

Agenda

01. Quick Refresh

- Project Area Map
- Proposed Street Layouts
- What's Included

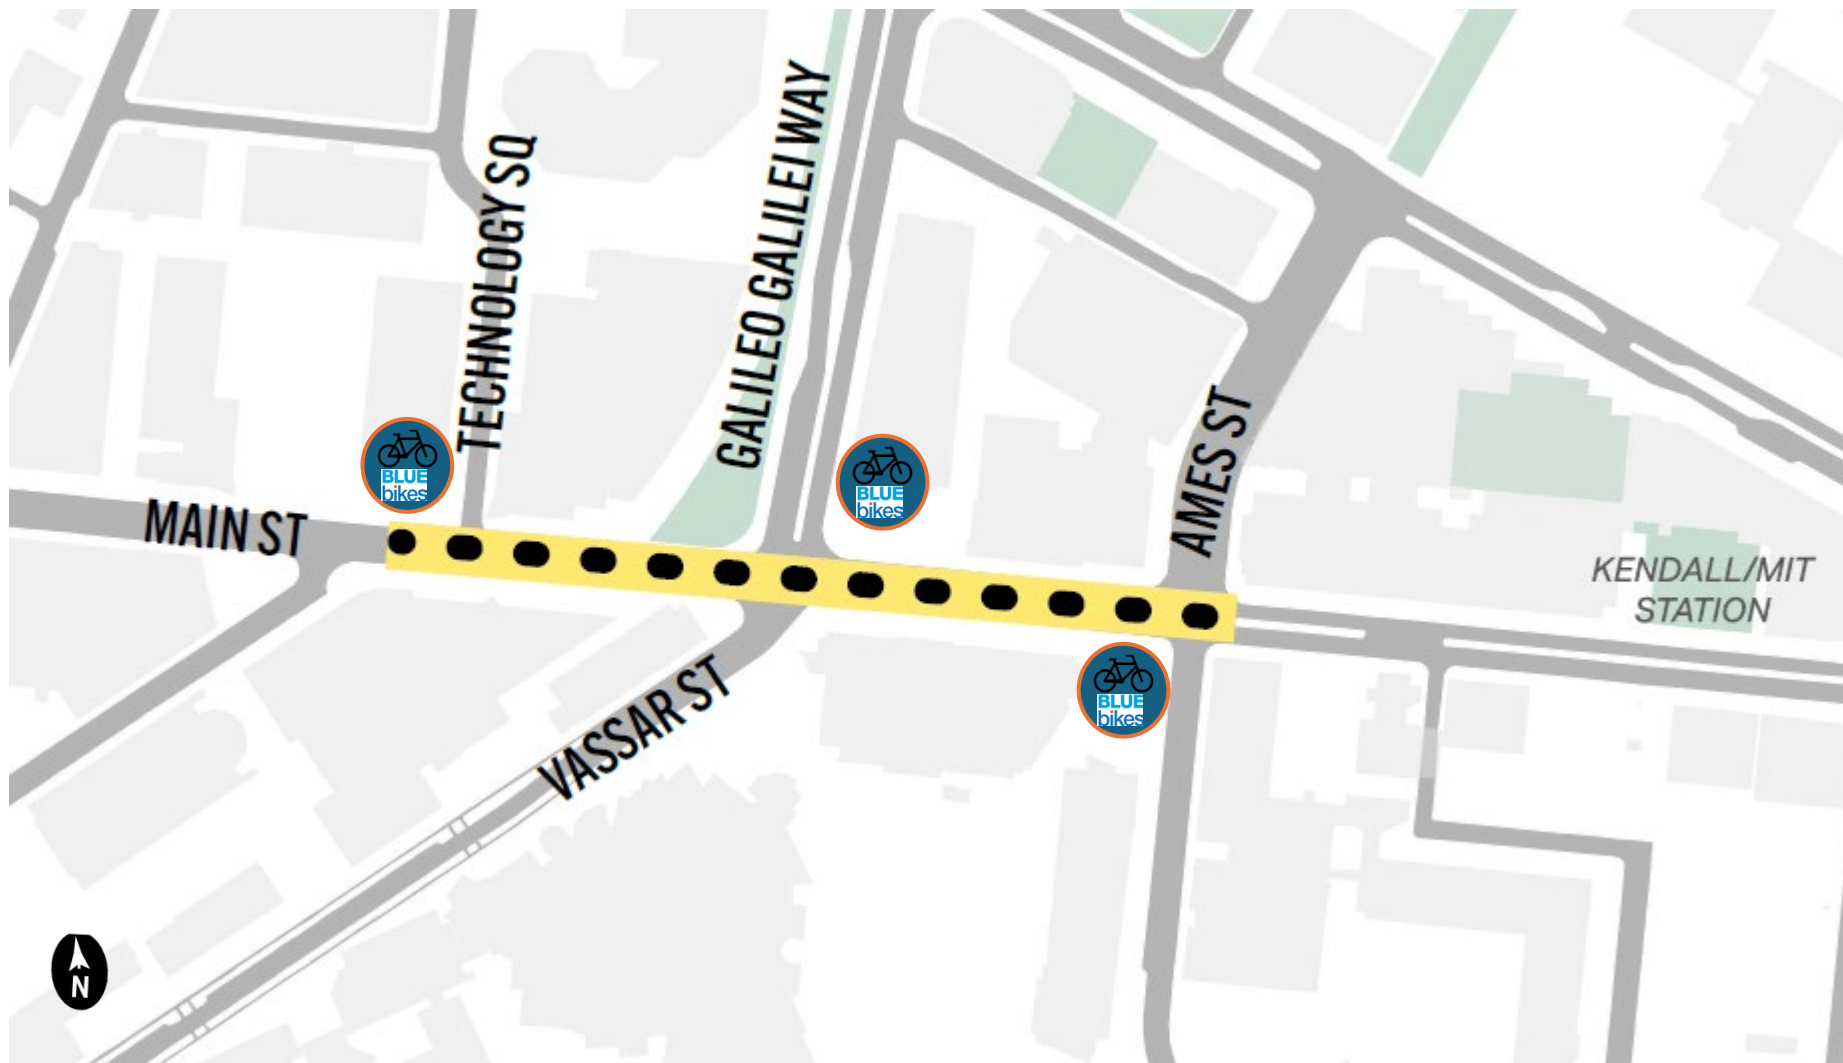

02. What's Changed?

- Tech Square bike connection
- Galileo Galilei Way bike lane buffer
- Loading zone location
- Main St at Vassar St intersection design
- Main St at Ames St intersection design

