SPRING/SUMMER 2022

A Look at City Initiatives for 2022-23

Proposed Community Safety Department to Offer Alternative Response to Non-Violent and Behavioral Health Crisis 911 Calls

The City of Cambridge is proposing a new Community Safety Department (CSD) that will coordinate community driven solutions to enhance safety in the community, with key services and programs targeted at our most vulnerable populations. CSD will operate independently from the Cambridge Police Department, and services will focus on behavioral health crisis response and violence prevention and intervention. These initiatives will be rooted in harm reduction and trauma-informed principles grounded in the belief that all people deserve respect, autonomy, dignity, and opportunity.

If approved by the City Council, CSD will oversee the Cambridge Alternative Response Program that will include specialized civilian field teams that serve as the primary responders to non-violent and behavioral health crisis calls received through the Cambridge Emergency Communications Center (ECC) which operates 9-1-1. The medical protocol utilized by ECC staff provides assurances that patient care will not be compromised. The field teams will employ their training and lived experiences to provide immediate support to individuals in crisis and provide aftercare services.

City Manager's Message

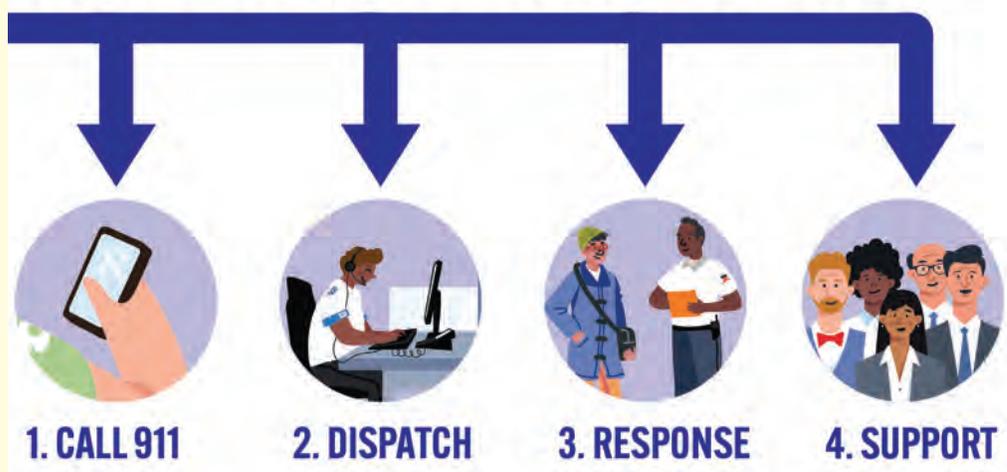

As someone who was born, raised, and has lived in Cambridge their entire life, I understand firsthand that our community's racial, ethnic, and cultural diversity shapes our City and is what makes it a desirable and enriching place to live, work, and raise a family. In July, I will be retiring from the City of Cambridge after more than 45 years of service.

During most of my tenure with the City, I worked in the Finance Department, serving as Budget Director and Assistant City Manager for Finance before being appointed City Manager in 2016. As I approach my last day as City Manager, I want to recognize our incredible workforce.

CAMBRIDGE ALTERNATIVE RESPONSE PROGRAM

Access Digital Versions of CityView and Other City Publications

The City has launched a new interactive website for digital publications which features this issue of CityView. The new site allows staff to create more responsive and interactive versions of content typically featured in our print publications to share additional information, videos, and more. In time, digital versions of other City publications will be added to the site as well. Learn more and explore the content at Cambridgema.gov/digital.

City Investing \$38 Million in Affordable Housing in FY23

The City's 2022-2023 Annual Budget again includes a significant increase in funding for the development and preservation of affordable housing in Cambridge. The chart below breaks down the funding sources.

Funding Source	Amount	
	FY22	FY23
25% of Building Permit Revenue	\$5,812,155	\$10,245,750
Property Tax	\$12,500,000	\$12,500,000
Short Term Rental Impact Fees	\$42,000	\$200,000
Estimated Community Preservation Act (CPA) allocation*	\$14,000,000	\$15,120,000
Total	\$32,354,155	\$38,065,750

*Assumes 80% CPA allocation for affordable housing

The total anticipated direct funding for affordable housing in FY23 from the sources noted above is over \$38 million, compared to over \$32 million in FY22. Through FY22, the City has appropriated more than \$278.8 million to invest in affordable housing initiatives. These funds have been used to preserve or create more than 3,625 affordable units to date. The City will also continue to support this effort through zoning tools that promote affordable housing, by providing access to affordable rental housing, and by providing homeownership education, counseling, and homebuyer financial assistance.

