

Keep Pet Waste Out of Our Waterways!

YOU can help protect our water – do your part!

Did you know?

Pet waste has bacteria that is harmful to our water and makes our ponds and rivers unsafe for swimming and other recreational activities.

Leaving pet waste on the sidewalk or lawn allows harmful bacteria to be washed into stormdrains and into our water bodies.

If you don't pick up after your pet, this is what you're doing.

Don't let this

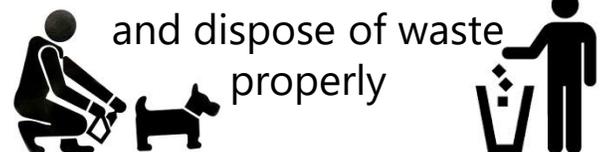

Go into this

Because it will end up here!

It's the law!

Pick up after your pet

and dispose of waste properly

Take the *Canines for Clean Water Pledge*
