**SUPPORTING STATEMENT FOR A SPECIAL PERMIT**

Please describe in complete detail how you meet each of the following criteria referring to the property and proposed changes or uses which are requested in your application. Attach sheets with additional information for special permits which have additional criteria, e.g.; fast food permits, comprehensive permits, etc., which must be met.

Granting the Special Permit requested for 1815 Massachusetts Avenue (location) would not be a detriment to the public interest because:

- A)** Requirements of the Ordinance can or will be met for the following reasons:

As demonstrated by the documents and information provided with this application, and as will be further demonstrated at the hearing on this matter, the modification constitutes an Eligible Facilities Request which must be allowed and cannot be denied, pursuant to Section 6409 of the Federal Spectrum Act and regulations thereunder.

- B)** Traffic generated or patterns of access or egress would not cause congestion hazard, or substantial change in established neighborhood character for the following reasons:

The upgraded facility will not change existing traffic demand or effect ingress or egress. The facility will generate only about one to two vehicle trips per month by a standard passenger vehicle during normal business hours for routinemaintenance.

- C)** The continued operation of or the development of adjacent uses as permitted in the Zoning Ordinance would not be adversely affected by the nature of the proposed use for the following reasons:

The upgraded facility will have no adverse effects on the operation or development of adjacent uses. The facility will emit no light, odor, dust or glare and generates no unusual noise or other adverse impacts.

- D)** Nuisance or hazard would not be created to the detriment of the health, safety and/or welfare of the occupant of the proposed use or the citizens of the City for the following reasons:

The upgraded facility will generate no additional traffic or other negative impacts on surrounding properties or within the City of Cambridge. The facility requires no water or sewer service and emits no light, odor, dust, or glare and generates no unusual noise or other adverse impacts. The facility will be unoccupied, with no employees or customers. The availability of wireless communication enhances the health, safety, and welfare of the community.

- E)** For other reasons, the proposed use would not impair the integrity of the district or adjoining district or otherwise derogate from the intent or purpose of this ordinance for the following reasons:

The upgraded facility has been designed to minimize its visual impact and is in harmony with the general purpose of the Zoning Ordinance and in accordance with the requirements for an Eligible Facilities Request under Federal Law.

**CITY OF CAMBRIDGE, MASSACHUSETTS  
BOARD OF ZONING APPEAL**

**STATEMENT IN SUPPORT OF  
ELIGIBLE FACILITIES REQUEST UNDER SECTION 6409  
and SPECIAL PERMIT, IN THE ALTERNATIVE**

**Applicant:** Cellco Partnership d/b/a Verizon Wireless  
**Property:** 1815 Massachusetts Avenue  
**Zoning:** Business C  
Massachusetts Avenue Overlay District  
Lesley Porter Zoning Overlay District  
**Proposed Use:** Mobile Communications Facility (Modification)

**BACKGROUND**

The Applicant, Cellco Partnership, d/b/a Verizon Wireless (“Applicant” or “Verizon Wireless”), is licensed by the Federal Communications Commission (“FCC”) to provide personal wireless services within the market area that includes the City of Cambridge. To the extent required, Verizon Wireless seeks to modify its existing special permit, issued by the Board of Zoning Appeal (the “BZA”) on September 13, 2017 in Case No. 013783-2017 (the “Existing Special Permit”) to allow it to upgrade its existing mobile communications facility located at 1815 Massachusetts Avenue (the “Subject Property”).

The existing facility and the proposed Verizon Wireless mobile communications facility is a personal wireless services facility within the meaning of the Federal Telecommunications Act (“TCA”), 47 U.S.C. § 332(c)(7)(C)(ii). It is also a mobile communications facility within the meaning of the Cambridge Zoning Ordinance (the “Zoning Ordinance”). This application is submitted with full reservation of the Applicant’s rights under federal, as well as state and local law, including, without limitation, Section 6409 of the federal Middle Class Tax Relief and Job Creation Act of 2012, commonly referred to as the “Spectrum Act.”

**DESCRIPTION OF PROJECT**

The Subject Property is improved with a multi-story building currently owned by Lesley University. The ground floor is occupied by retail space and the upper floors are used by the University. Consistent with the Existing Special Permit, and as shown on the Site Plan and photographic simulations (the “Photosims”) submitted with this application, the existing Verizon Wireless facility consists of four sectors of three panel antennas, for a total of twelve antennas on the façade of the tower.

Verizon Wireless proposes to replace eight existing antennas (two per sector) with eight antennas with integrated remote radio heads (“RRHs”) which will be affixed to proposed antenna mounts. Four existing antennas (one per sector) will also be relocated from position 1 (left) to position 3

(right). Consistent with the Existing Special Permit, all antennas and associated cabling and mounting equipment will be wrapped or painted to match the façade of the building, in terms of the solid red color.

