# **KENDALL SQUARE MOBILITY TASK FORCE**

Meeting #10 Public Meeting #2 February 28, 2017

- Review Boards
- Presentation
  - Overview of Task Force
  - Background
  - Draft Recommendations
- Question and Answer, Review Boards and Provide 55 min Comments

30 min 35 min

- Established in 2015 to take a comprehensive look at mobility issues in the Kendall Square area of Cambridge
- The process was focused on existing mobility issues and the need to address future growth
- Task Force goal was to develop a set of policy and project recommendations

# TASK FORCE MEMBERS

		:	
Kendall Square Mobility Task Force Member			
Co-chairs			
City of Cambridge, Environmental & Transportation Planning Division: Susanne Rasmussen		Kendall Square Association/Cam Center: Brian Dacey	
Agencies			
MassDOT: Scott Hamwey	MBTA: Melissa Dullea	<b>Charles River TMA:</b> Jim Gascoigne	Volpe Cente
City of Cambridge, Traffic, Parking, and Transportation: Joe Barr		Cambridge Redevelopment Auth	
Businesses/Developers			
Biogen: Chris Barr		Boston Properties: Mike O'Hearn	
Institutions/Associations/Advocates/Other			
MIT: Kelley Brown	MIT Investment Management Company: Michael Owu	Livable Streets Co- founder/MIT student: Jeffrey Rosenblum	Frien Junct
East Cambridge Planning Team: Peter Crawley		East Cambridge Business Associa

# **TASK FORCE WORK**

### Jan – Mar 2017

# **1** Public Meeting

Draft Recommendations (project and policy), Public Meeting, **Final** Recommendations

# TIGHTEST OFFICE MARKET IN THE COUNTRY STARTING TO LOSE BUSINESS?

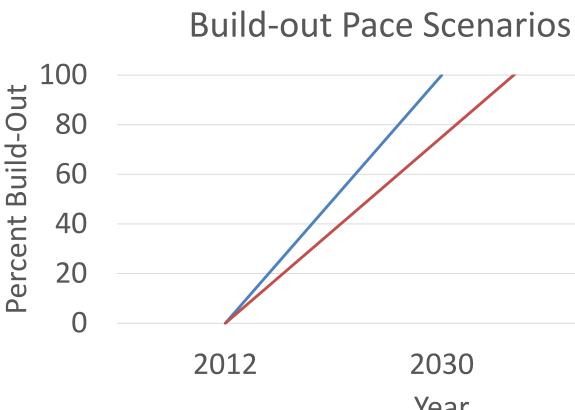

Facebook function in LinkedIn Email

The Cambridge-Boston office market is the tightest in the country. Its practically zero-vacancy climate is causing the life science industry to elbow out technology and startup companies, leaving subleasing as the only option to find space.

Print

- MIT received approval for a zoning change to build significant additional square footage in 2013
- Boston Properties/Cambridge Redevelopment Authority were approved for an additional one million square feet in 2015
- The planned development could happen at a faster pace than was anticipated in a Kendall Square planning process (K2C2) carried out in 2012 to assess the potential transportation impacts

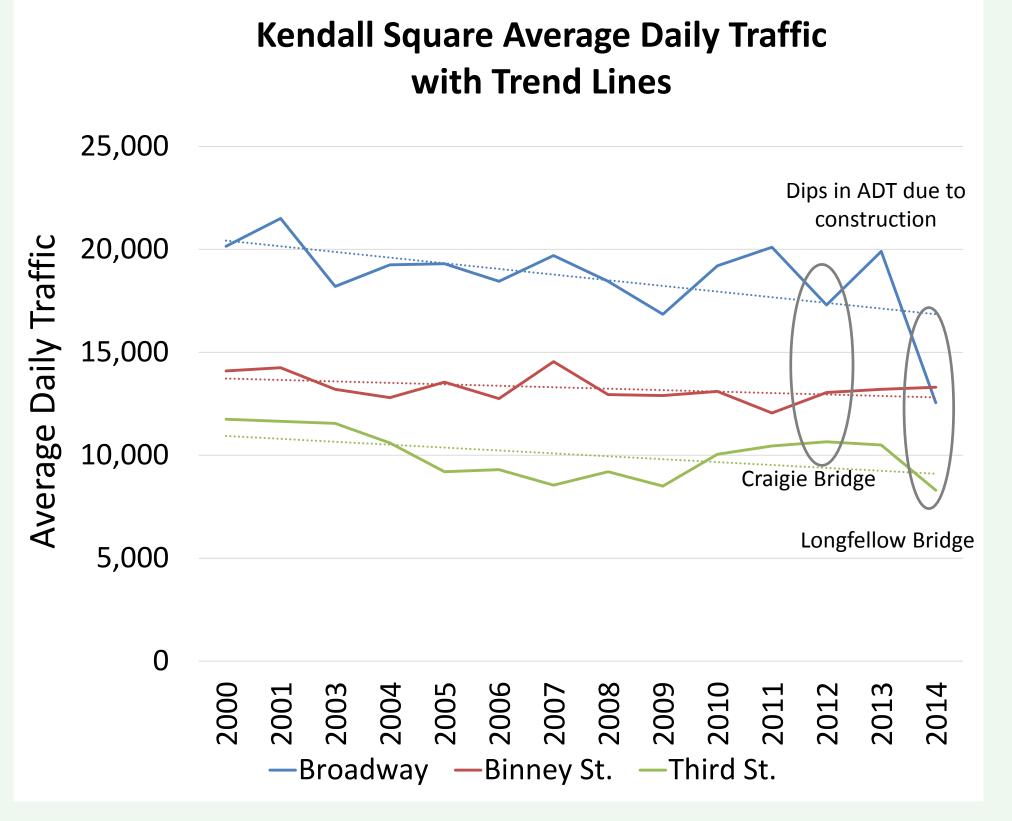

-2015 K2C2 -2012 K2C2

2030

Year

Future

- construction)
- been reduced

 Added more than 4.5 million square feet in **Greater Kendall since 2000** 

 An additional almost 1 million square feet are currently under construction

 93% growth in built square footage (including under

### Estimated Growth in Red Line Station Entries 2012 to 2040 "No Build", AM Peak

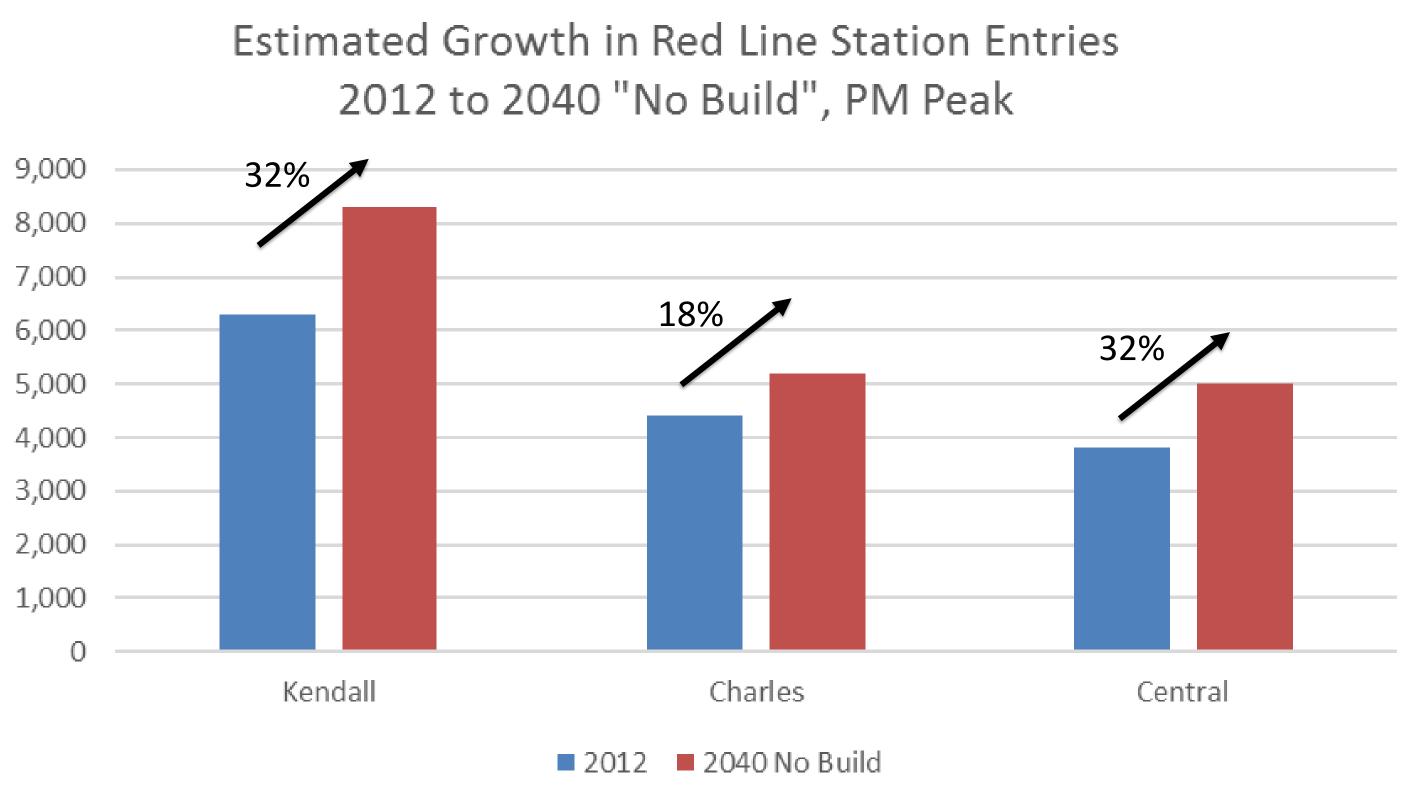

### Estimated Growth in Red Line Station Entries 2012 to 2040 "No Build", PM Peak

# **KSMTF FOCUS AREAS**

Five major focus areas determined by the Task Force, and presented at the first public meeting include:

