

Sight Line Guidelines

1. 20' east and 20' west of the nearest edge of the driveway, at the midpoint of the sidewalk (halfway between the Front of curb and back of sidewalk)
2. Intersection of the midpoint of the driveway exit and midpoint of the sidewalk
3. 8' behind the back of sidewalk at the midpoint of the exit driveway. This represents the driver's eye when the front bumper reaches the back of sidewalk.
