1. Board of Zoning Appeal Cases x
2. Update, Brian Murphy,
Assistant City Manager for Community
Development 3
3. Adoption of the Meeting Transcript(s)
x

PUBLIC HEARINGS

Patty Chen, et. al., to amend the Zoning Ordinance of the City of Cambridge by amending the Central Square Overlay District, Section 20.304.5 Use Limitations and Restrictions by amending paragraph 3b Restricted Uses by inserting the underline phrase:

Bar establishment where alcoholic beverages are consumed and where dancing and entertainment is provided, dance hall or similar place of entertainment: Section 4.35g shall be permitted only if the principal public entrance or entrances are directly from Massachusetts Avenue, Prospect Street between Massachusetts Avenue and Bishop Allen Drive or Main Street 4

PB#273, 54R Cedar Street, Special Permit for a second structure on the lot further than 75 feet from the street line Residence B district. Section 5.53. LaCourt Family, LLC, Applicant 150

Extension to January 31, 2013

GENERAL BUSINESS

Kendall Square Zoning Discussion of area-wide provisions 17

1 P R O C E E D I N G S

2 (Sitting Members: Hugh Russell, Pamela
3 Winters, H. Theodore Cohen, Ahmed Nur.)

4 HUGH RUSSELL: Good evening. This
5 is the meeting of the Cambridge Planning
6 Board, and the first item is an update from
7 Brian Murphy. There are no Zoning Board
8 cases for us to consider tonight.

9 BRIAN MURPHY: So in terms of
10 meetings, you've got the next one will be
11 December 4th and that's general business.
12 And the two pieces that we'll have there will
13 be Central Square -- an update of Central
14 Square recommendations from the C2 process
15 which is winding down this month, as well as
16 sort of an update on MIT Zoning proposal
17 discussion. Today I believe that the Provost
18 at MIT announced that they would be re-filing
19 and discuss sort of what came out of the
20 committees, and the goal is to have MIT come
21 and give an update to the Board on December

1 4th.

2 December 18th we've got a Watermark I
3 green roof Special Permit as well as a
4 continuation of the private way parking
5 hearing, and bike parking zoning is also
6 scheduled for December 18th.

7 And we will have three meetings in
8 January and three in February, and those will
9 be January 8th, 15th, and 22nd. And then
10 February 5th, 12th and 19th. And I think the
11 goal with that is to try to have more
12 meetings but have them end at a slightly more
13 civilized hour as we try to balance things.

14 And the other thing that's set at this
15 point is February 5th will be the Town Gown
16 reports.

17 HUGH RUSSELL: Okay, thank you.

18 So my vision isn't that good so it
19 looks like it's 7:20 to me.

20 So we will have a public hearing on the
21 Patty Chen, Et. Al. Petition to amend the

1 Zoni ng Ordi nance.

2 Are you Ms. Chen?

3 PATTY CHEN: Hi , how are you?

4 ATTORNEY JAMES RAFFERTY: Good
5 eveni ng, Mr. Chai rman, members of the
6 Pl anni ng Board. I 'm Ji m Rafferty. I
7 represent Ms. Chen on the Chen Peti ti on.
8 She' s present wi th her husband Mark Shul man.
9 He woul d be the second si gnatory on the
10 Peti ti on. The Peti ti on, I 'm sure you' re
11 aware of from havi ng revi ewed i t, deal s wi th
12 a very di screte one block segment of the
13 Central Square Overl ay Di stri ct. When the
14 Overl ay Di stri ct was created and adopted i n
15 1989, i t contain ed a provi si on whi ch amount s
16 to a use restri cti on that say s that i f
17 restauran ts servi ng al coh ol and al so havi ng
18 entertai nment, l i ve entertai nment; danci ng or
19 l i ve entertai nment, need to have thei r
20 pri nci pal entry on Massachusetts Avenue or
21 Mai n Street. Ms. Chen and her husband are

1 the long-time operators of the entertainment
2 venue on Mass. Ave. now known as All Asia.
3 They have identified a location in a building
4 that has a Mass. Ave. address. It's the
5 former, what did we call it? The Cambridge
6 Electric Light building or is that the one
7 behind it?

8 AHMED NUR: The former CC?

9 ATTORNEY JAMES RAFFERTY: Yes. This
10 is the former CC space on frontage -- the 634
11 Mass. Avenue I believe.

12 UNIDENTIFIED MALE: 675.

13 ATTORNEY JAMES RAFFERTY: Thank you.

14 AHMED NUR: It's right at the
15 corner.

16 ATTORNEY JAMES RAFFERTY: But the
17 principal entrance to the building is on
18 Mass. Ave., but this is a space that has its
19 principal interest on Prospect Street. But
20 Prospect Street has as you know, is a very
21 lengthy street, but the characteristics of

1 Prospect Street between Mass. Ave. and Bishop
2 Allen Drive are frankly very consistent with
3 the characteristics of Mass. Ave. and Main
4 Street. And I didn't come up with that
5 notion, that was actually contained in a
6 recommendation that the Planning Board sent
7 not too long ago to the BZA when we sought to
8 obtain a Use Variance to do this. And your
9 colleagues at the BZA, while they thought it
10 was a fine idea, they suggested that if the
11 City Council felt so strongly about it and
12 others, that what the Applicant should do is
13 amend the Ordinance.

14 So we took them at their word and we
15 filed this Petition. We had a hearing last
16 week before the City Council's Ordinance
17 Committee. It was very enthusiastically
18 received. Counselor Chung asked that we
19 report to you, the Planning Board, the level
20 of interest and enthusiasm of the Council and
21 urge them to -- the Planning Board to

1 favorably -- it was Councilor Maher who
2 pointed out to the Councilor Chung that it
3 was the Planning Board that advised the
4 Ordinance Committee and not the other way
5 around. So it was a somewhat brief hearing.
6 No one speaking against, and most Councilors
7 recognizing that this is exactly what the
8 Planning Board said in your commentary on the
9 BZA case; that the characteristics of this
10 street. Just remind you of the other uses,
11 across the street is a long time --

12 AHMED NUR: Field.

13 ATTORNEY JAMES RAFFERTY: Tavern,
14 Field is across the street. The Improv
15 Boston is there. So the street itself -- the
16 building does have as I said frontage on
17 Mass. Ave. And we tried to convince the BZA
18 that the hardship would be that patrons would
19 have to enter into the office lobby, go up
20 the elevator a floor, go down a corridor, and
21 then go down a flight of stairs in order to

1 meet this requirement. But that case has
2 been continued, but given my powers of
3 prediction, I'm not expecting it to succeed.
4 I think the preference at the BZA was that if
5 everyone so convinced it was such a good
6 idea, that perhaps rather than struggle over
7 the issues and legal definitions of hardship,
8 the more logical thing might be to attempt to
9 modify it.

10 So it's a very discrete change. It
11 simply asks to add in that section of the
12 Ordinance in the Central Square Overlay
13 District the phrase Prospect Street between
14 Mass. Avenue and Bishop Allen Drive. So that
15 then, that block of Prospect Street would
16 then join Mass. Ave. and Main Street, the
17 locations where principal entries could be
18 located.

19 I think you probably will recall that
20 there was a period of time when places like
21 Green Street in particular had a lot of

1 active nightclub uses at Green and Brookline,
2 and there was a lot of conflict with
3 residences back in the 80's. And I suspect
4 much of the thinking behind the adoption of
5 this had to do with the fact of the conflict
6 of residential uses was probably not ideal.
7 We don't have that type of context on this
8 section of the block. So that's the purpose
9 for the Petition.

10 HUGH RUSSELL: Nor do you have a
11 reputation that those businesses on Green
12 Street had.

13 ATTORNEY JAMES RAFFERTY: Yes, they
14 had an active following, but yes, I agree.
15 But I'd be happy to answer any questions. I
16 know my clients are eager to speak, but I
17 emphasized that this is a policy decision and
18 the testimony about what a fine establishment
19 they run might be better served at the
20 License Commission than the Planning Board
21 so they've agreed to allow me to speak on

1 thei r behal f.

2 Thank you.

3 (Thomas Anni nger seated.)

4 HUGH RUSSELL: Shall I we proceed to
5 the publ i c heari ng?

6 STEVEN WINTER: Yes.

7 HUGH RUSSELL: Does anyone wi sh to
8 speak on thi s case?

9 (No Response.)

10 HUGH RUSSELL: So, I'm actual ly
11 del ighted to see the All Asia Cafe is going
12 to have a way to relocate, because that's one
13 of the di ffi cul ti es when you devel op areas
14 and you can't always -- busi nesses who are --
15 good busi nesses don't always have all the
16 options. I bel i eve the street is completel y
17 sui ted to thi s use. I'm sure at some time a
18 di fferent operati on come in that is louder
19 and more boi sterous, I sti ll thi nk it woul d
20 be fi ne for the type of poli cy.

21 STEVEN WINTER: Mr. Chai r, I'm

1 inclined to be favorable to this. The only
2 -- but I would like to have some sense of due
3 diligence that we have here, is there
4 anything that we're missing, any impact that
5 we're missing that could come up if other
6 things were built on Prospect, if other uses
7 that are zoned for what -- I just want to
8 make sure that we're making a decision that's
9 correct forever.

10 HUGH RUSSELL: Well, I think because
11 it only affects one block, the west side, is
12 very hard property. It's not going to
13 change. It's, you know, there's this one
14 part of the, you know, the place where
15 they're planning to go in is sort of soft,
16 but that's really the only -- on the other
17 side of the street there's a similar use.

18 STEVEN WINTER: Very active side of
19 the street.

20 HUGH RUSSELL: I think the building
21 at the corner is of some historic

1 significance. And so I don't think we're apt
2 to see a change there. You know, if somebody
3 should choose to develop the part that's
4 closer to Bishop Allen Drive and similar
5 operations of Field came in, would that be a
6 problem? I don't think so. I should remind
7 you that we did look at a broader thing, when
8 was it, last spring? Yes.

9 ATTORNEY JAMES RAFFERTY: That's
10 right. That amendment proposed a complete
11 deletion of the restriction. And I think we
12 learned from the Ordinance Committee that
13 there was a feeling that that was too broad.

14 HUGH RUSSELL: Right.

15 Ahmed.

16 AHMED NUR: I'm pretty confident and
17 supportive of this and relieved that they're
18 actually staying in Central Square. I've
19 known these guys. They were on Broadway
20 Street and I lived on Needham Street at the
21 time and I used to bring my kids around the

1 corner where the restaurant was. And even
2 though there was no nightclubs and drinking
3 at the time, they had the biggest TV I know
4 back in the early nineties. But All Asia is
5 a very important landmark in my opinion in
6 Central Square, especially when it gets dark.
7 And I think this particular block between
8 right around the corner from Mass. Avenue on
9 Prospect across from the Field is a dead
10 block after H&R and the CCTV moved out. I
11 think it needs All Asia like and the type of
12 entertainment to balance the field. And so
13 I'm very confident and actually relieved that
14 as part of the Central Square that we're
15 looking for more like All Asia kind of
16 entertainment for Central Square. So, you
17 have my vote.

18 H. THEODORE COHEN: Well, I
19 similarly support this. I mean, I think this
20 particular block is totally appropriate for a
21 restaurant, a bar form of entertainment. I

1 think the next block down has a lot of
2 parking lots and there really are no
3 residential neighbors anywhere very close by.
4 It's a developed commercial park and bringing
5 more life and activity would be good for it.

6 PAMELA WINTERS: I concur with my
7 colleagues.

8 HUGH RUSSELL: So, have we -- Tom,
9 you haven't weighed in on this.

10 THOMAS ANNINGER: It sounds
11 reasonable to me.

12 HUGH RUSSELL: So we could recommend
13 this favorably to the City Council citing
14 what Ted has said about the expected
15 improvement to the street frontage having an
16 active use on this corner.

17 STEVEN WINTER: Could we mention
18 that a favorable recommendation is
19 enthusiastic and favorable recommendation? I
20 mean I think it's not just -- we're saying
21 okay. I think we're saying this is good.

1 HUGH RUSSELL: Yes.

2 AHMED NUR: Right. There are also,
3 I might add what differentiates All Asia from
4 the Field, for example, from any other bar or
5 club, is they do music that are sort of what
6 Central Square -- what we think of Central
7 Square central, music from Africa, music from
8 all over the place. The live music, it's a
9 very cultural thing. It's a really unique
10 thing. The majority of people that live in
11 Central Square would go to the Downs Complex
12 would walk to All Asia and this is now
13 closer.

14 HUGH RUSSELL: Okay, I think we have
15 to be careful in our recommendation to not
16 condition this on the excellence of the
17 proposed tenant, but on the principle. The
18 Zoning principle. Yes.

19 AHMED NUR: The principle.

20 HUGH RUSSELL: Okay, that's our
21 recommendation.

1 All those in favor?

2 (Raising hands).

3 HUGH RUSSELL: All members voting in
4 favor.

5 ATTORNEY JAMES RAFFERTY: Thank you
6 very much.

7 HUGH RUSSELL: Should we start on
8 the Kendall Square Zoning discussion? And
9 then at eight o'clock take a break to do the
10 Cedar Street business.

11 IRAM FAROOQ: I think that would be
12 great, because I don't think anybody who is
13 interested in Kendall expected this to be
14 over this quickly. So I'm expecting a few
15 people to be here. I don't know how many,
16 but it will be great if Cedar Street could go
17 first.

18 HUGH RUSSELL: Well, Cedar Street
19 can't go first.

20 BRIAN MURPHY: It can't go until
21 eight o'clock.

1 IRAM FAROOQ: Oh, it cannot go until
2 eight o'clock. I will then get started.

3 So, this is the slide that you have all
4 seen many times, but I just wanted to start
5 with it to remind us that the Kendall Square
6 recommendations are based on the vision of
7 creating a dynamic, even more dynamic Kendall
8 Square, that's sort of a place to live, work,
9 play, learn, innovate. And here's the build
10 out vision in terms of the various uses and
11 dimensions sort of scale and form that's
12 expected over time. The yellows are
13 residential. The whites -- these white
14 buildings are existing and then these color
15 grey and blue ones are intended to be
16 commercial. This is the constellation, so
17 it's its own unique color.

18 And most of that built form vision will
19 materialize largely through the height,
20 density, and use provisions that that are
21 embodied through the various PUDs. So we

1 have these four PUDs that are being proposed
2 for Kendall Square. MIT, which we've talked
3 about some out here and then they expected
4 that they will be before you over the next
5 coming months.

6 The sort of Cambridge redevelopment
7 authority and MXD District, Boston Properties
8 area which is proposed to be PUD Kendall
9 Square 1, the Volpe site, and then the
10 Cambridge Research Park site which is largely
11 built out but then has some opportunities
12 along the Broad Canal edge as well as
13 thinking a little more about the Third Street
14 edge and with confirmation of NStar are
15 located right now.