The City Manager will continue work with the City Council to examine potential new revenue sources to facilitate affordable housing initiatives.

Preserving Affordability at Fresh Pond Apartments

In FY22, the Affordable Housing Trust provided \$34.5 million in loans and other assistance to complete preservation of long-term affordability of all 504 affordable units at Fresh Pond Apartments at 362 and 364 Rindge Avenue. This commitment includes providing financing to the owner to reflect the value discount needed to continue affordability, and funding a rent phase-in reserve, which will be used to assist in transitioning some current residents to a new affordable rent structure in the coming years. Preserving affordability at Fresh Pond Apartments caps the City's efforts started in 2009 to preserve the affordability of 1,094 units at 10 privately-owned properties where continued affordability was at-risk.

Building New Affordable Housing

The City continues to use funds appropriated to the Affordable Housing Trust to expand a pipeline of new affordable housing in Cambridge. The adoption of the Affordable Housing Overlay (AHO) Zoning Ordinance in FY21 has begun to help developments advance toward construction.

City Manager's Message *continued from cover*

Our employees are the greatest asset of this City. From our laborers to our administrators, each employee provides excellent service to our community, and their passion and dedication to public service are second to none. I want to thank each of you for your commitment and passion for serving our residents.

The efforts undertaken by our workforce over the past two years have demonstrated that every City employee plays an essential role in our ability to carry out our goals and positively impact our residents' lives. I am forever grateful to our current employees and those I have had the privilege to work with over my career. There is no greater calling than public service, and I encourage you to consider a career with the City or volunteer to serve on one of our many boards and commissions. Your advocacy will ensure that Cambridge remains the best place to live, work, learn or raise a family.

Finally, I want to thank the Mayor and City Council for their leadership and for advocating for a financial plan that continues to match City policies and priorities while also being mindful of the impact on taxpayers.

Thank you for placing your trust and confidence in me to lead this great City.

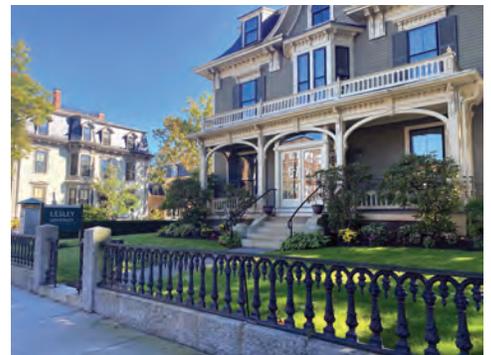

Notable developments include:

• 1627

Massachusetts Avenue.

Funding from the Affordable Housing Trust is anticipated to be used to purchase this property from Lesley University. Planning will begin in FY23 for the creation of new

affordable housing at this prominent property near Harvard Square through renovation of the historic structure and new construction on the large surface parking lot.

- **Squirrelwood.** 23 new affordable rental units were completed in FY22 to help recapitalize and preserve affordability of 65 existing affordable units at Linwood Court and Squirrel Brand Apartments.
- **Rindge Commons.** Plans advanced for new development of affordable rental housing in a two-phased mixed-use development in the Alewife area. The first phase, expected to begin in FY23, will create 24 affordable rental units, along with non-residential space that will include a new area for early childhood education programs.
- **52 New Street.** A plan to build 107 units of affordable rental housing in a mixed-use development next to Danehy Park was advanced through the AHO community review process in 2021. Once all funding is secured, construction is expected to begin in FY23.
- **Jefferson Park Federal Public Housing.** The Cambridge Housing Authority (CHA) is moving forward with plans for the revitalization of 175 units in North Cambridge to continue to provide this much-

needed affordable housing that will remain financially and operationally viable into the future. Plans were advanced through the AHO and include the creation of more than 100 affordable units. Construction is expected to begin in FY23.

- **Frost Terrace.**

The creation of 40 new units of affordable rental housing in Porter Square were completed in FY22.

The completion of Frost Terrace in FY22 brought 40 new affordable housing units to Porter Square. Photo: Robert Benson Photography

- **2072 Massachusetts Avenue.**

A proposal to build 49 units of affordable rental housing near Porter Square advanced through a public review process. Planning for an affordable housing development on this site is expected to continue in FY23.

- **Walden Square II.** A plan was advanced through the AHO process to create new units of affordable rental housing at the Walden Square apartment property.

- **49 Sixth Street.** A proposal is being developed to create 46 new units of affordable rental housing through the AHO at the former Sacred Heart rectory, school, and convent in East Cambridge.

- **116 Norfolk Street.** CHA has proposed to renovate existing rental housing and create 62 affordable units through the AHO to better serve low-income residents with on-site supportive services.