### **REQUEST FOR RELIEF AND SATISFACTION OF APPLICABLE STANDARDS**

Verizon Wireless seeks a special permit pursuant to Footnote 49 to the Table of Use Regulations (Zoning Ordinance section 4.40.49) to allow it to upgrade its existing mobile communications facility on the Building at the Subject Property. The following analysis demonstrates that the proposed modification of the existing Verizon Wireless installation meets these standards.<sup>1</sup>

1. *The scope of or limitations imposed by any license secured from any state or federal agency having jurisdiction over such matters.*

Verizon Wireless is licensed by the Federal Communications Commission (“FCC”) to provide personal wireless services within the market area that includes the City of Cambridge. There are no limitations imposed on Verizon Wireless’ licenses that would prevent it from installing and operating a mobile communications facility on the Subject Property as proposed in this application.

2. *The extent to which the visual impact of the various elements of the proposed facility is minimized: (1) through the use of existing mechanical elements on a building’s roof or other features of the building as support and background; (2) through the use of materials that in texture and color blend with the materials to which the facilities are attached; or (3) other effective means to reduce the visual impact of the facility from off the site.*

As depicted on the Site Plan and Photosims, the proposed modifications to the existing Verizon Wireless facility on the building satisfy these standards. Verizon Wireless proposes to replace eight existing antennas (two per sector) with eight antennas with integrated remote radio heads (“RRHs”) which will be affixed to proposed antenna mounts. Four existing antennas (one per sector) will also be relocated from position 1 (left) to position 3 (right). Consistent with the Existing Special Permit, all antennas and associated cabling and mounting equipment will be wrapped or painted to match the façade of the building, in terms of the solid red color.

3. *Where it is proposed to erect such a facility in any residential zoning district, the extent to which there is a demonstrated public need for the facility at the proposed locations, the existence of alternative, functionally suitable sites in nonresidential locations, the character of the prevailing uses in the area, and the prevalence of other, existing mechanical systems and equipment carried on or above the roof of nearby structures. The*

---

<sup>1</sup> In providing information addressing the standards set forth in the Ordinance that concern the proposed wireless communications use, Verizon Wireless does not concede, and expressly reserves all of its rights with respect to, any attempt by the City to exercise jurisdiction over matters concerning Verizon Wireless’ license or the technical performance of the proposed site or its network.

*Board of Zoning Appeal shall grant a special permit to erect such a facility in a residential zoning district only upon a finding that nonresidential uses predominate in the vicinity of the proposed facility's location and that the telecommunication facility is not inconsistent with the character that does prevail in the surrounding neighborhood.*

Not applicable. The Subject Property is not located in a residential zoning district.

The proposed modification of the existing wireless communications installation also satisfies the criteria of Section 10.43 of the Ordinance relating to the grant of special permits. The project conforms to the standards of Section 4.40.49 as discussed above. It will not have any traffic impacts and will not affect the operation or development of adjacent uses. It will not be detrimental to the health, safety or welfare of the City, and indeed the availability of reliable wireless communications enhances health, safety and welfare. The proposed modification of the existing installation will also not impair the integrity of the district or adjoining districts, or derogate from the intent and purpose of the Ordinance. The availability of reliable wireless communications service for both voice and data communications benefits businesses and residents which increasingly rely on these services for a wide variety of purposes. Reliable wireless service also enhances community safety, because it is used by public safety officials as well as the public in times of crisis, natural disaster, inclement weather, and similar circumstances.

### **THE PROPOSED MODIFICATION CONSTITUTES AN ELIGIBLE FACILITIES REQUEST UNDER THE SPECTRUM ACT**

Under the Spectrum Act and the implementing regulations adopted by the Federal Communications Commission<sup>2</sup> (the “FCC Regulations”), the proposed modification to the existing Verizon Wireless facility constitutes an eligible facilities request. The reasons for this are as explained below.

The Spectrum Act states, in pertinent part:

Notwithstanding section 704 of the Telecommunications Act of 1996<sup>3</sup> or any other provision of law, *a state or local government may not deny, and shall approve*, any eligible facilities request for a modification of an existing wireless tower or base station that does not substantially change the physical dimensions of such tower or base station.<sup>4</sup>

The rules for implementing this requirement of the Spectrum Act (i.e., the FCC Regulations) went into effect on April 8, 2015.

Pursuant to the FCC Regulations, an “eligible facilities request” means “any request for modification of an existing wireless tower or *base station* that does not *substantially change* the physical dimensions of such tower or base station, involving ... collocation of new *transmission*

---

<sup>2</sup> See 47 C.F.R. 1.40001 (Wireless Facility Modifications).

<sup>3</sup> The Telecommunications Act of 1996 is codified as 47 U.S.C. § 332(c)(7).

