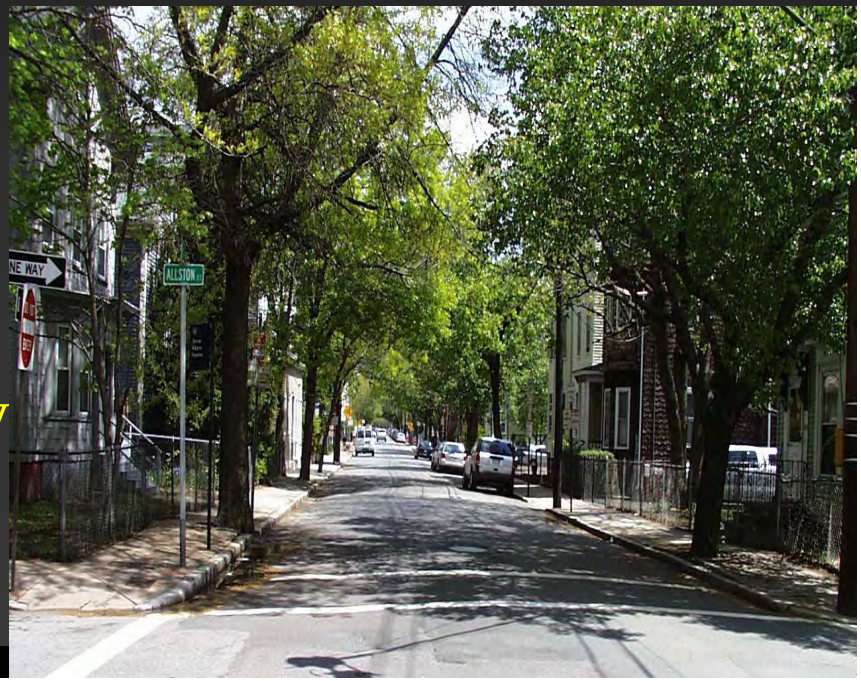
Streetscape Improvements

Goals For Brookline Street

- Improve Safety & Comfort for All Users
- Reduce Traffic Speeds
- Improve Pedestrian Experience
- Improve Conditions for Bicycling
- Improve Pedestrian Crossings
- Ensure Safe and Convenient Bus Travel
- Balance Parking and Visibility at Corners



Crossing the Street Should be Safe and Comfortable

Crosswalk Visibility

International or “zebra” striping is best

Drainage:

Make sure
it works!