- **35 Harvey Street.** Planning began in FY22 to convert this 16-unit single-room occupancy (SRO) with shared facilities into 12 small apartment units for individuals moving beyond homelessness.

- **Broadway Park.** A plan was advanced to build 15 affordable condominiums for first-time homebuyers in The Port. Planning for an affordable housing development on this site is expected to continue in FY23.

Inclusionary Housing

Through FY22, over 1,495 housing units were completed or under construction under the City's Inclusionary Housing provisions. Several new rental buildings with affordable units for low- and moderate- and middle-income residents were also completed in late FY22. In these buildings, more than 130 new units will be made available to applicants in late FY22 or early in FY23. With more than 200 additional new inclusionary units now under construction, the City will continue to see new inclusionary housing becoming available throughout FY23 and beyond. Over 1,086 residents have moved into an inclusionary rental unit in the last decade.

Affordable Homeownership

FY22 marked the first new offering of inclusionary homeownership units in several years as nine new units were made available to first-time homebuyers through a new online application for affordable homeownership units. The City continues to offer homeownership education and counseling to prospective homebuyers. More than 500 participants attend the City's homeownership workshop each year, with many also receiving homeownership counseling. In FY23, the City will also continue to offer financial assistance to income-eligible homebuyers. The City's HomeBridge program for homebuyers was recently expanded to serve households earning up to 120% of area median income. Offering up to 50% of a home purchase price, HomeBridge will continue to be available for income-eligible residents looking for homes on the market. These purchased homes then become part of the City's affordable housing stock. The City oversees more than 500 affordable homes throughout Cambridge. When these homes are sold by current owners, new buyers are selected through the City's homeownership resale program. In the last 5 years, 70 residents purchased their homes with assistance from the City. More than 150 residents have purchased a City-assisted affordable home in the last decade.

Developing Universal Pre-K

The Birth to 3rd Grade (B3) Partnership is serving as the lead office in the design, development, and implementation of the City's system of Universal Pre-K (UPK). The work of creating UPK in Cambridge will involve two key components. First, B3 will scale up the key components of its current work to include the entire early childhood landscape, including its scholarship program, quality improvement supports, and professional development. Second, B3 will align the City's numerous Pre-K options, quality standards, and application processes into one uniform set of standards and a single point of access for information, and subsequently, enrollment for Pre-K.

During FY22, B3 completed a strategic planning process that yielded a proposed governing structure and three distinct task forces for its work: workforce development, program quality, and family hub. A UPK Leadership Team has been established, and representatives from the City, Cambridge Public Schools, and the community will contribute to the work of an advisory committee and the three task forces to establish recommendations for the system. B3 is actively engaged in research and data collection that will yield important information for assessing and making decisions moving forward. A UPK Project Manager will be hired in FY22 to support the planning and implementation of UPK.

In FY23, B3 will work diligently to scale its existing work in direct alignment with the vision for UPK, including increasing the number of children and families supported with financial assistance to access high quality preschool. By the end of FY23, B3 will have a completed UPK Program Guide that outlines all of the requirements necessary for participation with UPK.

Creating High Quality Open Spaces

The last two years have highlighted the importance of access to outdoor open space. This is especially true since Cambridge is one of the most densely populated cities in the country, and estimated population growth over the past decade has outpaced expansion of public open spaces. In FY22, the City updated its state Open Space and Recreation Plan, applying an equity lens to criteria that include park distribution and access, park conditions, environmental benefits, and public health, to establish an action plan for Cambridge's open space network. This planning process included a community questionnaire in which a majority of respondents expected their increased use of open space to continue into the future. This information will help guide future park and open space improvements so that the benefits of open space are shared equitably across Cambridge.

In FY22, the City completed construction on several significant park and open space projects. Timothy J. Toomey, Jr. Park in East Cambridge features a new playground, dog run, and park green. The Louis A. DePasquale Universal Design Playground at Danehy Park serves as a model for an inclusive playground designed for visitors of all abilities to play together. Renovations at Glacken Field included improvements to the field area, a perimeter loop path, improved connections to existing courts, and a fully renovated tot lot. The Watertown-Cambridge Greenway provides a new multi-use path connection between Fresh Pond Reservation and Watertown.

New Louis A. DePasquale Universal Design Playground at Danehy Park. Photo by Cambridge Arts.

A new reading garden at the O'Connell Library in East Cambridge transformed a previously under-utilized space into a new resource for patrons and residents.

