TUESDAY, MAY 26, 2015

POLE AND CONDUIT COMMISSION MEETING

_____

EXECUTIVE DIRECTOR ELIZABETH LINT: Good morning. This is a meeting of the Pole and Conduit Commission on Tuesday, May 26, 2015 at 10:05 a.m.

We're in the Michael Lombardi Building, 831 Massachusetts Avenue, Basement Conference Room.

Before you are the Commissioners: Chair Andrea Jackson, Superintendent of Streets William Dwyer and City Electrician Stephen Lenkauskas.

CHAIR ANDREA JACKSON: Do you want to do the first order of business is to approve the minutes from the April hearing?

EXECUTIVE DIRECTOR ELIZABETH LINT: Well, we have to make the changes. You can approve

them subject to those changes.

CHAIR ANDREA JACKSON: Subject to those changes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do we have to name the changes?

CHAIR ANDREA JACKSON: I make a motion that we approve the minutes from the April 16 Pole and Conduit Commission Hearing.

Is there a second?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

City of Cambridge Traffic Department.

DANA BENJAMIN: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Good morning.

DANA BENJAMIN: Good morning.

CHAIR ANDREA JACKSON: Could please state your name for the record saying and spelling your first and last name?

DANA BENJAMIN: Yes, Dana Benjamin, D-A-N-A, B-E-N-J-A-M-I-N.

PETITION (CONTINUED):
CTP&T DEPARTMENT - HAMPSHIRE STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The first petition is for Hampshire Street?

DANA BENJAMIN: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: To cross Hampshire Street and Portland Street, put in a new traffic signal conduit to get rid of overhead connection on a traffic pole.

This one was continued from last month.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yeah. We actually had the site meeting with the contractor and Dana, and another consultant, I think.

DANA BENJAMIN: Yes. It's the person who will be doing the trenching and our --

SUPERINTENDENT OF STREETS WILLIAM DWYER: So, it turned out that was pretty much the only alternative, a sizable alternative we had, so Public Works is okay moving forward with this recommendation and approval?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the motion to approve?

SUPERINTENDENT OF STREETS WILLIAM DWYER: With typical conditions, Elizabeth, that we usually have, we still need the site meeting for the timing because things will be different, and they'll still need the permit or the contractor

needs to seek the city permits and whatever SPOF regulations apply, will apply to them at that time.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. On the motion?

CHAIR ANDREA JACKSON: Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

NEW PETITION:
CTP&T DEPARTMENT - MT. AUBURN STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Also Cambridge Traffic Department, install approximately 55 feet of traffic signal conduits across Mt. Auburn Street near the intersection with Aberdeen Avenue and within the sidewalks on the northeast and south side.

That's just the one section crossing Mt. Auburn Street?

DANA BENJAMIN: Crossing, yes, that's correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All the other conduit in the intersection is approved to be okay?

DANA BENJAMIN: Yes, I think I showed that one run across Aberdeen.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yes, you did.

DANA BENJAMIN: Yeah, that's compromised.

SUPERINTENDENT OF STREETS WILLIAM DWYER: We have no issues with this one.

DANA BENJAMIN: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the motion to approve, pending all typical conditions, site visit, permits, all typical conditions?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second that.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
CTP&T DEPARTMENT - CAMBRIDGE STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Third petition, also Cambridge Traffic Department. This is to install approximately 100 feet of traffic signal conduit cross Cambridge Street and within the sidewalks on the northeast and southeast corner, and I believe that's on Cambridge and Quincy Street, the intersection.

DANA BENJAMIN: Correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Same condition, all of the conduits okay?

DANA BENJAMIN: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Except for that one section.

DANA BENJAMIN: Yeah, and we're going around the long way because DPW recently paved that area.

SUPERINTENDENT OF STREETS WILLIAM DWYER: No issues. I have no issues with that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't have any issues either.

Motion to approve pending all typical conditions.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: Aye.

NEW PETITION:
CTP&T DEPARTMENT CHURCHILL AVENUE

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Fourth petition also for Cambridge Traffic Department. Install approximately 50 feet of traffic signal conduit across Churchill Avenue and within the sidewalks on the northeast and northwest corner, and I believe this is at Mass Ave, Mass and Churchill?

DANA BENJAMIN: Correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Once again, same condition, everything else is okay, just replacing the failed conduit across Churchill?

DANA BENJAMIN: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: No issues on my end.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Motion to approve, pending all typical

conditions and permits?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

CHAIR ANDREA JACKSON: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Thank you.

DANA BENJAMIN: Thank you.

CHAIR ANDREA JACKSON: Thank you.

Are there members of the public that wish to come forward to provide testimony on a particular application?

Specifically, I'm looking at the people in back. I have never seen you, so I didn't know if maybe you had an issue.

ARUNA SIKHARAM: We're from Eversource.

RICK SCHIFONE: NSTAR or Eversource.

CHAIR ANDREA JACKSON: All right. We'll keep it going.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All right, NSTAR or Eversource.

RICK SCHIFONE: Good morning.

CHAIR ANDREA JACKSON: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Good morning.

RICK SCHIFONE: I'm Rick Schifone. I'm here with Renee Banks-Clark filling in. She's filling in for Jack. Aruna is our engineer.

(Crosstalking by all Board members.)

CHAIR ANDREA JACKSON: Just speak your first name and who is with you, and if you can speak the name and then spell first and last name, please.

RICK SCHIFONE: Okay. I'm Rick Schifone, S-C-H-I-F-O-N-E.

ARUNA SIKHARAM: Aruna Sikharam, A-R-U-N-A, S-I-K-H-A-R-A-M.

RENEE BANKS-CLARK: Renee Banks Clark, R-E-N-E-E, B-A-N-K-S-hyphen-C-L-A-R-K.

ZAKARIA OUZZIF: Zakaria Ouzzif, Z-A-K-A-R-I-A, last name O-U-Z-Z-I-F.

PETITION (CONTINUED):
NSTAR - ALBANY STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: NSTAR/Eversource for Albany Street, it's a continued petition through last month on Albany Street. Northeasterly from a Manhole 3502 and 3503 approximately 200 feet southwesterly of Portland Street, a distance of 263 feet of conduit. The reason for this work is to relocate existing service to 36 Albany Street.

ARUNA SIKHARAM: MIT.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is the MIT site. I believe it was

continued. I think it was continued because of recent paving or --

SUPERINTENDENT OF STREETS WILLIAM DWYER: I'm trying to look back at my notes. I'm sorry for the delay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Did you have any revision?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yeah, this was -- I recall this. It was the conduit in the chamber, you had a new sidewalk that was just placed late last fall.

ARUNA SIKHARAM: Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER: So you -- we're going to bring it back and you're going to look at it again to see if you could do anything. This is a large sidewalk ramp, at least 50 or 55 feet of sidewalk and reset curb and the street was paved.

ARUNA SIKHARAM: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe this area was in here is also a planting area currently that cuts over.