16 So the part that we really want to
17 focus on today is a series of recommendation
18 in the Kendall Square Zoning that pertain not
19 to the height bulk use provisions in each
20 individual PUD but to the -- to a series of
21 provisions that will, are intended to apply

1 area-wide and that deal with things like
2 having active ground floors, finding space to
3 retain and encourage start-up businesses, how
4 to have it -- how to get investment to
5 continue to better Kendall Square, things
6 that are not owner specific but more of a
7 benefit for the entire district, which are
8 going to be talked about through a community
9 investment Kendall Square fund. And then
10 things like parking and loading changes. And
11 I snuck in after this historical preservation
12 provision, that's not in your memo, but it's
13 very, very simple.

14 And so, looking first at active ground
15 floor -- could we dim the lights just a
16 little because it's hard to see. Thank you.

17 So, active ground floors has at the
18 Board has been a huge topic for -- well, for
19 many, many years, as long as I've been here.
20 But it becomes particularly important in the
21 context of a place like Kendall Square where

1 you expect to have large buildings which are
2 -- which also means large facades that one
3 would be walking through. So it's not
4 necessarily just a function of architectural
5 variation that you might find in other -- in
6 a residential district, but it needs to be
7 the activity, and the rhythm needs to be
8 created to a great extent through uses. And
9 these are just two research buildings in our
10 area.

11 One is -- this is the Novartis building
12 on Mass. Ave. with Flour at the base which is
13 extremely, is a very, very active edge at all
14 times, indoors and outdoors. And then
15 there's the Broad Institute building on Main
16 Street which takes a different tact, and is
17 essentially a lobby that tries to engage
18 people. And is, you know, these various
19 approaches are successful, some in greater
20 measure than others. But we need to be
21 thinking that there's going to be some

1 sections that can actually support retail,
2 but there will have to be some sections that
3 will be other uses and how can we think of
4 those as being also active and engaging
5 because the -- but that is really what will
6 influence all of our experience in the area
7 as it continues to grow.

8 So, in this arena, the most significant
9 recommendations are -- aside from encouraging
10 active ground floors throughout, that along
11 Main Street, Broadway, and Ames Street
12 between north of Main Street and then Third
13 Street, are the streets where we think
14 they're really priority streets for retail,
15 where there's either an existing cluster or
16 they're so central that you want to see
17 retail evolve over time, because this is
18 going to be kind of the active core of
19 Kendall Square and right at the heart
20 adjacent to the T station. So the one other
21 section that we added to that list is the

1 Broad Canal edge. Both along the canal edge
2 but especially along, along Broad Canal Way
3 where you've already started to see
4 restaurants like EVOO and Ki ka emerge.

5 AHMED NUR: We have a new building
6 coming, too, Parcel G.

7 IRAM FAROOQ: That's right, and the
8 Watermark. Second phase of Watermark is
9 coming. And Parcel G is coming and they're
10 both intended to have the ground floor
11 retail. But the opportunity is also on the
12 other side of this Broad Canal Way where
13 there's a sliver that's owned by MIT. And in
14 conversations about their Zoning, there's
15 been discussion of what might be the most
16 appropriate use along that edge. Could you
17 have maybe a series of townhouse type units
18 that line the garage and create a more active
19 edge? Or could there be something that has
20 retail at the ground floor? And so we
21 haven't actually proposed requiring it on

1 that edge, but it's something that would be a
2 -- one of the desirable, one of the possible
3 desirable outcomes.

4 In addition to that, you know, one of
5 the successes of Kendall Square from a retail
6 perspective really is Third Street. And, you
7 know, when we did the Eastern Cambridge
8 planning study and came up with those Zoning
9 recommendations, you'll recall there was a
10 provision that exempted -- that required
11 ground floor retail and exempted it from
12 counting towards the permitted gross floor
13 area. And we think that that's a provision
14 that has allowed us to push developers to get
15 the ground floor retail, allow you to
16 leverage the development to get, and get the
17 retail, and that's really been transformative
18 for Third Street. And so we are proposing a
19 similar measure that ground floor retail will
20 be exempt from counting as gross floor area.
21 We have criteria that goes along with the

1 ground floor both in terms of the requirement
2 and the exemption which says that at least 75
3 percent of the building frontage must be
4 retail, that it should be a minimum average
5 depth of 40 feet, and that individual
6 entrances should be provided to the street
7 for each of the separately leased areas.

8 And for new construction the ground
9 floor must be at grade. If there's a
10 renovation of an existing building for
11 instance, the MIT Press Building, while it's
12 desirable to bring it down to the ground,
13 there may in fact be some solutions that
14 involve a higher level solution that may be
15 workable as well.

16 And then finally I think a question I
17 would throw out, you know, one of the things
18 that's happened is that while we've been from
19 the time that we concluded the Kendall Square
20 committee process about the end of the summer
21 in June, end of June, and while we've been

1 kind of talking about the various PUD
2 provisions, we've been working internally on
3 trying to think through some of these
4 provisions. So these elements like the
5 minimum frontage and average depth, these are
6 things that are additional beyond what the
7 committee recommended. So committee
8 basically said, let's examine the ground
9 floor retail and so we've tried to figure out
10 what might be the parameters that you attach
11 to that. And Jeff has been principally
12 working on that in addition to sort of our
13 Zoning team.

14 And then one of the other questions
15 related to this is should we include a
16 provision like we had in North Mass. Ave.
17 that limited bank frontages? And could we --
18 should we have something that limits other
19 large frontages and tries to establish more
20 of a rhythm of entryways. So I sort of throw
21 that question out to you, or maybe there are

1 strategic locations where we have such a
2 provision.

3 And then finally the -- well, so this
4 is not really a Zoning requirement but more
5 of an invocation to people that these are
6 much needed uses in Kendall Square. We have
7 not been to a single public meeting in any
8 forum where we didn't hear from people, we
9 need a grocery store and we need a pharmacy
10 in Kendall Square. So while there's no real
11 mechanism to require that, we want to put it
12 out at least as an important goal.

13 And finally eliminating some of the
14 restrictions such as now it's really hard to
15 put in a retail use in an existing building
16 in some of the base districts and also making
17 that as an as-of-right provision if it's less
18 than 5,000 square feet, so it doesn't have to
19 go through an elaborate process. But if it's
20 larger than that, we think it still requires
21 a -- it deems a visit to the Planning Board

1 to get a permit.

2 So that's the piece on -- let's see --
3 oh, one other -- sorry, one other thing I
4 will say is -- two other things I'll say is
5 that we did talk about having ground floors
6 be designed to accommodate retail in the
7 future even in areas where the retail is not
8 required, because as the area matures and the
9 population fills in, you think that the need
10 for retail would grow. I was on Third Street
11 on Saturday, and I could not find a way to
12 sit down at either Voltage or Tatte, and
13 finally had to go and actually have lunch and
14 sit down at Kika, because that was the only
15 place that was -- I mean, it was standing
16 room only in Voltage. So I think even now
17 you could have more retail there, but
18 certainly the need will grow as time goes on.
19 And we've been joined by Brian Dacey who is
20 one of our committee members and Tim Rowe who
21 really helped with the innovation space

1 provision that we'll talk about in a little
2 while.

3 And then the last piece, again, is that
4 for retail that is unleased for six months or
5 more, we wanted to say that the property
6 owner work with the city entities like the
7 Arts Council or with the Kendall Square
8 Association to find some short-term uses like
9 an art installation or a short-term pop-up
10 gallery or a pop-up retail like there have
11 been in Central Square with the Zaggat store
12 and the Sony video game store. Maybe a
13 community, non-profit use. But have a
14 short-term lease like maybe even weeks or
15 months so that if they get a tenant, they're
16 able to still be mobile and not -- and it
17 wouldn't be a deterrent for leasing the
18 space.

19 PAMELA WINTERS: I think the
20 Cambridge Art Association would be very much
21 interested in that. Yes.

1 IRAM FAROOQ: Very good.

2 HUGH RUSSELL: Okay, so what I'd
3 like to do is on each topic have a discussion
4 after Iram's presentation rather than trying
5 to remember everything until we get to the
6 end.

7 So on the retail I would look at the
8 text and I have three problems in the text --
9 four problems.

10 First problem is one I brought up in my
11 memo over the summer questioning whether we
12 should be forcing people to put retail on
13 Broadway. And in my thinking about this is
14 that I've sat on this Board for over 20 years
15 and I have many times voted to remove
16 requirements for retail in East Cambridge
17 where because in the '80's we required it
18 everywhere and it didn't work everywhere.
19 And so we gradually removed the requirement
20 from the places that it doesn't work. And
21 I'm questioning Broadway because the south

1 side of Broadway has, you know, a fairly --
2 it's all developed, complete developed.
3 There's only the one retail business on the
4 south side, and there isn't much chance that
5 there is going to be retail business on the
6 south side at all. And the north side
7 Broadway is on the DOT site. And the
8 question is can you in your cross wits --
9 it's always going to be a busy street, one
10 sided, should we tell people that they have
11 to put retail where it's not a particularly
12 good retail location? That's my concern that
13 -- because I think it's -- and I haven't
14 heard a response to that comment that I made.
15 So that's a comment A.

16 Comment B is an average depth of 40
17 feet I think is excessive. There are
18 certainly many businesses, particularly chain
19 businesses that won't come in if you don't
20 have 40 feet, but may not want to have every
21 place encouraging chain businesses. And the

1 one example you showed, Flour, the depth is
2 half of that, and the wine store is also half
3 of that. So I'm wondering whether an average
4 of 40 feet over 75 percent of the frontage is
5 really too severe.

6 Now that comes to my third question.
7 In the last bullet in the first section it
8 says the Planning Board may allow minor
9 modifications if the ground floor plan for
10 these streets is consistent with the intent
11 of these requirements. I'd like to see the
12 word minor struck. If it's consistent, it's
13 consistent. You know? If we're consistent,
14 we'll necessarily rule. The intent is to
15 produce continuous or nearly continuous
16 retail. That might be a way of, you know,
17 modifying this. When you say minor, then we
18 get to say what is minor.

19 IRAM FAROOQ: Yes.

20 HUGH RUSSELL: When we don't really
21 have any legislative or historical guidance

1 of what's minor. There's no definition of
2 what -- which is a retail use is or what
3 categories in the Ordinance constitutes --
4 are falling under these, you know,
5 provisions. And I think that needs to be
6 done in the final drafting. You know, we get
7 the spirit of it, but you have to -- and it's
8 not clear to me that putting say a day care
9 frontage would necessarily be inconsistent
10 with the idea in some places. It might be
11 that, you know, in places that aren't going
12 to be good retail from walk-in retail, maybe
13 you need to be able to allow that.

14 So those are my comments.

15 Other people have comments? Ted.

16 H. THEODORE COHEN: Yes. Well,
17 actually you hit on one of them, which was
18 the reference to minor modification and what
19 was the intent as to the scope of the power
20 of the Planning Board to act. The key for me
21 was the requirement of separate pedestrian

1 entrances for separately leased space which I
2 think in general is a good idea and
3 appropriate, but on a recent trip to Italy
4 there were several situations where older
5 buildings and newer buildings had been
6 renovated which just had display windows on
7 the street but then had an interior
8 passageway which was very lovely and very
9 successful for pedestrians. So I wouldn't
10 want to eliminate something like that, you
11 know. I understand we want to enliven the
12 street and have people out on the street, but
13 if there was an intelligent, you know,
14 workable design that was acceptable either,
15 you know, I'd like the by-law to allow it or
16 the Ordinance to allow it or the Planning
17 Board have the opportunity to review it and
18 approve something like that.

19 And just, I don't understand what's
20 being said on the paragraph in the written
21 text that the memo we got the other day about

1 space shown anywhere on the ground floor is
2 limited to retail consumer service may be
3 exempted from GFA in which case the space may
4 be occupied only by retail consumer services
5 each occupying 5,000 square feet or less on
6 the ground floor and the Planning Board must
7 approve it. I just don't quite understand
8 what the intent of that is. I mean, I
9 understand that, you know, there's retail and
10 consumer services will be exempted from the
11 GFA, but I don't quite figure out what the
12 rest of this statement is going to. So if
13 you could tell me --

14 HUGH RUSSELL: It seems to be saying
15 that if you're -- it's only small or up to
16 5,000 square foot establishments that get the
17 relief from the FAR.

18 H. THEODORE COHEN: And is there a
19 rationale for doing that?

20 AHMED NUR: Or even what if there is
21 no occupancy or whatsoever, is there a

1 I limitation for how long a place would be
2 vacant?

3 IRAM FAROOQ: Say that again? I'm
4 sorry.

5 AHMED NUR: In order for it to
6 qualify, for example, are you saying that
7 only if the area's occupied by retail then
8 they -- and it's less than 5,000 square feet,
9 then they qualify?

10 IRAM FAROOQ: Yes.

11 AHMED NUR: Okay.

12 IRAM FAROOQ: Yes, should I answer
13 everything together or do you want me to go
14 now?

15 HUGH RUSSELL: Sure.

16 IRAM FAROOQ: All right. So I'll
17 start with Ted's question about what this
18 means, and I think Hugh explained as well
19 that it's for the 5,000. It essentially says
20 small stores are exempt recognizing that
21 maybe less -- there's a strong theme that

1 we've heard in Kendall Square, a desire to
2 see local, independent retailers, and the
3 retail that is most cherished is, you know,
4 the retail on Third Street as opposed to the
5 retail on Main Street across from the T or in
6 the food court. So that distinction, I mean,
7 of course a food court could -- each of the
8 individual entities are pretty small, but
9 this was just a proxy to try and think of
10 what's the right number at which the space
11 starts to be less appealing to a larger
12 chain. But maybe 5,000 is -- we've been
13 thinking in Central Square is maybe too
14 large. We've been thinking of less than
15 1,000 even in Central Square. So perhaps
16 that number is fluid.

17 H. THEODORE COHEN: Just curious,
18 the highly desired grocery and pharmacy --

19 IRAM FAROOQ: Yes.

20 H. THEODORE COHEN: What size do
21 they typically end up being?

1 IRAM FAROOQ: They are significantly
2 larger. And I think that you mentioned a
3 really good point, maybe we should say that
4 we allow such an exemption. We were worried
5 at some point that it gets to be too big of
6 an exemption, but maybe we do allow the
7 exemption for things that are really needed
8 like a grocery store and a pharmacy.

9 So then --

10 PAMELA WINTERS: I ram?

11 IRAM FAROOQ: Yes.

12 PAMELA WINTERS: Can I ask you a
13 quick question? When you said nobody
14 mentioned -- none of the residents mentioned
15 grocery and pharmacy, did they not mention it
16 because they didn't --

17 IRAM FAROOQ: No, they all mentioned
18 it.

19 HUGH RUSSELL: They all mentioned
20 it.

21 PAMELA WINTERS: Oh, I'm sorry, I

1 mi sheard you. I'm sorry. Sorry.

