CAMBRIDGE, MASSACHUSETTS

BZA Application Form

BZA Number: 111270

General Information

The undersigned hereby petitions the Board of Zoning Appeal for the following:

Special Permit: _____ Variance: X Appeal: _____

PETITIONER: Brad Harkavy and Ann Marie Mador

PETITIONER'S ADDRESS: 120-122 Henry Street, Cambridge, MA 02139

LOCATION OF PROPERTY: 120-122 HENRY STREET

TYPE OF OCCUPANCY: Garage

ZONING DISTRICT: Residence C Zone

REASON FOR PETITION:

/New Structure/

DESCRIPTION OF PETITIONER'S PROPOSAL:

The existing garage structure is shared between two 2-family properties, 116-118 and 120-122 Henry Street. Because the existing garage building is in poor condition, the property owners are proposing to demolish and replace the structure on the same footprint as existing. Because the building crosses a property line it does not adhere to the setbacks required by the current ordinance, hence the variance relief requested in this application. Please refer to the corresponding variance application submitted for 116-118 Henry Street for additional information.

SECTIONS OF ZONING ORDINANCE CITED:

- Article: 5.000 Section: 5.31 (Table of Dimensional Requirements)
- Article: 4.000 Section: 4.21 (Accessory Uses)
- Article: 5.000 Section: 5.22.1 (Private Open Space)
- Article: 5.000 Section: 5.25.41 (Exemption for Residential Parking Spaces)

1. SEE CAMBRIDGE ZONING ORDINANCE ARTICLE 5.000, SECTION 5.30 (DISTRICT OF DIMENSIONAL REGULATIONS).
2. TOTAL GROSS FLOOR AREA (INCLUDING BASEMENT 7'-0" IN HEIGHT AND ATTIC AREAS GREATER THAN 5') DIVIDED BY LOT AREA.
3. OPEN SPACE SHALL NOT INCLUDE PARKING AREAS, WALKWAYS OR DRIVEWAYS AND SHALL HAVE A MINIMUM DIMENSION OF 15'.

BZA Application Form

SUPPORTING STATEMENT FOR A VARIANCE

EACH OF THE FOLLOWING REQUIREMENTS FOR A VARIANCE MUST BE ESTABLISHED AND SET FORTH IN COMPLETE DETAIL BY THE APPLICANT IN ACCORDANCE WITH MGL 40A, SECTION 10.

- A)** A literal enforcement of the provisions of this Ordinance would involve a substantial hardship, financial or otherwise, to the petitioner or appellant for the following reasons:
- The existing garage structure has become structurally unsound due to "concrete rot," resulting in exposed and rusting rebar. There is observable rusting and deterioration of structural steel beams, as well as cracking in the slab-on-grade foundation. It would be more complex and costly to repair the existing structure and foundation than to demolish and replace it on the same footprint.
- B)** The hardship is owing to the following circumstances relating to the soil conditions, shape or topography of such land or structures and especially affecting such land or structures by not affecting generally the zoning district in which it is located for the following reasons:
- The existing slab-on-grade foundation has cracked in several places due to settling of the soil below. Replacing the slab-on-grade with a pier foundation as is proposed is more appropriate for the soil conditions on this site. Additionally, this garage structure is unique in that it is shared by two lots. The four off-street parking spaces (1 per dwelling unit) provided by the garage must also be preserved as per the current Ordinance. The most efficient use of space in both lots would be to replace the structure on its current footprint, thereby preserving existing open space.
- C) DESIRABLE RELIEF MAY BE GRANTED WITHOUT EITHER:**
- 1)** Desirable relief may be granted without substantial detriment to the public good for the following reasons:

The proposed garage structure will preserve current off-street parking as required by the Ordinance. The proposed roof garden will also add Permeable Open Space to the lot, which currently does not meet Permeable Open Space requirements set forth by the Ordinance. The Functional Green Roof areas will retain stormwater at a minimum of 1" per hour, while the proposed 1000 gallon cistern will store rainwater that drains through the permeable deck areas. This stored rainwater will subsequently be used for garden and landscape irrigation, eliminating the need for additional use of city water. The proposed roof garden will not impact the current Floor Area Ratio of the lot as the space is below the third floor.
 - 2)** Desirable relief may be granted without nullifying or substantially derogating from the intent or purpose of this Ordinance for the following reasons:

The proposed garage structure will maintain and in some cases improve upon existing conditions by preserving off-street parking provided by the current structure, removing an eyesore and potential structural hazard, and adding usable permeable open space. Where visible from surrounding units, the roof garden will add aesthetic value superior to the current black rubber roof.

To whom it may concern,

We are neighbors of Barb Bryant and David Yee at 116 Henry Street, and Brad Harkavy and Ann Marie Mador at 120 Henry Street. I am writing in support of their appeal to the zoning board and ask that they be granted approval to rebuild their existing shared garage structure and roof garden, which abuts our property.

We have been made aware of their plans for improving the garage, and we are supportive of the project for several reasons. The current garage that they are seeking to rebuild is in disrepair. As such, the proposed new building would be an improvement to the neighborhood. The plan would directly benefit our property, as well as other abutting neighbors, by adding green space and providing a more pleasing view from our upper floors.

An important feature of the rebuild is that it will maintain the extensive off-street parking provided by the current structure. Thus, we are satisfied that the project will not negatively impact the availability of on-street parking in our immediate vicinity.

In sum, we are fully supportive of our neighbors' petition and urge you to act favorably on their request. If you should have any questions regarding our position or need any further information, please do not hesitate to reach out.

Sincerely,

Marc Chamblee