Construction at the new Triangle Park in East Cambridge is expected to be completed in FY23. Renovations to Sennott Park in the Port neighborhood will continue, and construction will begin at the new Binney Street Park. Construction is also expected to begin on improvements to the Peabody School Playground. Community processes for redesign of Hoyt Field in the Riverside neighborhood, Raymond Park in Neighborhood Nine, and Rafferty Park in Cambridge Highlands neighborhood will begin.

Danehy Connector, Linear Path, and Grand Junction Corridor Planning

The upcoming design process for Linear Park will focus on engaging users and enhancing this important open space.

Off-road paths provide a relaxing and fun way to travel in and around Cambridge. These facilities are designed for walking, running, bicycling, skating, and for people who use wheeled mobility devices. Cambridge's growing path network is an important part of the City's open space and parks spaces.

Design is beginning on two new corridors in Alewife and North Cambridge. The Danehy Connector/New Street Path extends from Concord Avenue near Fresh Pond to the Fitchburg commuter rail line, and may extend to Sherman Street if use of MBTA right of way is approved. It includes a paved multi-use path, landscaping and trees, lighting, and

a proposed connection to Danehy Park after it crosses New Street at a reconstructed, pedestrian-friendly intersection.

Linear Park, extending from the Somerville line to Russell Field, will be redesigned and reconstructed to engage users with the

potential addition of playful features and public art.

Final designs plans are in progress for the Grand Junction Multi-Use Path, a landscaped path alongside the existing rail tracks in the Grand Junction corridor, from the BU Bridge to Somerville. The City continues to advance plans for creating an all ages and abilities off-road path along the railroad right-of-way from Waverly Street to Main Street, then from Binney Street to Gore Street. The Path will provide a continuous linear park for residents, students, commuters, and visitors to walk, jog, or bicycle. Features will include adjacent pocket parks, lighting, public art, landscaping and trees, benches, and other amenities. This project is expected to be bid in 2024 with construction commencing as soon as possible afterward.

The Path, which was identified as a key new connection in the Envision Cambridge planning process, will connect several neighborhoods, commercial areas, institutions, and regional recreational resources such as the Charles River and the Dr. Paul Dudley White Bike Path.

Cambridge Plants 1,000 Trees and Establishes Miyawaki Microforest

The City continues to implement the Urban Forest Master Plan (UFMP) which guides the development of Cambridge's tree assets into the future. During FY22, Public Works reached the UFMP recommendation of planting 1,000 trees annually. Within two years, the City expects to exceed that recommendation and will plant 1,200 trees annually. In order to increase the long-term survival of newly planted trees, Public Works has improved pre-planting soil preparation, supervision of the planting process, and post-planting watering and other aftercare.

A bare root nursery constructed at Fresh Pond serves as a temporary holding place for bare root trees to be planted around the City, allowing the Urban Forestry Division to extend the planting season. During FY22, the Department of Public Works expanded the size of the bare root nursery utilizing \$125,000 from the Community Preservation Act Fund.

This past year, the City of Cambridge collaborated with Biodiversity for a Livable Climate and the SUGi Project to establish a 4,000 square foot Miyawaki microforest at Danehy Park. Miyawaki Forests offer an opportunity to reestablish healthy forests in urban environments, mitigate the urban heat island effect, support biodiversity, buffer against flooding and erosion, help balance water cycles to fight drought conditions, and sequester carbon.

Volunteers work to plant 40 native species of plants at the Miyawaki Forest at Danehy Park.

The preservation of existing trees on private property is another key aspect of the UFMP recommendations. During FY22, the Cambridge City Council passed an amendment to the Tree Protection Ordinance changing diameter and mitigation guidelines under the current ordinance. For any Significant Tree removal, a permit is required from the City Arborist. With replanting as an option for mitigation, additional trees are being planted across Cambridge. Public Works' arborists review planting plans, species selection, final mitigation amounts, and conduct post-planting inspections.

Stormwater Management Initiatives Help Reduce Flooding and Sewer Overflow

Twenty-five years of major investment in sewer and stormwater infrastructure and maintenance has significantly improved the quality of water discharged to the Charles River, the Little River, the Alewife Brook, the Mystic River, and the Boston Harbor. The amount of combined sewer overflows have decreased to the Charles River (by 98%) and Alewife Brook (by 85%) during a typical year. Investment in infrastructure provides a more reliable system that better serves residents, who experience fewer backups, reduced flooding, and less emergency repairs.