2 IRAM FAROOQ: We also heard bakery,
3 but we think bakery will fit in the rest of
4 the categories more easily.

5 PAMELA WINTERS: Okay.

6 IRAM FAROOQ: So, should we force
7 retail on Broadway because it's going to be
8 one sided? And we actually had a lot of
9 discussion on this topic because our retail
10 consultant on the team felt that Broadway is
11 suboptimal location for retail for exactly
12 the reason that you cited. But then in
13 further discussions at the committee it was
14 like well, maybe you do want some measure of
15 activation on Broadway even if you've kind of
16 lost one side, you at least want to try to
17 claim the other side of some activity there.
18 So that's where -- why this requirement is
19 here. We've been talking to Boston
20 Properties during the process and a little
21 bit subsequently about some small, really

1 small in-fill retail. They're starting close
2 to where the new Microsoft entrance is and
3 they're exploring how they might be able to
4 kind of retrofit in between the mechanical
5 and the front of that building on the Main
6 Street side, some little kiosk type retail.
7 So there is a longer term opportunity that
8 created edge might have some little, maybe
9 not even permanent, but some temporary kiosks
10 or carts or something. So we just wanted to
11 leave, to try to have an exploration of those
12 ATS.

13 AHMED NUR: One possible problem
14 with having -- I know there was a Bank of
15 America kiosk that I used to stop in that
16 corner just before I crossed the river.
17 Parking is an issue and I wondered if along
18 those lines if there are meters would be
19 there because I just -- I know there's a big
20 parking lot but it's for most of the people
21 if they just want to run in and out. I

1 wonder why there's no meters to start with
2 along Broadway? Because that might encourage
3 that type of a --

4 IRAM FAROOQ: You know, Broadway is
5 being redone. And I have to say that I don't
6 know. Not on Broadway. Yeah, I just think
7 there's not enough right of way to add
8 parking in there. Plus the whole focus of
9 the Kendall Square Zoning is to create a
10 place that is extremely walkable, and the
11 idea is that most people would be coming here
12 by T, be walking or biking rather than
13 driving to the retail establishments.

14 AHMED NUR: Right.

15 IRAM FAROOQ: So that's the --

16 AHMED NUR: Except we could never
17 stop people from driving and leaving their
18 blinkers on and running in and out, so on and
19 so forth.

20 IRAM FAROOQ: Yeah.

21 I totally agree with you that the

1 40-foot depth is probably excessive and maybe
2 we should notch it down. We were
3 particularly thinking about it after the
4 Planning Board walk where you talked about
5 the Flour edge. So I think we can certainly
6 notch it down.

7 Does anybody have a thought of what
8 might be a more appropriate number? Is 20 a
9 better for an average? Or is it 30 so that
10 you could have some that are 20 feet deep and
11 some that are deeper?

12 HUGH RUSSELL: Well, some of this
13 relates to the notion are these going to be
14 guidelines or are these going to be
15 requirements? Because if they're guidelines,
16 then you can say you want a significant
17 amount of 40-foot deep space, but you know,
18 it could be a balance of shallower spaces.
19 When you're laying out a building, it's
20 challenging. I just, you know, I'm designing
21 a retail frontage in a new town right now and

1 I have to get -- I've got, you know, 40 feet
2 for most of it, but I needed some stuff that
3 I had to put in to cut some of this to 20
4 feet. Now, I don't want to get, you know, it
5 was just like well, when you plan a real
6 building, you have these kinds of
7 constraints.

8 IRAM FAROOQ: Actually, these
9 bullets are intended to apply to two
10 different categories. One is the required
11 retail, and then the second is the exempt
12 retail. So I would say we had intended it to
13 be requirements, particularly thinking about
14 the exempt retail, that you want to have some
15 clear definition of what you're exempting
16 before you -- so that people aren't just
17 doing some --

18 HUGH RUSSELL: Retail wallpaper.

19 IRAM FAROOQ: Yes.

20 So that was the intention, but I guess
21 we don't -- neither the committee nor staff

1 feel strongly that it has to be requirements,
2 right? I'm speaking for others, so jump in
3 if I say something you don't agree with.

4 ROGER BOOTHE: I agree. I'm
5 concerned about the requirement for the exact
6 reason you cite. I think really it's clear
7 that the committee very strongly wants it,
8 but we also have to be careful we don't set
9 up something in East Cambridge that's going
10 to be a failure. Who wants a failure? I
11 don't believe we had a minimum depth in the
12 ECaPs retail.

13 IRAM FAROOQ: No.

14 ROGER BOOTHE: And that seems to
15 work well.

16 IRAM FAROOQ: Yes.

17 ROGER BOOTHE: I don't know if Brian
18 has feelings about that or --

19 BRIAN DACEY: Nothing other than
20 what's already been said.

21 IRAM FAROOQ: And so that's

1 feasible. And I think the deleting minor
2 totally makes sense.

3 And we were thinking that maybe in the
4 required section it could be the set of
5 categories that we talked about for Mass.
6 Ave., North Mass. Ave. So it isn't just
7 traditional retail but it includes like a
8 dental office or a chiropractor or something
9 like that in that range just to give some
10 flexibility.

11 HUGH RUSSELL: At no time could the
12 retail be more than 50 percent banks in the
13 entire district.

14 IRAM FAROOQ: Yeah, maybe that is
15 something to worry about.

16 HUGH RUSSELL: I tend to think
17 that's a temporary phenomenon. Not that
18 banks are temporary, but I don't think we're
19 going to be using banks -- people don't go
20 into the buildings now, they're always pretty
21 empty. And at some point --

1 H. THEODORE COHEN: I think that's
2 true, but my understanding is that a lot of
3 the banks are not there for customers, but
4 are just there as an advertisement and so I
5 am not so certain that, you know, with the
6 changes in banking they will whither away and
7 die like the cellphone stores and the record
8 stores.

9 HUGH RUSSELL: I'm aware of a bank
10 in Harvard Square that has an absolutely
11 prime location, or the location that is
12 relocating to a B location. And hopefully
13 their frontage will be more serving people.

14 IRAM FAROOQ: So, I'll turn it over
15 to Chris Cotter our director of housing to
16 talk about the housing provisions.

17 STEVEN WINTER: I don't want to
18 leave the active ground floor. I have one
19 comment, Mr. Chair.

20 HUGH RUSSELL: Sure.

21 STEVEN WINTER: And it's not

1 something that requires a dialogue but I
2 wanted to bring it up. The strategic
3 marketing/leasing plan which is the bullet at
4 the bottom of page 2 of 7. I think if we're
5 going to say that we are going to provide
6 ongoing review of this activity, that we have
7 to be absolutely certain that we've got this
8 capacity in the Community Development
9 Department. And we mentioned specifically
10 the economic development division, and I
11 don't believe that we have. I could be
12 wrong. But the Board needs very strong staff
13 guidance to make defensible decisions on
14 this. And I think also the proponents need
15 -- businesses need very strong staff support
16 of somebody who really understands the issue
17 and is working with them. So I just want to
18 put that on the table, Iram.

19 I RAM FAROOQ: That's a good point.

20 CHRIS COTTER: Good evening.

21 So I'm going to talk a little bit about

1 the middle income housing recommendations and
2 the Kendall Square Committee recommendations
3 just to talk about middle income housing. To
4 talk about middle income housing, the
5 recommendations are to talk about housing for
6 families in the 80 percent median to 120
7 percent median which is typically how we
8 would see the middle income band of
9 households within the programs, housing
10 programs within the city. This is a range
11 that is slightly above households that are
12 eligible for typical affordable housing which
13 tends to be affordable to households that are
14 under 80 percent of median. Those are the
15 developments that are created with public
16 funding, tax credits, low income housing tax
17 credits, other public sources from the state,
18 federal sources like the community
19 development block grant which are home funds
20 which the city receives as part of its annual
21 funding. And funding that is developed by

1 housing trust which CPA funds which leverages
2 a lot of that funding. There is a gap there
3 for folks who are over the incomes necessary
4 for the typical affordable housing programs
5 who are still not able to afford a lot of the
6 housing in the market. And I think most
7 notably in the Kendall Square area when we
8 look at rents and that across the city, some
9 of the highest rents we see are in the
10 Kendall Square area. So I thought I'd just
11 start with giving you some quick numbers to
12 tell you -- give you an idea of what we're
13 talking about in the 80 to 20 percent median
14 range. So for a family of four, it would
15 span from roughly \$78,000 a year in annual
16 income to \$117,000 a year. That would be the
17 low at 80 percent just above eligibility for
18 traditional programs up to 117,000 which
19 would be 120 percent of median which is the
20 upper limit of what we're talking about here
21 in these recommendations. So that's 78 to

1 117 for a family of four.

2 For a single person it is roughly
3 55,000 to 82,000 would be that 80 to 120
4 range. So and then to give you a little bit
5 on the housing market, rents are as high as
6 we have ever seen them. They tend to -- they
7 seem to be flat, although ticking up. And
8 we're seeing a lot of development, as you all
9 know, around the city, a lot of rental
10 housing which tells you there's a strong
11 rental market. Rentals are very, very
12 strong. In our last analysis of the asking
13 rents to get a sense of what someone looking
14 for housing might be facing, we do an
15 analysis of listings, buildings, try to
16 understand what someone might be facing with
17 the asking rents. And we found that they're
18 not affordable to certainly folks under 80
19 percent. But at the larger size units, three
20 bedrooms and two bedrooms and again certainly
21 in Kendall Square, we're talking about the

1 highest part of the market. Not affordable
2 to folks in the 80 to 120 range as well. So
3 what we found is the median asking rent for a
4 one bedroom was roughly 2300 a month, 2575
5 for a two bedroom, and 2750 for a three
6 bedroom. This is an analysis that's done
7 city wide. So it incorporates all
8 neighborhoods, all types of housing. When we
9 look at the Kendall Square market in more
10 focus, we find rents are substantially
11 higher. You tend to have new buildings there
12 with higher rents. You've got nicer
13 amenities in a lot of those buildings. It is
14 a very small sample so it's hard to say with
15 a great degree of confidence that this is
16 the, you know, actual market. When you look
17 at the buildings, the rents may be 20 to 30
18 percent higher than what we're seeing even in
19 our city-wide analysis. So the idea behind
20 the recommendation was to try to incorporate
21 some housing there that would ensure a

1 diversity of household in these buildings in
2 much the same way that the city's
3 inclusive Zoning Ordinances has ensured
4 that there is a component of low and moderate
5 income housing in any new element over the
6 last 10 or 15 years. That's worked very well
7 and it has produced almost 600 units now that
8 are done under construction and we would
9 propose to implement this in much the same
10 fashion. You know, the details I guess
11 somewhat need to be worked out.

12 So I guess walking through the
13 recommendation to give you a sense here, so
14 what we are looking at would be in buildings
15 that exceed 250 feet in height, that -- so
16 here we are. So buildings over 250 feet
17 would then be required to include a component
18 of middle income affordable housing. And
19 that component would be a size based upon the
20 amount of building based on the 250-foot
21 limit. It would be based on a 25 percent, a

1 25 percent of the GFA over 250 feet. The
2 units themselves would not have to be located
3 in that upper tier of the building, but would
4 be scattered throughout the building. And
5 again in much the same way that the
6 inclusionary units are now located throughout
7 the building, so they would be vertical
8 diversity. They would be around the
9 building. We would look to have a typical
10 unit sample, a unit that mirrors the building
11 in terms of size. We would suggest a
12 preference or a -- a preference for larger
13 units, again, getting at the family. The
14 biggest names for middle income housing
15 across the city and really again the Kendall
16 Square, this is the most acute area would be
17 for the larger units, the two- and
18 three-bedroom units. So to the extent that
19 those are developed through this incentive,
20 that would be preferable from a policy
21 standpoint from our perspective.

1 And this would be in addition to the
2 inclusionary and incentive zoning
3 requirements which would continue to apply.
4 So there would be in these buildings an
5 inclusionary component, any building like
6 there is now and then from those buildings
7 that exceed 250 feet, there would be a
8 component of middle income affordable housing
9 in addition to that inclusionary. So that's,
10 I guess the quickest overview.

11 I am, you can tell me if I missed
12 anything. I can answer any questions or have
13 a discussion.

14 HUGH RUSSELL: So I guess two
15 questions. What proportion of the Kendall
16 Square workforce falls in this income
17 bracket? I'm guessing it's a double digit
18 number and it's somewhere maybe 20 to 50
19 somewhere in that range. And what proportion
20 of the housing would be affordable? My guess
21 is that it would be less than three percent.

1 CHRIS COTTER: Yeah.

2 HUGH RUSSELL: So I mean there's
3 like a huge mismatch between --

4 CHRIS COTTER: Yes. It's certainly
5 a supply and demand mismatch in terms of a
6 lot of folks that work in that area. You
7 know, certainly people commute from great
8 distances to work in Kendall Square, because
9 it's an area of a lot of opportunity, a lot
10 of jobs. I don't know offhand what the
11 median salary for folks working in that area,
12 but certainly any place you would have
13 business like that, you're going to have
14 folks at all ranges of the pay scale. And
15 the same way that we know the low and
16 moderate income housing is there supporting
17 the service level jobs in those buildings.
18 The services in the community. The middle
19 income units there would serve very similar
20 need, albeit a slightly higher income level.
21 As far as the housing affordability, again,

1 i t' s di ffi cul t to say because there' s not a
2 l ot of bui l di ngs i n Kendal l Square now.
3 There' s sti ll -- there' s a l ot more housi ng
4 than there has been, but i t' s not l i ke we
5 have a ci ty-wi de sampl e that we coul d say
6 thi s i s reall y telli ng us what that i s. When
7 you ask what the aski ng rents are i n that
8 area, they are si gni fi cantl y hi gher than what
9 they are i n the rest of the ci ty. You know,
10 l ooki ng at some of them I don' t want to use
11 al armi st tacti cs, but there are, you know,
12 l i sti ngs that are 50 percent hi gher than you
13 see even wi th our medi an -- our anal ysi s of
14 medi an aski ng rents. And I thi nk
15 parti cul arl y the tal l er bui l di ngs where you
16 have premi um rents wi th uni ts on upper fl oors
17 where they have the vi ews.

18 HUGH RUSSELL: I went on the
19 Watermark websi te and I saw rents over \$4,000
20 a month.

21 PAMELA WI NTERS: For how many

1 bedrooms, Hugh?

2 HUGH RUSSELL: Two I believe.

3 CHRIS COTTER: And we've seen rents
4 approaching 5,000 for three bedrooms and
5 admittedly there's very few three bedrooms
6 there. So it's a very niche sample.

7 HUGH RUSSELL: Right.

8 CHRIS COTTER: If you see you're a
9 family, you're not looking at that. If
10 you're earning less than \$180,000 a year,
11 it's difficult to be in that neighborhood.

