somerville.

SUPERINTENDENT OF STREETS WILLIAM DWYER: On Tremont.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On Tremont Street?

KOSTA JOVANOVIĆ: Yep.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That's why we don't have it.

CHAIR ANDREA JACKSON: That makes sense.

KOSTA JOVANOVIC: I'm not savvy with underground construction. When you Y into another person's bank, you just break into it?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Typically.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Or core into it. You core into it and there's a fitting that you purchase and make the connection in that manner.

KOSTA JOVANOVIC: And that would eliminate going down to the manhole?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yes. I think on a previous utility company what they were proposing to do is to run a four inch to the duct bank with a inch and quarter and they would intercept two of those inch and quarter in the duct bank, cut them off, sweep one towards one and one towards the other.

So, in other words, they cut the two out, and they'd send two of those conduits within the quad to where you want to go rather than leaving those blank, they'd be redundant, so they have two paths.

KOSTA JOVANOVIC: I think the wrinkle is, it is not our fiber.

We are going to lease fiber from Last Mile Solutions, is the name of the company. I don't know if -- I guess they would have to break into Level 3 and provide us with a connection point.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So you don't own any of the conduit in that duct bank?

KOSTA JOVANOVIC: No.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So they wouldn't be able to.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Nope.

We can move forward with that one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Motion to approve pending any SPOF.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes. All typical conditions.

CHAIR ANDREA JACKSON: Which Node so we
are clear for the record?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Node N064, which is in packet AF002.

CHAIR ANDREA JACKSON: Motion's been
made.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: In the same packet AF002, this is for Node N065, an extension of fiber optic cable and new conduit from Level 3 manhole 0515-0208 on Cambridge Street to pole 211/16 on Line Street 30 feet with attachment of equipment to pole 211/16.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Compared to some of the other things, that would be pretty straightforward. Do you have a picture of the pole?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It

borders the parking lot. It is a pole to pole top and it does border parking lot there.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I think we can go with this one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: For

Node N065 I make a motion to approve pending any

SPOF regulations, DPW permits and a site visit.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe this is in packet AF007, the third petition on Page 4. That's Cambridge Street an extension of new conduit from Crown Castle vault on the corner of Cambridge Street and Cardinal Medeiros Ave easterly along Cambridge Street to Level 3 manhole No. 051-0101, 177 feet. So there's no nodes involved in this, this is just conduit?

KOSTA JOVANOVIC: A connection between

our existing system and the long run on Cambridge Street that we are leasing fiber from.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
You are actually running down Cardinal Medeiros?

KOSTA JOVANOVIC: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Because the level 3 manholes, you just need to contact Level 3 and you have done that already?

KOSTA JOVANOVIC: Yes. It was done through Last Mile Solutions. They've done the coordination.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Are you splicing in both holes there? Or is this a pass through to get from Cardinal Medeiros to Mass Ave?

KOSTA JOVANOVIC: Pass through.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Pass through?

KOSTA JOVANOVIC: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

This is going to be interesting.

CHAIR ANDREA JACKSON: Do you want to continue and think about it?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

We may have to have a site meeting about this.

This is quite a bit of disruption in that neighborhood, and I'm not quite sure if the routes will be -- you may have to do some research, site exploration on the research.

They can't get into the electrical the -- the formations because they are right there. They can just branch out of those electric formations.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So

I make a motion to continue, and that is for the first acceptable AF007.

CHAIR ANDREA JACKSON: That's on our agenda, it is Page 4, third item, correct, Level

3 manhole?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

That's correct.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Jumping ahead, it will be the same for the next one.

CHAIR ANDREA JACKSON: Third and fourth?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Yes. The first one would be Cardinal Medeiros to Cambridge Street, and the second on AF007 also to be continued is for Node N074 on Mass. Ave that runs from Cambridge into Mass. Ave so both of those we'll move to continue.

CHAIR ANDREA JACKSON: Motion's been made.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes.

CHAIR ANDREA JACKSON: All those in favor

signify by saying aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

New conduit from Sixth Street extension of new conduit from Level 3 manhole 0515-0009 easterly along Cambridge Street then continuing south along Sixth Street with pole 636/8, 154 feet, then continuing aerially to pole 636/12S with attachment of equipment on pole 636/12S, Node N075.

