

INNER MT. AUBURN CORRIDOR SAFETY IMPROVEMENT PROJECT

WALK TO HEAR FROM BUSINESSES

THURSDAY, MAY 23 | 2:00 P.M. - 4:00 P.M.

ABOUT THE WALK:

On the day of the walk, members of the project team will walk through the project area to hear from business owners and employees. We want to learn more about your experiences using the street. The map above shows our walking route and estimated times.

ABOUT THE PROJECT:

The City of Cambridge is beginning the design process for the Inner Mt. Auburn Corridor Safety Improvement Project. The project area is Mt. Auburn Street from JFK Street to Putnam Avenue. This is a quick-build project. Our tool box includes pavement markings, signs, traffic signal changes, and flex posts. With community input, we will explore design alternatives that provide improved bicycle facilities, enhanced pedestrian safety at existing crosswalks, and potential transit improvements.