RICK SCHIFONE: If we could continue it to next month. And word didn't seem to get back to us.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I think you should get an updated version of this showing the current --

RICK SCHIFONE: The current conditions?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: -- conditions and the streetscape and landscape in the areas that this was just done.

RICK SCHIFONE: Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER: It doesn't help, Rick, if we need to -- one of your reps needs to meets with someone from Public Works that knows about it. You can contact us and we can set that up.

RICK SCHIFONE: Yeah, that would be what Aruna and our construction folks to see how to attack this without destroying the sidewalks.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Move to continue.

CHAIR ANDREA JACKSON: Second. All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
NSTAR - HARVARD STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Next petition is for Harvard Street, also NSTAR/Eversource, southeasterly from Manhole 1095 approximately 110 feet from Moore Street a distance of 30 feet of conduit. The reason for this work is to provide new temporary underground

electric service to Harvard Street.

RICK SCHIFONE: This is to bring a secondary into the --

ARUNA SIKHARAM: Into the construction site.

RICK SCHIFONE: Into the construction site.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't have any issues with that.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Just let me take a quick peek here. I wasn't able to get to this one this morning.

The schematic -- the dig is actually up from here to here.

RICK SCHIFONE: The full run is showing our cable. The final dig is just going to bring it to the property.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: 1095 into the property.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I have been there prior to for the developer. I'm familiar with the site. No issues. Go ahead with the typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Motion to approve all typical conditions?

CHAIR ANDREA JACKSON: Second.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
NSTAR - LANSDOWNE STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Next petition is for Lansdowne Street, at and

southeasterly at the intersection of Green Street from Manhole 19 to manhole 3243. This is approximately 10 feet on conduit. This is to provide electric service to 300 Mass Ave.

Was this before us once before or is this in addition?

RICK SCHIFONE: This is an additional piece to the same work order that we came in before on. This is the Lansdowne's piece section.

ARUNA SIKHARAM: We didn't have any spares in that section to pull the cable.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Between those two manholes?

ARUNA SIKHARAM: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: What is the schedule for the rest of the work for this whole site? I know there's quite a bit of dig throughout that end of the city.

ARUNA SIKHARAM: They're looking for us to energize them.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Is this tied into the Forest City work?

ARUNA SIKHARAM: Yes. Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: No major concerns with DPW. Typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Motion to approve pending typical conditions.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
NSTAR - AMES STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Next petition is Ames Street. Also, Eversource and NSTAR. At and northeasterly approximately 140 feet south of Broadway from Manhole 2343, a distance of 138 feet of conduit. This is to provide electric service to 4 Cambridge Center.

ARUNA SIKHARAM: Due to the switch gear for the -- the switch gear is going to be on the sidewalk temporarily to support the construction in the high-rise building in the area.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So where you show that's the existing switch gear?

ARUNA SIKHARAM: No. That will be the new switch gear.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: But the original is marked there?

ARUNA SIKHARAM: The SE 132 is --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So

they're proposing to relocate it on the sidewalk?

ARUNA SIKHARAM: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Well, number one, I think Ames Street was paved two years ago.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is this for consideration of the new building going in?

ARUNA SIKHARAM: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe they're taking that street.

SUPERINTENDENT OF STREETS WILLIAM DWYER: So they're taking that side of the street, yeah.

ARUNA SIKHARAM: That was the information we had that they already had approval to --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: They're taking a good section of that sidewalk and putting housing, I believe, from Broadway all the way down.

SUPERINTENDENT OF STREETS WILLIAM DWYER: What kind of time frame are they on, do you know?

ARUNA SIKHARAM: I think at least they're out at least six months because it takes six months for us to get the switch gear for them. So maybe the beginning of the next year I think we have to energize them.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Okay. Fine. You can move ahead with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is that the only section that you need to relocate --

ARUNA SIKHARAM: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: -- for that whole street -- the whole street?

ARUNA SIKHARAM: Right.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: For this construction?

ARUNA SIKHARAM: Especially for this

construction, yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Given again with SPOF and typical conditions, but the street preservation will probably kick in here, and it will take awhile to work that out. Mediate something out with the developer or the owner.

ARUNA SIKHARAM: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay.

CHAIR ANDREA JACKSON: Is that in the form of a motion?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yeah, the second part was.

Actually, you know --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I would move --

SUPERINTENDENT OF STREETS WILLIAM DWYER: I think we should -- given, you know, it takes

six or seven months to get the switch gear, anyway. Do you know what you need to get?

ARUNA SIKHARAM: Yes, that's the information I have, but I can get back you on the exact dates.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I'm not exactly sure where they are as far as status.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Have you got approval for the sidewalk -- to take the sidewalk, or is this all just preliminary?

RICK SCHIFONE: This is a temporary --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is a temporary service. To take the sidewalk and put the switch gear on the sidewalk.

RICK SCHIFONE: Yeah, that would've been the developer to get the okay from the city to have that location because that's actually owned by them.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I haven't heard anything about that yet.

motion to continue for one month, the next month to get --

CHAIR ANDREA JACKSON: To continue?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yes.

CHAIR ANDREA JACKSON: Okay. So I make a motion that we continue this application, is there a second?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I second it.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

RICK SCHIFONE: We'll get back with the

developer and have them contact the city about the okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The time frames and everything else, so we can get a better look at what's -- and if the city will approve that area for the switch gear.

RICK SCHIFONE: Understood.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Thank you.

RICK SCHIFONE: All right. Thank you.

ARUNA SIKHARAM: Thank you.

NEW PETITION:
COMCAST - WATERHOUSE STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Comcast. This is in regards to 9 Waterhouse Street. Place one new sidewalk vault over existing Comcast conduit in the brick sidewalk area in front of 7 and 9 Waterhouse Street from new sidewalk vault trench easterly

approximately 19 feet in the brick sidewalk to the property line at 9 Waterhouse Street, installing one 4-inch conduit. This will include the removal and restoration of the brick sidewalk.

ANTHONY VATALARO: So this is for new service to 9 Waterhouse.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Right. I think we have some concern about the brand-new brick sidewalk and it being --

ANTHONY VATALARO: Right.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Were you able to talk to the owner in regards to entering the property right at the vault:

ANTHONY VATALARO: I'm not dealing directly with the owner. So they're in communication with him, so I haven't received an answer back since we met, so...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I

move to continue it until we get that information.

ANTHONY VATALARO: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Motion to continue.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
COMCAST - BEECH STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Comcast - 6, 8 and 10 Beech Street, install one new manhole existing Comcast conduit in front of 9 Beech Street. From new manhole trench 115 feet

southwesterly in the public way ending at the property line at 6 and 8 Beech Street installing one, two-inch conduit. From new manhole, trench an additional 42 feet southeasterly in the public way ending at the property line of 10 Beech Street installing 1, two-inch conduit. This will include the removal and restoration of the brick sidewalks.

ANTHONY VATALARO: So this is for to get service back to 6, 8, 10 Beech Street.