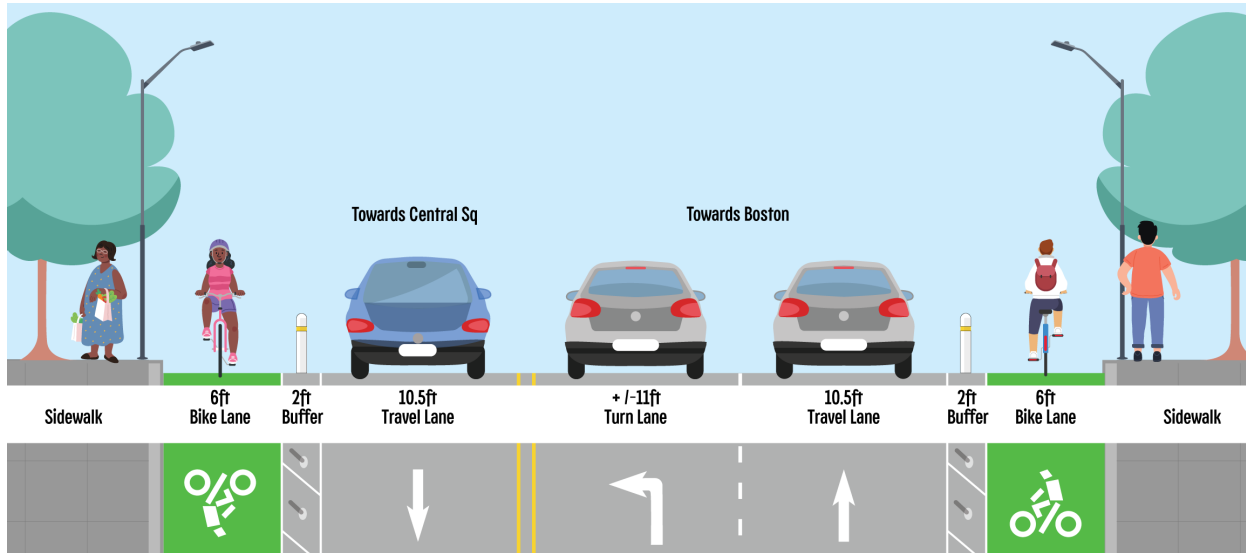

03. Questions and Feedback

01. Quick Refresh

Project Area Map

Proposed Street Layouts

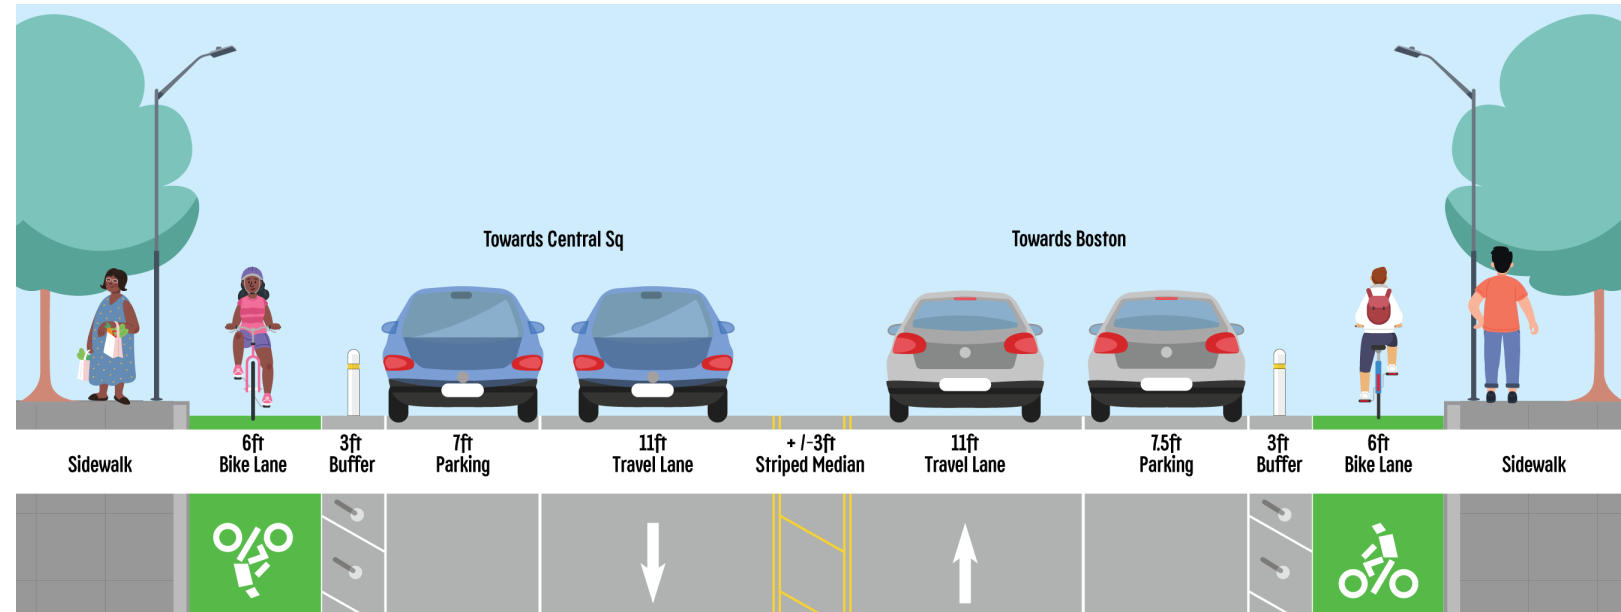

Proposed Street Layout – Tech Sq to Vassar

- Travel lanes narrowed to standard width
- Extra width used to widen bike lanes and add flex post buffers

Proposed Street Layout – Vassar to Ames

- Travel lanes narrowed to standard width
- Median removed
- Extra width used to add flex post buffers and keep a “flex area”
 - Flex area used for bus stops, parking, and turn lanes

What is Included?

