

Cambridge Department of Human Service Programs FY2020 Community Development Block Grant Public Services RFP

Questions and Answers

Updated May 20, 2019

- **Regarding the 1-3 page narrative, would we only answer the questions in the bullet points on Page 1 of the RFP? Or do we also add sections from the second page: Performance measures, Priority Areas and Target Population?**
 - Your narrative response to the bulleted questions from page 1 of the RFP should address the target population which your current program/proposed expansion will be serving. The Priority Areas listed on page 2 of the RFP are the target populations that have been identified as priorities by DHSP staff in conjunction with the Human Services Commission. We anticipate that proposals for Mental Health and/or Substance Abuse services targeting these listed populations will be prioritized. Note that these Priority Areas are listed in no particular order. With regards to performance measures, your response should address the number of clients your proposed program would serve and the anticipated percentage of clients that would have a positive outcome.
- **I am wondering how much indirect agencies are permitted to request with these proposals?**
 - The City of Cambridge does not have a set indirect cost rate.
