# Petition for Funding of Reconstruction of Cambridgeport School Playground

Playgrounds are vitally important aspects of schools as well as their surrounding areas. At their best, playgrounds foster interest in learning and health through safe, engaging play, and serve as active, inviting meeting places that instill pride in students, families, and neighbors. These goals are not currently met by the playground at the Cambridgeport School.

Cambridgeport has undergone a major change in population -- from K-8 to preschool-5 -- and the school now serves as a hub for many families with young children. However, many surfaces and structures designed and selected for older children are not suitable for younger ones. To make matters worse, the surfaces and structures at Cambridgeport are beginning to show their age, increasingly raising safety concerns.

For these reasons, we submit this petition to the City of Cambridge Community Preservation Act Committee to request funding for reconstruction of the playground at the Cambridgeport School. We thank the Committee for its consideration and look forward to a Cambridgeport playground that offers safe and age-appropriate opportunities for fun and learning.

My son was hospitalized due to an injury on that playground. It is unsafe and unkept and the school staff should not be responsible for monitoring the children's safety on the equipment. If the city doesn't want to fix it, maybe they would like to staff it.