Definitely

- Protected bike lanes
- Some parking removal
- Narrowing of travel lanes
- Repaving streets
- Removing median

Could Be

Changes to parking regulations

New traffic signal timing and phasing

New turn lanes

New traffic lights

Not Included

- Most curb changes
- Utility, lighting, or stormwater work
- Entirely new traffic signal posts
- New crosswalks
- Speed humps or raised crosswalks
- Sidewalk expansion
- Changes to other construction projects

02. What's Changed?

Tech Square Bike Connection

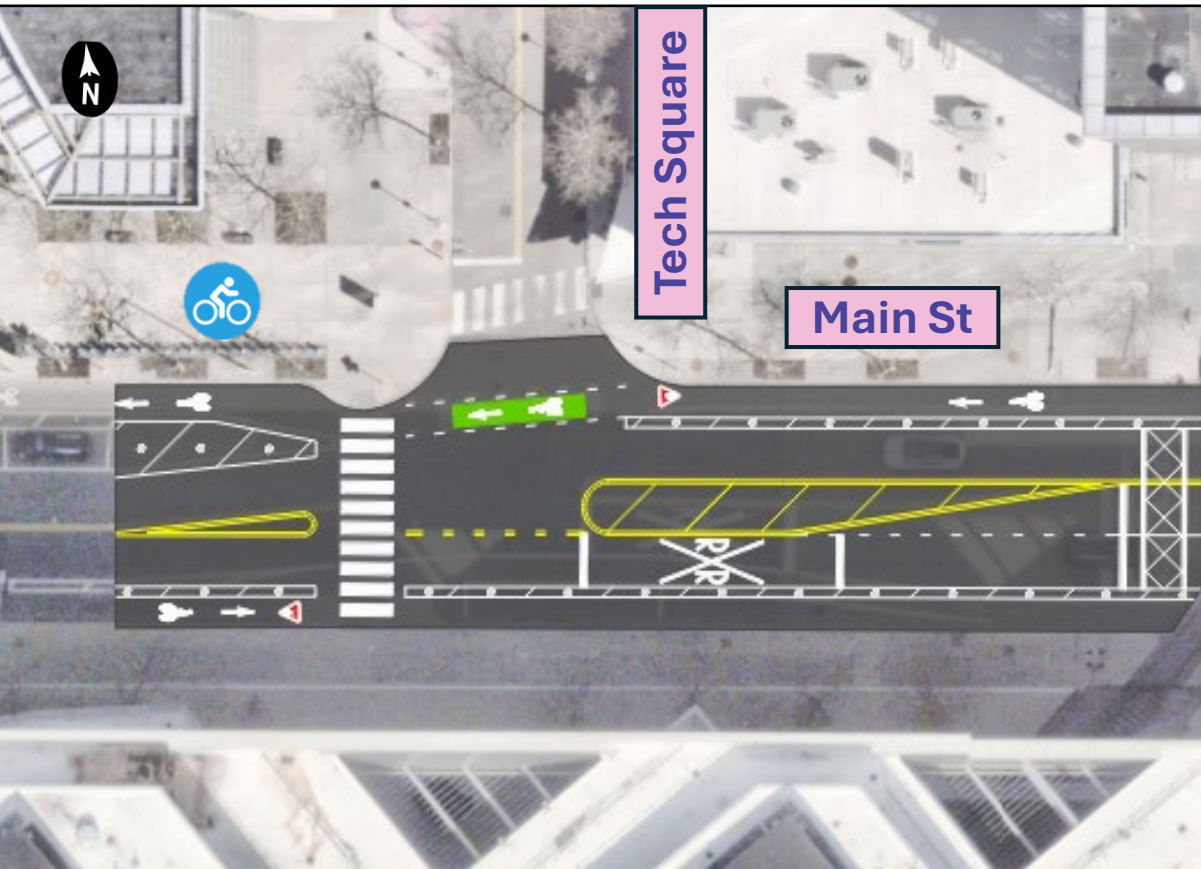

You asked for a way to access Tech Square and the Bluebikes station from both sides of Main Street...