As part of a long-term strategy to reduce flooding, the City has constructed 12 underground stormwater storage systems over the last 20 years on Hovey Avenue, Scott Street, Wendell Street, Broadway (Main Library), Museum Street, Danehy Park, New Street, Francis Avenue, and Parking Lot 6 in The Port. Collectively, these facilities can hold over two million gallons of stormwater. The value of this infrastructure was demonstrated last summer when the city had over nine inches of rain, making it the second wettest period since 1921. These storage systems operated as expected, holding stormwater during the heavy rain events and directly reducing flooding in Cambridge neighborhoods. The Port tank and pump station alone stored approximately 400,000 gallons of stormwater. Prior to the installation of the stormwater systems, such heavy rain would have caused significant flooding in The Port, Agassiz, and Mid-Cambridge neighborhoods.

Appropriations totaling \$25 million will support the construction of a 1.2 million gallon stormwater holding system and a 100,000-gallon rain garden in conjunction with the Tobin Montessori and Vassal Lane Upper Schools construction. This infrastructure will reduce flooding on Concord Avenue and in the Vassal Lane / Standish Street area and was identified in the Alewife Preparedness Plan as key to improving the resiliency of the Alewife neighborhood to climate change. Learn more at Cambridgema.gov/stormwater.

Climate Change Preparedness Update

The Resilient Cambridge Plan, the citywide climate change preparedness and resilience plan, based on the Climate Change Vulnerability Assessment, was issued in June 2021. This Plan includes strategies for a Closer Community, Better Buildings, Stronger Infrastructure, and a Greener City and is coordinated with Envision Cambridge, the Urban Forest Master Plan, and the Community Health Improvement Plan. While the Resilient Cambridge Plan was being developed, numerous initiatives were launched or are underway to reduce risks and prepare for increasing heat and flood risks. These initiatives include supporting development of a resilience hub at the Cambridge Community Center, developing a social capital mapping project, the Neighborhood Energy community microgrid project, and various open space projects such as Triangle Park in East Cambridge. The plan also connects to initiatives such as The Port Infrastructure Project, citywide tree plantings, updates to the Cambridge Floodviewer, and development of the Cambridge HeatViewer.

Cambridge is also collaborating on climate change actions regionally through the 15-member Metro Mayors Climate Change Preparedness Task Force, the Charles River Climate Compact, and the Resilient Mystic Collaborative (RMC). With the RMC, the City has led the development of a regional sea level rise/storm surge protection plan that would protect Cambridge and 11 other communities through interventions at 10 locations outside the city.

Supporting Language Justice

The City continues its work to support language justice, the right to understand and be understood in the language in which a person is most comfortable. Since the fall of 2020, the Family Policy Council has been researching and focusing on language justice in a number of ways: reviewing Cambridge demographic data, forming the Language Justice Working Group,

conducting surveys of City departments and more than 20 focus groups with community members, learning from other communities, and drafting policies and resource materials. The Family Policy Council's work demonstrates that dedicated staff, funding, and supportive resources like training, are key to expanding language justice.

The City has committed to use American Rescue Plan Act (ARPA) funding to further support language justice efforts, including computer-assisted translation technology, translation, and interpretation costs. The FY23 budget includes funding for a full-time Language Access Manager in the Cambridge Human Rights Commission's new Language Justice Division. This position will provide support and collaborate across City departments to make the City's wealth of information and resources more accessible to all. In addition, the Language Access Manager will further refine and operationalize the Family Policy Council's work to date, including conducting assessments of each department's strengths and needs; producing centralized tools for City staff, such as workflows, written guides, "how-to" instructions, and training; increasing cohesion and uniformity in City practices by sharing data, resources, and best practices; and developing a Language Access Plan.

The City's language justice work will remain focused on continuous improvement, recognizing that the cultural, educational, and technical aspects of language justice are complex and can present certain challenges.

Tobin Montessori and Vassal Lane Upper Schools Construction Underway

Construction of the new Tobin Montessori and Vassal Lane Upper Schools project kicked off in December 2021. Located at 197 Vassal Lane, the new complex will house the Tobin Montessori School, Vassal Lane Upper Schools, the City's Department of Human Services Programs preschool and after school programs, and Special Start.

This project will include renovations and upgrades to Callanan Park, open space enhancements, including a variety of age-appropriate play areas, multi-purpose fields, and public access to a bike lane and community paths. The Tobin Montessori and Vassal Lane Upper Schools project is being designed as a Net Zero Emissions Facility.