12 HUGH RUSSELL: Right. So it's -- so
13 the question is is this proposal too modest?
14 That's what I look at it and think very few
15 of the people who work in Kendall Square can
16 actually afford market rate housing because
17 the market rate housing is so expensive. I
18 mean, part of it, it's -- part of it, you
19 know, rents are demand driven as much as
20 anything, so -- and if you manage rental
21 property, you try and get the best rents you

1 can for your property unless you, you know
2 have people saying well, you can't do that.
3 Let the rich folks partially subsidize the
4 people who can't, don't have as much money
5 and that's like the backbone of the state's
6 40-B program say for example. And the
7 backbone of our inclusionary program.

8 CHRIS COTTER: I say, and I say that
9 those have worked well certainly in
10 Cambridge. I think insofar as whether this
11 is a modest step? You know, maybe it's a new
12 step. We've seen it work case by case. The
13 permits, some of which you've approved. I
14 think with this, it's also trying to strike
15 the balance between ensuring that housing is
16 built overall, and that when that housing is
17 built, that there is a component of middle
18 income affordable housing to ensure a mix of
19 incomes throughout the building, but I think
20 not losing sight of also wanting to make sure
21 there's enough of an incentive to build

1 housing so you can get the middle income
2 housing in these types of buildings.

3 IRAM FAROOQ: Can I jump in?

4 CHRIS COTTER: Yes.

5 IRAM FAROOQ: I guess two other
6 things that -- I mean, two things that relate
7 to this. One is that people have talked a
8 lot about the notion of microunits which I'm
9 sure that you've been reading about lately in
10 the planning arena a lot about a lot of
11 cities are starting to allow smaller and
12 smaller -- progressively smaller units
13 recognizing that there is this gap between
14 what people can afford and what the market is
15 demanding. And so -- and also a lot of the
16 people who make, who are in this middle
17 income tier are young and working all the
18 time and are starting out and they're in
19 their lives and maybe don't need to be in a
20 place all of the time. So this is one of the
21 provisions that didn't make it -- I mean,

1 that is a recommendation of the committee,
2 but didn't make it into this sheet, is the
3 idea -- because we were focusing on middle
4 income, is to remove hurdles to the creation
5 of microunits. Because of all the places in
6 the city, this seems like a place that would
7 be a good match for that format.

8 PAMELA WINTERS: Definitely. And,
9 Iram, I really love that idea I just want to
10 say. Because a lot of these younger people
11 who work all day, you know, they come home at
12 night, they just want a place to, you know,
13 have a quick bite to eat, you know, go to
14 bed. And these units could be sort of almost
15 like a dorm type of thing like where they
16 could make friends and it would be a little
17 minor community type of things where, you
18 know, I think it's a great idea.

19 IRAM FAROOQ: You know, we had Barry
20 Bluestone give a talk as part of the Central
21 Square Advisory Committee process because

1 middle income housing is a big focus in that
2 area. And it was interesting that even
3 though we hadn't been thinking of microunits
4 as being such a big thing in Central, his
5 thesis was that for all urban areas like
6 ours, this is going to be a direction of the
7 future because people just -- like, I go home
8 just to sleep. So why do I have to clean two
9 bedrooms for no reason? So, and it's not
10 just a model that --you know, we've been
11 talking about as a model that caters to the
12 young. But in places like Central Square,
13 his thesis was that it is a model that might
14 cater to the aging population as they want
15 less space to take care of and less -- more
16 amenities from a centralized pool
17 essentially.

18 We've been joined by a number of other
19 committee members, Conrad, Kelly, Maureen, so
20 I just wanted to make sure that you know that
21 we have a bunch of people here.

1 So other thoughts on housing?

2 H. THEODORE COHEN: Why was the
3 250-foot height selected?

4 IRAM FAROOQ: So, that was through a
5 -- that's the height to which commercial
6 buildings are allowed on this proposal. So
7 the idea was that being able to go up above
8 that should be an incentive that if, limited
9 one, to housing, and two, as an incentive to
10 provide middle income housing. So you would
11 only be able to go up to 300 feet if you were
12 doing housing and only be able to go up --
13 only be able to access that if you had the
14 middle income components.

15 H. THEODORE COHEN: But I'm sorry,
16 so you could only go above the 250 in a
17 residential if you had middle income?

18 IRAM FAROOQ: Correct.

19 H. THEODORE COHEN: All right.

20 Now if it's a good idea, 250 isn't it a
21 good idea to lower heights, too?

1 IRAM FAROOQ: It would be, but we
2 were just trying to do the math on the
3 incentive. So saying that the -- being able
4 to go higher than commercial buildings is
5 essentially the incentive. So you do the --
6 so we ran the math on that. And I think just
7 to get to also the why is it so modest?
8 Well, actually a little bit is that there's,
9 you know, unlike affordable housing where we
10 have a lot of mechanisms to support it
11 financially, tax benefits as well as state
12 programs, there really isn't any such
13 mechanism for middle income. So it would be
14 totally a subsidy -- a cross-subsidiation
15 across the building. It seems like a
16 challenging piece and we weren't -- to be
17 honest we weren't quite sure where that
18 tipping point might be. So we figured that
19 something that in conversation with the
20 committee which had several developers,
21 seemed like a potentially -- I mean, I think

1 it was more us pushing than them saying this
2 is a great idea. But, you know, it sort of
3 seemed like a balance, a point of balance.
4 And also talking to Chris's team.

5 H. THEODORE COHEN: A follow up on
6 that is what happens if these buildings turn
7 into condos?

8 CHRIS COTTER: If the buildings are
9 turned into condos, we would work with the
10 owner doing that conversion to ensure that
11 the notwithstanding the change in tenure
12 that the units remain affordable to
13 households in that income range and we would
14 change the (inaudible) restrictions to
15 reflect the limited equity provisions of the
16 home ownership program within those income
17 requirements as opposed to the rental
18 restrictions.

19 THOMAS ANNINGER: Maybe you could
20 explain how do these rental restrictions
21 work? I don't quite understand. Once you

1 have these units, who manages them and how?
2 How do the rents -- how do you arrive at
3 rents?

4 CHRIS COTTER: Sure. Well, again,
5 this is something that we would envision
6 running very similar to how we measure the
7 inclusionary program which has got the same
8 type of requirements which has the lower
9 income eligibility limit. So in practice
10 those units are accessed through CDD, and we
11 work with owners of rental buildings that
12 have those units to refer to them, eligible
13 tenants are eligible applicants for them to
14 consider for housing. When they approve an
15 applicant, we will then determine what the
16 rent is based upon 30 percent of that
17 applicant, that tenant's income. So that
18 becomes the rent and it's somewhere in the
19 range of eligibility. So in this case it
20 will be rent based somewhere between 80 and
21 120 percent depending on the applicant's

1 income. We would then work with the tenant
2 and the manager over time on an annual basis
3 as the lease is turned over to recertify
4 income eligibility and calculate what the new
5 rent would be to ensure that the tenant
6 remained eligible for the housing. Again,
7 remain within that income range.

8 THOMAS ANNINGER: And this is how
9 incentive housing --

10 CHRIS COTTER: This is how
11 inclusionary housing works --

12 THOMAS ANNINGER: Inclusionary
13 housing works for the whole thing?

14 CHRIS COTTER: Yes.

15 THOMAS ANNINGER: And this doesn't
16 have any issues to do with rent control?

17 CHRIS COTTER: No.

18 THOMAS ANNINGER: And why is that?

19 CHRIS COTTER: Why is it?

20 THOMAS ANNINGER: Why does it not
21 touch on the issue of rent control?

1 CHRIS COTTER: Well, I think there's
2 not a main sense of rent control. And this
3 is a housing that has a continual means that
4 folks remain eligible for it and a need for
5 that. In fact upon recertification it's
6 found that your income has increased, we will
7 then work with you to help you then
8 transition into a market unit as opposed to
9 remain in that unit so the unit can be made
10 available to an income eligible household.

11 ROGER BOOTHE: I think another
12 aspect of this is there's a bonus given so
13 that when you're doing affordable units,
14 you're given bonus for --

15 CHRIS COTTER: As far as
16 inclusi onary, yes.

17 ROGER BOOTHE: As far as
18 inclusi onary. So in rent control they know
19 as an application on that particular set of
20 housing that doesn't have any sort of
21 incentive.

1 CHRIS COTTER: Yeah. There's a
2 bonus here -- there's bonus inclusionary that
3 offsets the cost of producing and operating
4 the affordable. And in the case of the
5 proposal here, what there would be, there
6 would be an option incentive for developers
7 who want to build to that height, over 250
8 feet. In order to exempt them to do that,
9 there would be this additional 75 percent of
10 anything over 250 feet which would be market
11 rate housing which would help us, any
12 subsidy, internal subsidy necessary to make
13 an affordable use.

14 THOMAS ANNINGER: I guess you're
15 putting this the way Iram puts it as an
16 incentive. I guess the other side of that is
17 the question is this a disincentive to go
18 above 250 feet?

19 CHRIS COTTER: Well, I think that
20 gets into the balance of the incentive versus
21 it being too modest. You know, that's again

1 trying to --

2 THOMAS ANNINGER: Or is it too much?

3 HUGH RUSSELL: So you --

4 IRAM FAROOQ: It's just right.

5 CHRIS COTTER: Either way.

6 HUGH RUSSELL: So you would -- when
7 a developer looks at housing, he does a
8 financial model that takes into account what
9 he thinks he can get for rent. And so under
10 this scheme he could study it at, you know,
11 250 feet and he can see what, given the costs
12 and the rents that he can get, what it would
13 be feasible or if he puts on another five
14 floors and has to drop his rents in three
15 percent of his units, how does that pencil
16 in?

17 CHRIS COTTER: Right.

18 STEVEN WINTER: That's where the
19 profit is.

20 HUGH RUSSELL: And -- well, I mean
21 there's tremendous amount of wishful thinking

1 about what the rents will be when the time
2 comes to rent the building because nobody
3 knows. It takes several years to build a
4 building. And so I work for a fairly
5 conservative housing developer, and he keeps
6 bidding on land and he keeps losing the bids
7 because he has an idea of exactly what it's
8 going to cost and he manages 20,000 units all
9 over the region. He has a pretty good idea
10 of what he can get for various things. And
11 so he gives -- he bids to buy land at certain
12 prices to get control of sites at certain
13 prices and he doesn't win very many because
14 he knows too much. . And somebody who
15 doesn't is more hopeful than he is, offers
16 more and sometimes they fail and sometimes he
17 picks up, you know, he's standing in line.
18 But it's a very American process as people to
19 try to figure things out and see if they
20 work. Most developers try to make projects
21 bigger if they can because the bigger the

1 project is the more some of the very fixed
2 costs can get amortized over. So that's why
3 this theory should work.

4 CHRIS COTTER: I'd say that that is
5 the idea and in that acknowledging that the
6 additional density that you're allowing to be
7 built over 250 feet is some of the most
8 premium units in terms of what the income is.
9 And then the fact that the middle incomes are
10 located throughout the building, really gives
11 you everything over 250 feet. You know, say
12 for maybe a component of inclusionary
13 affordable piece that might be in there to
14 offset any internal subsidy for the middle
15 income units. The idea that you are
16 building, you know, within an economy of
17 scale. The other thing I'd say is that, you
18 know, as far as, you know, what the
19 requirements are, they'd be predictable so
20 that developers would be aware of that going
21 in and be able to run their numbers knowing

1 how we would look at that requirement, be
2 able to really make sense of whether that
3 incentive would make sense and make their
4 decisions accordingly. It wouldn't be we'd
5 figure it out later. It would be something
6 that they could know and find that that's a
7 very important thing to development when
8 running the numbers is that they know what
9 range they're going to be in.

10 PAMELA WINTERS: Hugh, just a quick
11 -- also, these recommendations they're not
12 really written in stone. And as time goes
13 along, you know, we can sort of, you know,
14 start at this point and then, you know, sort
15 of see what the requirements are, what the
16 tenants -- how the economy is doing. You
17 know, a lot of things could change. And, you
18 know, we could certainly revisit it and, you
19 know, start at a certain point and revisit it
20 as time goes on. I suspect that things will
21 change as time goes on.

1 CHRIS COTTER: That's a very good
2 point. And certainly this is an idea that
3 we're putting out to have a discussion with
4 the Board, with the Council, with the
5 community. The other thing that's worked
6 very well in that regard with the
7 inclusionary is to have the Affordable
8 Housing Trust involved from a policy
9 perspective. Helping us to administer the
10 program, set standards and policies, answer
11 questions like that that come up from time to
12 time. So that's something that I think we
13 would recommend as well.

14 STEVEN WINTER: Mr. Chair. First
15 thing I want to do is something that I wanted
16 to, Brian, compliment the staff on these --
17 both of these memos, this one and the one
18 before. They're -- the layout is perfect.
19 The information is great, easy to read, easy
20 to digest, and it contains a lot of content,
21 too. Content rich.

1 In the location of middle income
2 housing we're saying although the required
3 amount of housing is based on the height,
4 middle income dwelling units may be located
5 anywhere within the PUD with Planning Board
6 approval of the location. And I'd just like
7 to make sure that we have some criteria
8 somewhere that talks about where our
9 defensible decision is in making those
10 assessments.

11 And then in the diagram, which is very
12 interesting, No. 3 says: Middle income
13 housing may be distributed throughout the
14 project. I don't think there's anybody wrong
15 headed enough now to want to put all of these
16 units on one floor or next to each other, but
17 should we say that these must be distributed
18 throughout the building as opposed to may?
19 You know, just so that we don't have to run
20 into that.

21 And also I want to mention the

1 micro-housing issue. The Cambridge
2 Innovation Center has these terrific units
3 called Unos. And Unos are very affordable
4 Kendall Square addresses for entrepreneurs
5 who are moving in different directions and
6 may require for a short or a long period of
7 time, we just don't know. I think that the
8 micro-housing option is one we should
9 certainly keep our eye on and not make a
10 judgment on -- based on our own cultural or
11 lifestyle preferences but that may be okay
12 for somebody who wants to have that. So I
13 think we should keep our eye on it somehow.
14 And that was it.

15 CHRIS COTTER: Right. I would say
16 that the micro-housing -- I think if -- it's
17 a good point because the micro-housing as far
18 as what you have and how the community is,
19 not that different than many of the SRO
20 projects that we call from years past. The
21 model and the type of community that you

1 might find in that is certainly some that we
2 see effective in other areas.

3 HUGH RUSSELL: Ahmed.

4 AHMED NUR: Yes, just a quick
5 question.

6 The proposal requirement on bullet 1
7 over here it says that -- 30 percent, and
8 that the cost of the unit must not exceed 30
9 percent of the household income.

10 Have you ever come across a place where
11 it's less than 30 percent? I mean, the
12 developers just going to maximize the 30
13 percent of the household income?

14 CHRIS COTTER: Well, there are
15 certainly examples of people that are paying
16 more than 30 percent of their income for rent
17 or for housing.