We formerly had a pole line behind them, and there was an aerial attachment to the 1971 Mass Ave, the building that got demoed, so we had to take that down and this is the fix. This is actually a continuation of the trench we just installed for No. 9 Beech Street.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I see. Okay. DPW is fine with it.

Motion to move ahead with typical

conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Second it.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: Aye.

NEW PETITION:
COMCAST - RINDGE AVENUE

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Comcast, 280 Rindge Avenue. Place new Comcast manhole over existing underground conduit on Rindge Avenue. Trench southerly 38 feet in the public way to the property line of 280 Rindge Avenue installing one 4-inch conduit. This will include the removal and replacement of two

sidewalk panels.

ANTHONY VATALARO: This is along the same lines. This is for CHA. They have demoed for buildings at 280 Rindge Avenue, so the feed we have going into 280 is now gone and that fed the rest of the complex, the buildings that remain. So, the manhole is going to go over existing. There will be a new trench to the property that remains. I think there's a Federal and State side. So the new trench will feed the buildings, the residents that are still there. Right now, we have them on a temp around the construction fence. And then the old feed will feed the new buildings, which it's in place to the property, but we won't have to do anything in the public way.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So the buildings that are coming down you're going to use the existing conduit over there to refeed.

ANTHONY VATALARO: To feed them when the new buildings are up, yeah, which is closer to Clifton Street, that feed.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Move to --

SUPERINTENDENT OF STREETS WILLIAM DWYER: Do you have a manhole where the existing feed is now on the main line?

ANTHONY VATALARO: I think on the next street there's a manhole on the corner it's a little further away.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Just it loops in -- sweeps in from the line, from the manhole itself, from the existing manhole, the old connection, the existing connection sweeps in from --

ANTHONY VATALARO: I think it's there to feed the next riser pole on the next street down.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Oh, I see. DPW is fine with this. Move ahead with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Motion to approve?

CHAIR ANDREA JACKSON: Second.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded. Typical conditions. Yep.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

ANTHONY VATALARO: Thank you.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Thanks.

PETITION (CONTINUED):
LIGHTOWER - CHESTNUT STREET AND MAGAZINE STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Lightower. Chestnut Street and Magazine Street starting at Utility Pole 34, place 190 feet of 4-inch communication conduit to Utility Pole 146/33.

I believe this has been continued a few times.

BILL CONWAY: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Where are we?

BILL CONWAY: We're still pending the pole resets. Last meeting you had asked that we send the map with the poles highlighted, which I emailed to both of you.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I did receive them.

BILL CONWAY: So you have that. The latest update from Eversource or NSTAR we're looking from mid- to late-July for the resets to be completed.

EXECUTIVE DIRECTOR ELIZABETH LINT: We're going to need a copy of that for our files since we're the ones that issue the paperwork.

BILL CONWAY: That's fine. We also submitted the letter from Eversource last time as well, last meeting, stating that due to the weather that we had this past winter that they're delayed, but do not see any issues.

THE REPORTER: I just need you to state your names for the record and spell it.

BILL CONWAY: Bill Conway, C-O-N-W-A-Y.

HERB BERTONI: Herb Bertoni, B-E-R-T-O-N-I.

SHAWN ALLES: Shawn Alles, S-H-A-W-N, A-L-L-E-S.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The section of the dig you're going across Magazine Street, Eversource is proposing, or they have proposed, and it has been granted to put a duct

bank across that same intersection and that would -- it would be nice to get it all in one trench.

BILL CONWAY: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Coordination with them. I believe their -- their approved dig was between the two manholes which actually is a little bit further than the two poles you're proposing to go to. I don't have any issues with it.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Nope.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: I'm going to abstain since I have not had a chance to review that, so I'll abstain.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And in the future any correspondence with requests should go to Andrea and Liz, copy us all so we all get the same information of it going forward.

BILL CONWAY: Okay.

PETITION (CONTINUED):
LIGHTOWER - MEMORIAL DRIVE

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Also Lightower. Ten feet northwest from utility pole is not tagged to a private property, telecommunications manhole at 790 Memorial Drive/Pleasant Street extension. I believe this was also continued and part of the previous

project?

BILL CONWAY: Correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That's just for that small section to enter the property?

BILL CONWAY: Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Are you going to be out on Memorial Drive at all, on State property?

BILL CONWAY: We shouldn't be, no. I don't believe so.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I don't think so, not on this.

BILL CONWAY: This is a copy of what I was just handed.

SUPERINTENDENT OF STREETS WILLIAM DWYER: DPW is fine with this. Typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the motion to approve pending typical conditions?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: Who made the motion?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I made the motion.

CHAIR ANDREA JACKSON: Okay. All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

CHAIR ANDREA JACKSON: Aye.

PETITION (CONTINUED):
LIGHTOWER - REMINGTON STREET AND HARVARD STREET
-and-
PETITION (CONTINUED):
LIGHTOWER - MASSACHUSETTS AVENUE

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Also Lightower. This is also a continuation from last month. Remington Street at Harvard Street, starting at Utility Pole 580/5 on Remington

Street approximately 164 feet north on Remington Street, approximately 10 feet northwest on Harvard Street to a Verizon Manhole 26/451.

I think this was continued to explore remaining underground using PVC conduit?

SHAWN ALLES: From Verizon and they provided a letter. We asked them to research that and they provided a letter to us stating they do not have any conduits available for us to use.

BILL CONWAY: I got that last week to you as well. I just gave a copy here.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Did you have a sketch of that?

BILL CONWAY: (Complies.)

SUPERINTENDENT OF STREETS WILLIAM DWYER: Are you coming out of your own chamber?

SHAWN ALLES: We have existing services in Verizon Manhole 26/451. So this would be

looking to dig to Utility Pole 580/05. Not to jump ahead, but the next petition is part of the same job.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Do you have a sketch on that?

BILL CONWAY: (Complies.)

SHAWN ALLES: Because they don't have any conduit, what we're looking to do is get on the pole line to go down Remington Street down to Mass Ave and then dig to 1100 Mass Ave at the corner of Remington and Mass Ave.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Have you met with anybody from DPW on this?

SHAWN ALLES: We have not yet on this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: They only told you that they don't have room. Have they told you -- can you find out who is in there, or how many conduits in the fill?

SHAWN ALLES: They did on the P Plan, I

think, that we provided. The P Plan says there's 42 conduits, but Verizon, I don't think, is telling us that there's 42 conduits available. And those conduits go back to the '60s, so I don't know how accurate...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: What is the time frame for this?

SHAWN ALLES: As soon as possible. The customer is looking for service the beginning of June.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe that section of Mass Ave was recently paved.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Three years ago. I remember that big Eversource dig for the oil line. That's the one that concerns me as far as what -- where you're going to try to go with that and how it's going to get done.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do you have an alternative route?

