

Parker and Healey Street Update

June 2017

Dear Resident,

Attached please find a copy of the plans for the roadway and sidewalk work on Parker Street and Healey Street. In addition to sidewalk and roadway reconstruction, the project includes traffic calming elements to reduce vehicle speeds and enhance safety for pedestrians.

As mentioned at the community meetings, the main goal of the project is to create an accessible route for all users of the street. The plan includes new crosswalks on Parker Street at Buckingham Street and Concord Avenue, Healey Street at Buckingham Street and a raised intersection at Parker and Healey Streets. Also new trees will be planted where possible based on the recommendations from the city arborist. The plan was developed through a community process taking into consideration the input of the residents.

Parker Street and Healey Street are part of a construction package that is scheduled to be ready for construction bid by June 2017; construction is expected to start late summer/fall 2017. We will forward a construction schedule when a contractor is selected.

Please let me know if you have any questions, thank you for your participation in the community process,

Sincerely,

Juan P. Avendano
Traffic Calming Project Manager
