

Preferred Alternative Separated Bike Lanes

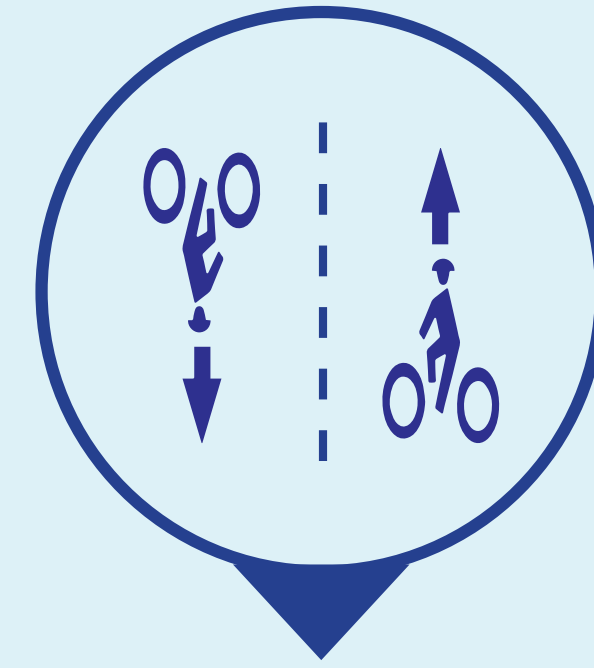

Keeps two travel lanes

Creates new loading zone between Allen Street and Davenport Street

Adds new accessible/disability parking spaces

Adds separated bike lanes in both directions

1 Northbound Loading Zone between Allen Street and Davenport Street

- Loading is available at all hours during the day
- No overnight parking
- **Limiting Factor:** overhead wires prevent adding longer-term parking

2 Accessible/Disability Parking

- Three new accessible/disability parking spaces north of Porter Square
- Two more added between Upland Road and Roseland Street
- To allow for the new loading zone, the existing space in front of the post office may need to be relocated to a new location nearby

Review all project materials and fill out survey.