SHAWN ALLES: We don't. We explored NSTAR as well, and NSTAR doesn't have any conduits available for us to use either. And getting back to our -- that's the path of least resistance.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I think actually it would be -- it would be advisable to look at the details here before we recommend an approval. So I would recommend that we continue this, both of them, or this petition, anyway, until next month and have a site meeting on this. I think it's imperative to have a site meeting. Not Remington, that end hasn't been recently paved, but Mass Ave being Mass Ave in that area, I think it's important we should be on site and try to see what options we may have. On that note, I move to continue this until next

month.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye. I'm sorry. I probably should add the condition would be a site meeting coordinated by -- you have it.

EXECUTIVE DIRECTOR ELIZABETH LINT: I didn't say who was going to coordinate it. I just said have a site meeting with Public Works.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That's sufficient. Thank you.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The second petition is 1100 Mass Ave which, I believe, is connected with the previous petition.

SHAWN ALLES: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I would move to continue that also the petition for 1100 Mass Ave.

CHAIR ANDREA JACKSON: Second. All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

Thank you.

NEW PETITION:
LIGHTOWER - BROADWAY/PORTLAND STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Lightower. Approximately 80 feet southerly on Portland Street from Verizon Manhole 26/301, approximately 80 feet westerly on a private property belonging to 201 Broadway into the building at 201 Broadway.

Does that run on private property -- it looks like it's on the other property from this?

HERB BERTONI: That runs down the property line and has been eliminated. We're coming in on the corner of the building on the property.

SUPERINTENDENT OF STREETS WILLIAM DWYER: On the private side?

HERB BERTONI: On the customer side, so we won't be encroaching on the 161 property.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That's definitely the Verizon manhole you need to get into, huh?

HERB BERTONI: Yes, yes. I looked at this in the field trying to get out there with Paul. And we have a coil in that manhole. It's just -- we need to break out to go down the street. Part of Portland Street has already -- it's fairly new, no patches. I don't know when

it was paved. But right past the catch basin there's a seam there where the old and new, so we're looking to come down right around the catch basin and jump in the sidewalk, and we will put a brand-new sidewalk, and that way we won't be on the roadway.

So when I talked to Paul about that, he said, "Go there and talk a look and see what you can do." And we'll meet with him once it's approved and go over the all the specific details, but it will be pretty straightforward and clean.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: How is that building fed now?

HERB BERTONI: From very -- we don't really know. We found conduits inside the building. We don't know where they go or how they get in there. There's a false facade when that building was renovated and the conduits just

pop up inside --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: But they do have service, they have Verizon service in this building currently?

HERB BERTONI: Yeah. So what we're going to do is find one of the conduits on the private property that runs down here in the front of the building and tap into one of them, and pull it right into the private property. That's the goal on this one, so everything will be done in the sidewalk.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This conduit runs -- this conduit is going to be moved onto the sidewalk that shows in the gutter line there?

HERB BERTONI: That's after we reviewed it in the field.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It has since been relocated to the sidewalk?

HERB BERTONI: Right. So it will be a brand-new sidewalk and we won't be giving up any of the streets.

SUPERINTENDENT OF STREETS WILLIAM DWYER: The trucks are trying to stay on the Hampshire side with their petition. You said you have a letter from Verizon?

SHAWN ALLES: Yeah. We explored Verizon using their existing conduit, and they came back with negative results for us.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: No results at all, not even negative?

SHAWN ALLES: That we can't use their conduit.

HERB BERTONI: There's nothing available and I did verify in the field that they have three conduits coming in, each one has cable in it, so they can't --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is

one of them red?

HERB BERTONI: No, I did look at that. But one does have a Comcast in it, and once you get on the private property, it becomes the property owner's conduit. So that's what we're going to do is get on the property and accept that conduit and jump into it and pull it into the building.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: What is your deadline for this one?

HERB BERTONI: First week of May. And we've got two customers in there we need to hook up.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So Verizon said that their conduits are full?

HERB BERTONI: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: But they can't tell you where they go?

HERB BERTONI: No.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Or they haven't told you where they go?

HERB BERTONI: Or they don't want to. They honestly came back with all the paperwork negative, everything, nothing, nothing, nothing, nothing. And we were trying to get, you know, Portland Street from Broadway to Hampshire and they had nothing. We do have network in the existing manhole, so we did locate that and find out there's a coil sitting there and all we have to do is a breakout.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Well, I would like to move to continue only to just chase out a little more what enters that building, how it gets there.

HERB BERTONI: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So motion to continue?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: If you give me a call next week sometime, I'll also get the fire alarm cable, I'll add that into the building, that might lead in a better direction.

HERB BERTONI: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And a path that might be available rather than having to go and dig all this. Give me a call during the week or the first part of next week.

HERB BERTONI: Okay.

PETITION (CONTINUED):
TELEPORT COMMUNICATIONS - BENT STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Teleport Communications.

DAVID EDGAR: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Good morning.

DAVID EDGAR: I'm not sure if you have the revised plans printed out for you. I emailed them over a few weeks ago, but I have some copies here.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I'll take a look at one.

DAVID EDGAR: (Forwarding.)

We were introduced as new business last month. The Commission requested that Teleport install city shadow ducts from the Verizon manhole and the Level 3 manhole across Bent Street to the AT&T property. Additionally, they requested that we remove the small handhold that was proposed in the sidewalk. That has since

been removed. And as far as I'm aware, those are the only conditions or concerns at that time.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I'm okay with this. Seeing all the conditions met, I make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Can I ask: Where does that small handhold go, you just took it out and --

DAVID EDGAR: It was coming from the Level 3 manhole and we just removed it from the design.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So the conditions being met that you removed the handhold on the sidewalk and added two 4-inch city shadows to each manhole, one at Level 3 and one at the Verizon manhole across so I make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second that motion.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

DAVID EDGAR: Thank you for your time.

EXECUTIVE DIRECTOR ELIZABETH LINT: All conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: All typical conditions.

PETITION (CONTINUED):
CROWN CASTLE - CAMBRIDGE STREET (Node N061)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Crown Castle. First petition is Cambridge Street. Extension of fiber optic cable in new conduit from Level 3 Manhole 0515-0204 on

Cambridge Street to Pole 166-75A on Columbia Street, 277 feet, then aerial along Columbia Street with attachment of equipment to Pole 166/79 known as Node N063.

KOSTA JOVANOVIC: Good morning. Kosta Jovanovic for Crown Castle.

Based on the discussions that we have had with the Electric Department, Public Works Department, we have a number of amendments and a number of drawing amendments. So what I did was in order to ease us through this process, I prepared sort've an alternate agenda that calls out the new drawings. (Forwarding.)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Thank you.

KOSTA JOVANOVIC: I believe on the agenda revision that came out, the first one is Node 61.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That was my mistake. I have that next on the agenda. I skipped forward.

KOSTA JOVANOVIC: If I may also point out that because the revisions resulted in a reduced footage in each case, we didn't need to notify abutters. They had all been originally noticed on the original drawings.

I would be happy to replace all the original paperwork with the amendments.

CHAIR ANDREA JACKSON: So my question is that do we have to post notice of these?