Legend

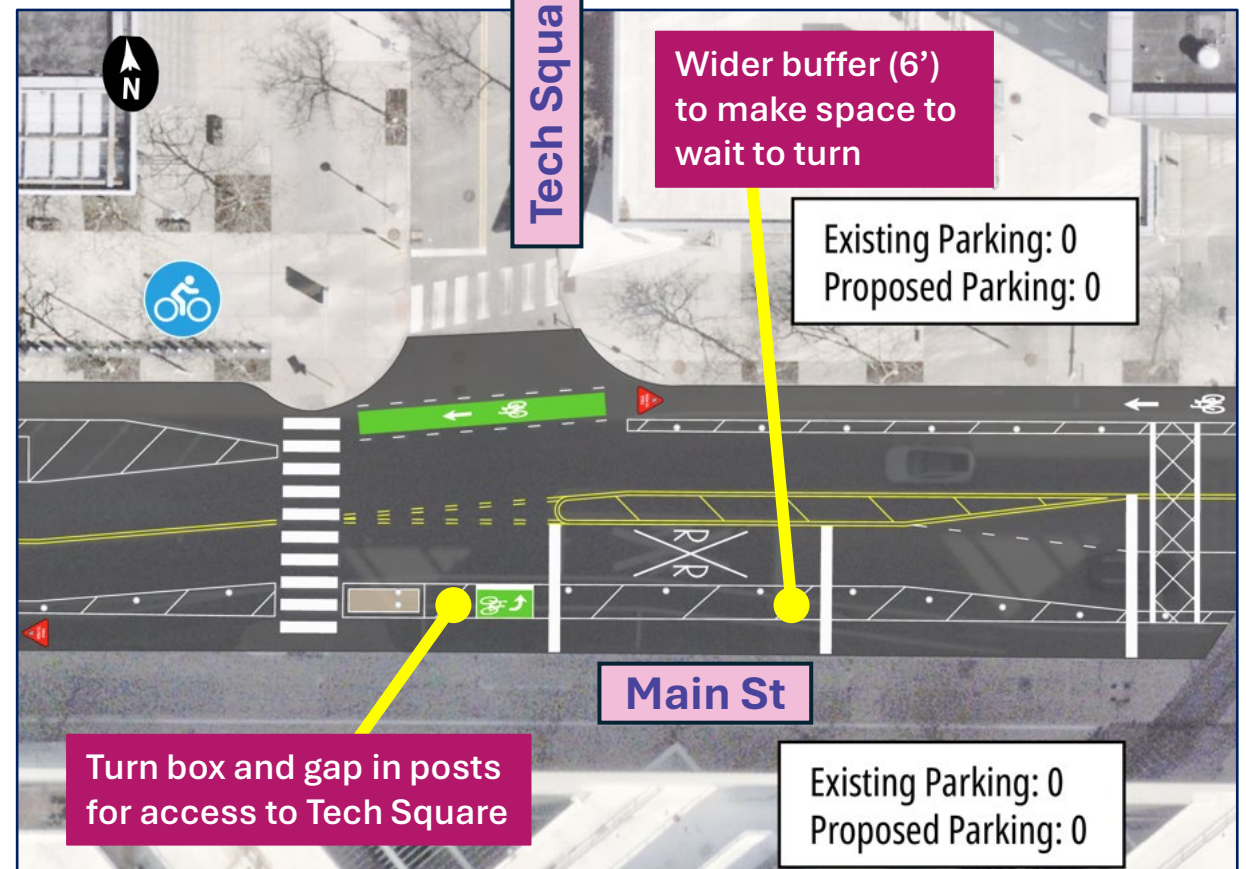

Bluebikes station

Flex Post

Galileo Galilei Bike Lane Buffer

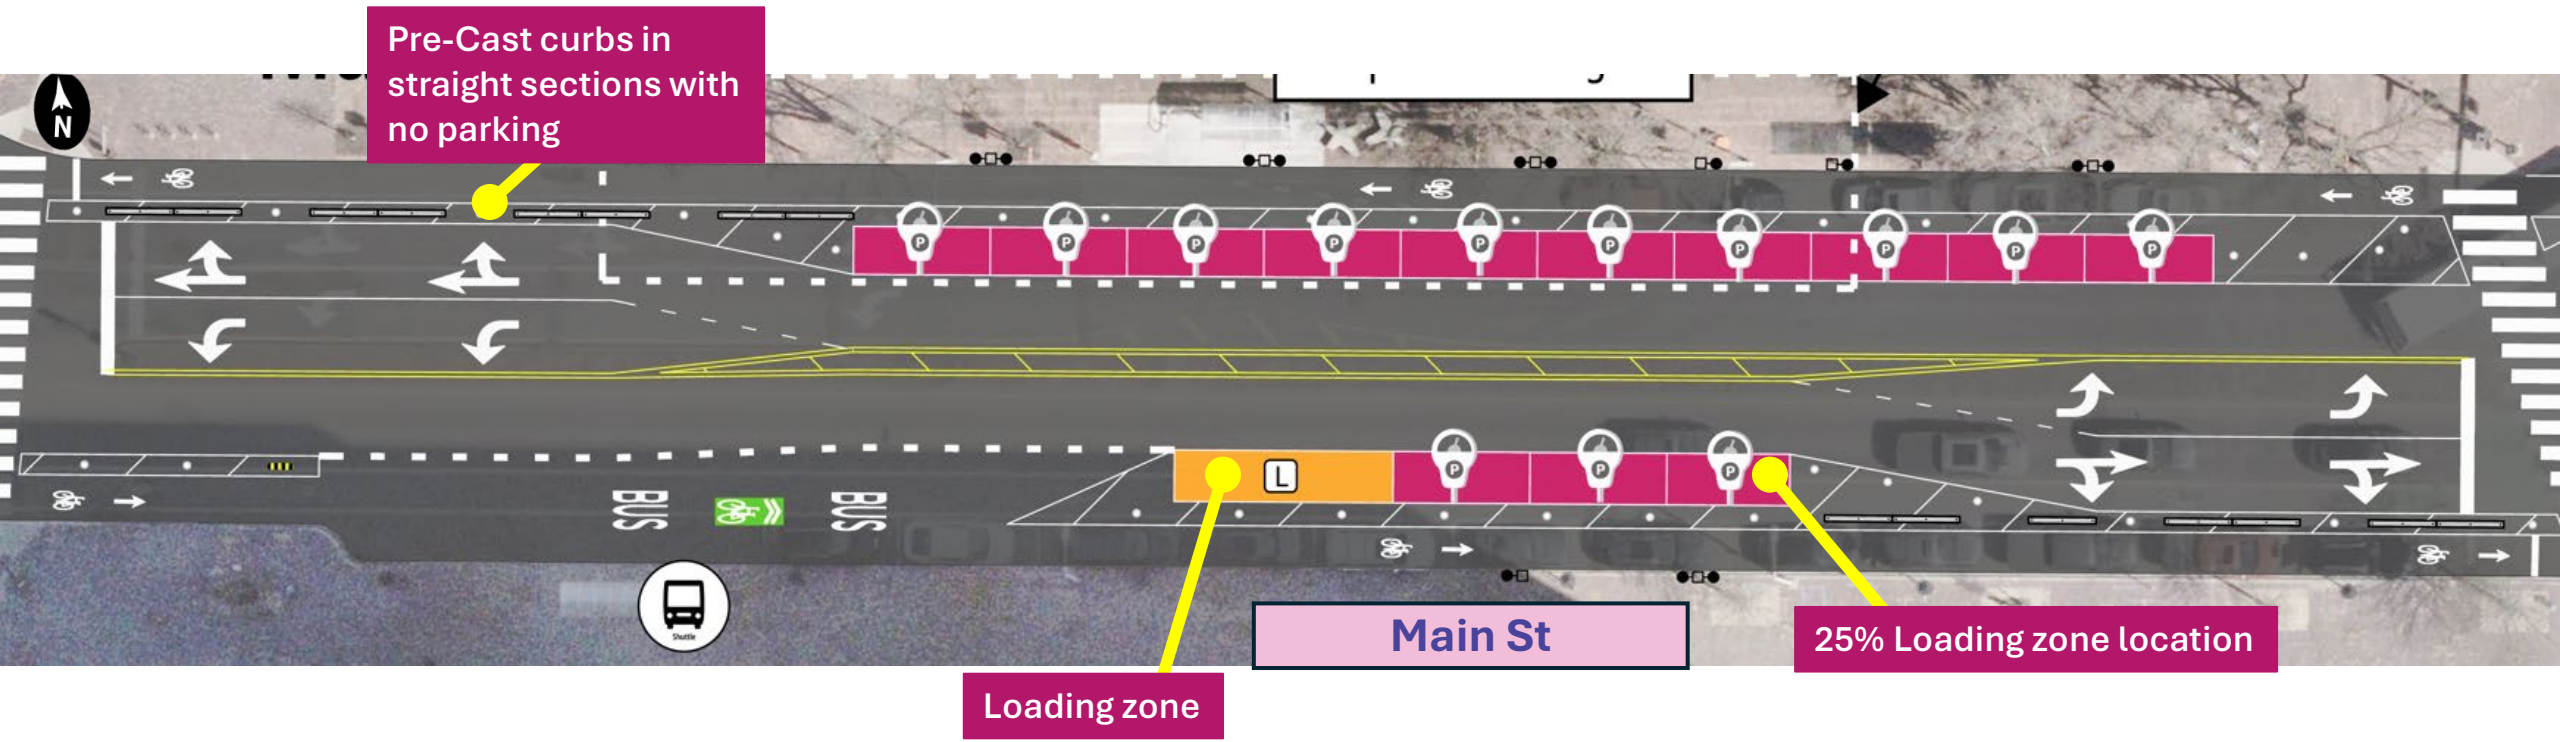

We were asked for a separated bike lane on Galileo Galilei Way, even if it had to be done in paint or separately from the rest of the project...

