

# Number of Affordable Units by Census Block

Cambridge, Massachusetts

**Notes on Census block geography:**

- Census block boundaries were altered at four locations to increase clarity about the location of housing units.
- Two Census blocks comprising Washington Elms were merged together into a single polygon.
- A large Census block at Fresh Pond Reservation was divided into three polygons to separate the open space from the housing enclaves at Neville Manor and along Grove St/Blanchard Rd.
- Two Census blocks that included portions of Danahy Park and adjacent properties were divided into seven polygons in order to separate developed areas from uninhabited open space.
- The Census block at Russell Field was divided into two polygons in order to put the adjacent residential properties along Clifton St into a separate polygon.