- **1.** Increasing direct transit access (fewest transfers)
- Improve MBTA service reliability and capacity 2.
- **3.** Decrease challenges on local street network (improve **mobility for buses**, pedestrians, cyclists, cars)
- 4. Policy and Outreach
- 5. Increased financing

# **TRANSPORTATION PRIORITIES**

- Red Line capacity
- Bus
  - Bus priority corridor
  - Enhanced bus connections
- Grand Junction transportation options
- Shuttles and Transportation Network Companies (TNCs)/Ride-hailing services (Uber, Lyft, Bridj)

# TRANSPORTATION PRIORITY: RED LINE

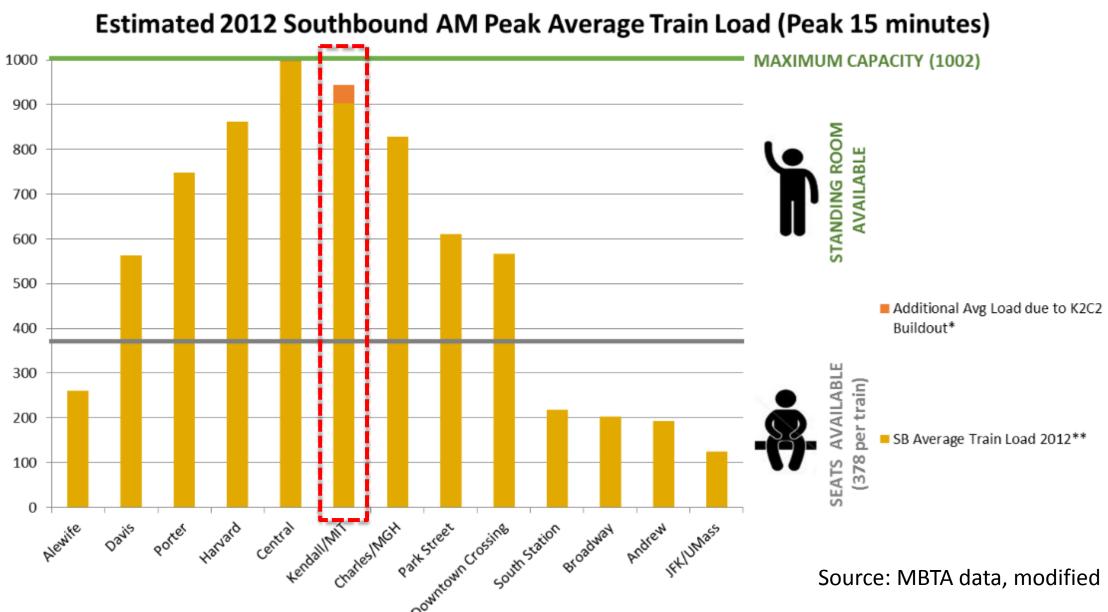

## **CHALLENGE: RED LINE CAPACITY**

### In theory, the Red Line has just enough capacity to meet demand.

**BUT**, in realworld conditions, people are getting left behind at stations during their commute.

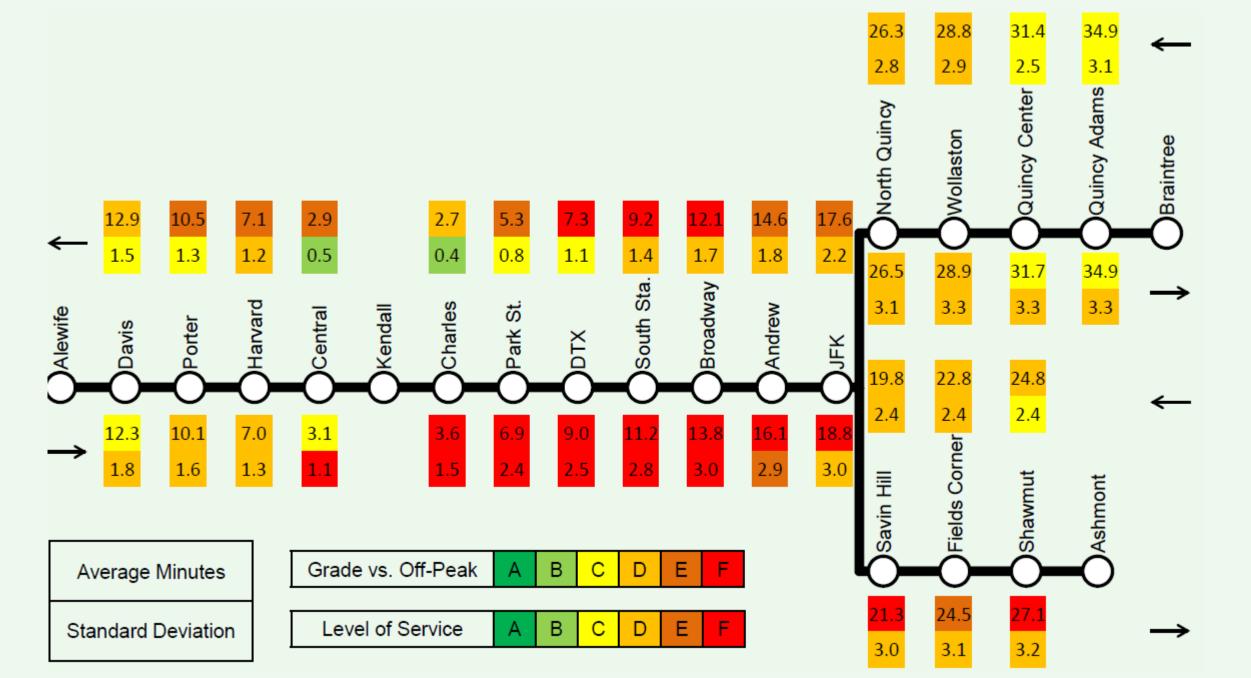

\* K2C2 buildout determined from the 2013 Kendall Square Central Square Planning Study \*\* Average Train Load based on total station entries (from MBTA data) divided by number of total number of cars (6 per train) over all trains (13.333 per hour) during the time period. Uses Peak Factor = 1.5 (from MIT Kendall Square Initiative TIS, certified by TP&T on July 21, 2015)

## CHALLENGE: RED LINE QUALITY

# The Red Line is both **slow** (9.4-11.6mph) and **unreliable** with excessive wait times.

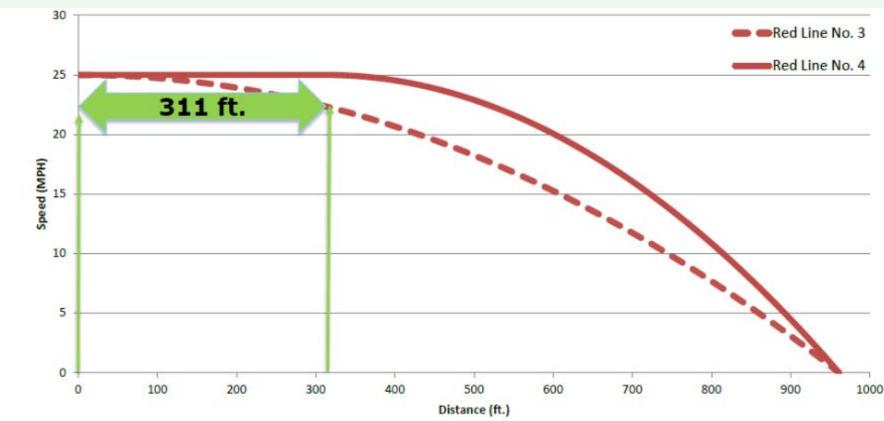

The Fiscal and Management Control Board approved the purchase of all new Red Line cars (to be in place by 2024)

- The new cars reduce braking distance by 30%, so they run faster for longer
- **Theoretically**, this will allow for 20, instead of 13, trains per hour
- A Better City (ABC) received funding from the Barr Foundation to review the assumptions of MBTA capacity analysis

