March 16th

April - August
(1st Thursdays)

June 10th

September 13th*

*Rain date: September 14th

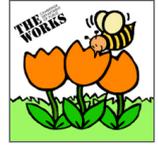

(See reverse side for more details)

Alewife Sewer Separation Project 2017 Community Events

To help keep you informed of project updates and to say thank you for your continued patience during construction, we hope you can attend the events below:

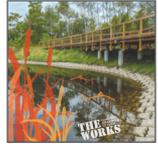

Spring Construction Kick-off! We invite you to join us at the Tobin School (197 Vassal Lane) on **Thursday, March 16th, from 6pm-8pm** to learn more about spring construction schedules and future activities. Project staff will be on hand to answer any questions or concerns at an Open House (6pm-8pm in the Cafeteria). At 6:30pm there will be a presentation with an overview of the project, remaining work, and project costs. Food will be provided at the Open House. See you there!

Come to Coffee Talk! We understand living through construction is difficult, and you may have questions or comments for us. We want to hear from you! Please drop in to join our project team members for Coffee Talk at Sarah's Market (200 Concord Ave) from **7am-11am on the following Thursdays:**

- April 6 • May 4 • June 1 • July 6 • August 3

Alewife Stormwater Wetland Tour! Ever wonder where your stormwater drains to? Visit the award-winning stormwater wetland and recreation trails near Alewife Station. Please join the wetland team members for a guided walking tour on **Saturday, June 10th at 10am** (meet near entrance at 200 Cambridge Park Drive).

End of Construction Celebration! Please join us on Fern Street's newly completed public art project on **Wednesday, September 13th from 5pm-7pm** to celebrate the substantial completion of construction. Project staff will be on hand to answer any remaining questions. Talk with your neighbors and enjoy food from local vendors.

**Rain date: September 14th*

During construction, many of your streets will likely be impacted simultaneously, which can make navigating the city extremely frustrating. Check out the free WAZE app to help navigate around construction. WAZE is a mobile app and a website (waze.com) that gathers real traffic data from users and government partners to identify the best traffic routing for a specific trip.