Loading Zone Location and Pre-Cast Curbs

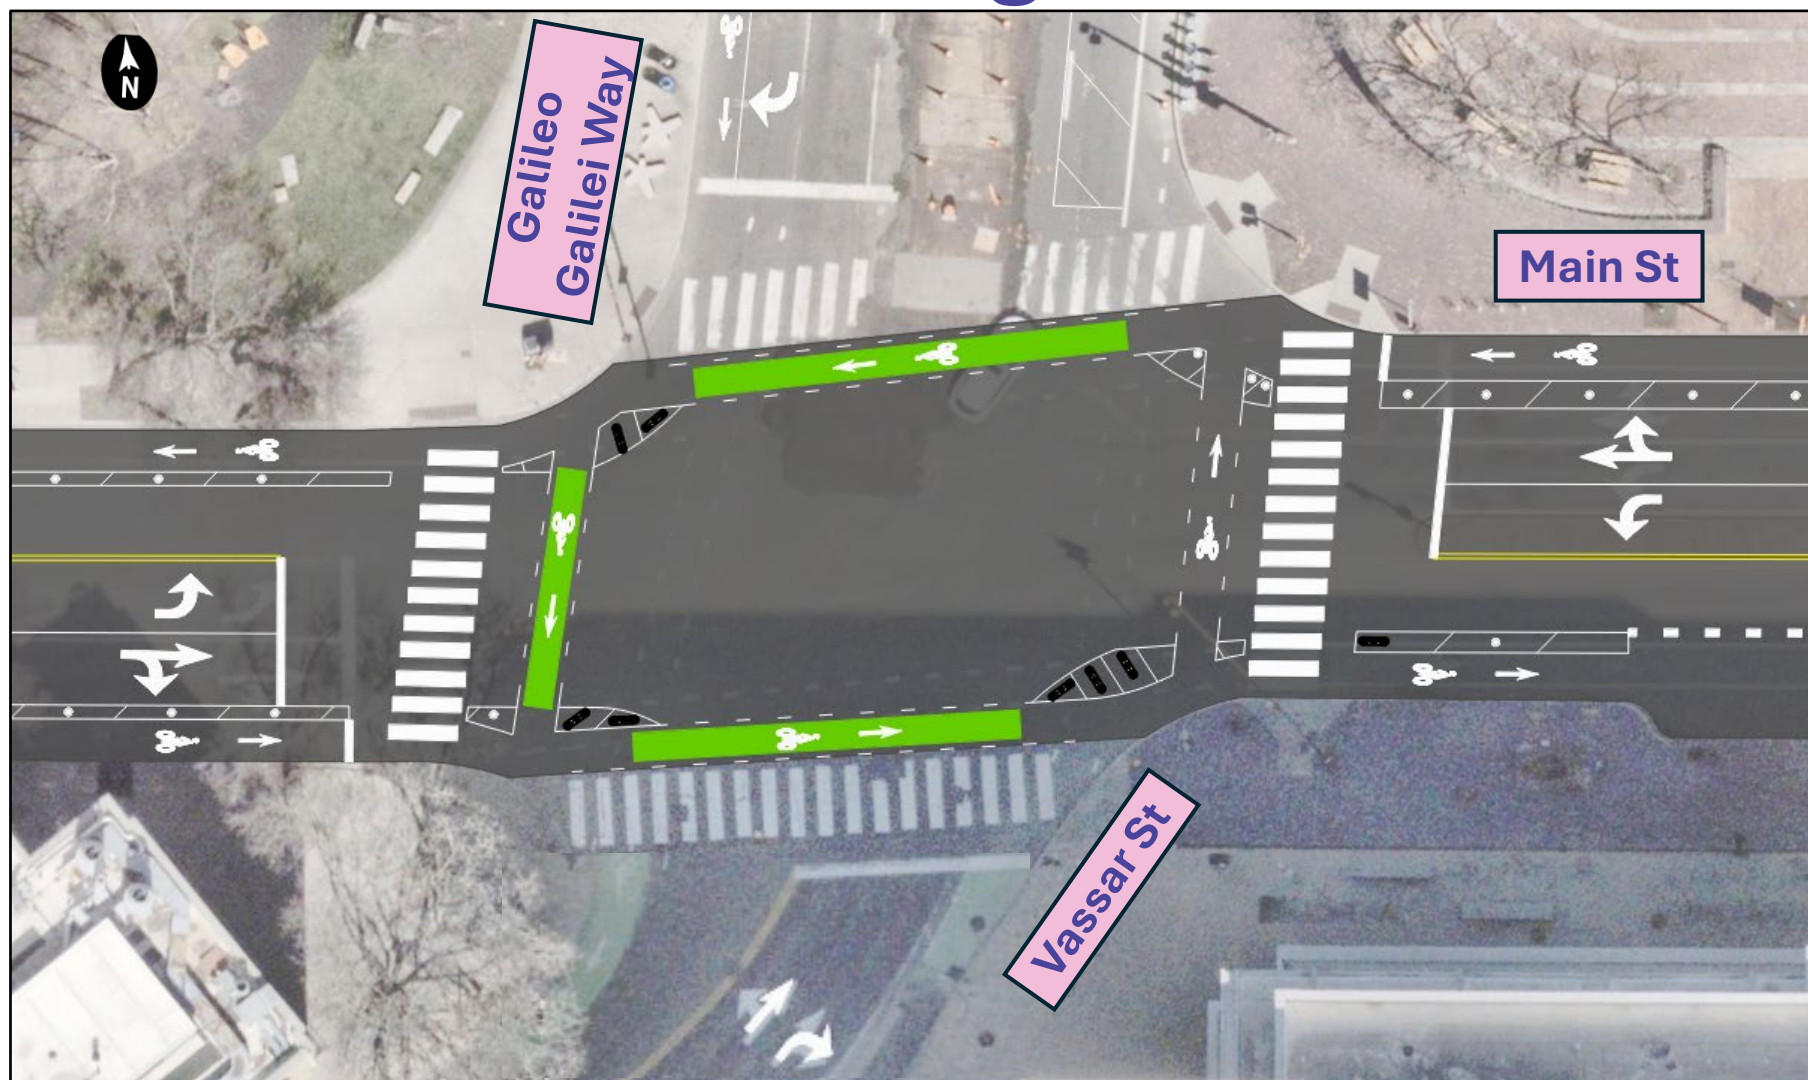

We hope the loading zone will be more obvious in its new spot, leading to less frequent stopping in the bus stop...

Also, we were asked for pre-cast curbs, so we added some in the plan and will install them when we can.