18 AHMED NUR: Right.

19 CHRIS COTTER: And in fact the
20 numbers are kind of staggering when you look
21 at the number of people that are cost

1 burdening for the people that are paying more
2 than 30 percent. You know, I don't know
3 offhand what the data would be on that, but
4 certainly I could.

5 AHMED NUR: Well, yes -- no, I'm
6 just saying why don't we just call it what it
7 is and let it be 30 percent?

8 CHRIS COTTER: To call it --

9 AHMED NUR: To call it 30 percent
10 because the developers can then say I'll
11 charge you 10 percent; right?

12 HUGH RUSSELL: But you're going to
13 be setting the rents; right?

14 CHRIS COTTER: Well, you know, I
15 should say, you know, there are examples
16 where we have been able -- we've had
17 situations where we were able to work out
18 with developers where there have been
19 hardships and we've been able to make that
20 work. But point taken 30 percent, 30
21 percent.

1 AHMED NUR: Right. And speaking of
2 working out, are there any language with
3 regards to amenities for people who pay 100
4 percent parking and what not?

5 CHRIS COTTER: That's a really good
6 question. I don't know that we've talked
7 about that in detail.

8 IRAM FAROOQ: Yes, it would be the
9 same. Just like the inclusionary model.

10 CHRIS COTTER: Absolutely. So yes,
11 I would expect that we would treat it the
12 same as inclusionary. The provision in the
13 inclusionary ordinance. Other amenities I
14 presume we'll handle the same way as far as
15 that.

16 AHMED NUR: Yes.

17 HUGH RUSSELL: Thank you.

18 IRAM FAROOQ: All right. So on to
19 item 3 which is the startup space provision.
20 And much like, this is actually almost like
21 middle income housing, but for businesses. I

1 guess that's my not so great analogy. But --

2 HUGH RUSSELL: This is

3 micro-housing.

4 IRAM FAROOQ: That's right.

5 And you all probably read over the last
6 -- well, today this morning there was an
7 article about how Cambridge is at the top in
8 the entire region in terms of venture capital
9 funding and it's beating out Boston and it's
10 beating out the 128 corridor. And one of the
11 venture capital partners was quoted as saying
12 that Cambridge has the benefit of the
13 universities with many start-ups that are
14 started by students and a great density of
15 office and lab space. And that is the most
16 appropriate infrastructure for start-ups.
17 And the action is really where the young
18 entrepreneurs are.

19 And so given that as being such a
20 driving force in an innovation district, I'm
21 sure that everybody has also read articles

1 over the past few weeks about how the
2 start-ups are getting priced out of Kendall
3 Square. So this is an attempt to try to make
4 sure that over time we retain a presence of
5 an office model that really is designed to
6 appeal to and serve start-up businesses. And
7 that is also the area where the greatest
8 amount of innovation happens.

9 So the proposal here is that all --
10 five percent of all office space that is
11 created under any PUD would be devoted to
12 this start-up space. And then we have a
13 definition for what is start-up space. Thank
14 you, Roger.

15 HUGH RUSSELL: Do you happen to know
16 what is office space?

17 IRAM FAROOQ: I'm sorry of what is
18 start-up innovation space.

19 HUGH RUSSELL: My question is --

20 IRAM FAROOQ: We reduce the office
21 and the office are in de-categories in the

1 Ordi nance.

2 HUGH RUSSELL: Okay.

3 IRAM FAROOQ: Yes.

4 So the one thing that is new here
5 beyond what we had talked about with the
6 commi ttee is that we figured we shoul d thi nk
7 about what if there is some benchmark above
8 whi ch thi s appli es and not to -- whoops, and
9 not to all devel opment. So we' ve proposed a
10 -- it' s not here, but it' s in the text. We
11 proposed that thi s appli ed to PUDs that
12 contai n at least 200,000 square feet of
13 offi ce space. Now that we will have to make
14 sure we wri te l anguage so that it' s not, so
15 that peopl e aren' t breaki ng up thei r PUD area
16 i nto projects that are, you know, 190,000
17 square feet, but that it woul d be an
18 aggregat e over the PUD di stri ct. And then we
19 al so, si mi lar to retail , we put i n a
20 provi si on that 50 percent of the space --
21 sorry, it' s not -- 50 percent of the space,

1 of the innovation space is exempt from being
2 counted as GFA. This is incorrectly stated
3 in the memo that you have as a hundred
4 percent of that innovation space. So I just
5 wanted to point that out specifically as a
6 correction, just because this could total to
7 a more significant amount than the retail.
8 And also I think people will be making
9 potentially more of a return on the start-up
10 space than they might be on the retail, which
11 is really often a lost leader for folks.

12 And then that would be capped at -- the
13 exemption would be capped at five percent
14 non-residential GFA. So meaning that if 10
15 percent of their office space was -- if they
16 did twice as much as they were required to
17 do, they would get five percent of that
18 office space. But people certainly could do
19 more if they so desired.

20 HUGH RUSSELL: And this wouldn't
21 apply to academic buildings because they're

1 on different line items on the Ordinance?

2 IRAM FAROOQ: Correct. It would not
3 apply to academic buildings.

4 So then here is the series of
5 definition for what constitutes start-up
6 innovation space. And we essentially had to
7 -- we found we had to work with Brian and Tim
8 and Tim helped us convene a group of people
9 who run innovation spaces in this area. So
10 we were able to pick many brains to come up
11 with this definition that essentially focuses
12 on flexibility for the tenants and makes sure
13 that a bulk of it is shared space so that you
14 have very short term leases and that the
15 average space that's occupied by companies --
16 so you're targeting smaller entities, the
17 average space is 200 square feet or less.
18 And also that less than 10 percent of the
19 space could be leased by any one company, so
20 that even if you do have some large entities,
21 that they are not taking up the bulk of the

1 space.

2 And then finally that at least half of
3 the space would be used for co-working and
4 shared common areas. So not even the Unos
5 but kind of like the big table, I don't know
6 what the -- what that's called. The big
7 tables where you bring your laptop and you're
8 sharing that space as well as, you know,
9 kitchen areas and common gathering spaces.

10 AHMED NUR: Like Darwin's.

11 IRAM FAROOQ: I'm sorry?

12 AHMED NUR: Darwin's is known for
13 that. Like the couches and the big tables.

14 IRAM FAROOQ: Yes, exactly.

15 Exactly, right.

16 And then some flexibility in terms of
17 where this is to be provided. Because we --
18 one of the things that Tim particularly
19 mentioned to us, that there is economy of
20 scale is very, very important in these, in
21 this particular model, and so not only did we

1 say you want to be in at least 20,000 -- pods
2 of at least 20,000 square feet, but put in an
3 incentive, I mean not an incentive but in a
4 criterion that says you can combine with
5 adjacent PUD districts to create a
6 consolidated area. So which would hopefully
7 -- I could see that it would be really hard
8 to implement, but it could work that it would
9 be very much easier in terms of the
10 management of the space and the effectiveness
11 of it.

12 HUGH RUSSELL: So that might come
13 into play for Boston Properties that might be
14 doing relatively little commercial
15 development or it might allow the DOT site to
16 be developed in smaller pieces.

17 IRAM FAROOQ: Exactly. Or if, you
18 know, MIT decided that they would dedicate
19 all of One Broadway to this space. They
20 could essentially work out partnerships with
21 all the other districts and be able to

1 accommodate as one giant innovation space.

2 And then let's see, what did I miss?
3 Just the fact that there would be a reporting
4 requirement, again, to just make sure that
5 these criteria were being met over the long
6 term and that you didn't over, you know, five
7 or ten years find that they were just turning
8 into regular office space.

9 HUGH RUSSELL: So the most important
10 question I have is Tim, is this right?

11 TIM ROWE: This is terrific. And I
12 will tell you that I reached out to -- we
13 have four other companies besides Cambridge
14 Innovation Center in Kendall Square that do
15 this work, competitors if you will to us, and
16 I reached out to all of them and I said
17 look --

18 AHMED NUR: I'm sorry, could you
19 come and use the microphone and state your
20 name?

21 TIM ROWE: Oh, I'm sorry. Oh, I'm

1 not familiar with the process here.

2 So we reached out to all the players
3 that are doing this in Kendall Square and we
4 drafted this so that it works for everyone's
5 model, not just, to be clear, not just for
6 Cambridge Innovation Center. We have a
7 letter that you have before you signed by all
8 of us supporting these criteria.

9 H. THEODORE COHEN: I have a quick
10 question. The idea that leases must not be
11 longer than one month, what if parties do
12 indeed want something longer than a month?

13 TIM ROWE: So, if you don't restrict
14 that, then I think you'll find that landlords
15 would much prefer a long-term lease and would
16 simply require it.

17 H. THEODORE COHEN: Right, I
18 understand that.

19 TIM ROWE: I will say that Amazon
20 for instance recently set up a small space in
21 Cambridge Innovation Center, and has a one

1 month lease and accepted that. So you will
2 occasionally get a bigger company that will
3 be willing to accept that. We haven't had
4 any smaller companies object to the short
5 term.

6 H. THEODORE COHEN: I mean, my
7 concern is for the small company or the small
8 person who wants some security that they can
9 stay there longer than on a month-to-month
10 basis and not be at the whim of the landlord
11 who might decide, well, I'll evict you after
12 a month.

13 TIM ROWE: Right. You would think
14 that -- what I will say is that start-ups
15 universally want this everywhere I've seen it
16 in the world. They just don't have a
17 planning horizon that farther than that. And
18 it's one of the criteria that simply makes it
19 start-up space as opposed to regular office
20 space.

21 PAMELA WINTERS: So in other words,

1 after one month they can then renew their
2 lease if they wanted to?

3 TIM ROWE: Yeah, it automatically
4 renews.

5 PAMELA WINTERS: Oh, oh.

6 TIM ROWE: We have a company that's
7 been there for about ten years. And they
8 could do that just continually. But the
9 average is about 24 months which is enough
10 time to either fail or get big enough to move
11 out.

12 PAMELA WINTERS: Make or break it.

13 And, I am, I have a question for you.
14 How did you come up with the 200 square feet?
15 That's about half the size of this room?

16 TIM ROWE: 20,000.

17 PAMELA WINTERS: Oh. 20,000?

18 TIM ROWE: So the average size of
19 the suite of 200 square feet was based on the
20 analysis of, again, all of the competitors
21 currently operating. If you don't have such

1 a restriction, what you end up with is the
2 sort of 5,000 square foot things called
3 start-up space but they're not really
4 appropriate for what we think of as
5 start-ups.

6 PAMELA WINTERS: No, I was just
7 wondering why 200 and not say 300 or 100?

8 TIM ROWE: Oh. We just analyzed
9 what's actually there --

10 PAMELA WINTERS: Got it.

11 TIM ROWE: -- and said this is what
12 everybody is doing and this seems to be
13 therefore, you know, it's a practical number.

14 PAMELA WINTERS: Okay. Good to
15 know. Thank you.

16 HUGH RUSSELL: And it might be
17 rather difficult to administer, you know, if
18 it creeps up to 207, are you going to then
19 lose your PUD, you know?

20 IRAM FAROOQ: Well, actually, to
21 that point one of the things that I think is

1 not in this list but is in your memo is that
2 -- oh, no, here it is, that you can approve
3 an alternative format because this is what we
4 know now based on how Tim is functioning and
5 all the other operators are functioning, but
6 maybe in three years, you'll come up with a
7 different model or evolve this, and we wanted
8 the flexibility for you to be able to grant
9 those alternative model improvements as well.

10 AHMED NUR: Does it include the
11 average?

12 IRAM FAROOQ: The 200 is the average
13 for the privately rented suites.

14 TIM ROWE: Just the rooms
15 themselves.

16 AHMED NUR: Oh, right. Okay.

17 HUGH RUSSELL: And, again, are these
18 -- these are all in the context of a PUD
19 Special Permit?

20 IRAM FAROOQ: Yes.

21 HUGH RUSSELL: And so, it seems like

1 some of these things ought to be seen as
2 guidelines where they might be subject to,
3 you know, change particularly over time and
4 some of them are, you know, very specific
5 where you shouldn't be changing them. So as
6 -- when you put in a phrase in approving the
7 space, the Board may allow variations. You
8 have to decide what things you want us to
9 vary and those are I think the guideline
10 things. So I don't, you know, the total
11 quantity strikes me as something you don't
12 want to vary. So some of these
13 characteristics, you know, might be a reason.

14 IRAM FAROOQ: Right.

15 STEVEN WINTER: Mr. Chair?

16 HUGH RUSSELL: Yes.

17 STEVEN WINTER: I have two comments
18 on this.

19 One is the approval and monitoring at
20 the bottom of page 4 of 7. That's the second
21 bullet. Following the initial start-up the

1 devel oper shall submit annual reports to the
2 Communi ty Devel opment Department. I think
3 this is fine. I think it's great. But let's
4 make sure that we make some kind of an
5 on-line reporting system that's not onerous
6 to the proponent. As someone who does report
7 to public sector agencies, I can tell you
8 that some of those agencies are armed and
9 dangerous and ask ridiculous things. So we
10 have to be very careful on what we ask, that
11 we're being reasonable and that we really
12 need the information.

13 And the other piece is that I just want
14 to comment here, this whole innovation office
15 space piece is just as solid as a rock. It's
16 good foundation, directions, guided by the
17 success that we have right here in the city,
18 so this is just very solid piece.

19 IRAM FAROOQ: Thank you. I did want
20 to say that Tim asked if he should bring a
21 lot of people to help support this provision?

1 And I suggested that we didn't need a lot of
2 support, so...

3 HUGH RUSSELL: I think we're all
4 understanding that this is key feature.

5 TIM ROWE: If you like, we could
6 bring any number of us at any time.

7 HUGH RUSSELL: You may need to take
8 them to the big house down on Mass. Avenue.

9 IRAM FAROOQ: All right. So moving
10 on then to the Kendall Square fund community
11 investments provision. And this is intended
12 to be a way to enhance Kendall Square as a
13 whole and be able to leverage future
14 development for improvements that would be
15 hard for any one individual property owner to
16 do on their own. So the three categories
17 that particularly were pointed out, were one
18 is public open space, particularly management
19 and programming of it, and enhancing transit
20 connections. So you know Red Line is kind of
21 the heart blood of not just Kendall Square,

1 but all of Cambridge, but particularly of
2 Kendall Square. And more and more as we talk
3 about continuing the trend that we see in the
4 city of people driving less and taking
5 transit more and biking more. So transit
6 continues to be really important, but it's
7 not something that we control. So in
8 addition to working with the state, we wanted
9 to try and figure out if there are ways at
10 least in short term measures, be able to
11 support non-MBTA transit, things like the EZ
12 Ride or expand that or increase frequency to
13 it. There are connections to Kendall to make
14 a connection, Kendall to North Station
15 connection, that are really critical based on
16 data that we have received particularly from
17 the PTDM reports that people submit that show
18 us where folks are coming from and where
19 they're going to. But also it is the an
20 important connection not just going home but
21 in terms of a business connection. It's a

1 very significant one.

