

Corridor Safety Improvements Project

MASSACHUSETTS AVENUE: Sidney St. to Memorial Dr. – 2018

Coming Soon!

“Quick build” changes to increase safety and access on South Mass. Ave.

- Signal timing for greater protection at intersections for all
- New pedestrian crosswalk (installation Spring 2019)
- Separated bicycle lanes
- Sections of bus lanes
- New designated areas for passenger drop off/pick up

Parking Changes

Most parking will move out from the curb as marked on the street; note that meters remain on the sidewalk. Drivers are reminded to please not stop or park in the bike lanes.

Bus Lanes

Sections of red painted lanes will be marked for buses only. Car drivers may only go into these lanes to turn right or access parking.

When will this happen?

Weather permitting, installation will begin late October and last approximately two weeks for the initial elements; some of the final pavement markings, along with the new crosswalk, will be completed in spring, 2019.
