**Questions:**

- How much energy is being used during the heat waves?

- How can I ensure energy efficiency during the heat waves?

**Tips:**

- Always check the weather forecast and follow the advice of the National Weather Service–Boston or similar local authorities.
- Make sure your air conditioning is working properly.
- Keep your windows and doors closed to prevent heat from entering your home.
- Use fans to circulate air and cool your home.
- Avoid using large appliances when electricity demand is high.
- If you notice any signs of electrical problems, such as smoke or sparks, call your local electrical utility immediately.

**Safety Tips:**

- Keep your pets and plants cool by providing shade and access to water.
- Avoid outdoor activities during the hottest parts of the day.
- Check on elderly family members or neighbors who may be at risk of heat-related illnesses.