2 And then the final piece is workforce
3 readiness because one of the most heart
4 wrenching things about Kendall Square is that
5 it sits right next to Area 4 where most
6 people cannot hope to work in the or reap the
7 benefits of the immense wealth that gets
8 created in a place like Kendall Square, and
9 we felt that it was really important to
10 create that connection between the
11 Cambridge's innovation and business economy
12 and the community and make sure that it is a
13 two-way traffic and that there is also a
14 mechanism to supplement existing programs
15 that are run by human services. There's a
16 bring jobs program. There's also Cambridge
17 Housing Authority runs a workforce program
18 for youth. So there are school programs but
19 then this would -- there's a big gap in terms
20 of adult workforce training. So to be able
21 to use this across the board and enhance

1 those existing programs, there are many
2 things that are run by businesses. So
3 Microsoft for instance and I think also
4 Google have existing programs where they get
5 student interns, but I don't think that
6 there's anything for, as far as we could
7 tell, for adults, you know, to assimilate
8 adults and connect them to that economy. And
9 so that's part of the emphasis here.

10 So, the idea is that for all
11 non-residential development there would be a
12 \$10 per square foot payment into a Kendall
13 Square fund. And it would be a minimum of 30
14 percent to each of these public open space,
15 transit and workforce categories. And then
16 there would be oversight by a committee that
17 is similar to the CBA Committee that would
18 make recommendations to The City Manager for
19 how the money would be disbursed. We did
20 want to leave the flexibility particularly
21 for things like the open space category that,

1 you know, in-kind contribution might be
2 possible, but also wanted to make sure that
3 we don't end up double counting things that
4 you would normally ask people for. So, you
5 know, you ask Novartis to create a public
6 connection through their campus, that's not
7 something that would count towards this kind
8 of contribution, but if sort of the
9 Alexandria Park would be a situation that
10 might be an in-kind contribution. But I just
11 wanted to point out that it shouldn't, you
12 know, PTDM measures should not count towards
13 your transit enhancement, but that's really
14 the -- yeah, that's the fund component.

15 AHMED NUR: How often is the fund
16 going to be collected, monthly or yearly?

17 IRAM FAROOQ: No, no, it's a one --
18 it would be -- sorry, I think that should be
19 in there. It's a one time payment when you
20 do development. So, we've been talking about
21 what's the most logical point for the

1 payment, and building permits seemed like to
2 us the best time. But it's possible that we
3 could have some greater flexibility where
4 somebody could actually pay first --

5 HUGH RUSSELL: I'd like to speak to
6 that.

7 So when you're developing a property,
8 ultimately all your costs with paid by people
9 who pay you rent. And the rent starts after
10 the building is completed. And up to that
11 time you're borrowing money. So if somebody
12 has 100,000 square foot building, they have
13 to borrow \$1 million in addition to their
14 building permit costs at the time they file
15 for their building permit, and then they've
16 got to pay interest on it for the two years
17 of construction, so, you know, it's really --
18 it should be a -- I think I understand that
19 the -- you have the latest date that you
20 could make it which is an occupancy permit.
21 Otherwise you're just increasing the cost.

1 It's true you'll get the money sooner, but I
2 think that -- it's just not fair for a
3 developer to have to borrow money, you know,
4 for a long time under this requirement.

5 PAMELA WINTERS: That's a good
6 point.

7 HUGH RUSSELL: The other comment I
8 would make is the third bullet, the committee
9 makes recommendations on the disbursement of
10 funding to be approved by the manager. I
11 mean that's not actually the right language.
12 The manager has the authority to spend all
13 funds in accordance with appropriations by
14 the City Council by budget. Right? That's
15 how municipal finance works. Other people
16 don't decide to -- he decides. He may ask
17 for advice, and this committee is the entity
18 that gives advice and recommendations, but he
19 has the power and we shouldn't write it as if
20 that's not there.

21 IRAM FAROOQ: Okay.

1 HUGH RUSSELL: And from a
2 bookkeeping point of view, I think having
3 three things, each of which have to have 30
4 percent. So I'm asking myself, well, is that
5 going to be measured every year? And how
6 would you measure that? Would you measure it
7 over the life history of the fund? And if
8 you were using it to require open space, you
9 might like to save up say some money. And
10 you might, you know -- so I think it has to
11 be somewhat more flexible if the intent is
12 that each of these three areas achieve
13 roughly equal attention over time, that's
14 instructions to the committee essentially;
15 right? It's not -- and I don't think we as a
16 Planning Board will be monitoring that. And
17 I don't think a developer who is kicking in
18 the money would have anything to do with
19 that. So... But I don't -- wouldn't want to
20 see this language.

21 H. THEODORE COHEN: Hugh, in

1 following up your earlier comment.

2 HUGH RUSSELL: Yes.

3 H. THEODORE COHEN: -- could that 30
4 percent requirement or guideline be imposed
5 on the City Manager?

6 HUGH RUSSELL: I think, you know, as
7 a guideline, as a statement of purpose,
8 statement of intent, I don't actually know
9 how the city budget handles some of these
10 essentially trust funds. And I'm not an
11 accountant so I don't know that. It's just
12 someone takes the books of your company and
13 they could see that -- keeps the books of
14 your company. So this is a proposed
15 requirement and, again, I don't know how to
16 do this. I don't know how this works with
17 the Zoning language. And legally I know
18 there are similar kinds of paragraphs in the
19 Affordable Housing section of the Ordinance
20 that --

21 IRAM FAROOQ: Yes. We can certainly

1 work with the appropriate folks at the city,
2 but we wanted to make sure that the overall
3 principle was something that made sense to
4 all of you in terms of having the fund, the
5 logistics of how that will work. I feel
6 confident that we can figure out, but the one
7 other confounding factor is that the City
8 Council right now is also discussing their
9 community benefits strategy. And so in some
10 ways this will need to dovetail with that as
11 well as it works out.

12 STEVEN WINTER: Mr. Chair?

13 PAMELA WINTERS: Sorry, go ahead.

14 STEVEN WINTER: Please?

15 I have five points that I'd like to
16 make and I'm going to be very frank. Often
17 public sector workforce development programs
18 are not high performing programs. And often
19 their deliverables are far from high quality
20 deliverables. I think we need to be very
21 careful in attaching funds to public sector

1 programs that perhaps we're not able to
2 evaluate or provide feedback on how these
3 programs are being run. An option could also
4 be to indicate to not assign the money, but
5 to have it -- to have some kind of a
6 competitive process where both private and
7 public sector folks could in fact request the
8 money. But I think attaching a lamprey to
9 the belly of a shark is a bad idea. And I
10 really don't think we should go there.

11 IRAM FAROOQ: Okay.

12 STEVEN WINTER: The second one is
13 that the -- I think that the -- I think this
14 is a good idea by the way, but I think that
15 the Kendall Square fund that we need to be
16 very, very thoughtful as Cambridge is, about
17 how we populate this committee. And I think
18 we need to be careful not to have geographic
19 restrictions. I just think we need to be
20 very, very thoughtful about who this
21 committee is so that it's a high functioning

1 committee making good, clear decisions and
2 always has enough of a critical mass to make
3 it work.

4 And I also think that the staff role
5 needs to be very, very clear. What is the
6 role of the staff on this committee? Is it
7 to staff, is it to recommend, what is that
8 role?

9 And also I think that the in -- kind
10 contribution is a blessing in disguise. We
11 can see some innovative contributions if we
12 open that door and allow it to be used. You
13 are correct that the word that they use
14 actually at the federal level is that when
15 the Feds give you money, they say this money
16 will supplement, not supplant. And I think
17 we need to be careful that these kinds of
18 contributions supplement not supplant the
19 original assessment, what we're talking
20 about.

21 And the last piece is that I, I'm just

1 not sure I like the 30/30/30 and I don't know
2 if there's other options, but I -- and I
3 don't know how the committee came to these
4 decisions, but I just am not sure that --
5 that it just seems that it's an inflexible
6 piece and it may get in the way of long range
7 strategic planning of when to do things.
8 Maybe the 30/30/30 needs to be a ten year
9 horizon, I don't know. But I think that
10 overall we've got a really good idea, but
11 there are some places where this could go
12 terribly wrong.

13 PAMELA WINTERS: Steve, what
14 30/30/30 are you talking about?

15 STEVEN WINTER: The 30/30 is the 30
16 percent of the funds go to management of
17 programming and open space.

18 PAMELA WINTERS: Oh.

19 STEVEN WINTER: 30 percent to
20 enhance transportation.

21 PAMELA WINTERS: Okay. You know

1 what I was wondering about that, too, is that
2 does -- in each year does it have to be equal
3 or can one year all of the funds go to open
4 space and -- you know what I mean? Like,
5 does it have to be split up equally?

6 IRAM FAROOQ: Yes. You're asking
7 all the tough questions. I think, I think
8 this is something that we in a very
9 simplistic way wanted to have the guidance
10 that there shouldn't be -- that things should
11 not end up skewing in one direction because
12 we happen to pick a committee that had a
13 really strong voice regarding open space and
14 not as strong on workforce or not as strong
15 on transit or the other way around. And so
16 this was just an effort to say that things
17 should be roughly equally -- all three of
18 these things are really important and they
19 should roughly get roughly equal benefit with
20 a little bit of a sway in there with the
21 remaining 10 percent. Now whether that

1 happened -- and you know what I'm hearing
2 from you all is that it's maybe not a smart
3 idea to try to do that every single year
4 because how are you going to get critical
5 amount of money to really make an effective
6 difference? And maybe programming of open
7 space it may actually be able to be a
8 functional amount where you can -- it's what
9 you need to pay for performances or tents or
10 something.

11 PAMELA WINTERS: Well, something
12 might come up one year where you want to
13 spend all the money on one thing and then,
14 you know, the next year --

15 IRAM FAROOQ: Sure. Let us go back
16 and let us try to flesh that out in a way
17 that makes sense.

18 PAMELA WINTERS: Okay, great.

19 HUGH RUSSELL: One suggestion I
20 would make to you is that the Zoning
21 requirement is that the committee come up

1 with a written plan and that, you know, the
2 operation and how they will do things in
3 accordance with these principles.

4 IRAM FAROOQ: That's good.

5 AHMED NUR: That's a great idea.

6 HUGH RUSSELL: And then we leave it
7 to I guess the Community Development
8 Department to assist that process, maybe to
9 staff that process, but you know, maybe the
10 Council decides they want to prove it. Maybe
11 it's appropriate that there be communications
12 with the Council to, you know, so that it's
13 feeding with the other goals. But CD is the
14 logical staffing because of the -- they have
15 a broader view overall of these kinds of
16 things.

17 IRAM FAROOQ: So that brings us to
18 sustainability and I'm going to ask Susanne
19 Rasmussen the director of environment and
20 transportation to talk to the next two pieces
21 here.

1 SUSANNE RASMUSSEN: Good evening.
2 It's nice to be back before you again after a
3 long hiatus here. And there's a range of
4 sustainability recommendations that touch on
5 some very different things and they're all --
6 and all of them are based in overall
7 sustainability policies and sort of the state
8 of affairs of the environment in Cambridge.
9 And starting with the recommendation around
10 improving building energy performance;
11 namely, that all buildings would be required
12 to meet the LEED gold design standard for new
13 and existing buildings, and that very much
14 came out of our understanding of the fact
15 that 80 percent of greenhouse gas emissions
16 in Cambridge come from buildings and that the
17 types of buildings that we see in Kendall
18 Square typically are very energy intensive.
19 In fact, we did an analysis that showed that
20 50 percent of all energy consumed in
21 Cambridge is consumed in just this small

1 Kendall Square area. And so they're very
2 large buildings and typically very energy
3 intensive buildings. And also the proposal
4 you have before you contemplates a very
5 significant increase in square footage
6 compared to what is allowed under the Zoning
7 envelope today. And this plan would resolve
8 in even though there are of course many, many
9 positive outcomes from these buildings, it
10 would be a net increase in the environmental
11 contribution in terms of greenhouse gas
12 emissions. So, it was felt that moving the
13 bar up from what is currently the
14 requirement; namely, LEED silver, moving up
15 to gold would be an appropriate requirement
16 to compensate for the additional square
17 footage that's going to be built and add to
18 emissions in the area.

19 HUGH RUSSELL: Okay. In my comments
20 on this requirement in the earlier dates, I
21 asked you to look at whether that was a

1 realistic requirement for housing uses.

2 SUSANNE RASMUSSEN: Right.

3 HUGH RUSSELL: Because I've been
4 only able to find eight or nine gold LEED
5 housing projects in the Massachusetts; four
6 of which were in the city, two of which were
7 MIT dormitories, and one was a Harvard dorm,
8 and one was the Watermark building.

9 SUSANNE RASMUSSEN: Right.

10 HUGH RUSSELL: And so did you do
11 that? And what's your response?

12 SUSANNE RASMUSSEN: We've looked at
13 what is -- what exists in terms of LEED
14 buildings either at the gold level or even at
15 the platinum level in the high rise category,
16 and it's true, you're absolutely correct as
17 far as Massachusetts, they're only beginning
18 to be introduced. But -- and if you look in
19 a couple years back, there really weren't any
20 in the country either, and it's really
21 accelerating now. We're beginning to see in

1 all kinds of climates be the Denver,
2 Colorado, or Evanston, Illinois, all over New
3 York and New Jersey in particular we're
4 seeing a lot of LEED gold and LEED platinum
5 buildings. It was just important --

6 HUGH RUSSELL: I was talking
7 specifically about multi-family housing.

8 SUSANNE RASMUSSEN: Multi-family
9 high rise. Those are the categories I'm
10 talking about.

11 HUGH RUSSELL: And what is the
12 additional cost?

13 SUSANNE RASMUSSEN: What we have
14 been able to glean from people we've talked
15 to is that it's -- depending on who you ask,
16 but I would say everyone says it's under five
17 percent. And some will tell you it's more
18 like one to two. So it's not -- I think in
19 relation to the added square footage that
20 this plan proposes, it's not a very
21 significant increase. And I think it's also

1 important to look at operational savings down
2 the road that you're making up for the
3 increased construction costs through
4 operational savings as the building goes
5 forward.

6 HUGH RUSSELL: So my concern is that
7 by adding the requirement you're only going
8 to have very, very expensive housing built
9 and that some of the peripheral sites which
10 might be suitable for housing, people will
11 say well, you know, I got to build a high
12 rise there. And that maybe some of the
13 affordable developers who are appraising
14 housing are going to say well, I can't make
15 it work. I just think when you go so far
16 beyond what is, what is the norm, you have to
17 examine the consequences.