Is that pole being replaced, the one that you are proposing to install the Node?

KOSTA JOVANOVIC: No.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Your height is all right there for a pole top?

It looks like a shorter pole, and it includes a dig out to Cambridge Street.

You are coming in off Cambridge Street, it looks like you are hitting the second pole on Sixth and then aerial to the Node at the corner of Thorndike, it looks like, on Sixth.

CHAIR ANDREA JACKSON: This is the top of the pole?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It will be a pole top.

KOSTA JOVANOVIC: The title indicates Node replacement on the first page, and then when you compare the pole heights on Pages 2 and 3, the pole on Page 3 is 24 foot, so that indicates that we will replace the pole with a taller one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: You will replace it with a taller one?

KOSTA JOVANOVIC: Yes.

CHAIR ANDREA JACKSON: My concern is, looking at it, even with the height, it's hard to tell, just looking at the picture, without going

to the site, would that interfere with what we are talking about with a taller pole and then adding to it, does that interfere with the tree?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It looks like the tree might be back on Thorndike Street. It's deceiving where it is.

CHAIR ANDREA JACKSON: Continue this one and maybe have an arborist take a look? I would rather be safe.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Yeah.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
He needs to look at that one too.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Okay, so in regards to the third item on AF007 for Node N075, move to continue.

CHAIR ANDREA JACKSON: That's at the top of Page 5 agenda item N075?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Yes.

CHAIR ANDREA JACKSON: Top of page.

Motion's been made to continue.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

Fourth item on AF007 is for Sixth Street, an extension of the aerial fiber optic network from pole 30 on Sixth Street northerly on Charles Street then continuing westerly along Charles Street to pole 1 and attachment of equipment on pole 1, Node N028. This is all aerial?

KOSTA JOVANOVIC: Correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I
don't have any issues with this one.

Motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Second.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
AF007, once again, it is the last one. This is
for Gore Street, new equipment, attachments on
existing fiber optics pathways on pole 40 on Gore
Street known as Node N003.

You have existing fiber? You are just
attaching equipment onto existing fiber?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Kosta, you wouldn't have a picture of that in your packet?

CHAIR ANDREA JACKSON: Is that in front of a residence? Do you need this one back, Kosta?

KOSTA JOVANOVIC: Yep.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The last item on AF007 on Gore Street for Node N003, a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All those in favor.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second.

CHAIR ANDREA JACKSON: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Packet AF008, first item, which is at the bottom

of Page No. 5, and this is for installation of equipment on existing pole 40.

Is this a duplicate of the previous one?

KOSTA JOVANOVIC: Yes. It's just --

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

With no Node marking on it. Is that a duplicate?

KOSTA JOVANOVIC: I think it is a duplicate, yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I make a motion to remove the first item, which is Gore Street, which calls for the installation of equipment on existing pole 40.

CHAIR ANDREA JACKSON: That's the last item on Page 5.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Last item on Page 5.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: For the first one on top of Page No. 6, which is Bent Street, installation of equipment on existing pole 61/33. Fiber cable is already at this pole.

CHAIR ANDREA JACKSON: Which package are we in?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
AF008. Do we have a Node number for that?

KOSTA JOVANOVIC: That's No. 77.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't have any issues with this one.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Second.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Same packet AF008 this is for Cambridge Street,
installation of new conduit from Level 3 manhole
0515-0013 easterly to Third Street to then south
on pole 11, 227 feet with the installation of
equipment on pole 11. Would that also be known
as N024?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Okay, that's N024.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
We'll continue this for more exploratory on the

site.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Motion to continue further review of the
excavation of Cambridge Street.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: Third Street and
extension of existing aerial fiberoptic cable
from pole 24 southerly to pole 19 with the
installation of equipment on pole 19.

Would this be known as Node N005?

KOSTA JOVANOVIC: That's correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This is just no excavation, it is just the
installation on existing fiber. I don't have an

issue with this one.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I don't either.

