

Franklin Street Park - Concept Design Features

▼ ACTIVE VS PASSIVE:

Creating a unique and interesting park will increase community use.

▲ PLAY DOME:

Climbing / sliding dome and rice stone play area along with colorful wall panels and a "wavy bench" at back of park will provide visual interest and seating to watch a child play.

▲ SAFETY:

Improved lighting along with an emergency call box, better regulatory signs and tree pruning will all contribute to park safety.

▲ ► PLAY DOME:

A center piece of the park design includes a play dome, which may be used to climb on, slide on, sit on, or run around. This unusual piece is low enough to the ground to provide safe yet challenging opportunities for play. The area also includes two kid talk tubes.

▲ MEETING GROUND:

Providing comfortable benches, a table, drinking fountain and other park furniture will encourage use of park as a community meeting ground.