18 SUSANNE RASMUSSEN: I think we
19 looked at a cost differential that's in the
20 low single digits not a huge addition to the
21 cost of development, and the -- probably in

1 Kendall Square as in we've been talking back
2 and forth with the housing staff about this
3 issue and the types of housing that the
4 market will produce is going to be in the
5 price range that we're seeing right now which
6 is the 3,000 a month type of housing. That's
7 what 303 Third Street, Watermark, Archstone,
8 all those buildings, that seems to be where
9 they're coming in. And it's through the
10 provision, the middle income provision that
11 we will be able to realize that housing units
12 that are --

13 HUGH RUSSELL: So it's like six
14 housing units, six middle income housing
15 units in Watermark. It's not a lot.

16 SUSANNE RASMUSSEN: Somebody else
17 knows this math. I don't.

18 HUGH RUSSELL: That's a couple
19 hundred units.

20 AHMED NUR: 25 percent.

21 HUGH RUSSELL: It's about three

1 percent is -- a couple hundred is six. I
2 mean I may be 240, but maybe 30, but it's
3 about 200 units.

4 IRAM FAROOQ: Hugh, I think as we
5 looked at what the rents are right now where
6 we were -- what we were realizing is that the
7 rents that people are charging in Kendall
8 Square are based more on what people are
9 willing to pay rather than what the
10 construction cost is. And for the
11 foreseeable future we think that the demand
12 is going to significantly exceed supply even
13 despite our requirements for some percentage
14 of development to be housing. And that was
15 sort of jiving as to think that if that is
16 not the -- if that's not the measure that
17 links to what people are causing, are using
18 for rent or asking for rent, is that
19 something that should then hold us back from
20 putting in place an energy efficiency
21 requirement that we think is important for

1 us.

2 HUGH RUSSELL: Okay, I think that's
3 a cogent argument. The part that I have a
4 lot of trouble with is that we're not coming
5 up with a plan for Kendall Square that
6 produces housing for the majority of people
7 who work there. That's the problem I'm
8 having.

9 SUSANNE RASMUSSEN: And that may be
10 -- the tool for that may be a different tool
11 than this tool.

12 HUGH RUSSELL: Well, it sounds like
13 you've given up on doing anything but very
14 modest and you're going to -- and so
15 therefore it's all going to be expensive high
16 rises and, you know, I think you're right, if
17 you're building an expensive high rise going
18 to gold LEED, you know, makes it a little bit
19 more expensive. I mean it's -- I'll give you
20 an example: I don't know what Watermark
21 costs. I don't know what the MIT dorms cost.

1 But I guess it's a few hundred dollars a
2 square foot. And so five percent of that is,
3 let's say it's \$300, and five percent of that
4 is \$15 a square foot. So other than the
5 burbs we're providing housing, we're building
6 it for \$110 a square foot and it's renting
7 for half those prices. And you look at them
8 and you say well, that's a pretty good deal
9 actually. But that \$15 is not five percent,
10 it's 15 percent of an affordable housing in
11 terms of construction. So I don't know if
12 we'll ever build housing for a reasonable
13 price that we can rent and that people can
14 afford anymore in the city except through
15 subsidy. But it's not in -- I just don't
16 like -- I don't like it that we're only
17 building for rich folks and poor folks.

18 SUSANNE RASMUSSEN: The underlying
19 land values of course have a huge impact on
20 this. I was looking at -- when I was looking
21 at all these LEED gold and high rise

1 buildings, the rents were not -- they were
2 rents that were 1800, but that's building a
3 different location.

4 HUGH RUSSELL: Right.

5 SUSANNE RASMUSSEN: So it's not the
6 construction cost, but it's not death to
7 similar, but the underlying value of the land
8 is hugely different.

9 HUGH RUSSELL: Right. But in terms
10 of the land cost for housing, one thing is it
11 may be free. For example, Boston Properties
12 already has control of all the land and we're
13 trying to get them to build housing on the
14 land they already have. They don't have to
15 acquire any land at all.

16 You know, MIT, you know, if they get
17 their full commercial build out and they're
18 required to build more housing, they don't
19 have to acquire more land for that housing.
20 They just have to pull a little more density.
21 So it's not clear for housing. It's not like

1 you're telling the developer to go out and
2 buy, you know, like 169 First Street, buy a
3 piece of property to build the housing. And
4 these sites, the housing is a requirement
5 that you have to meet to get the ability to
6 build a commercial space.

7 SUSANNE RASMUSSEN: It's sort of
8 back to your question you asked earlier which
9 is that is this, too (inaudible) what's being
10 asked around the middle income. I think
11 that's where the needs to have more
12 discussion.

13 HUGH RUSSELL: Right. And Christy,
14 what it means is that when people move into
15 the city and work in these new jobs that
16 we're creating, they're going to look for
17 housing they can afford and they may start
18 displacing other people because they'll pay
19 3,000 a month for that, you know, two-bedroom
20 apartment somewhere in Wilmington-Harrington
21 where somebody else won't pay that because

1 they're already living there. So it's not
2 like this is just an isolated thing. They'll
3 go out to Malden or Medford or --

4 PAMELA WINTERS: Somerville.

5 HUGH RUSSELL: -- wherever. There
6 probably will be lots of pressures on the
7 income and communities in the city where
8 people are living now. So if you don't solve
9 the problem in Kendall Square, it's going to
10 get solved by throwing people out of their
11 houses.

12 PAMELA WINTERS: Could I ask a quick
13 question? Is there a huge difference between
14 green and -- between gold and silver LEED in
15 terms of the environment? Like, what is the
16 -- I'm -- I apologize for being ignorant in
17 that, but what is the difference?

18 SUSANNE RASMUSSEN: So, it's all,
19 it's a point system and you have to get
20 additional points.

21 PAMELA WINTERS: No, that I

1 understand. I don't know what the difference
2 is in terms of what it does to the
3 environment.

4 HUGH RUSSELL: Well, it's a laundry
5 list and you pick things off the list. If
6 you're silver, you have to pick off half the
7 list. And for gold you have to pick off 60
8 percent of the list. That's --

9 PAMELA WINTERS: Does it impact --

10 SUSANNE RASMUSSEN: So to quantify
11 exactly --

12 HUGH RUSSELL: It depends on what
13 somebody picks.

14 SUSANNE RASMUSSEN: You can't say
15 it's going to improve the energy performance
16 by exactly 25 percent because it is a laundry
17 list as Hugh says, so you will get improved
18 energy performance, but it's hard to give
19 like a very precise definition of exactly how
20 it will be improved. You tend to be able to
21 get more points out of energy when you go to

1 a higher level because you need more points.
2 So the idea here is that it will improve
3 energy efficiency. But you can't say like
4 other systems, like the stretch code, you can
5 be very clear and say it's going to improve
6 energy performance by exactly this amount.
7 It's a little harder because there are so
8 many different elements of sustainability.
9 That's part of the LEED system.

10 HUGH RUSSELL: So, and let me --
11 I've done a couple of silver LEED projects.

12 PAMELA WINTERS: Okay.

13 HUGH RUSSELL: And the construction
14 that you need to get to get silver LEED, and
15 it's basically sort of the -- it's the best
16 typical construction. You do everything as
17 best you can. It's commonly done. People
18 can commonly do it. And you may have to --
19 and then you probably have to do a little bit
20 better on say the efficiency of your heating
21 equipment. Right? And so when you get to

1 gold, you have to take another step forward.
2 And probably as Sue said, it's in the energy
3 efficiency and those are some of the points,
4 they're harder to get. They're more valuable
5 from the city's point of view and that you
6 can't get more points for being near a bus
7 line because you've already taken those
8 points. And then you can't do a lot more on
9 saving water because those are actually
10 fairly low hanging frugal points and you
11 probably kept them just to get the silver.

12 PAMELA WINTERS: I see.

13 HUGH RUSSELL: And they're using
14 less water. So it's -- I don't -- you know,
15 I haven't seen an analysis of the difference
16 between, you know, the Harvard gold dorm as
17 opposed to the Harvard silver dorm.

18 PAMELA WINTERS: It might be
19 interesting to compare, you know.

20 HUGH RUSSELL: It's --

21 PAMELA WINTERS: Equal. It would be

1 interesting.

2 HUGH RUSSELL: It's a -- you
3 sometimes, I mean you don't get credit for
4 things that are positive sometimes. In
5 multi-family housing. The most important
6 thing in multi-family housing is that you put
7 the units adjacent to each other. You get no
8 credit for that. And that's what saves you
9 energy more than anything else, but you don't
10 get credit at all in the energy calculation
11 for doing that. So it's really bizarre. You
12 know, the most important thing and yet you
13 get zero points for. And it's just like
14 Zoning, when you write down a set of rules,
15 there are places where they make sense, there
16 are places where for a particular project
17 they don't make sense, and you have to write
18 -- if you want to do something, you have to
19 write the rules, you have to follow the
20 rules. This is a highly respected set of
21 rules, but it is incredibly difficult

1 bureaucracy, you know, and it just filling
2 out those forms is really annoying.

3 SUSANNE RASMUSSEN: One thing I
4 should have mentioned is we're not requiring,
5 as is the case now under the silver rule,
6 we're not requiring that projects be
7 certified because it's as you say, it's an
8 extremely bureaucratic undertaking and also
9 it can be very costly. So that's not part of
10 the requirement. So you have to demonstrate
11 through a signature from your LEED
12 professional that you are meeting the
13 requirements. And then the sort of on the
14 back end what we're proposing is that
15 projects would be required to track and
16 disclose their energy consumption and that's
17 -- there's really two reasons for that.

18 One is this LEED gold requirement is a
19 design standard, but that doesn't mean that
20 your building necessarily operates according
21 to how it was designed. And all of us who

1 live or work in LEED buildings know that that
2 can be the case. And you can't really adjust
3 something if you don't measure its
4 performance. And so the requirement is to
5 measure the performance and disclose it and
6 the disclosure part of it is will help future
7 tenants to really understand how your
8 building performs and received from other
9 places where building disclosure ordinances
10 have actually been put in place as a
11 city-wide requirement that there is an effect
12 that comes from requiring disclosure that
13 measures are put in place to upgrade
14 buildings. And we've -- we've had a number
15 of conversations with stakeholders, and
16 people understand these systems. And in many
17 cases use them already. I mean, we're
18 talking, the kind of buildings we see in
19 Kendall Square, it's typical that people
20 actually already track their energy building
21 performance using one of the systems we

1 propose.

2 Moving along to the next item which
3 does two things: One is to encourage on-site
4 generation of energy and cogeneration. And
5 it's not a requirement in this proposal, it's
6 really putting in place language that would
7 prevent this, would allow the Board to grant
8 relief so people can use shared systems.
9 They can be much more energy efficient as
10 we're learning now from the hurricane Sandy
11 that they can also be more resilient. In New
12 York where they have shared systems in
13 Manhattan there have been many examples of
14 where they've shared better than the
15 individual systems in a storm, future storm
16 scenarios, which unfortunately this is
17 something we have to get used to. So the
18 language is just encouraging that. And then
19 there's a requirement to do an ability
20 analysis of connecting to district scheme.
21 And the reason for that is that the general

1 on power plants in Kendall Square produces
2 waste steam which in most conditions from an
3 environmental perspective is free because
4 it's being produced anyway, so it is a waste
5 product that can then be used and, therefore,
6 you lower your overall environmental impact.
7 That we're not requiring that people hook up
8 to the steam system. It's simply an analysis
9 of the financial and technical feasibility to
10 just make sure that it is being considered.
11 And the requirement is -- can probably in
12 large part be fulfilled by the building that
13 provided the steam because they can do the
14 financial analysis. So it's not a heavy
15 lifting kind of requirement. But we're of
16 course hoping that as a result, that we may
17 see more steam users in Kendall Square rather
18 than sending the steam across the gradient to
19 Boston so that they can use it over there.

20 HUGH RUSSELL: It also goes over the
21 Longfellow Bridge.

1 SUSANNE RASMUSSEN: Yes. Also the
2 Longfellow, yes.

3 HUGH RUSSELL: Mass. General, it's
4 heated by --

5 SUSANNE RASMUSSEN: Right.

6 And then switching gears, there are a
7 number of elements of the proposed Zoning
8 that speak to the desire to reduce the
9 reliance of automobiles and also increase use
10 of alternative fuel vehicles. And some of
11 them Iram has already spoken to. Namely the
12 advocate for enhanced transit links to
13 locations where the MBTA is not currently or
14 in the future able to provide the service.
15 But certainly also putting pressure on the
16 MBTA itself to provide the service that we
17 need. And when you look at the Zoning
18 proposal, you'll see a very significant
19 number of people that will have to come to
20 and from Kendall Square without using
21 vehicles. And that really, really will

1 require in the long term future much more
2 transit and also bicycle access. So the fund
3 that Iram described will help facilitate that
4 by making funds available for enhancing
5 transit and also enhancing bike riding
6 through the hubway program for example.

7 And then the road shares that we're
8 expecting and that the parking is designed to
9 accommodate are significantly lower than what
10 we've been using in the past and that all is
11 based on analysis that we've been doing of
12 existing projects through the PTDM program.
13 So we know that when we're proposing that no
14 more than 40 percent of people drive, will be
15 able to drive to Kendall Square and therefore
16 no more parking will be provided, that that
17 is possible when we look at some of our best
18 performers today. And so in addition to --
19 when we did this background study on
20 transportation, we looked at all of the best
21 practice for transportation and said road

1 shares for each category of development. And
2 I'll talk about that in a minute because
3 we'll get to the parking rates.

4 We have become increasingly focussed on
5 the issues of urban heat gain, and this
6 proposal seeks to address that issue by
7 requiring cool roofs and that can be either a
8 white or a green roof. We're not
9 distinguishing as they both have
10 environmental benefits. A white roof really
11 does not have a cost implication today. So
12 we don't -- since we're not requiring green
13 roofs, it's really -- it is a no brainer that
14 this can happen.

15 The proposal also talks about
16 encouraging green walls and the planting of
17 trees. So just really increasing the amount
18 of vegetation which will help with shading
19 and just cooling the urban environment in
20 general.

21 And then the proposal includes language

1 about on-site storm water retention, but that
2 is really already an existing requirement.
3 This is not something new. It's -- we just
4 felt that it was important to note it in the
5 Zoning language as well.