EXECUTIVE DIRECTOR ELIZABETH LINT: No because these are smaller. They were noticed on them.

CHAIR ANDREA JACKSON: Noticed in terms of the abutter notification, but our notice in terms of when we post our agenda?

EXECUTIVE DIRECTOR ELIZABETH LINT: No

because it's just the same, but condensed.

SUPERINTENDENT OF STREETS WILLIAM DWYER: The scope.

EXECUTIVE DIRECTOR ELIZABETH LINT: The scope is smaller.

CHAIR ANDREA JACKSON: Is that for all of them?

KOSTA JOVANOVIC: All the items that are continued, correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: If we kept them as-is and kept these as addendums to it, because we asked them to be continued pending further review, and this is a further review. Take them as -- we could take them as --

EXECUTIVE DIRECTOR ELIZABETH LINT: Then --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: -- node number and reflect it here.

EXECUTIVE DIRECTOR ELIZABETH LINT: That

might be an easier way to do it.

CHAIR ANDREA JACKSON: Okay.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: We'll take the first one, which is N061 on the agenda. It's in aerial N061. We can note on the amended plan this is for the extension for fiber optic cable in a new four-inch conduit starting at a new Crown Castle 3 x 3 manhole placed over or adjacent to the Level 3 duct system at the intersection of Norfolk and Cambridge Streets, southerly on Norfolk Street plus or minus 179 feet to Pole 510/59.5, then aerial along Norfolk Street with attachment of equipment to Pole 510/59.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Public Works no issues with this particular one.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the motion to approve?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Make a motion to move ahead and approve this one with typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - CAMBRIDGE STREET (N063)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Moving onto the next petition which is aerial node N063 for an extension of fiber optic cable in new 4-inch conduit starting 3 x 3 manhole. Place over the Level 3 deduct system at the intersection of Cambridge and Columbia Streets, northerly on Columbia Street, plus or minus 221

feet to Pole 166/75A, and then aerial along Columbia Street with attachment of equipment to Pole 166/79.

This is also a revision of the original petition eliminating some conduit and adding a manhole. I'm all right with this.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I make a motion to approve this with typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Second it.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - CAMBRIDGE STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Area AF-007, which is node N074 -- strike that. The previous petition was for some Cambridge Street and existing -- an extension of new conduit from Crown Castle vault on the corner of Cambridge Street and Cardinal Medeiros Avenue easterly along Cambridge Street to Level 3 Manhole 0515-0101. Is this removed?

KOSTA JOVANOVIC: No. This is the third item on the first page. This is the cross connect. This is the -- this is called cross connect to Level 3. There are two -- the drawing N074 contains two parts and the first one is the cross connect.

CHAIR ANDREA JACKSON: And then there's the other on the next page.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That's a small dig at Cardinal Medeiros and Cambridge and then going out onto Max. Ave?

KOSTA JOVANOVIC: That's correct.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So for this section of 177 feet is consolidated down to a crossover with a manhole at Cardinal Medeiros at Warren?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second that motion.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - CAMBRIDGE STREET (N074)

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Node N074 which is the installation of a new Crown Castle 3 x 3 manhole over or adjacent to the Level 3 system where Cambridge Street meets Max Ave, then southerly in new conduit along Max to Pole 536/2 plus or minus 141 feet and attachment of equipment on Pole 536/2 which is node N074.

Move to approve all typical conditions.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - CAMBRIDGE STREET (N075)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Next one is area AF-005 which is Node N075. Installation of a new Crown Castle 3 x 3 manhole over or adjacent to the Level 3 system at the intersection of Cambridge and Sixth Streets and then southerly and new conduit along Sixth Street to Pole 636/8, plus or minus 101 feet, then continuing aerial to Pole 636/12S, as in Sam, with attachment of equipment on Pole 636/12S known as Node N075.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Public Works doesn't have any issues with this and I make a motion to move forward with typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Second it.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - Third Street (N024)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Area AF-008, Node N024, installation of a new 3 x 3 Crown Castle manhole over or adjacent to the Level 3 duct system located on Pole 11 on Third Street with new conduit plus or minus 10 feet from the new manhole to Pole 11 with the installation of equipment on Pole 11, known as Node N024.

Motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

PETITION (CONTINUED):
CROWN CASTLE - ESSEX STREET (N033)

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Area AF 005 Node N033, Essex Street installation of a new Crown Castle manhole at the corner of Norfolk Street and Bishop Allen Drive, and then along Bishop Allen Drive, plus or minus 341 feet, to a 3 x 3 manhole at the corner of Essex Street and then continuing in conduit to Pole 241/9, approximately 100 feet, then aerial to Pole 241/15 and attachment of equipment on Pole 241/15, known as Node N033.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

What is the time frame -- well, I know the answer. This one is going to take quite the effort to get this one and keep everything

moving, I guess. As long as you're aware of that. I guess with all of these I assume when they meet approvals and you -- to minimize the impact the best we can.

JOE LUCCHESE: The good part of having all this work is we have plenty of places to go to stay away from areas that are congested so we can slide our installations.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Maybe this isn't the perfect time to have the conversation, but some of those places may be more sensitive than others. We can talk about that later, what gets approved and how to schedule.

Motion to move ahead on this petition with typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I second it.

CHAIR ANDREA JACKSON: All those in favor

signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

KOSTA JOVANOVIC: On the next one, the only correction was a pole number. The route did not change.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is AF-005 Node N038.

KOSTA JOVANOVIC: That's correct.

PETITION (CONTINUED):
CROWN CASTLE - AMORY STREET (N038)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On Amory Street from Verizon Manhole 26/70 on Broadway to Pole 15-2 on Amory Street in new conduit approximately 101 feet, then aerial to Pol 16 with installation of equipment on Pole 16, known as Node N038.

So the only correction is the pole --

RICHARD SHEPARD: And the riser detail.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Public Works is fine with this.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Is that being paved in the near future?

SUPERINTENDENT OF STREETS WILLIAM DWYER: There was just some major utility work just completed, but this could be one of those locations you may have to get into ASAP.

JOE LUCCHESE: Sure.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: On the motion to approve with all pending -- typical conditions?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

PETITION (CONTINUED):
CROWN CASTLE - ANTRIM STREET (N040)

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Area AF-005 Node N040. From Crown Castle manhole at the intersection of Antrim and Broadway to Pole 620/NT on Antrim Street in new conduit, approximately 82 feet, then aerial to Pole 620/15 with installation of equipment on Pole 620/15 known as Node N040.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Move ahead.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Motion to approve?

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor

signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - GARDNER STREET (N059)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: AF-005 Node N059 in the Verizon Manhole 26/72 on Broadway to Pole 672/4 on Tremont Street in new conduit approximately 175 feet, then aerial to Pole 285/4 on Gardner Street with the installation of equipment on Pole 285/4 (Node N059).

KOSTA JOVANOVIC: We discussed this one last time. And because of the status of the street, we were asked to look for an alternative, but the original plan for that was to come across St. Mary's Road, which is a longer route, but

maybe that's the only way if we want to avoid the new pavement.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I think we're near Prospect Street.