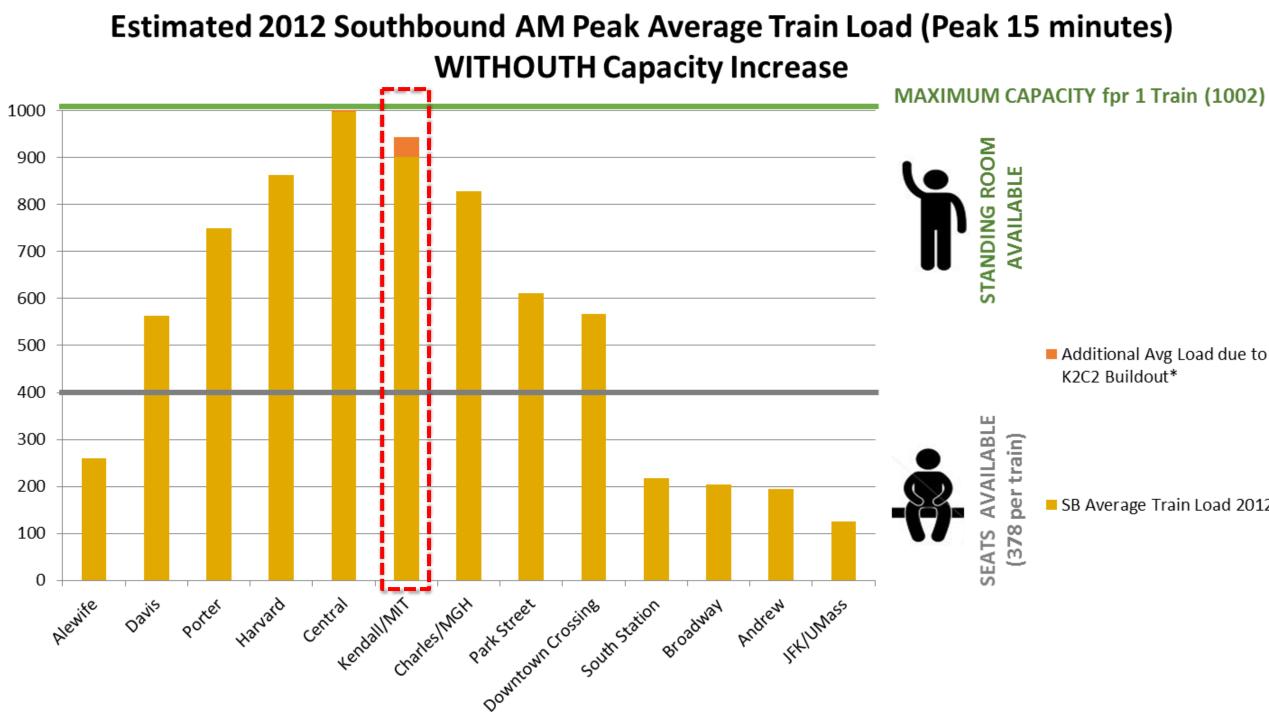

### Effect of purchase of new Red Line cars (theoretical)

Additional Avg Load due to

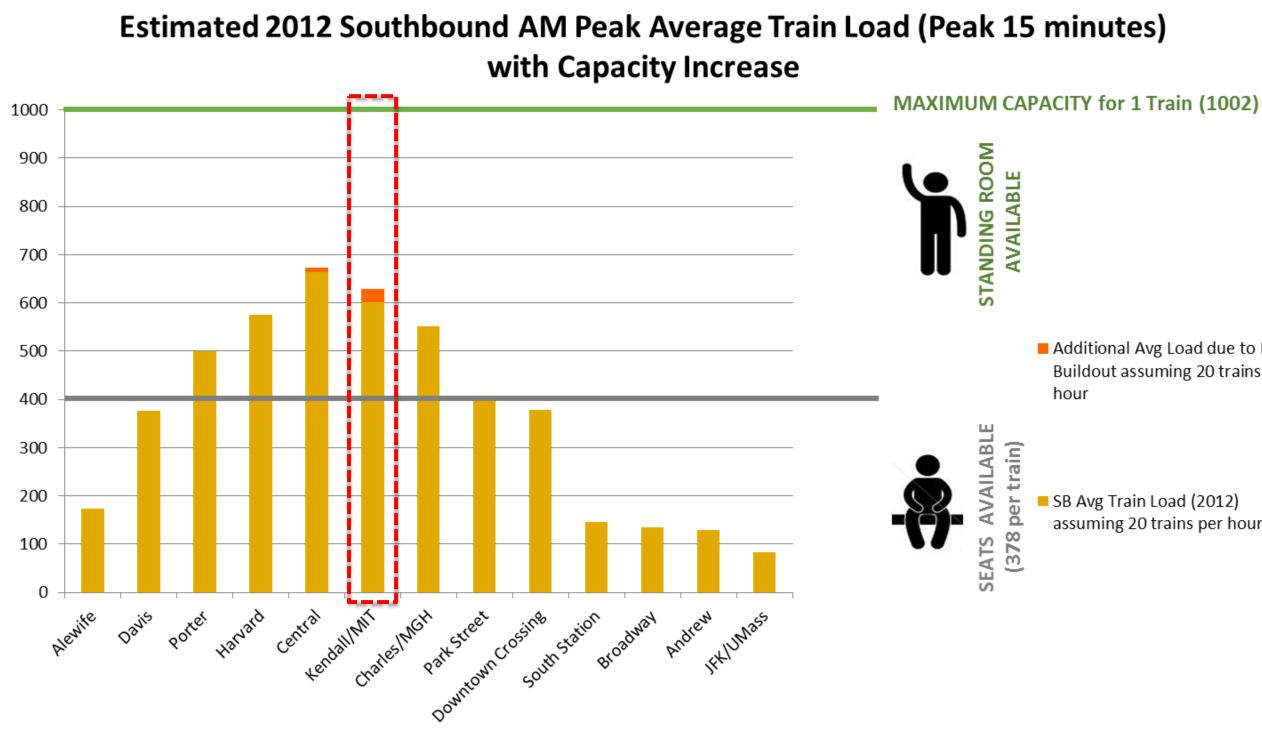

SB Average Train Load 2012\*\*

### Effect of purchase of new Red Line cars (theoretical)

Additional Avg Load due to K2C2 Buildout assuming 20 trains per

SB Avg Train Load (2012) assuming 20 trains per hour

- Headhouses
  - MIT will reconstruct the south headhouse
  - Boston Properties will fund up to \$400k towards repairs of the north headhouse

Source: MIT

- Review results of ABC analysis and advocate for continuing analysis of further capacity improvements, if needed
- Advocate for exploring additional station improvements that could accomplish:
  - Quicker boarding (e.g. marking platforms where to wait)
  - Increased capacity for passengers entering, existing, and waiting at Kendall Station as demand grows
- Advocate for repairs to the Red Line portal and including it in the MBTA's vulnerability and resiliency assessment

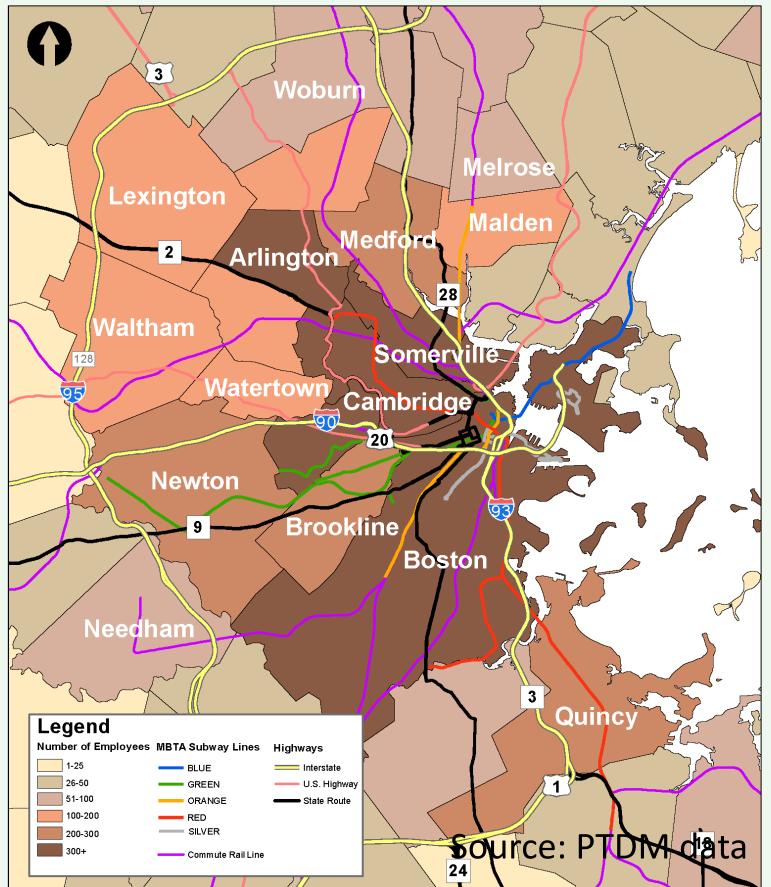

# **KENDALL SQUARE EMPLOYEE ORIGINS** Greatest concentration of employees from:

- - Cambridge
  - Boston
  - Somerville
  - Arlington

# **KENDALL SQUARE BUS TRIPS**

- 22% of transit trips to the Kendall study area arrive via bus with the most on:
  - MBTA 1 (Boston) 6% (1,250 trips)
  - EZRide 6% (1,225 trips)
  - MBTA 64 4% (775 trips)
  - MBTA 85 3% (625 trips)
- Of those bus trips, about 19% of passengers entering the study area are transfers to the Red Line

### **CHALLENGE: BUS DELAY & ROUTING**

- Service planning for buses has not occurred for over eight years
- There are major gaps in transit connectivity to Kendall Square – particularly Allston/Brighton and Back Bay
- Connectivity is inadequate (slow, indirect) to other areas: North Station, other parts of Cambridge, Somerville

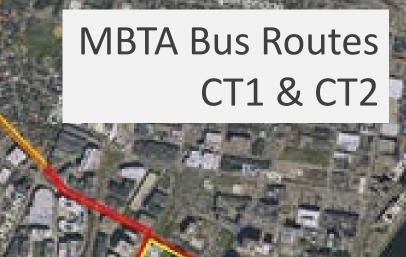

Connecting bus services are generally slow (8mph during peaks) and unreliable (level of service E and F)

PM Peak Bus Level of Service (LOS)

- Consider implementing bus priority corridor, for example:
  - Sections of exclusive bus lane
  - Queue jumpers
  - Transit signal priority
- Possible locations for consideration:
  - First Street
  - Binney between First and Third
  - Third or continue on Binney/Galileo
    Galilei Way

 Example of bus priority treatment on First Street (concept only, NOT a final recommendation for design)

 $\odot$ 

- BIKE LANE
  - BUS LANE

CROSSWALK

PROPOSED BUS STOP

THIS AREA TO BE DESIGNED IN COORDINATION WITH THE NORTH POINT DEVELOPMENT

SCALE: 1" = 40'

PIEN SWIT

Next steps for bus priority corridor include:

- Better
  understand
  implications for
  current curb uses
- Develop case for
  benefits and
  more detailed
  designs *before* implementing
  bus priority