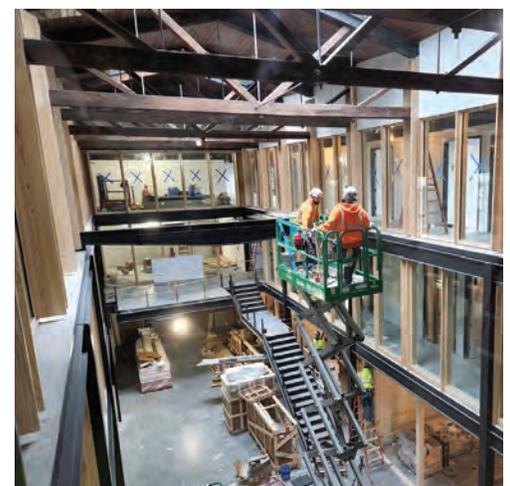

The City of Cambridge is committed to creating a sustainable and resilient community and has invested over \$500 million in three new school facilities since 2011, two of which were completed – the Martin Luther King Jr. and Putnam Avenue Upper Schools, and the King Open and Cambridge Street Upper Schools and Community Complex – and the final, the Tobin Montessori and Vassal Lane Upper Schools, which is currently underway.

"As City Manager, I can say that not many communities, if any, are able to make the type of financial investments that we are making in rebuilding our schools," said Cambridge City Manager Louis A. DePasquale, acknowledging former City Managers Robert W. Healy and Richard C. Rossi for their financial foresight and initial execution of these school construction projects. "Our success is only possible because of the collaboration that occurs between the Cambridge City Council and the City Administration and with the School Committee and School Administration."

Renovated Foundry Building to Reopen this Fall as Center for Creativity and Collaboration

The transformation of the historic Foundry Building at 101 Rogers Street is nearing completion following COVID related construction delays and is expected to open this fall. This massive brick building, originally constructed as an iron foundry in 1889, is an adaptive reuse project that will reopen as a self-sustaining center for creativity and collaboration for the Cambridge community. At the intersection of the Kendall Square Innovation District and the East Cambridge neighborhood, the Foundry building will provide space and programs for visual and performing arts, entrepreneurship, technology, and workforce education within its historic, industrial setting.

The Foundry will also help facilitate access for residents, especially underrepresented communities and adjacent neighborhoods, to the dynamic working and learning environment of Kendall Square.

Cambridge Cycling Safety Ordinance

Cambridge is working hard to ensure our city remains a vibrant, livable environment in which a wide range of people can live, work, and play. To do this, we need to be able to travel around the city safely and sustainably. The City's Cycling Safety Ordinance, which was passed by the Cambridge City Council in 2019 and amended in 2020, is helping make this possible. The Ordinance calls for the City

to build out a 25-mile network of separated bike lanes in the next five years.

Separated bike lanes, which generally include space and vertical dividers that create a physical distance between bicycles and motor vehicles, improve safety and create a more

comfortable environment. This makes cycling accessible and attractive to a wide range of people of all ages and all abilities. Separated bike lanes can also improve the streets for pedestrians, by slowing cars and trucks and shortening the distances where walkers are exposed to cars and trucks when crossing the street.

The City will be installing separated bike lanes on many major streets, creating safe connections to allow riders to access destinations for school, work, shopping, recreation, and more. Each project for a specific street or area will include a design process with opportunities for the community to be heard and help shape the designs.

For more information on the Cycling Safety Ordinance or to join our mailing list, visit Cambridgema.gov/cycling-safety-ordinance.

Cambridge's 21st Century Broadband Initiative

The City has launched a 21st Century Broadband initiative and hired nationally known CTC Technology & Energy (CTC) to conduct a feasibility study to help the City achieve its digital equity connectivity and Municipal Broadband goals. The yearlong Municipal Broadband feasibility study is well underway. CTC is conducting a baseline analysis; performing technical analysis and design; performing market analysis, financial analysis, developing business and City-ownership models; conducting stakeholder engagement; and generating a comprehensive report. Following the completion of the analysis of different business and city-ownership models, CTC will present to the City the benefits and drawbacks of each option in terms of costs, revenue, risk, and potential legal and regulatory issues of each model. In addition, CTC will assist the City in identifying the preferred model that best aligns with the City's policy priorities.

This initiative is one of the identified strategies from the *2021 Digital Equity in Cambridge Report*. The City commissioned report outlines the research findings from a comprehensive study examining digital equity gaps in our community, including broadband access, affordability, digital skills, and device ownership. The FY23 Budget includes funding for a new full time Digital Equity Specialist and Broadband Project Manager. This position will assist in the development, outreach, research, analysis, project management, and implementation of the City's digital equity and broadband initiatives.

Free Private Property Rodent Control.

Residential buildings with 4 or less units can learn more and sign up at CAMBRIDGEMA.GOV/RODENTS

Alternative Response *continued from cover*

The Cambridge City Council initiated a review of public safety models after national events elevated the conversation around traditional public safety and policing and the need for alternative emergency responses for non-emergency related situations. The City Manager established the City Manager's Alternate Public Safety Task Force led by Councillor E. Denise Simmons and Councillor Marc C. McGovern to examine the future of public safety in Cambridge. The Task Force made many recommendations including a mental health professional to assist with triage for callers experiencing behavioral health crisis and policy around alternative response programs to support those experiencing a mental health emergency.