KOSTA JOVANOVIC: I notice from the construction schedule that there's going to be a raised intersection there --

SUPERINTENDENT OF STREETS WILLIAM DWYER: And St. Mary's. I was going to make a motion to continue this one anyway. Yeah, there seems to be further discussion with DPW and you folks on this particular one. A motion to continue this to next month to work out further details and further exploration.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This was the original route.

RICHARD SHEPARD: That was the original and they had asked us to shorten it up coming directly off Broadway, and now we're back to the

design to avoid the guarantee. They recently paved Tremont.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This should be on file. You don't need this, do you?

EXECUTIVE DIRECTOR ELIZABETH LINT: Not if we have it.

RICHARD SHEPARD: Was that actually petitioned?

SUPERINTENDENT OF STREETS WILLIAM DWYER: It doesn't look familiar.

RICHARD SHEPARD: I think you reviewed it internally and we had a premeeting and you made a suggestion to do it differently.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: We should add this to that petition which is continued.

On the motion to continue?

CHAIR ANDREA JACKSON: Second.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I make a motion that we would like to take a break.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

(Short recess was taken.)

CHAIR ANDREA JACKSON: I make a motion that we go back on the record.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I second that.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

PETITION (CONTINUED):
CROWN CASTLE - ELLERY STREET (N039)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Area AF-003, which is Node N039 on Ellery Street from the Crown Castle manhole at the intersection of Trowbridge and Harvard Streets easterly in new conduit to Ellery Street, then southerly to Pole 7 approximately 628 feet and installation of equipment on Pole 7.

KOSTA JOVANOVIC: This is one where you asked to us to investigate some work that Verizon did back in 2013, and I looked at the records and it showed that Verizon installed 2, four-inch conduits in this vicinity. The resident concern was from the person that, House No. 8 on Ellery Street, and we won't be going down that far. If this is approved, we'll start at the house 12/16 on Ellery Street and proceed northerly. So because there are only two, four-inch conduits, it's not likely that we'll get duct from Verizon.

SUPERINTENDENT OF STREETS WILLIAM DWYER: So you haven't researched with Verizon to see if they have any available space in there?

RICHARD SHEPARD: They have two ducts and they leave one spare for themselves and they used one, and it was a service connection. We looked into it, but there wasn't a bank put in, just two pipes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I think this needs to be continued, Steve, for some further -- a little more homework on this for reasons I mentioned at the meeting and prior.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Did you look at an alternate route to reach that Pole 7? I don't know if there's anything available coming up Ellery Street from Mass.

SUPERINTENDENT OF STREETS WILLIAM DWYER: You want to get to Trowbridge, right, or you need to get --

RICHARD SHEPARD: Coming from Trowbridge.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Your node is on Pole 7 on Ellery Street. That's where you need to get to.

RICHARD SHEPARD: Yes. There's no aerial connection on that side, so...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Motion to continue?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

Are there going to be two petitions on this one? There's two plans. The bottom of 7 and top of 8, or is that the same?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe it's the same. It's the same.

RICHARD SHEPARD: What would you like us to do during the continuance?

SUPERINTENDENT OF STREETS WILLIAM DWYER: We should set up a site meeting probably again at a minimum.

PETITION (CONTINUED):
CROWN CASTLE - BROADWAY STREET (N042)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Area AF-005 for Node N042 from Broadway from Verizon Manhole 26/113 on Broadway to Pole 227/24 at the corner of Ellery Street in new conduit, approximately 84 feet and installation of equipment on Pole 227/24 known as Node N042.

KOSTA JOVANOVIC: This is the location where we discovered a pole top antenna, so we're moving our prior antenna to the com zone.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Repeat that one more time? I'm sorry. I was looking for this.

KOSTA JOVANOVIC: In between the time that we applied for the pole license and the time of the hearing, a pole top antenna appeared on the pole, it's not ours. So instead of going to a different pole, we're going to the same pole, but lower in the communication zone.

SUPERINTENDENT OF STREETS WILLIAM DWYER: This goes along with that?

KOSTA JOVANOVIC: Yes.

JOE LUCCHESE: There's no change in the dig, just the antenna location?

KOSTA JOVANOVIC: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That was going from a pole top to a com zone?

KOSTA JOVANOVIC: Correct.

EXECUTIVE DIRECTOR ELIZABETH LINT: New term, "com zone."

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Communication zone. If that antenna does shrink or disappear or doesn't interfere with the pole top, which we may be able to determine, can we make it a pole top?

RICHARD SHEPARD: Yes. We would prefer a pole top.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

I'm good.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

PETITION (CONTINUED):
CROWN CASTLE - Prescott Street (N043)

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Area AF-005 Node N042 on Prescott Street from existing Crown Castle manhole at the intersection of Remington and Harvard Streets, northerly 10 feet to a new Crown Castle 3 x 3 vault, and then

westerly and new conduit to a new Crown Castle 3 x 3 vault, approximately 336 feet, then northerly in new conduit to Pole 4 on Prescott Street, approximately 134 feet, and installation of equipment on Pole 4 known as Node N043.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Boy, oh boy.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That's the same intersection.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yeah, I know it. And the pavement -- paver made its upgrade, I think, not last week, but the week before.

I think we need to continue this. I move to continue this one for a little bit more research and discovery on the DPW's end.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Seconded.

CHAIR ANDREA JACKSON: All those in favor

signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Area AF --

SUPERINTENDENT OF STREETS WILLIAM DWYER: I need to sit with a few other people with DPW to sit down and take -- maybe take a more intense look at it and see where you are.

RICHARD SHEPARD: Yeah. And on our end we'll take a look at alternative solutions to that, but...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't know if you could include the previous petitions. They're looking to go in the same area. I mean, you know, trench-wise, they're digging to Remington, in and out of the same

trench might be advantageous to them.

RICHARD SHEPARD: Who was that?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Lightower.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Lightower. They want to go to Mass Ave, I think, but still...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: That same petition was on the Remington Street side, too. They're coming on both sides.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Remington wasn't the issue so much as Mass Ave on their end. That would be a possibility if we could -- if we get to that point to coordinate the dig so one contractor is doing the work.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Might be able to jump in and out of the same trench -- I think they're going around that same corner to the first pole and then go overhead

down Remington and going back underground on Mass, so...

PETITION (CONTINUED):
CROWN CASTLE - PLEASANT STREET (N048)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The next petition is AF-004, which is Node N048, Pleasant Street, extension of aerial fiber beginning at Pole 550/30 on Pleasant Street northerly to Pole 25, then continuing northerly on Pleasant Street in new conduit to an untagged pole at the north corner of Pleasant Street and River Street, 365 feet, then continuing as aerial fiber northerly along Pleasant Street to Pole 1 and attachment of new equipment on Pole 1 known as (Node N048).

KOSTA JOVANOVIC: This is the plan that avoids the Western Avenue crossing.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yes, I believe the original was to come up on the

pole that was not tagged.