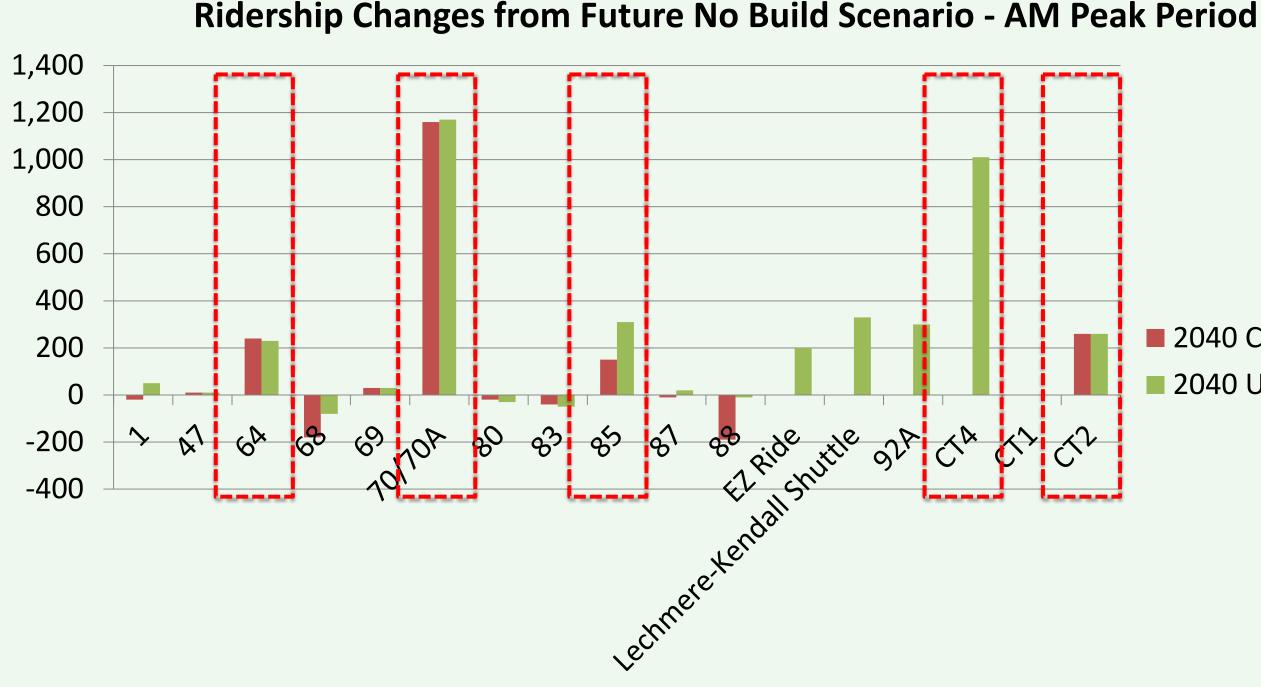

**Graphic: Current curb uses** 

 Draft recommended routing and service changes are based on scenario modeling

### 2040 Constrained 2040 Unconstrained

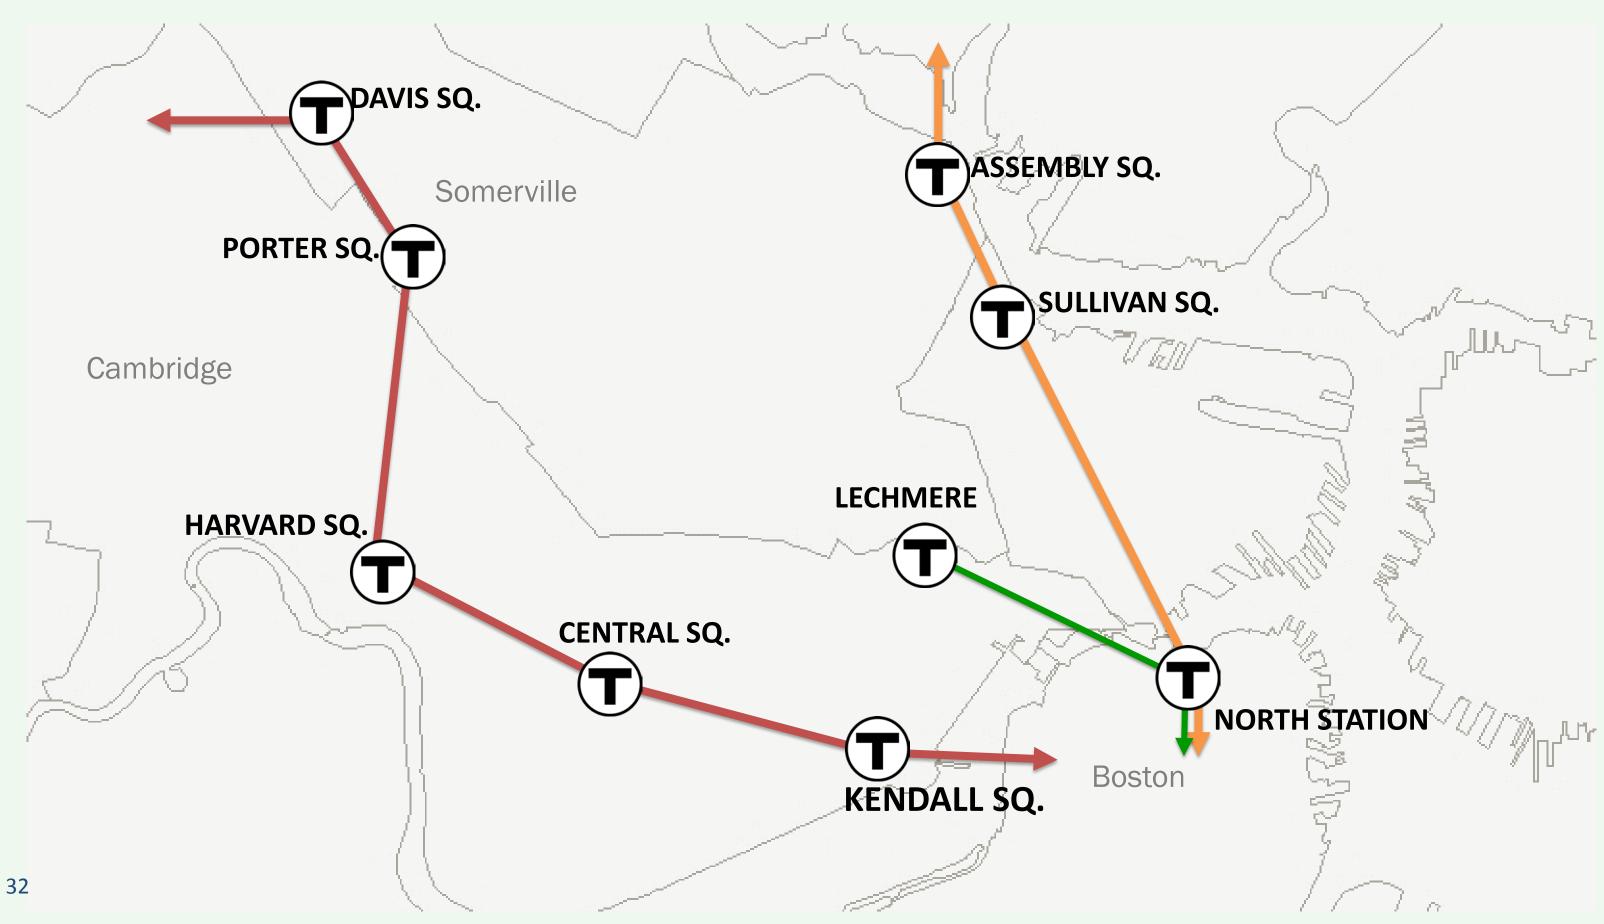

- Draft recommended routing and service changes (requires) additional resources/buses)
  - Extend 64/70 into Kendall during peak If successful, extend 64/70 all day
  - Transit Signal Priority and stop consolidation on the 85 and CT2 routing
  - Increased EZ Ride service (8.5 to 15 trips per hour per direction)
  - New "CT4" service between Sullivan, Kendall, and beyond