If approved, the CSD will establish an advisory committee to support the Cambridge Alternative Response Program to provide a forum for stakeholders, community partners, and members to provide guidance on the evolution of the program, opportunity for program evaluation, and accountability to a representative group of community members. Membership will include members from local community organizations and public safety agencies, as well as members of the public.

Young Adult Diversion Program Offers Alternative to Criminal Prosecution

The Young Adult Diversion program is designed to work with eligible young people as an alternative to criminal prosecution. The diversion

program operates under a pre-arrest model and can be either pre- or post-complaint. Diversion allows a young person the opportunity to complete an individually-tailored program in lieu of prosecution and may include conditions such as educational programs, counseling, community service,

working with housing, letters of apology, and restitution.

The goal of the program is to address the underlying problems (e.g., homelessness, mental health issues, substance use) that may have contributed to the person committing a prosecutable offense.

Cambridge Police Department (CPD) has successfully worked with juveniles through the nationally renowned Safety Net Collaborative implemented in 2008. The Department's Family and Social Justice Section (FSJS) has worked to expand its diversion efforts with young adults (ages 18-26). CPD partnered with the Middlesex DA's Office and their Young Adult Diversion Program to increase the capacity for young adults in Cambridge to access diversion.

A team from CPD's Family and Social Justice section that includes both sworn officers and clinical staff meets regularly with the diversion team from the DA's office to discuss cases to determine eligibility and draft terms of diversion. Since FY21, 21 young adults were enrolled in the program. In 2021, due to the Department's diversion efforts and continued partnerships, the number of Cambridge juveniles arrested represented the lowest number since the Safety Net Collaborative was established. In FY23, the FSJS and Criminal Investigations Section (CIS) will continue to build upon these partnerships to expand and increase our options for referrals to services and supports for young adult diversion candidates.

Cambridge Offers New Apprenticeship Program

The Department of Public Works (DPW) and the Office of Workforce Development (OWD) will collaborate to identify residents interested in committing to one to two-year paid apprenticeships. This will benefit Cambridge residents who have faced barriers to employment, while helping Public Works build a pipeline of entry level workers. Participants will have access to all DPW training opportunities, including Commercial Driver's License training and hoisting license training, and will also receive on-the-job mentoring from technical experts and OWD's Cambridge Works staff. The occupations participants will be trained for include Urban Forestry Helper, Vehicle Lube Tech/Inventory Assistant, Construction Helper and Sewer Maintenance Helper, among others.

Expanding Advanced Life Support Services

Cambridge Fire Department (CFD) will hire eight firefighters in FY23 to expand the delivery of Advanced Life Support, (ALS) or Paramedic service, to the community. An ALS response often results in the responding unit being tied up for extended periods while transporting a person to the hospital. Careful analysis of the ALS systems revealed an opportunity to streamline the program to a more effective delivery model without negatively impacting vital fire suppression units in service. The new positions will allow CFD to staff an additional two-person ALS Squad unit at the East Cambridge Firehouse.

New Trash Carts Arriving Soon

The Department of Public Works (DPW) will deliver standard trash carts to all buildings where the City collects trash between June 6-24. These will replace your current trash barrels. Beginning June 27, 2022, DPW will only empty the standard trash carts provided by the City.

Check the chart to learn when to expect your new cart and when to place your old empty barrel(s) curbside for pickup and recycling by DPW.

Trash Pick-Up Day	New Carts Arrive Between	Old EMPTY Barrels Collected on
Monday	Thursday 6/16 – Saturday 6/18	Wednesday 6/22 and Thursday 6/23
Tuesday	Thursday 6/9 – Saturday 6/11	Wednesday 6/15 and Thursday 6/16
Wednesday	Tuesday 6/21 – Thursday 6/23	Friday 6/24 and Saturday 6/25
Thursday	Monday 6/13 – Wednesday 6/15	Friday 6/17 and Saturday 6/18
Friday	Monday 6/6 – Wednesday 6/8	Saturday 6/11 and Monday 6/13

The goals of the Standard Trash Cart program are to improve:

- Rodent control efforts
- Worker safety
- Sidewalk accessibility

To learn more visit [Cambridgema.gov/trash](https://www.cambridgema.gov/trash).

Resumen de esta emisión del boletín informativo CityView

La ciudad de Cambridge está creando un nuevo Community Safety Department

- El departamento recibirá llamadas al 911 relacionadas con conflictos no violentos y de conducta.
- Esta iniciativa es parte de un nuevo Cambridge Alternative Response Program para ayudar a brindar soporte a la seguridad de la comunidad.

