

Main Street Safety Improvement Project

The City of Cambridge is adding separated bike lanes, reducing parking, and making related safety improvements on Main Street between Lafayette Square and Portland St.

Installation this Year

After listening to community feedback from our 2023 outreach, we are moving forward with important safety upgrades to make Main Street safer and more accessible for all. In order to do so, we are:

- Installing separated bike lanes,
- Reducing parking to one side of the street,
- Enhancing pedestrian crossings, and
- Introducing elements to slow vehicle speeds

Project Installation:
Spring/Summer 2025