<sup>4</sup> 47 U.S.C. 1455(a)(1) (emphasis added).

equipment ... or replacement of transmission equipment.”<sup>5</sup> The FCC Regulations define “base station” to mean:

A structure or equipment at a fixed location that enables Commission-licensed or authorized wireless communications between user equipment and a communications network.

...

(iii) The term includes any structure other than a tower that, at the time the relevant application is filed with the State or local government under this section, supports or houses [equipment associated with wireless communications services] that has been reviewed and approved under the applicable zoning or siting process, or under another State or local regulatory review process, even if the structure was not built for the sole or primary purpose of providing such support.<sup>6</sup>

“Transmission equipment” is defined to include not only antennas but also all “equipment that facilitates transmission” for a FCC-licensed or authorized wireless communication service, including but not limited to “radio transceivers, antennas, coaxial or fiber-optic cable, and regular and backup power supply.”<sup>7</sup>

The proposed modification to the existing Verizon Wireless facility is an “eligible facilities request” under the Spectrum Act because:

- (1) The existing building at 1815 Massachusetts Avenue that is the subject of this request constitutes a “base station” in that it currently “supports or houses” wireless communications equipment that has been reviewed and approved under the City’s zoning ordinance, including Verizon Wireless’ Existing Special Permit, Case No. 013783-2017, as well as communications equipment installed and operated by other wireless service providers (see e.g., Case No. BZA-016894-2018 and Case No. BZA-016956-2018).
- (2) The proposed replacement of existing antennas constitutes a “replacement of transmission equipment;”
- (3) The proposed modification does not “substantially change the physical dimensions” of the base station. The proposed modification does not constitute a “substantial change” as defined under the FCC Regulations<sup>8</sup> because it:
  - (i) does not involve the installation of more than the standard number of equipment cabinets;  
**Comment:** *No more than the standard number of equipment cabinets will be installed for the technology involved.*
  - (ii) does not entail excavation or deployment outside of the current site;  
**Comment:** *The request does not propose any excavation.*

---

<sup>5</sup> 47 C.F.R. § 1.40001(b)(3) (emphasis added).

<sup>6</sup> 47 C.F.R. § 1.40001(b)(1).

<sup>7</sup> 47 C.F.R. § 1.40001(b)(8).

<sup>8</sup> See 47 C.F.R. § 1.40001(b)(7)(i)-(vi) (definition of “substantial change”).

- (iii) does not defeat the concealment elements of the Existing Facility;  
***Comment:** As is the case with the existing antennas, and consistent with the Existing Special Permit, all antennas and associated cabling and mounting equipment will be wrapped or painted to match the façade of the building, in terms of the solid red color.*
- (iv) does not increase the height of the building by more than 10% or ten feet;  
***Comment:** The proposed modification will not exceed the current highest appurtenance.*
- (v) does not add any appurtenances that would protrude from the edge of the building by more than six feet; and  
***Comment:** The proposed antennas and the RRHs will be mounted to the same location on the building as the existing antennas and will not protrude from the building façade more than six feet; and*
- (vi) complies with the conditions associated with the siting approval.  
***Comment:** The proposed modification satisfies the concealment conditions of the Existing Special Permit in that all antennas and associated cabling and mounting equipment will be wrapped or painted to match the façade of the building, in terms of the solid red color.*

Pursuant to Section 1.40001(c)(1) of the FCC Regulations, an applicant asserting that a request for modification is covered by the Spectrum Act may be required to submit “documentation or information only to the extent reasonably related to determining whether the request meets the requirements of [the Spectrum Act].” Section 1.40001(c)(1) further states that a state or local government “may not require an applicant to submit any other documentation, including but not limited to documentation intended to illustrate the need for such wireless facilities or to justify the business decision to modify such wireless facilities.”<sup>9</sup>

The information presented by Verizon Wireless in connection with this application—including but not limited to the Site Plan, the Photographs, and this Statement—is sufficient for the BZA to determine that the proposed modification to the existing facility qualifies as an eligible facilities request under the Spectrum Act.

The FCC Regulations provide that an eligible facilities request must be approved within 60 days of submittal unless the local government determines that the application does not satisfy the requirements for an eligible facilities request or notifies the applicant within 30 days of submittal “clearly and specifically delineating all missing documents or information” that is “reasonably related to determining whether the request meets the requirements” for an eligible facilities request.<sup>10</sup> Moreover, an eligible facilities request is deemed approved as a matter of federal law, if not denied within 60 days of submittal of the request.<sup>11</sup> In filing this application, Verizon

Wireless does not waive, and specifically reserves, all of its rights under federal law, including these provisions.

### **CONCLUSION**

For all of the foregoing reasons, Verizon Wireless respectfully requests that the Board of Zoning Appeal grant a special permit in addition to granting any other relief that may be appropriate or necessary, to authorize the proposed equipment upgrade as set forth on the Plans and described in these application materials.

Respectfully submitted,  
Cellco Partnership d/b/a Verizon Wireless
