

Gardening Journal

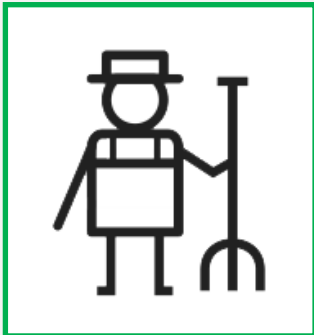

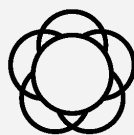

Helpful Tips:

1. Start recording your gardening observations on the day you start to soak your seed in water.
2. Record your next observation when you start to see your seed sprout.
3. Continue recording how your plant is growing and developing by sketching what you see, collecting data, and describing your observations.

(NOTE: To add pages to this journal, make copies of the last page.)

Seed Sprouting Day!

Today's Date: _____

What kind of seed are you sprouting? _____

This is a sketch of my seed:

What did you do to sprout your seed? What are the steps to doing this?
(Think about how you would describe this process to a friend.)

Sprouting, Day 1

Today's Date: _____

How long did it take for your seed to sprout? _____

This is a sketch of my sprout:

Describe what your sprout looks like:

- What color is your sprout? _____
- Do you see any leaves? If yes, how many? _____
- Do you see any roots? _____
- How long is the stem? _____
- What other new changes do you see?