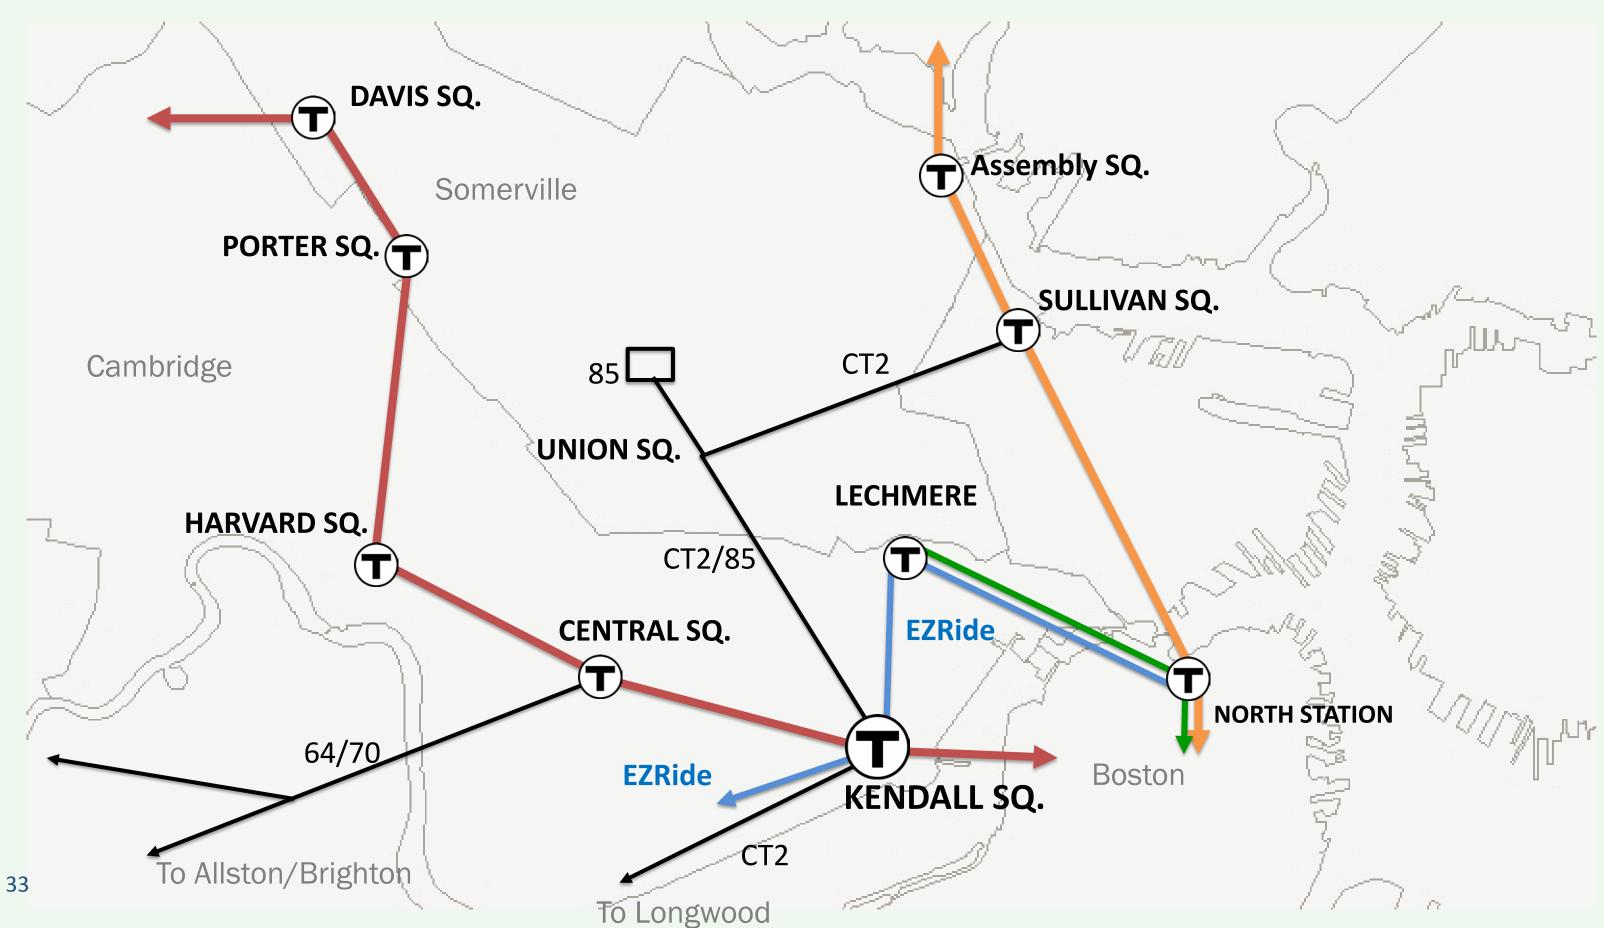

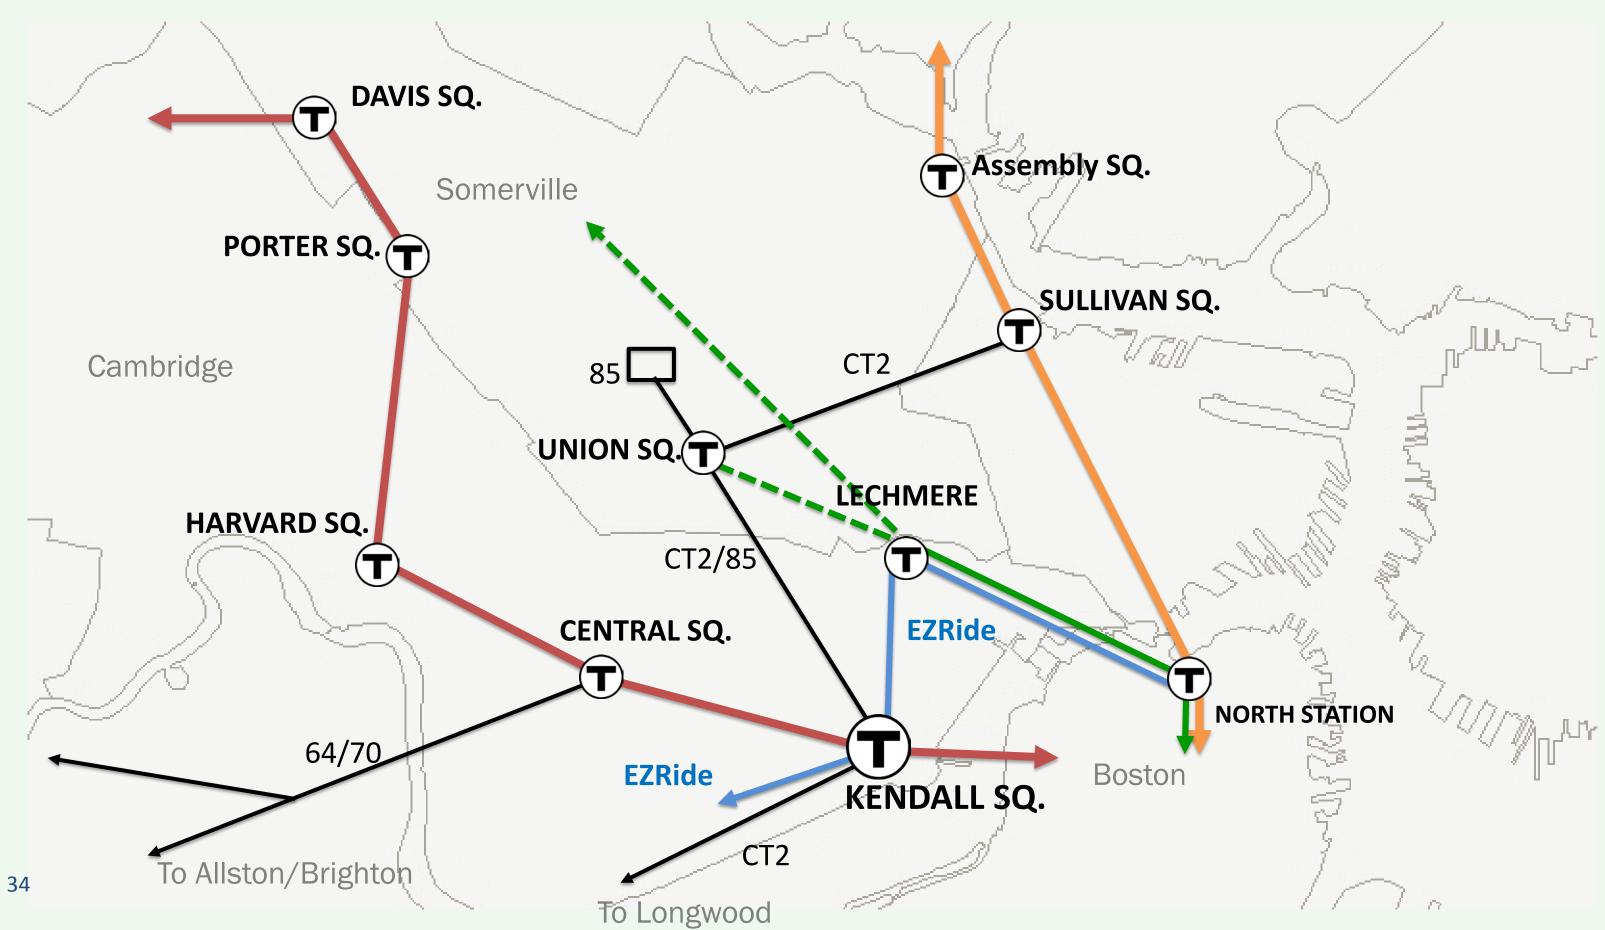

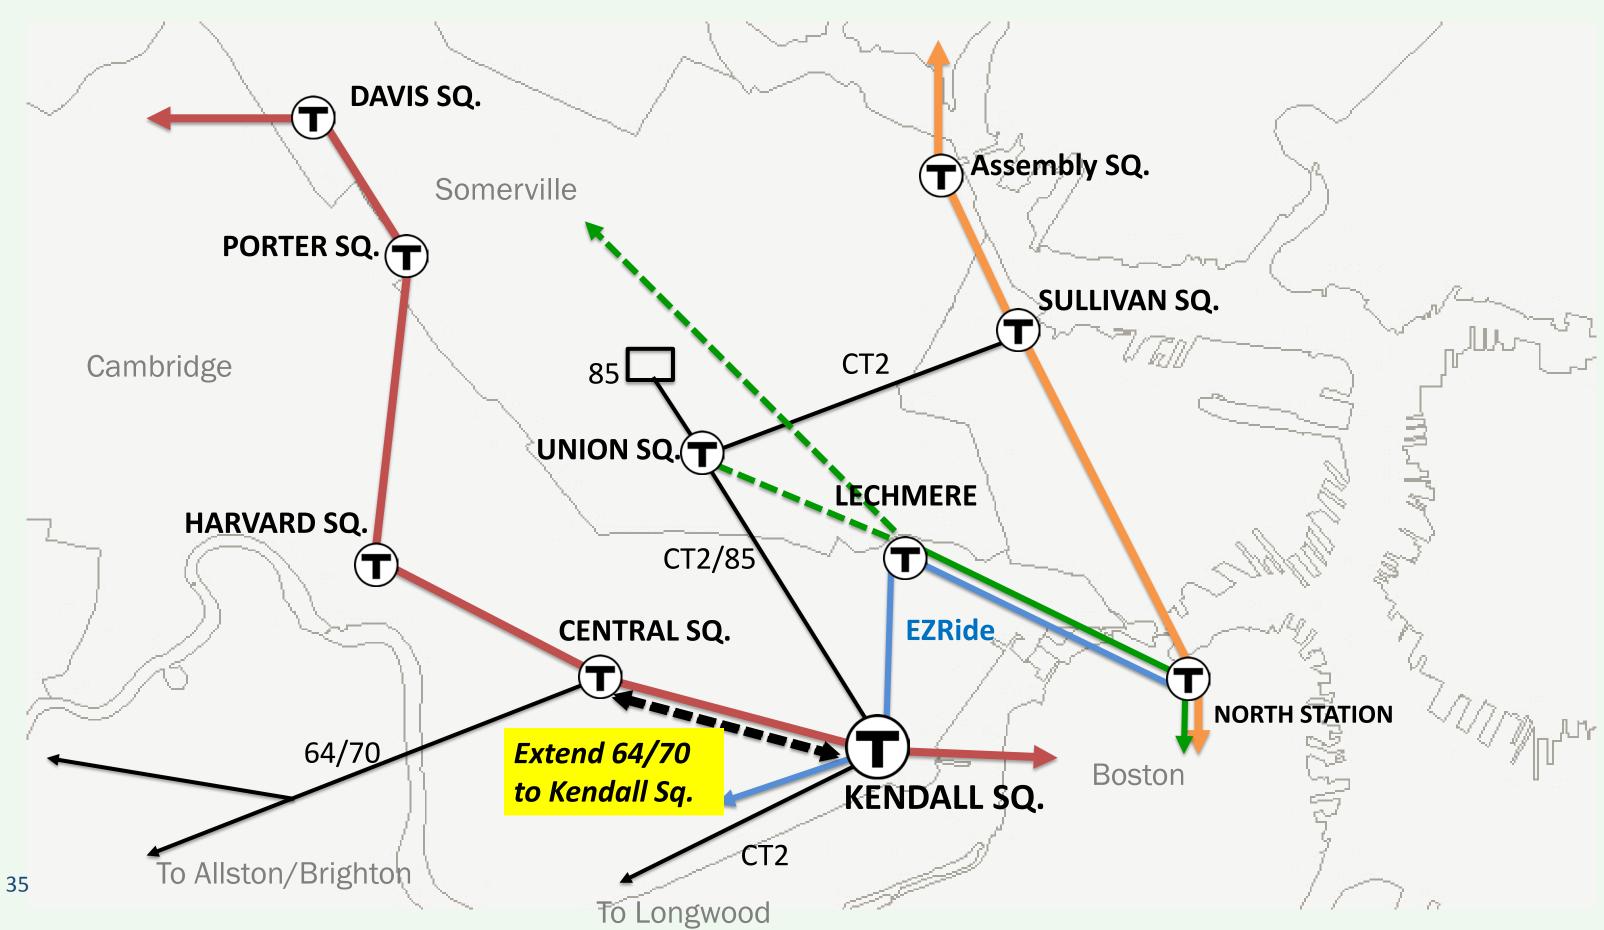

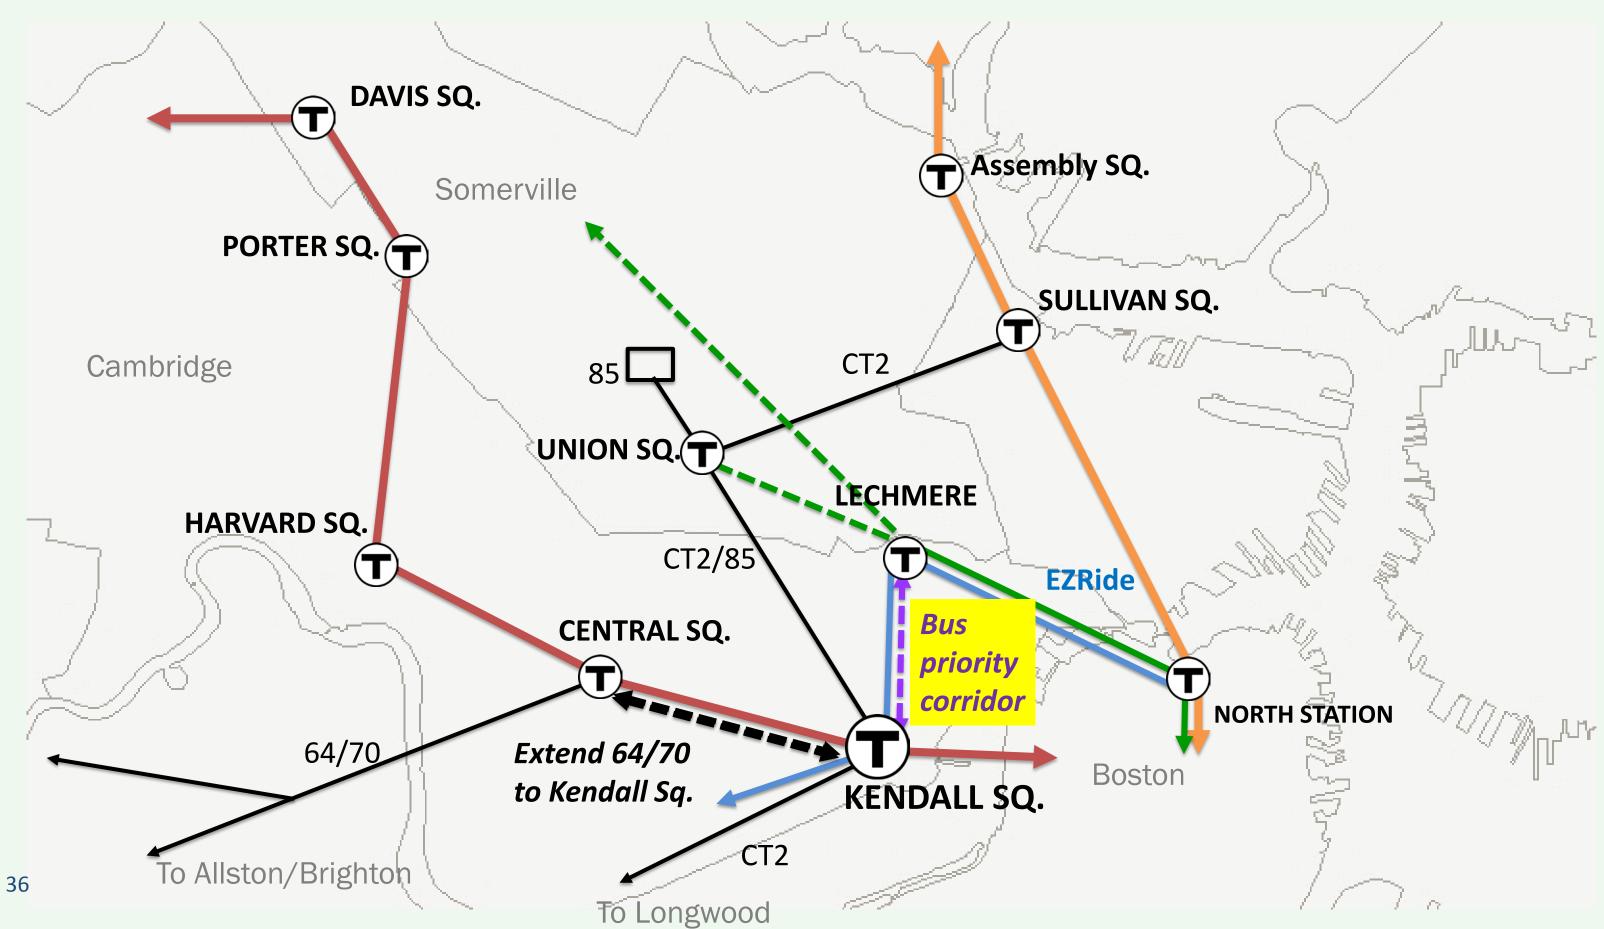

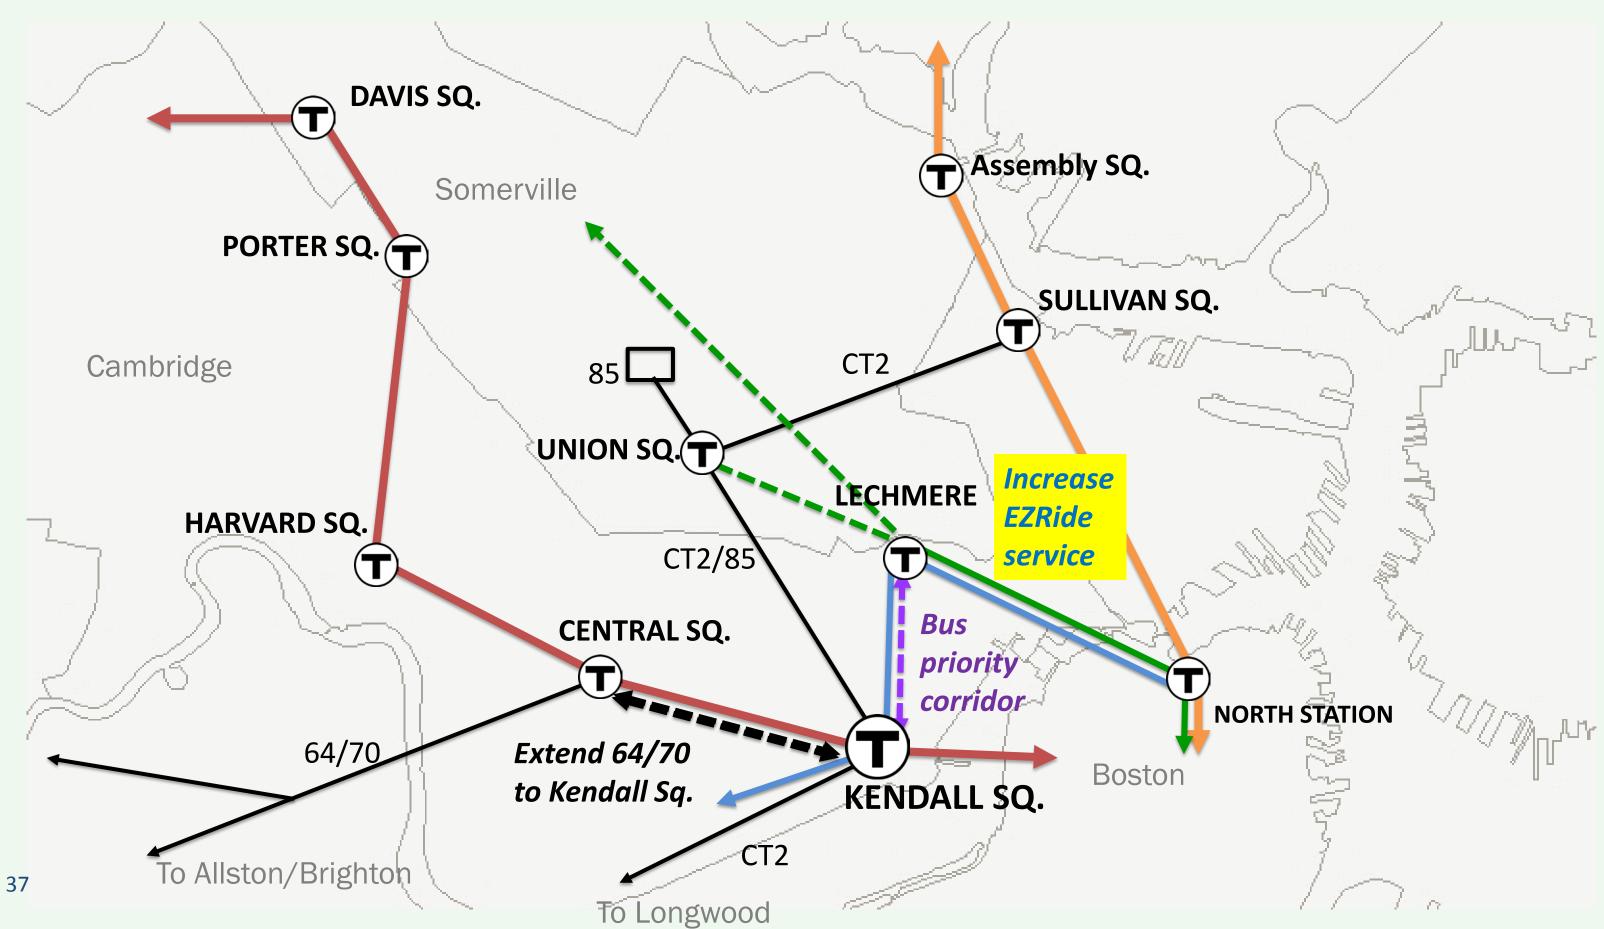

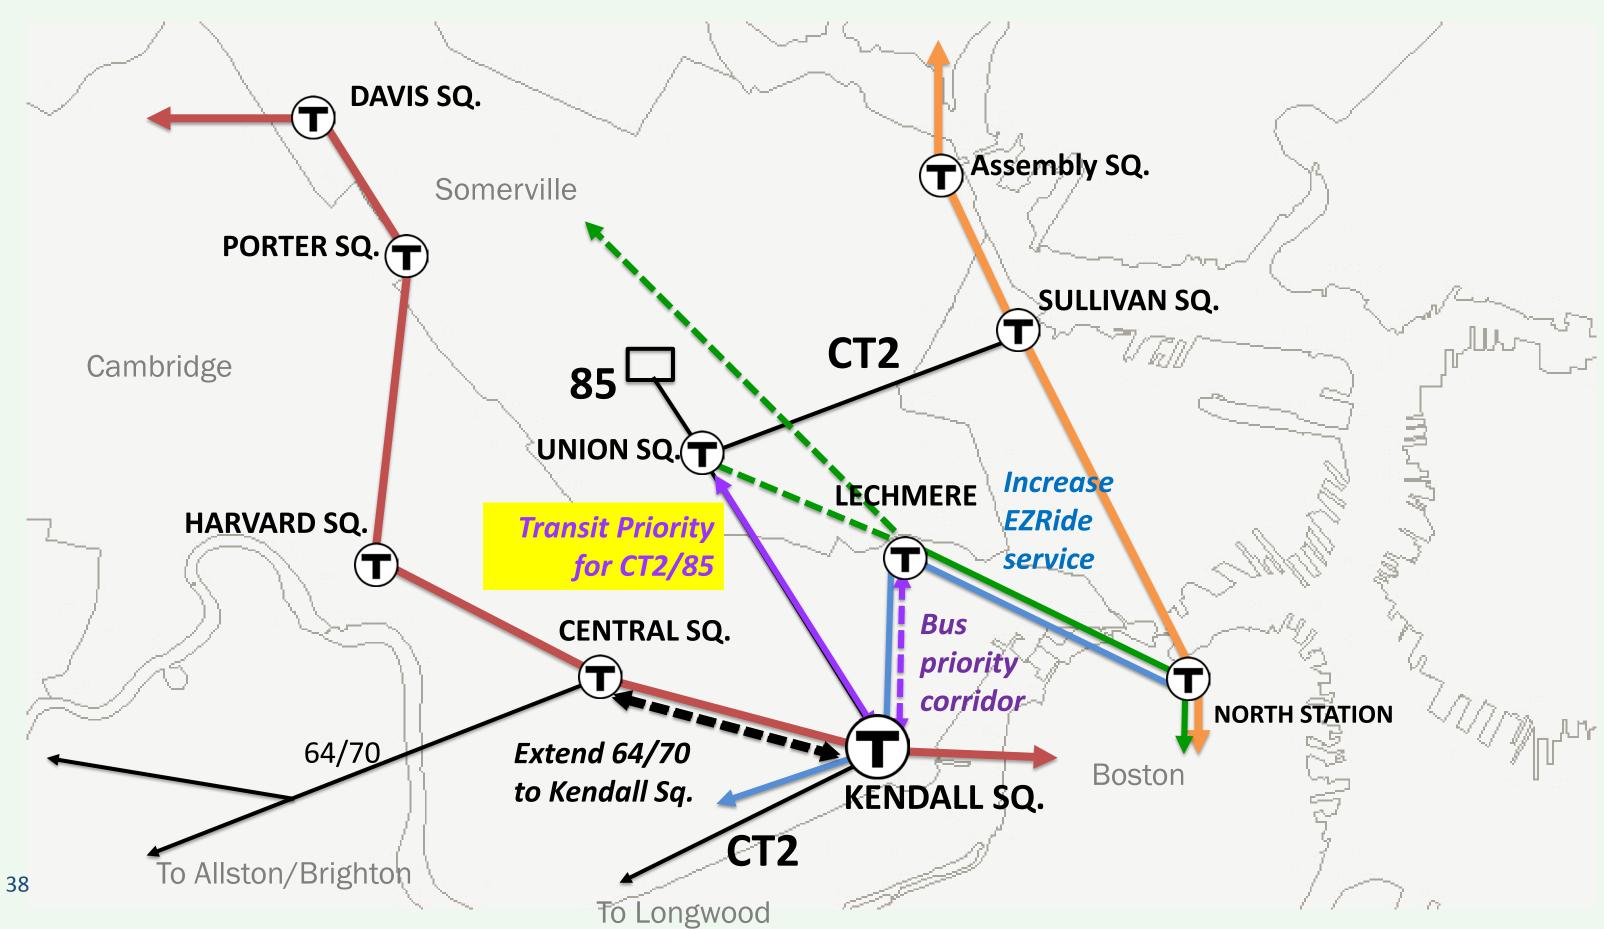

# **DRAFT RECOMMENDATIONS: BUS**

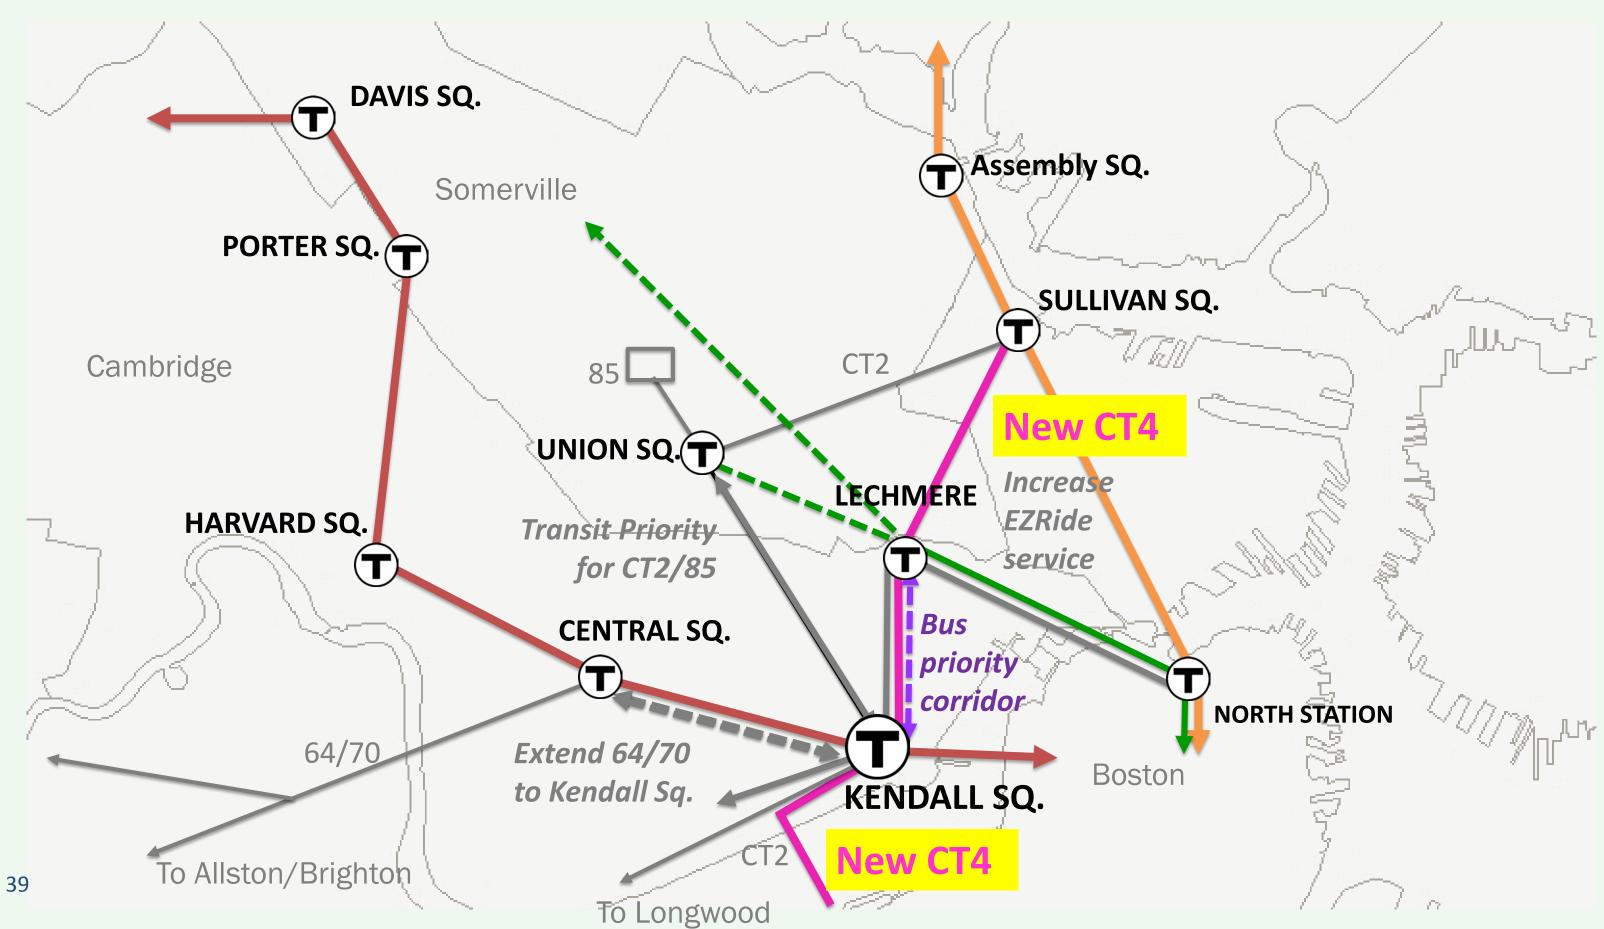

# **DRAFT RECOMMENDATIONS: BUS**

# **DRAFT RECOMMENDATIONS: BUS**

# **CHALLENGE: GRAND JUNCTION**

Underutilized rail corridor (only a few equipment or freight movements per day) Cambridge St with the ability to serve important local Story all sources of the strategy of the story of the sto and regional connections Within a  $\frac{1}{2}$  mile of the Grand Junction corridor are: Binney St 42% (49,000) of jobs in Cambridge Sin 31% (33,000) of residents MIT Museum Field Rd Two tracks currently exist River Massachuse Path not funded Trader Joe's (MIT ROW) Regiona Charles Rive Path not funded connections Nest Station and beyond Beacon St Boston Storrow Dr University 20 41