Improve Conditions for Cycling

Safe and Convenient Bus Travel bus travel

Review Bus Stop Conditions

Transit: Provide Easy, Safe Crossings

Improve Sight Lines at Intersections

Rationalize signs and avoid visual clutter

Increase

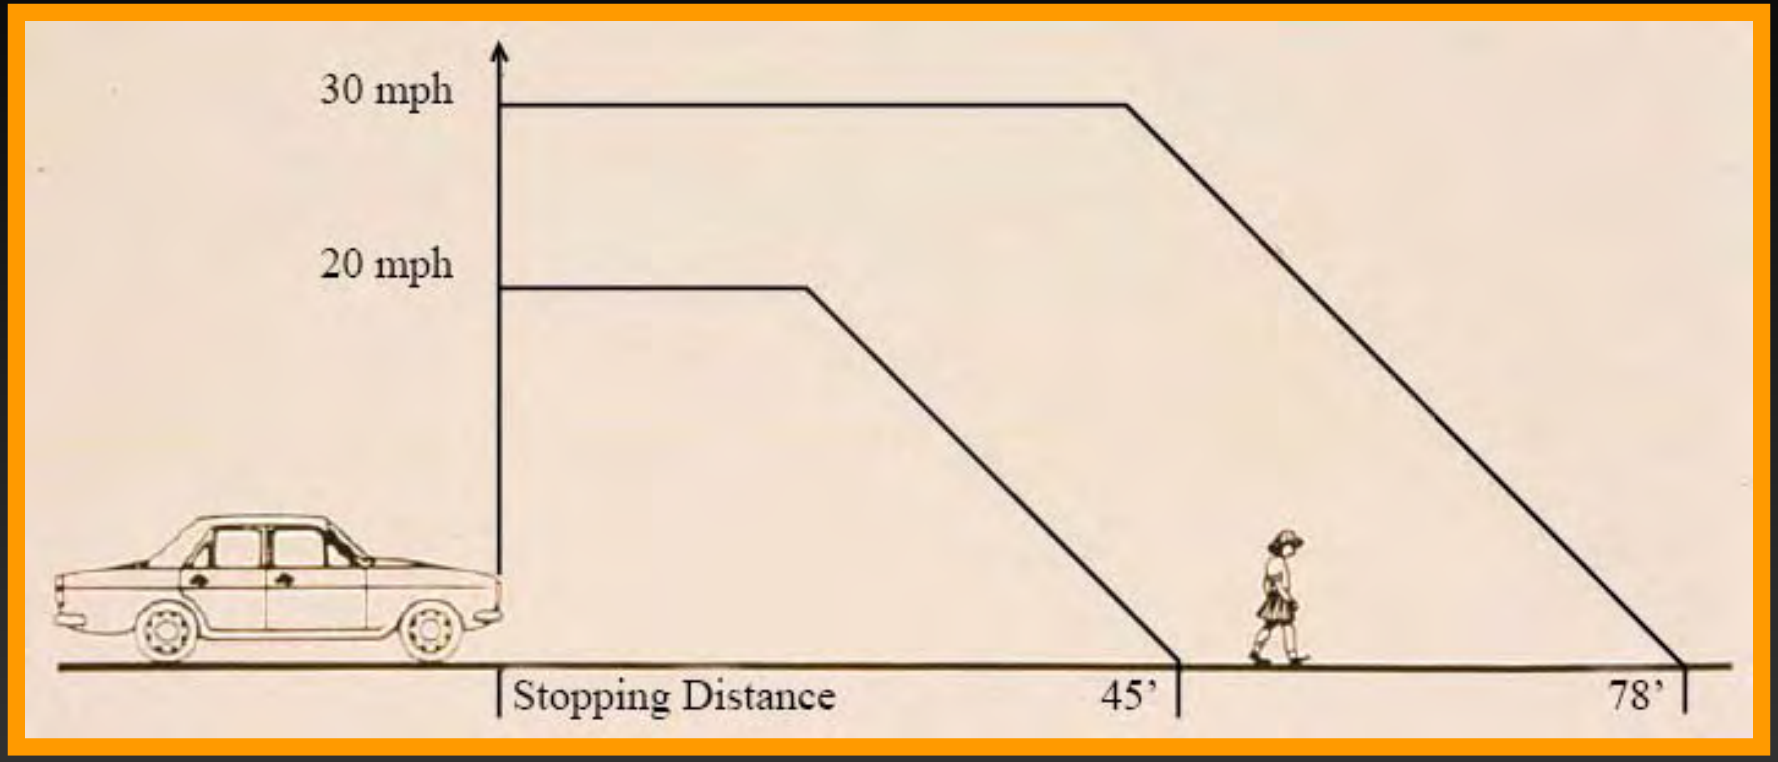
Yo! Please Go Slow.

TRAFFIC CALMING

Slower Is Safer



Distance needed for a vehicle to stop vs. speed:
30 mph ======== Approximately 78 feet.
20 mph ======== Approximately 45 feet.

Pedestrian Safety: Speed as a Factor

150’

First scenario: Speed 25 MPH

100’ = distance covered in 2.5 sec. perception/reaction time

100’

150’

