

Building a Network

In 2015, the City published the *Cambridge Bicycle Plan: Toward a Bikeable Future*. The guiding principle for the plan is to enable people of all ages and abilities to bike safely and comfortably throughout the city. The plan provides the framework for developing a network of Complete Streets and supporting programs and policies that will help meet this goal.

The Inner Mount Auburn St project area was identified as part of the separated network. The Quincy/DeWolfe project area was identified as a lower volume and/or lower speed facility.

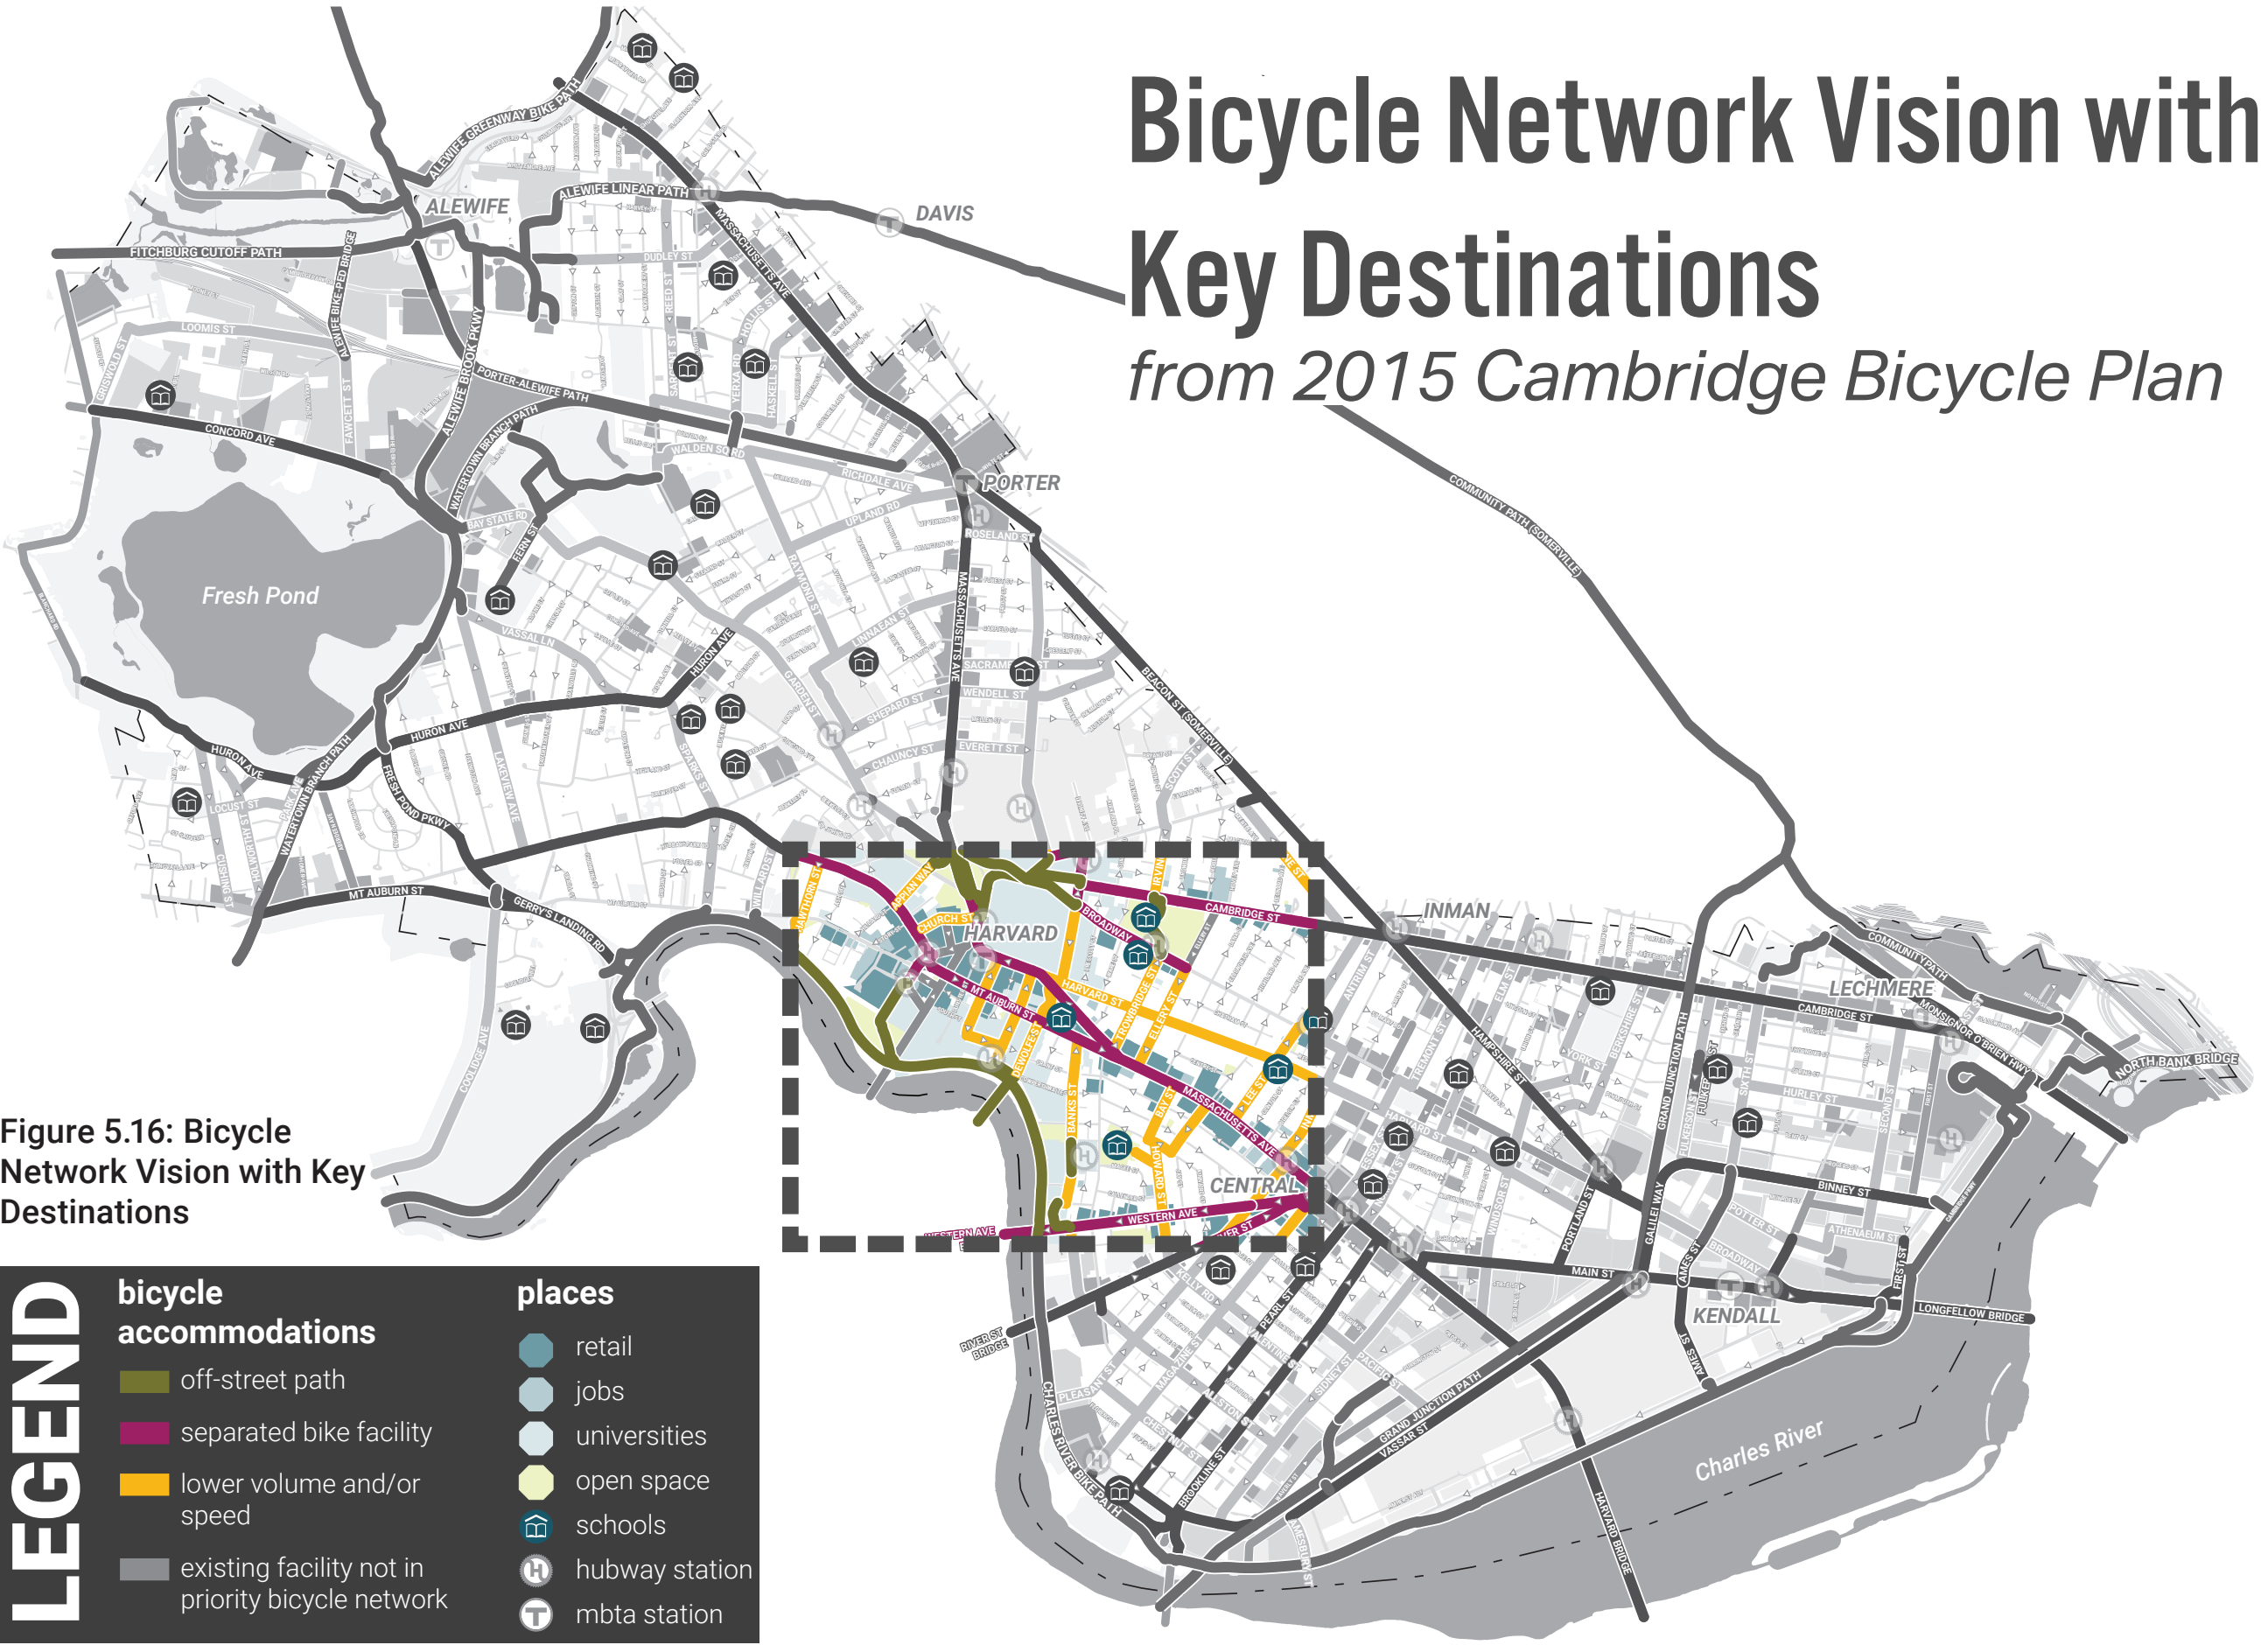

Figure 5.16: Bicycle Network Vision with Key Destinations

The Inner Mount Auburn project will create connections between current and future projects. The Quincy/DeWolfe project

will create a new bike connection between the Charles River and Cambridge St.