# **Regional connections** (Somerville, Sullivan, North Station)

## Cambridge St Path funded by City<sub>28</sub>) for \$10 million, First Street Municipal Garage **MassDOT ROW**

Charles River Reservation IV

Boston I Gard

Beacon St

The

BACK BAY

# DRAFT RECOMMENDATIONS: GRAND JUNCTION

- Create a working group to collaborate on implementing the multi-use path
  - There is already wide-spread support for the path
  - City funded \$10 million for the northern portion
  - Need to engage with MassDOT regarding planning for Rail with Trail
- Clearly define the goals for the design of the path related to transit:
  - Maximize flexibility for allowing for future transit
  - Accommodate 6-15 minute frequency (two-tracks)
  - Enable more regional connections (North Station, West Station, GLX, regional path network)

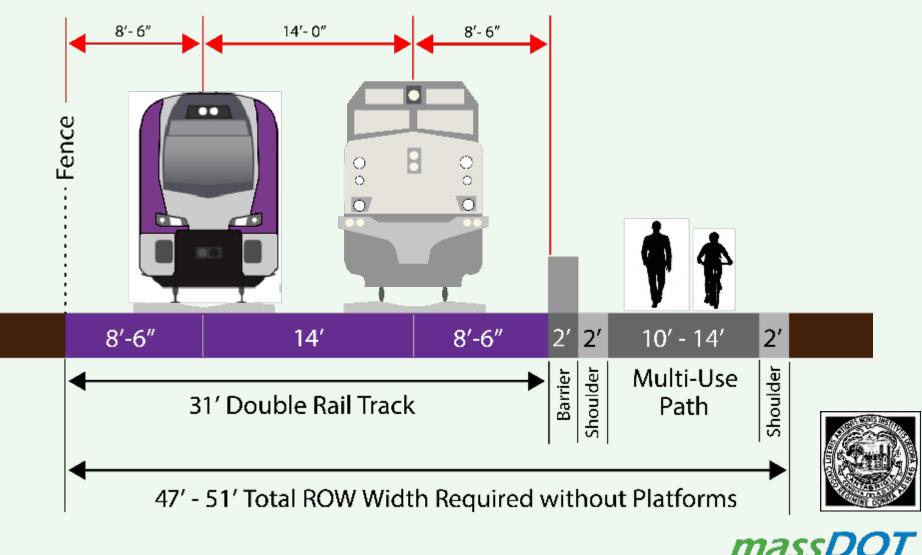

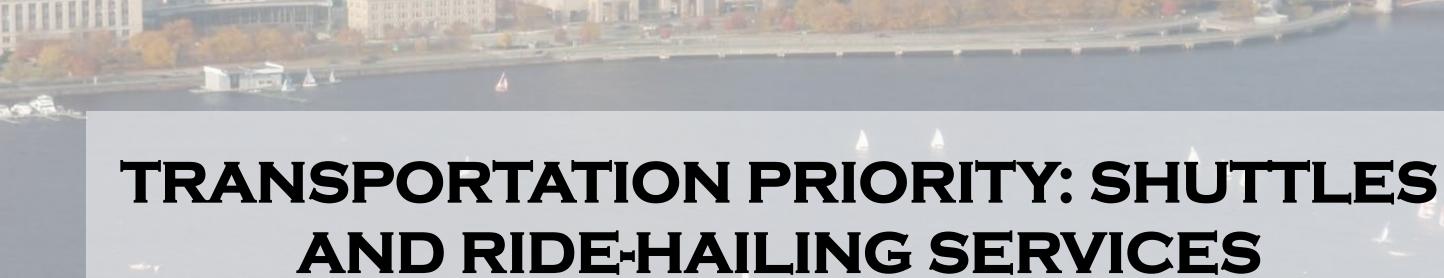

# **DRAFT RECOMMENDATIONS: GRAND JUNCTION**

- **Transit Recommendations:** 
