

Webster Avenue Reconstruction Project *Roadway Reconstruction to Begin Week of 4/15*

Dear Neighbor,

In association with the Webster Avenue Reconstruction Project, the City's Contractor, Newport Construction., will begin to **reconstruct the roadway on Webster Avenue (between Lincoln St. and Hampshire St.) during the week of April 15th (work will not start on the 15th, due to the holiday)**. This work is anticipated to last for **approximately two weeks**, weather permitting.

To ensure that the roadway conditions will be favorable for many years to come, crews will engage in full-depth reconstruction. At the end of each day, the contractor will clean the work site to allow for motorists to utilize the roadway. We kindly ask that motorists drive through the construction zone slowly outside of general working hours.

Work will begin on Webster Avenue from Lincoln St toward Hampshire St. The contractor plans to complete 1-2 blocks of full-depth excavation, then perform base paving in that area before moving on to the next 1-2 block section. This pattern will continue down Webster Avenue to Hampshire St. **Detours will be in place during work hours. Please look for Detour signs, Road Closed signs, and No Parking signs as they will be changing frequently during the work.**

What to Expect During Construction:

- General work hours 7am-4pm, Monday through Friday.
- Please check posted No Parking signs.
- During this work, the roadway will be lower, making the curbs higher for parked cars. Please use caution when opening car doors as to not damage them on the curbs.
- Access to properties will be maintained, when possible.
- Access will be maintained for City services and emergency vehicles.

Final roadway paving will occur at the end of the Webster Avenue project and will be announced via an additional notice in the coming months.

For Information and Assistance During Construction:

Questions regarding this project? Contact Kristin Kelleher, Community Relations Manager, at 617.349.4825/kkelleher@cambridgema.gov or Melissa Miguel, Supervising Engineer, at 617-349-9351/ mmiguel@cambridgema.gov.
