

Linear Park Redesign Project

The Linear Park Redesign project will reimagine a beloved and highly used community park and multi-use pathway.

The **outcomes** of a redesigned Linear Park are:

- To be an inclusive space and accommodating of all users
- Create an engaging community open space
- Strengthen neighborhood connections
- Be a resilient and biodiverse landscape suited for a changing climate

To **enhance the experience** of the path users and park visitors, we will:

- Include playful and creative features
- Add new seating for all to enjoy
- Widen and differentiate paths of travel, where space allows

Anticipated Construction Schedule

- Winter 2025 — Release bid documents
- Late Winter 2025 — Enter contract negotiations
- Late Fall 2025 — Our goal is to have the path partially reopened later in 2025

Key Park Upgrades

Drainage & Irrigation

Addressing ponding & slick areas, install new irrigation system.

Lighting & Amenities

Replacing existing lighting, introduce new water bottle fillers and trash and recycle containers.

Secondary Paths

The main paved will have new asphalt. The shoulders and secondary paths will be made from stonedust.

Signage

Wayfinding to area destinations and etiquette signage.

Tree Health & Soil Quality

We are improving the soils in the park to create a better growing environment for existing and new trees.