Cambridge realiza una inversión de \$38 millones en viviendas económicas en 2022-23

- Estos fondos ayudarán a crear y preservar viviendas económicas en Cambridge.
- La ciudad de Cambridge ofrece clases gratuitas, asesoramiento y ayuda financiera para propietarios.

La ciudad creará un programa universal de preescolar

- La ciudad combinará las opciones existentes de preescolar en un conjunto uniforme de regulaciones.
- Los padres contarán con un único punto de acceso para la información y la inscripción.

Cambridge creará y mejorará parques, paseos y espacios abiertos

- Este último año abrieron el nuevo Timothy J. Toomey, Jr. Park en el East Cambridge y Louis A. DePasquale Universal Design Playground en Danehy Park.
- Los dos nuevos carriles de paseo y ciclismo están planificados para Alewife y el North Cambridge.

La ciudad colabora con las iniciativas de justicia idiomática

- Esto hace referencia al derecho de comprender y ser comprendido en el idioma en el cual la persona se siente más cómoda.

- Tobin Montessori এবং Vassal Lane Upper Schools দুইটির নির্মাণ কাজ শুরু হয়েছে।
- পুনর্নির্মিত ফাউন্ড্রি ভবন এই শরৎকালে পুনরায় চালু হবে। এখানে ললিত কলা ও দৃশ্য-শিল্প কলার জন্য নতুন করে জায়গা রাখা হবে।

সম্পূর্ণ নিবন্ধ বাংলা ভাষায় দেখুন এখানে Cambridgema.gov/Bangla

本期 CityView 通讯的要点

剑桥市正在成立一个新的 Community Safety Department

- 该部门将处理非暴力和行为危机 911 求助电话。
- 这项工作是新的 Cambridge Alternative Response Program 的一部分内容，旨在帮助支持社区安全。

剑桥将在 2022-23 年投资 3800 万美元用于经济适用房

- 这些资金将有助于在剑桥建设和维护经济适用房。
- 剑桥市提供免费的房屋所有权课程、咨询和经济帮助。

剑桥市将创建普及学前教育 (Universal Pre-K) 计划

- 本市将把现有的 Pre-K 方案合并成一套统一的标准。
- 家长们将有一个单一的访问点来获取信息和注册。

剑桥将建设和改善公园、道路和开放空间

- 位于 East Cambridge 的新建 Timothy J. Toomey, Jr. Park 和位于 Danehy Park 的 Louis A. DePasquale Universal Design Playground 于去年开业。
- 为 Alewife 和 North Cambridge 规划了两条新的步行和自行车道。

剑桥市支持语言公平工作

- 这是指一个人用感觉最舒服的语言去理解和被理解的权利。
- 将设立一个新的职位，为本市各部门提供支持，使信息和资源更容易获得。

Cambridge Cycling Safety Ordinance 有助于提高安全性

- 剑桥市将在未来 5 年内建造 25 英里长的独立自行车道。
- 这些车道设有隔离设施，保证自行车和汽车之间的物理安全距离。

Young Adult Diversion Program 提供刑事起诉的替代方案

- 符合条件的青少年有机会完成个性化的计划，而不是被起诉。
- 该计划的目标是解决导致青少年犯下可起诉罪行的潜在问题。

剑桥市提升 Advanced Life Support 服务

- 剑桥消防局 (Fire Department) 将增加 8 名消防员，以提升在东剑桥的 Advanced Life Support 服务。

新的剑桥学徒计划

- 有兴趣的居民可以参加为期 1-2 年的带薪学徒计划。
- 参与者将接受城市林业助理、车辆润滑油技术/仓储助理、建筑助理和下水道维护助理等工作的培训。

新的标准垃圾桶将于 6 月送到

- 标准垃圾桶将免费运送到本市收集垃圾的所有住宅楼。
- 新垃圾桶将有助于控制啮齿动物，并开辟更多的人行道空间。

剑桥市努力为所有居民实现数码资料公平

- 数码资料公平意味着确保所有居民都能使用设备、WiFi 和电脑。

本期 CityView 的其他要点

- 剑桥种植了 1,000 棵树，在 Danehy Park 打造新的微型森林。
- 雨水计划改善了水质，减少洪水泛滥和下水道溢流。
- Resilient Cambridge Plan 帮助本市应对气候变化。
- Tobin Montessori and Vassal Lane Upper Schools 的建设已经开始。
- 翻新的铸造大楼将于今年秋天重新开放。它将提供表演和视觉艺术的新空间。