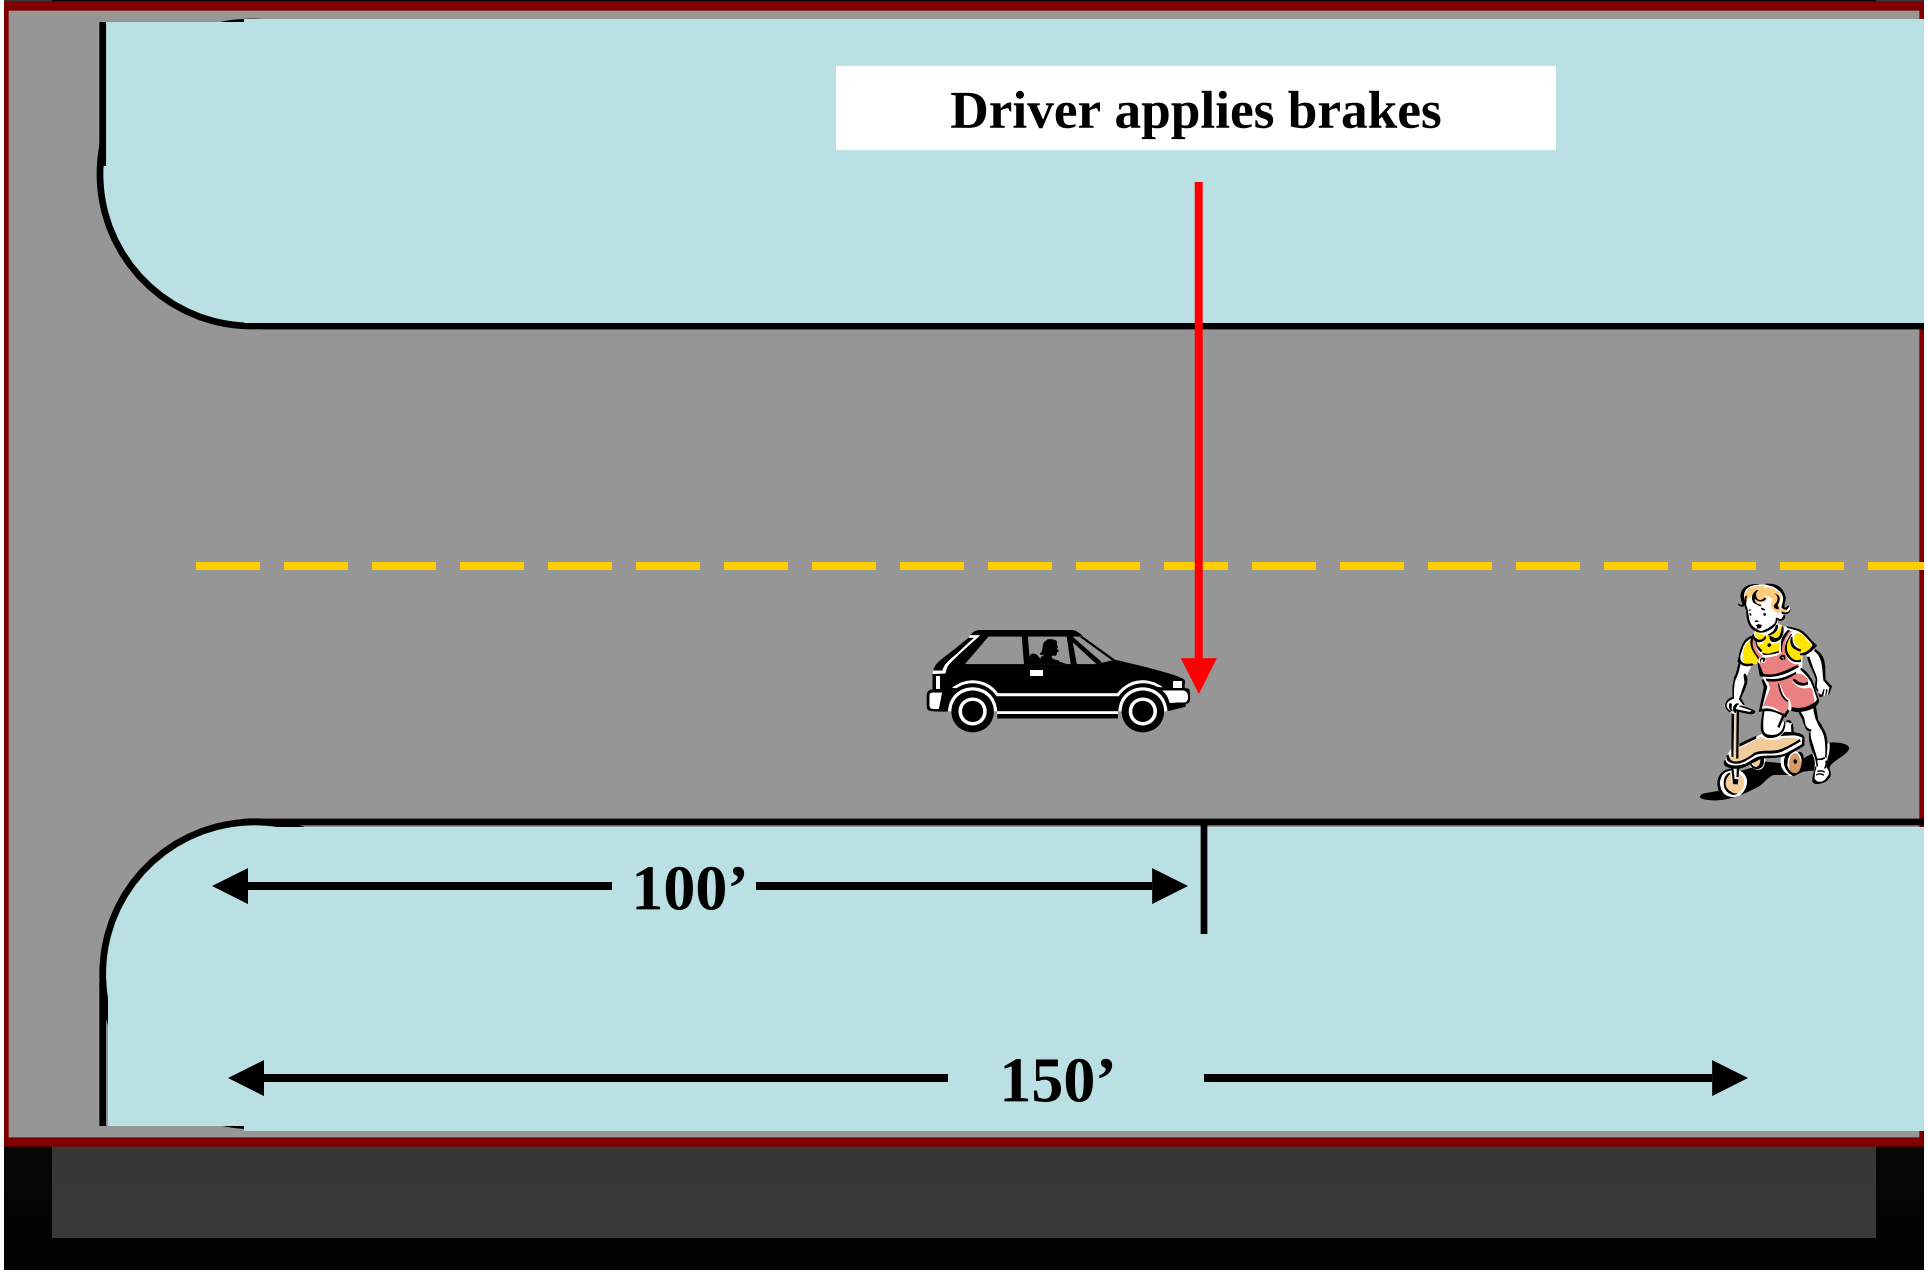
First scenario: Speed 25 MPH

100’ = distance covered in 2.5 sec. perception/reaction time

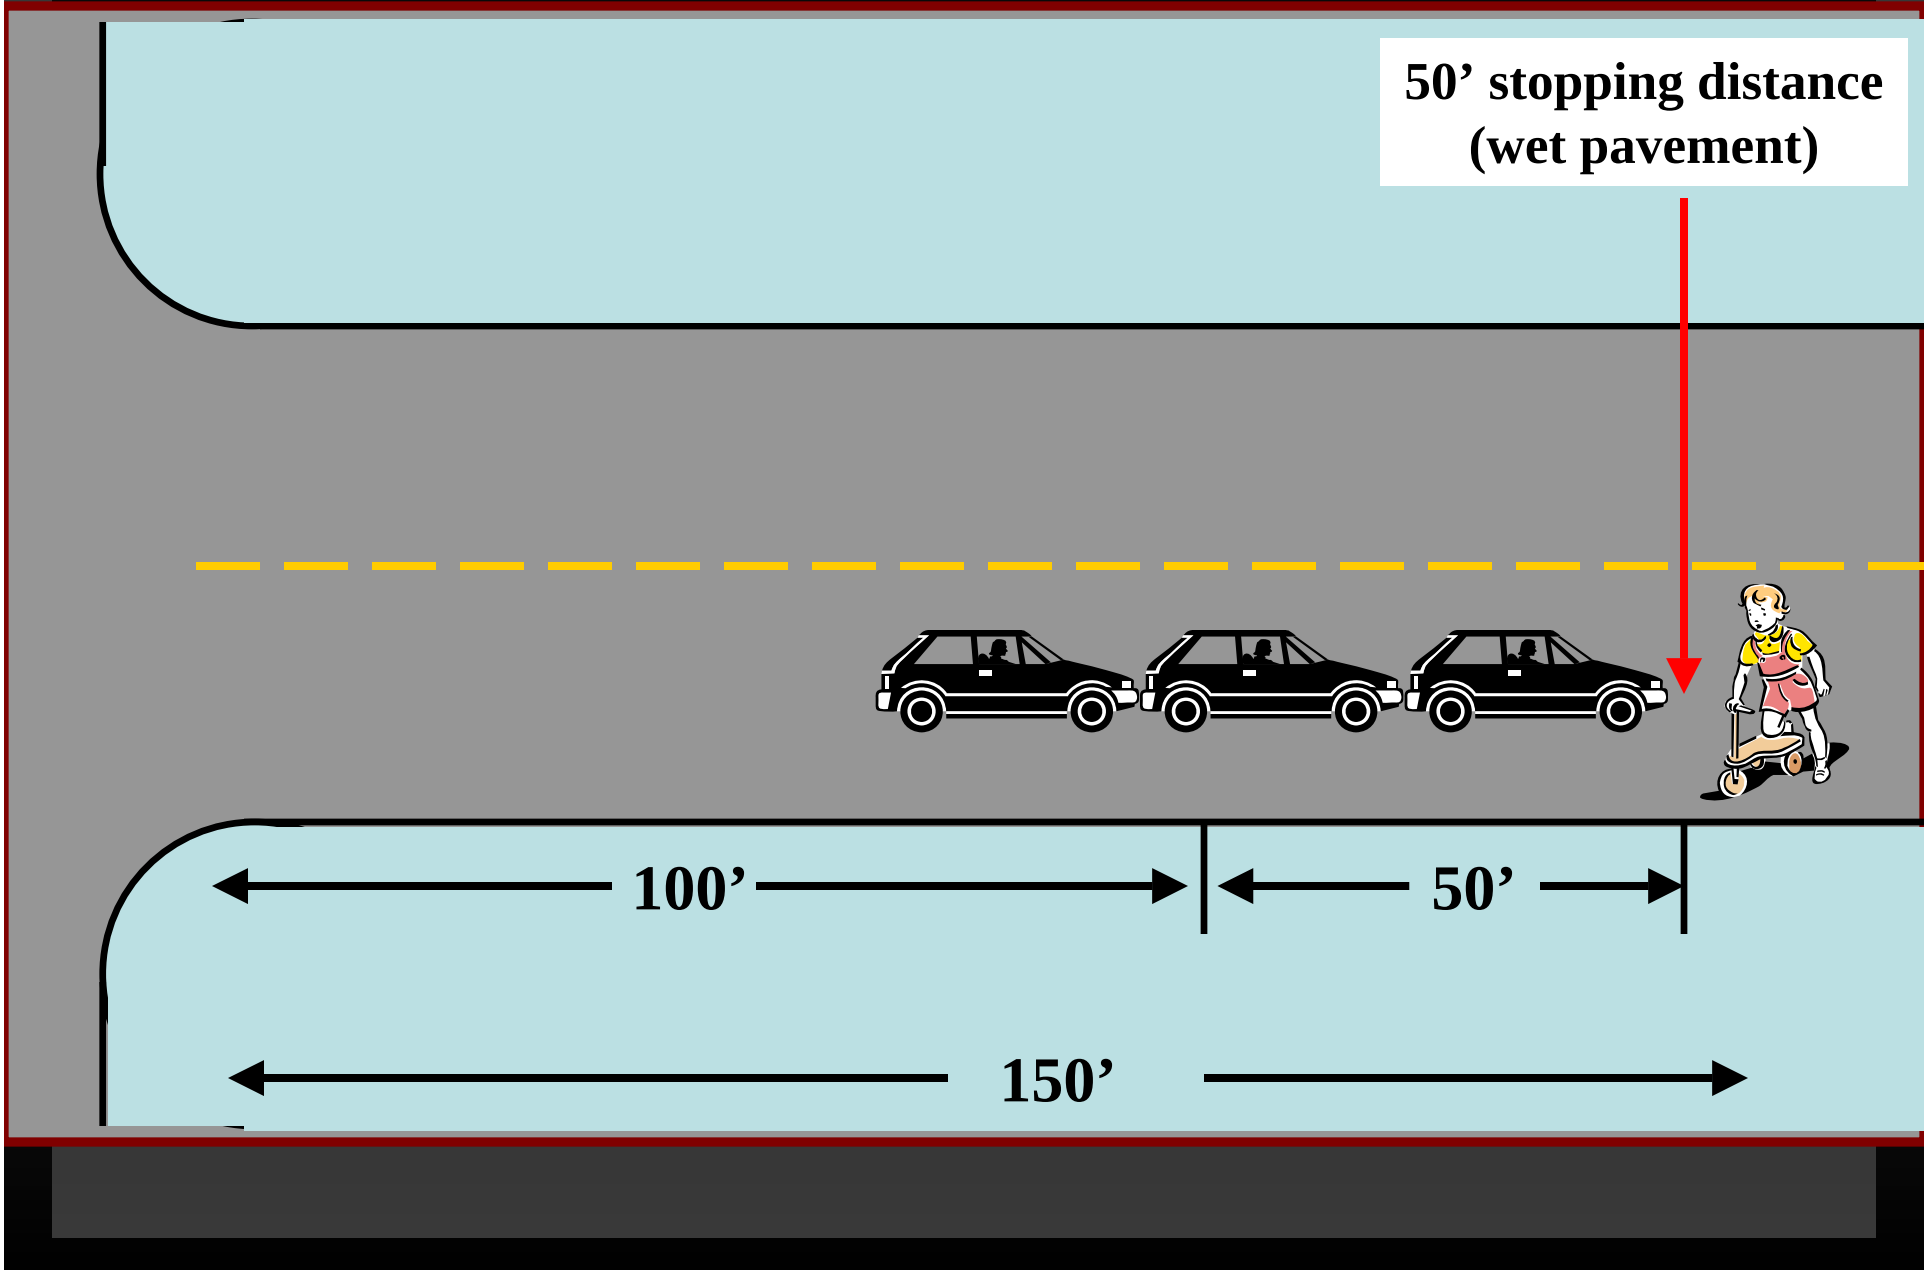
100’

150’

First scenario: Speed 25 MPH

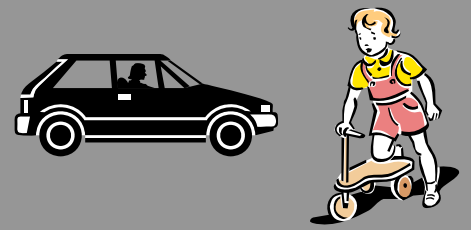


First scenario: Speed 25 MPH



First scenario: Speed 25 MPH

Result: Nothing happens beyond one scared child, driver & parent!



100’ 50’

150’

Second scenario: Speed 38MPH

140’ = distance covered in 2.5 sec. perception/reaction time

140’

Second scenario: Speed 38MPH

Second scenario: Speed 38MPH

Traffic Calming

- Narrow the road
  - Add Parking
  - Pavement Markings (edge line for bikes)
  - Visual Narrowing by Adding Trees
- Horizontal Devices: make the road less straight
  - Chicanes
  - Crossing Islands
- Vertical devices: make vehicles go over something
  - Raised intersections & crosswalks