RICHARD SHEPARD: Yeah.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: And then we requested it to be moved down one. It looked like you stayed underground.

RICHARD SHEPARD: Just one more section exactly rather than come up.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yeah. And that was in regards to opposition to a resident here because those buildings are coming down. So it's gone -- rather than coming up on that back pole, it's remaining underground all the way to where the original request was.

CHAIR ANDREA JACKSON: It's going to remain underground?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yeah, it will extend underground to Pole 1.

I make a motion to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: With all typical conditions.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Second.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: I'm going to abstain. I abstained on the original as well.

PETITION (CONTINUED):
CROWN CASTLE - HIGHLAND AVENUE (N041)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Area AF/005 Node N041 Highland Avenue, an extension of new conduit from Verizon Manhole 26/110 on Broadway, northerly approximately 10

feet to a new 3 x 3 Crown Castle vault at the intersection of Crawford Street and Broadway, then continuing along Highland Street to Pole 3, plus or minus 294 feet, then continuing as aerial fiber northerly along Highland Avenue to Pole 9 and attachment of new equipment on Pole 9 known as Node N041.

I would mention on this one, we have had a fair amount of complaints of the work going on Highland Avenue, and if approved, may be a flyer could be sent to the houses a couple days before, or the day before so that the residents the days you're going to be out there will have some notice.

RICHARD SHEPARD: Sure.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This one in particular.

SUPERINTENDENT OF STREETS WILLIAM DWYER: You don't -- do you have folks working out there

now on overhead?

RICHARD SHEPARD: No.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That was Eversource.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The recent complaint was with Eversource with some pole work on that street, yeah. It was actually transfers of double poles due to a service upgrade.

JOE LUCCHESE: What types of complaints?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: No notice, taking parking out, arriving on street cleaning day so they were unable to clean the street. There were a number of issues and the complaint came forward.

SUPERINTENDENT OF STREETS WILLIAM DWYER: There was a disturbance, too. They lingered after the job and they were making an awful lot of noise disturbing the neighborhood.

JOE LUCCHESE: With trucks?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Not with trucks. Hanging around. The conversations were not too pleasant from what I understand. It doesn't help things along. Move them in and move them out. Notify them as in most of the areas you're going to be working in, it goes a long way.

CHAIR ANDREA JACKSON: Is there a motion made on this one?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Move to approve.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Approve typical conditions.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Typical conditions.

CHAIR ANDREA JACKSON: And notice provided to residents.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Correct.

CHAIR ANDREA JACKSON: Motion's been made and seconded.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

CHAIR ANDREA JACKSON: So we start this next section we probably should note we have received two letters of opposition, and I believe it goes to at least one -- we can wait until we get to that specific one. I didn't want it to fall in between. One was an email sent in from a resident of Market Street in opposition asking why it can't be underground. They wanted to know if it can be underground. This pertains to Area 4. "The damage these wires cause to Cambridge trees is severe and this would aggravate it. We

urge the Commission not to allow installation of additional equipment over streets and residential neighborhoods like ours that are already burdened by ugly utility poles and area cables.

Second, we have double poles at the northeast corner of Market and Columbia that are unsightly and appear dangerous. It is our understanding that these orphaned poles are to be replaced. Please let us know if this is incorrect."

Another letter that was received again from someone from Area 4 concerned about the prospect of adding to the already unsightly area of cables in their neighborhood. They attached a photograph showing a view outside of their window. This is someone who lives on Columbia Street. And I agree this is rather unsightly. And, again, the question of whether or not the cables can be put underground.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That wasn't sent to us via email, was it?

EXECUTIVE DIRECTOR ELIZABETH LINT: That came in the mail.

CHAIR ANDREA JACKSON: This one came in the mail.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Is it possible to have Dana scan it and send it and forward it to us?

CHAIR ANDREA JACKSON: Absolutely.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe these would be reviewed and continued for licensing from the original petitions? Do we take one at a time? Are they all new petitions?

SUPERINTENDENT OF STREETS WILLIAM DWYER: They're all new petitions.

CHAIR ANDREA JACKSON: Same end result, though.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

They will be.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Didn't we do this a few months ago and we continued it?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yep, for review and for licensing.

CHAIR ANDREA JACKSON: You can do it as a blanket petition instead of listing each and every single one out.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Are we best off to continue these and meet with Crown Castle?

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

SUPERINTENDENT OF STREETS WILLIAM DWYER: Two pages left or one?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is just the one. There's six petitions. Six different areas. First time around the first petition I believe it's for approval to approach

the utilities for locations.

SUPERINTENDENT OF STREETS WILLIAM DWYER: That's what I thought.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Okay. Move to continue the packet known as AF 011 for Node N010, N017, N018, N056 and N058 and lastly N066.

CHAIR ANDREA JACKSON: Second. All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

Any more after this?

KOSTA JOVANOVIC: One petition that will contain two items.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Is that the scope of this project, if you will?

KOSTA JOVANOVIC: Yes. That will close

out the nodes in this project.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Anything further in other parts of the city in the next 12 months?

KOSTA JOVANOVIC: I don't think -- this should finish out 2015. In 2016, there will be some more.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Thank you.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Thank you.

Okay. Verizon.

EVERETTE BRYAN: Good morning.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Good morning.

EVERETTE BRYAN: For the record, my name is Everett Bryan, and I'm a right-of-way engineer representing Verizon New England, Wildwood Drive in Woburn. We have two petitions.

PETITION (CONTINUED):
VERIZON - CAMBRIDGEPARK DRIVE

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So the first petition we have which was continued from last month is Cambridge Park Drive, place approximately 12 feet of underground conduit, two, 4-inch PVC from existing Verizon Manhole 26/597 to 165 Cambridgepark Drive for service to a new building.

EVERETTE BRYAN: That one was done and manhole breakout. The question was who did the breakout on the manhole. Verizon always does their own breakout, but they built the conduit up to the manhole is my understanding.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I think we needed to verify that one was for the city --

EVERETTE BRYAN: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

-- within that breakout?

EVERETTE BRYAN: The engineer had no problem with that.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is the notification and --

EXECUTIVE DIRECTOR ELIZABETH LINT: The notes say that you needed to determine if there were permits pulled for the work.

CHAIR ANDREA JACKSON: Right.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Are you aware of any permits pulled at the time?

EVERETTE BRYAN: My understanding is that Jaya worked with the contractor to -- for that and secured whatever permits were required at that time.

There was a rush issue with it.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I understand that. Let's continue it one more month.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Motion to continue pending --

SUPERINTENDENT OF STREETS WILLIAM DWYER: We'll have the information.

CHAIR ANDREA JACKSON: To determine if the permit --

SUPERINTENDENT OF STREETS WILLIAM DWYER: To determine it before then.

CHAIR ANDREA JACKSON: Okay. Motion's been made and second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
VERIZON - WATER STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So the second petition is for Water Street to

install approximately 21 linear feet of underground conduit, 4-inch PVC from existing Verizon Manhole 197-A located on easterly side for service at private property at 21 Water Street. (Petition No. P2015-1A1B4EN.)