6 So those are the non-parking related
7 sustainability issues.

8 On the parking and loading side, like I
9 said, we went through an analysis of what we
10 see in terms of best practice in terms of how
11 much sustainable modes can be part of the
12 trip making, and that's what these numbers
13 that you have in the chart are based on. So
14 we have said -- we're proposing upper limits
15 of ranging -- depending on whether it's
16 retail, office, or indeed from 0.5 space per
17 thousand up to 0.9. And we're proposing that
18 there would be no set minimum. That the
19 minimum would be part of a conversation with
20 the Board about what is really needed because
21 we do see quite a range. And so for example

1 if you look at the Broad Institute, very,
2 very low. I think it's 23 percent dry. And
3 then other projects it could be up to what's,
4 would be allowed by these numbers, which is
5 around 40 percent. So we didn't want to send
6 something, set a minimum because we're seeing
7 that these numbers fortunately keep going
8 down over time. And where there's a
9 continuous trend that SOV percentage is down
10 over the past 20 years. So only for housing
11 are we proposing a minimum, and a maximum
12 growth. And the minimum we set as 0.5. And
13 that's really based on, again, analysis. We
14 have a wide range of housing developments in
15 and around transit stations and that's the
16 number that we see. And there have been
17 recently in the Central Square Committee
18 process, a lot of conversation about should
19 it not be zero? And this number is proposed
20 because there is and has been as you all well
21 know, always concern about the traffic might

1 spill over, the cars might start parking on
2 residential streets and supplanting or
3 preventing existing residents from accessing
4 those parking spaces.

5 HUGH RUSSELL: Right, but your last
6 section where you look at ways to use
7 existing facilities it might be how you
8 described those facilities, sharing those
9 kinds of things could mean that there might
10 be no new net spaces for a use even though
11 you'd have to get an allocation of 50 percent
12 for the residential uses.

13 SUSANNE RASMUSSEN: Right.

14 And another element of this is to of
15 course require a shared parking study. So
16 when this mixed use development that you
17 would be required to look at how could you
18 maximize utilization of the parking spaces
19 that are created? And again we've actually
20 done a lot of analysis on this with the
21 Traffic Department to see what are the

1 patterns of when do people leave their house
2 and when do they come home from work and when
3 do workers arrive and depart? And we have
4 proposals that meet those patterns that we
5 see and you can really use parking spaces
6 much, much better than we have been doing by
7 using shared parking. So that is a
8 requirement in the new Zoning.

9 And also that the distance within which
10 off street parking is increased to 2,000 feet
11 to provide more of an opportunity to soak up
12 some of the unused parking.

13 And then there's just an issue around
14 loading bays, which is a different issue, but
15 that the Planning Board can waive the
16 required number of loading bays to allow for
17 consolidation between projects. And
18 obviously it's -- if you were loading bays,
19 the fewer loading bays you have the better it
20 is from an urban design perspective because
21 you don't have vehicles coming in and out of

1 the bays across the sidewalk.

2 HUGH RUSSELL: And I assume that
3 this represents a consensus of the committee
4 working on the Transportation Department to
5 the city?

6 SUSANNE RASMUSSEN: Yes. Yeah, we
7 worked very closely on all of this.

8 AHMED NUR: Thank you.

9 HUGH RUSSELL: Okay.

10 IRAM FAROOQ: If people didn't have
11 questions on that, I just wanted to throw in
12 one final piece about historic reservation.
13 This is just that we wanted to put in the
14 same provision here in Kendall Square that
15 has worked well in Harvard Square, so that if
16 somebody is preserving a historic building,
17 that they essentially have a mechanism to
18 utilize that floor area on other parts of
19 their site even if it's not on the same
20 parcel. The reason this is important is
21 because as you know, we've been talking a lot

1 about this, some ledge of three buildings on
2 Main Street, the MIT Press Building and the
3 two buildings adjacent the Rebecca's and then
4 the clock tower building, and this is just a
5 method in an area that doesn't have a lot of
6 historic buildings, it's important to have
7 some provision by which people aren't just
8 demolishing buildings because they need floor
9 area.

10 Charlie, did you have anything to add
11 to that?

12 CHARLES SULLIVAN: I'll answer
13 questions.

14 If you like I can try to explain the
15 map in some more detail.

16 STEVEN WINTER: Yes, please.

17 THOMAS ANNINGER: Please.

18 CHARLES SULLIVAN: I'm Charles
19 Sullivan. I'm director of the Cambridge
20 Historic Commission.

21 I was asked to prepare sort of an

1 informal map of significant buildings in the
2 Kendall Square and Central Square area.
3 There are buildings that are already
4 designated as landmarks like the Loop
5 building and the former firehouse here.
6 There are buildings which are potential
7 landmarks are being under study for landmarks
8 like the three buildings in Kendall Square
9 are currently entered in the landmark
10 designation study. And so they're protected
11 as if they're already designated until
12 there's some recommendation made to the City
13 Council. And the case that these three, we
14 have our protection period runs for a year.
15 And in this case the owner, MIT, has agreed
16 to extend the protection period while the
17 zoning issues are worked out. And we've
18 recently agreed further to not to make any
19 further recommendations to the City Council
20 until MIT files their zoning petition and
21 that goes through the Council process.

1 So there are a lot of wheels turning
2 with those three buildings.

3 The buildings that are colored in this
4 sort of yellow color are all more than 50
5 years old. And I applied the standard of our
6 demolition delay ordinance which says that if
7 there's an application for a demolition
8 permit, the staff gets to determine whether
9 or not the building is significant. Then the
10 public -- the Historical Commission at a
11 public hearing will decide whether to confirm
12 the determination of significance to find the
13 building preferably preserved and possibly to
14 designate it as a landmark.

15 So based on what I knew at the time, I
16 was asked to do this plot, this map. These
17 are -- all the colored buildings are more
18 than 50 years old. They are ones which if I
19 were asked today about a demolition permit,
20 yes, we would find them significant and we
21 would have a hearing. It's not just say that

1 we'd seek to preserve all of them, but the
2 ones that are marked with a P are ones which
3 I think are potential landmarks. At least
4 from the staff level I would recommend that
5 the Commission consider designating those
6 buildings as to be protected permanently.
7 The Commission doesn't take these actions
8 typically designating buildings as landmarks
9 unless there's a threat of demolition. We
10 don't go out proactively and designate a
11 bunch of buildings just because we think
12 they're neat buildings or significant
13 buildings. We pretty much wait for the
14 threat to come along and then we see what the
15 proposed replacement is also. So we're
16 always trying to balance the public interest.

17 So this is kind of a notional map of
18 significant buildings. It's not one that's
19 based on a process, but it's the staff's best
20 judgment of how conditions are today.

21 HUGH RUSSELL: Those large areas in

1 the yellow, is that a reflection of urban
2 renewal process?

3 CHARLES SULLIVAN: I'm sorry?

4 HUGH RUSSELL: The large areas with
5 no yellow buildings sort of a reflection of
6 the urban renewal process that cleared all of
7 the buildings in a wide area in Kendall
8 Square in the sixties?

9 CHARLES SULLIVAN: Yeah. There were
10 once some significant buildings in this area,
11 a lot of that was not. But there were a few.
12 And under the urban renewal approach at the
13 time, the government paid 90 or 75 percent of
14 clearing the entire area regardless and
15 that's what we've ended up with a bunch of
16 super blocks.

17 HUGH RUSSELL: And the -- and you
18 didn't consider buildings outside of the
19 dotted line. So, for example, the MIT campus
20 which you obviously would find a way of being
21 significant.

1 CHARLES SULLIVAN: And certainly
2 there are. For the purposes of this exercise
3 I didn't look it over other areas.

4 HUGH RUSSELL: Sure.

5 CHARLES SULLIVAN: Much of the older
6 buildings at MIT are on the National Register
7 of Historic Places so is the Metropolitan
8 Storage. We would have flagged the old
9 armory and the old storage. Necco as being
10 significant also.

11 Thank you.

12 THOMAS ANNINGER: Charlie, before
13 you --

14 IRAM FAROOQ: Tom has a question for
15 you.

16 THOMAS ANNINGER: -- could you
17 explain in a little more detail the
18 agreement, call it what you will, that has
19 been struck on the three buildings along Main
20 Street?

21 CHARLES SULLIVAN: Well, it's -- it

1 would be an exaggeration to call it an
2 agreement. We've been -- we have a process
3 which started in December of 2011 when the
4 Commission found -- initiated a landmark
5 designation study. So typically those run
6 for a year unless the owner agrees to extend
7 the study. Which MIT has done two or three
8 times. They're now protected until January.
9 Most recently the MIT -- it's been on MIT
10 faculty committee which has come up, which
11 has gotten involved in the Kendall Square
12 process, raised questions about the
13 protection of these buildings, especially the
14 MIT press building because it would, it would
15 possibly conflict with their concepts that
16 MIT should have a grand gateway or a gateway
17 at the Kendall Square end to balance the
18 other end of the Infinite Corridor on
19 Massachusetts Avenue. So we've agreed to not
20 to send a designation recommendation to the
21 City Council immediately as we would

1 typically do before the end of the year,
2 because of all these ongoing discussions
3 about the goals for Kendall Square, the K2C2
4 process, and MIT's expected filing of a
5 Zoning Petition. And we're very much part of
6 this discussion process through the K2 and
7 meeting with the Institute and Community
8 Development for the past year. So we're
9 interested in seeing how this works out. And
10 we want to be constructive but we want the
11 outcome to be the best thing, the best for
12 Kendall Square. So it seemed like the most
13 productive way to engage at this point is to
14 maintain the status that the buildings have
15 as being eligible for landmark designation as
16 the Commission found them, voted to find them
17 last September. And just to hold that status
18 without trying to push it to the City Council
19 at this point because these issues are
20 complicated enough without having two
21 complicated issues on the City Council agenda

1 at the same time. We're willing to defer,
2 allow the Zoning to go, to go through the
3 process. We, you know, the Zoning is neutral
4 with regard to whether buildings, these
5 buildings should remain or not, and the
6 Zoning -- MIT Zoning Proposal will be neutral
7 in that regard so that's enough for us. So
8 we have a process in place that protects
9 them. And when the moment comes, we'll send
10 it to City Council or reach some other
11 agreement with the parties concerned about
12 preservation or disposition of these
13 buildings.

14 HUGH RUSSELL: And presuming that
15 moment is when MIT comes in and presents a
16 PUD plan.

17 CHARLES SULLIVAN: Yeah.

18 HUGH RUSSELL: Although they might,
19 we'll preview it before there's a formal
20 submission.

21 CHARLES SULLIVAN: Yeah.

1 HUGH RUSSELL: Okay.

2 CHARLES SULLIVAN: Okay, thank you.

3 IRAM FAROOQ: That's it for our
4 presentation of the overall, overarching
5 provisions of Kendall Square Zoning. And I
6 guess we'll be back when MIT is ready. And
7 if you wish to remain to talk about their
8 ideas.

9 BRIAN MURPHY: They're back here
10 December 4th.

11 IRAM FAROOQ: December 4th MIT will
12 be back to talk.

13 HUGH RUSSELL: So at our next
14 meeting we're going to get a preview of what
15 they intend to file which should give us the
16 opportunity to request changes or adjustments
17 to what gets filed.

18 AHMED NUR: Sure.

19 HUGH RUSSELL: We hoped that that
20 process would be more extensive and that we
21 would be filling in some joint fashion, but it

1 doesn't appear that that's going to happen
2 that way. Besides it was very important
3 however that we -- before things get filed
4 that we review them, because as you know, the
5 amendment process to file proposals limits
6 use in some cases and you can't amend outside
7 the general envelope that's created between
8 the existing and the new.

9 STEVEN WINTER: Mr. Chair, I have a
10 question for you, please. The letter from
11 the MIT Provost, I was going to ask you, does
12 indicate that the Institute will file a three
13 Zoning Petition as soon as possible. That
14 said, is there any way that we can salvage
15 the -- our intention to work together with
16 them to bring something forward together or
17 do we think now at this point this is really
18 the best way for this to work?

19 HUGH RUSSELL: So it's a two-part
20 question and it calls for a judgment. So
21 there is a meeting scheduled next week where

1 I'll be talking to members of the CE
2 Department at MIT to get a preview of what
3 they're going to show us on the 4th. And is
4 this the best way to do it? I don't -- I'm
5 not convinced. But it's really going to
6 depend on the substance of their approval.
7 If they, in listening to us along, and maybe
8 the proposal is in fact presented in a form
9 that we can approve or approve with some
10 minor amendments, then that will be fine.

11 STEVEN WINTER: Okay.

12 HUGH RUSSELL: And then, you know,
13 there are people out there, I see, Mr.
14 Galluccio out there who has been working very
15 hard to help make this process be a
16 cooperative process. So there's nothing --
17 I've heard nothing from MIT that is more than
18 -- I think their objections are procedural
19 and bureaucratic rather than substantive and
20 not trying to shove something down our
21 throats, but they exist within a world that

1 has certain internal rules about the
2 institute operates. And we have, you know,
3 we're existing within a body of laws of how
4 you propose changes.

5 STEVEN WINTER: Thank you,
6 Mr. Chair, I appreciate your efforts on our
7 behalf.

8 HUGH RUSSELL: Okay, if there's
9 nothing else, then we're adjourned.

10 JEFF ROBERTS: The Cedar Street.

11 HUGH RUSSELL: Oh, Cedar Street has
12 finally come. We were supposed to take a
13 break at eight o'clock to do that.

14 Okay, Cedar Street. Thank you very
15 much.

16 So the request to extend the time for
17 decision on the permit to January 31, 2013.

18 STEVEN WINTER: Mr. Chair, I would
19 ask Brian if you have any comments or
20 concerns?

21 BRIAN MURPHY: No, I think it's a

1 reasonable request for an extension of time.
2 I'm not sure when they'll be back. There's
3 also I believe that some exploration by the
4 proponent as to whether or not there's as of
5 right option, but it seems from the staff
6 standpoint that it's appropriate to give the
7 extension of time to allow them to try to
8 work this out.

9 HUGH RUSSELL: And we have a written
10 request by them?

11 SUSAN GLAZER: Yes.

12 H. THEODORE COHEN: We received one.

13 STEVEN WINTER: From legal offices?

14 HUGH RUSSELL: Okay. So....

15 STEVEN WINTER: I move that we grant
16 this extension based on Sean Hope's letter of
17 November 19, 2012, and the discussion that
18 we've had here tonight.

19 HUGH RUSSELL: Is there a second?

20 THOMAS ANNINGER: Second.

21 AHMED NUR: I second.

Discussion?

On the motion, all those in favor?

(Raising hands).

HUGH RUSSELL: All members voting in favor.

9:55 now we're adjourned.

(Whereupon, at 9:55 p.m., the Planning Board Adjourned.)

1 ERRATA SHEET AND SIGNATURE INSTRUCTIONS

2
3 The original of the Errata Sheet has
4 been delivered to the Community Development
5 Department.

6 When the Errata Sheet has been
7 completed and signed, a copy thereof should
8 be delivered to each party of record and the
9 ORIGINAL delivered to the Community
10 Development Department, to whom the original
11 transcript was delivered.

12
13 INSTRUCTIONS

14 After reading this volume of the
15 transcript, indicate any corrections or
16 changes and the reasons therefor on the
17 Errata Sheet supplied and sign it. DO NOT
18 make marks or notations on the transcript
19 volume itself.

20 REPLACE THIS PAGE OF THE TRANSCRIPT WITH THE
21 COMPLETED AND SIGNED ERRATA SHEET WHEN
RECEIVED.
