FRESH POND PARKWAY
Before & After

City of Cambridge
Community Development Department
Environmental & Transportation Planning

---

A larger center island, splitter islands, curbs, pavement markings and sidewalks organize the space around the rotary.

By removing the slip lane from Lakeview Ave., a new pedestrian plaza was created with sidewalks, landscaping and a push-button pedestrian signal for crossing Fresh Pond Parkway.

Curbing installed to define public right of way along with a generous sidewalk, lighting and landscaping.

Excess roadway space used to create a planting strip, sidewalk and two-way bicycle facility.

Landscaped islands, signs and pavement markings encourages vehicles to yield when entering into the rotary. Bicycle path with lighting installed on the “pond” side of the roadway.