  - Finish ROW survey and confirm space for two tracks and path for the entire length
  - Develop transit conceptual designs to not preclude rail options with at least one station
  - Work with MassDOT to produce new demand estimations
  - Continue to explore feasibility and advocate for regional connections

# **CHALLENGE: RIDE-HAILING** SERVICES AND SHUTTLES

- Need to understand the importance of TNC/ride-hailing trips to Kendall Square and the impact on the transportation network
- Need to better understand the individual shuttle services and opportunities for consolidation

# **DRAFT RECOMMENDATIONS: RIDE-**HAILING SERVICES AND SHUTTLES

- Continue meeting with shuttle providers and ride-hailing companies to request information and determine challenges and opportunities
  - Met with Uber and Lyft and requested origin and destination information for trips into and out of Kendall Square
- Continue collaborating with other stakeholders to gather more information that is applicable to Cambridge and the region (e.g. City of Boston, MBTA, MAPC, CTPS)

Heatmap of top origin points for trips ending in Kendall

# **PUBLIC QUESTIONS AND INPUT**

# Recommendations

- Draft Recommendations
- Draft Items for Further Analysis
- Bus
  - Description of routing scenarios
  - Evaluation of routing scenarios
- Grand Junction
  - Grand Junction Multi-use Path
  - Possible cross sections
  - Right-of-way constraints

# **GENERAL INFORMATION**

- Website: http://www.cambridgema.gov/CDD/Projects/Transportation/ kendallsquaremobilitytaskforce
- Contact:
  - Brian Dacey, President, Cambridge Innovation Center 617-401-2870, dacey@cictr.com
  - Susanne Rasmussen, Director of Environmental & Transportation Planning, City of Cambridge 617-349-4607, srasmussen@cambridgema.gov
  - Tegin Teich Bennett, Transportation Planner, City of Cambridge 617-349-4615, tbennett@cambridgema.gov
- Final Task Force Meeting: tentatively Thursday, April 6, 2017