EVERETTE BRYAN: All the permits for that were granted last week. I think they're done because they're coordinating for the paving of the street and then with partners they were working with, too, and I think that's all been done as of last week. I believe this is a late petition from last month.

EXECUTIVE DIRECTOR ELIZABETH LINT: That's right. You approved it. And it was put on for notice purposes.

CHAIR ANDREA JACKSON: All notices have been made?

EVERETTE BRYAN: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

That was done through the application process?

EXECUTIVE DIRECTOR ELIZABETH LINT:

Should have been.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Move to approve?

EXECUTIVE DIRECTOR ELIZABETH LINT:

Reapprove.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Reapprove.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS:

Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER:

Aye.

CHAIR ANDREA JACKSON: I'll abstain on that since I abstained on the original one.

NEW PETITION:
VERIZON - EVERETT STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: The next petition is Everett Street. Place approximately 39 feet of two, 4-inch PVC conduits from existing Verizon Manhole 26/333 on westerly side of private property at 11/15 Everett Street for service. Full panels of sidewalk disturbed during excavation will be repaired as necessary. This is petition No. P2015-1A0X6SG.

This is going to a pole in the rear?

EVERETTE BRYAN: That's correct. Yes.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Do you have an extra copy? I seemed to have misplaced mine.

EVERETTE BRYAN: (Forwarding.)

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This is for service to 15 or just a backyard feed?

EVERETTE BRYAN: It goes to that backyard pole and we have an easement for that. There's so much paper, I don't know if I included a copy of the existing easement that we secured that property, in your packet.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I don't believe --

EVERETTE BRYAN: I have the three copies you need for your files.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Do we need it where it's private property, an easement, we wouldn't require it, not on private property?

EXECUTIVE DIRECTOR ELIZABETH LINT: Not on private property.

SUPERINTENDENT OF STREETS WILLIAM DWYER: You're coming from a pole to put the conduit -- to put the connection -- the feed underground?

EVERETTE BRYAN: Yes. It's all going

underground across the street from the manhole within the public way, and that portion of the private way goes to a back to Pole 39 --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Is this to replace an existing conduit that's in the ground?

EVERETTE BRYAN: I suppose so, but -- well, I don't think --

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe that's been recently paved up to that pole.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Pretty close.

EVERETTE BRYAN: I can't say for certain it has already been done. The private portion of it may have been. It's only calling for one duct going back to the pole, two ducts in the street.

SUPERINTENDENT OF STREETS WILLIAM DWYER: When they go on private property, do they need

special services, a permit for that?

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I'm not aware of it. I don't believe so.

There's two, four-inch conduits, one is being stubbed. What's the second one for, leaving the manhole being stubbed for?

EVERETTE BRYAN: A spare.

SUPERINTENDENT OF STREETS WILLIAM DWYER: You have to dig a trench; this would have required a trench to be excavated, correct?

EVERETTE BRYAN: Yes, from the manhole across the street?

SUPERINTENDENT OF STREETS WILLIAM DWYER: I'm talking about on private property.

EVERETTE BRYAN: Oh, on private property if --

SUPERINTENDENT OF STREETS WILLIAM DWYER: There's a law that was instituted three or four years ago, Jackie's Law.

EVERETTE BRYAN: Everything's a shallow trench, if that's what you're getting at.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I don't know.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: This section here, has any of this been done yet, the private property section?

SUPERINTENDENT OF STREETS WILLIAM DWYER: He just mentioned he thought it had.

EVERETTE BRYAN: I believe it has been done, yes. I can't say definitely. I think that petition -- that easement was granted last year. And actually, I think they petitioned for it before, but you need to repetition again for it because it expired before they got the public way portion done, so we repetitioned for this across the street for the conduit, and the conduit, I believe, is on private property was already placed. There was conduit there, but they

couldn't get through it because they had to get to that backyard pole previously. But it's an old conduit run.

He was showing blacktop in there now, so they must have put this in there before.

SUPERINTENDENT OF STREETS WILLIAM DWYER: I move to continue this to next month for further research.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: So we can be more definitive of what actually has been completed to date?

SUPERINTENDENT OF STREETS WILLIAM DWYER: Yes.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Motion to continue.

CHAIR ANDREA JACKSON: Second. All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

NEW PETITION:
VERIZON - WILLOW STREET

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Last petition is for Verizon as well, for Willow Street. Place approximately 227 linear feet, two 4-inch PVC conduits in existing Verizon Manhole 26/175 located at the intersection with Cambridge Street to existing jointly owned Pole 743/19 located on the easterly side. Petition No. P2015-1A0H9LQ.

EVERETTE BRYAN: This petition we already had existing conduit there. It's not usable pulling the cable in, so they want to reinforce that run up to Pole 743/19 with two new ducts.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I believe, not quite a year ago, there was a petition to install a conduit to the first pole

which has been installed. So there's a new conduit currently from that same manhole to that -- to the first pole. I believe 15 or 17, brand-new.

EVERETTE BRYAN: It doesn't show but one pole on the petition plan. I don't know if that's the first pole or...

CITY ELECTRICIAN STEPHEN LENKAUSKAS: It may be the sending -- either the first or second pole. There's a -- Verizon petitioned within the last year and has installed a new 4-inch conduit already down Willow Street from that manhole.

EVERETTE BRYAN: The distance tells me that was probably to the first pole. I think there may be another pole between Cambridge Street and that Pole 743/19.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: There's ample room and a new 4-inch conduit to meet your needs.

EVERETTE BRYAN: It's calling for two 4-inch conduits.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Yeah, but for your current needs that you're looking for now in the two 4-inch, does the one 4-inch that was recently installed meet your needs?

EVERETTE BRYAN: He was calling for two more, so I would presume not.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: What is being installed in the two, 4-inch?

EVERETTE BRYAN: It would be copper cables, I'm quite sure, but he doesn't tell me.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: I make a motion to continue pending clarification of what the last installation of the 4-inch and if it's adequate for your needs on that street.

EVERETTE BRYAN: Okay.

CHAIR ANDREA JACKSON: Motion's been

made. Second.

All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

EVERETTE BRYAN: Thank you.

CHAIR ANDREA JACKSON: I make a motion adjourn.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Seconded.

CHAIR ANDREA JACKSON: All those in favor signify by saying aye.

CITY ELECTRICIAN STEPHEN LENKAUSKAS: Aye.

SUPERINTENDENT OF STREETS WILLIAM DWYER: Aye.

(Hearing adjourned.)

CERTIFICATION

Commonwealth of Massachusetts

Norfolk, ss.

I, Jill Kourafas, a Notary Public in and for the Commonwealth of Massachusetts, do hereby certify:

That the hearing herein before set forth is a true and accurate record of the proceedings.

IN WITNESS WHEREOF, I have hereunto set my hand this 30th day of May, 2015.