KOSTA JOVANOVIC: There's an aerial run.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

From existing fiber?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

From pole 24 to 19?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It

is all overhead. I don't have any issues. I

make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor

signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Sciarappa Street, an extension of existing aerial fiber optics cable from pole 545/20A northerly on pole 14 and a half with installation of equipment on pole 14 and a half and I would think this is Node N076.

KOSTA JOVANOVIC: Correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

This is also within the same packet AF008, the last item.

I realize this is not the comp space. It's at a corner where there's a park, so I don't have any issue with comp space being down low.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Agreed.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: A

motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor
signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

I think that moves us into new petitions.

I did have a concern from one citizen in
regards to one of these petitions for Pleasant
Street.

CHAIR ANDREA JACKSON: Is it on Page 12,
third item on Page 12?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Yes. That would be Node N041.

CHAIR ANDREA JACKSON: Just for the
record, that was an email sent in by resident
Patrick Barrett, III, at 41A Pleasant Street in

opposition to the work being proposed.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: His opposition was that the building that he resides in on Pleasant Street is slated to be demolished and that pole conceivably would be coming out.

He's proposing for that pole to be removed. Probably move to continue, but we need to look at maybe extending the underground down a few poles further down the street so it bypasss that pole.

Other than that, he didn't have any concern with the excavation. It was more that the Node was going to be installed in front of construction site, which will hopefully be a construction site if all his efforts are met.

On that particular petition for Pleasant Street for Node N041, we would move that one be continued in consideration of relocating that Node, and the underground, to bypass a pole

that -- pole 1, actually, which is right in front
at Pleasant Street.

CHAIR ANDREA JACKSON: Motion's been
made.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yes.

CHAIR ANDREA JACKSON: All those in favor
signify by aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CHAIR ANDREA JACKSON: I'm going to
abstain. Mr. Barrett's property abuts mine.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And
the one other petition, which is on Page 10, and
this is in regards to the third one on Page 10
for Rogers Street. This is for the relocation of

the Rogers Street poles?

KOSTA JOVANOVIC: Yes.

CHAIR ANDREA JACKSON: Where are you
at --

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Page 10, petition 3. So this is for Second
Street addition of new aerial fiber optics cable
from pole 17 on Second Street running southerly
to pole 31, approximately 850 feet, then in
leased conduit to Verizon manhole 2 on Rogers
street, breaking into an existing Crown Castle
conduit and ending at Crown Castle vault A,
corner of Rogers and First Street, approximately
372 feet. This is required due to the removal of
utility poles along Rogers Street.

This is all aerial work except for that
one break-out between the two manholes on Rogers
Street.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

It's all aerial.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

There's one piece of excavation.

KOSTA JOVANOVIC: I believe the excavation is already complete. It was done in connection with some other work that was going on there, so that they tell --

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

They did the cross-over between the two manholes?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Between your duct bank and the manhole?

KOSTA JOVANOVIC: We are asking to pull the new -- place the new fiber and remove the old.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Yeah. I make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded. Yes.

CHAIR ANDREA JACKSON: Question: Because this a new petition, do I need to engage the other utilities?

SUPERINTENDENT OF STREETS WILLIAM DWYER: We did last time, didn't we?

CHAIR ANDREA JACKSON: I wasn't here, so I'm not sure.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Was it last month or two months ago?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Two months.

SUPERINTENDENT OF STREETS WILLIAM DWYER: We did it as a whole package.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is a petition. It is not part of this build-out. This is to remove the poles on Rogers Street between Third and Second, so this rerouting of that section will enable them to remove that cable and get the poles out of

there.

There was some, not urgency, but they are trying to expedite things.

Motion to approve.

As far as licensing, have you completed your licensing for the poles?

KOSTA JOVANOVIC: Yes.

CHAIR ANDREA JACKSON: Motion's been made to approve.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Yes.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So

the remaining petitions are all new petitions.

KOSTA JOVANOVIC: Right.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe it is section -- packet AF003 and packet AF005.

KOSTA JOVANOVIC: 3, 4 and 5.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I would like to move that we continue all three packets to move forward with the licensing and approval from utilities and make ready work.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:
Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:
Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

That's it, other than, I make a motion to approve the minutes from the February meeting.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes. Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: I will abstain. I wasn't present.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Move to adjourn.

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye .

(Meeting was adjourned.)
