

# Bioretention Area Routine Maintenance

*Note: Configuration of each Stormwater Control Measure (SCM) may vary. This graphic shows a common bioretention area configuration and the common components requiring routine maintenance. Timeframes for each maintenance activity may vary, and some maintenance types may only be required as needed.*

## Maintenance Key

Remove sediment using clamshell or vacuum

Remove sediment using hand tools

Remove pipe blockages using pipe jetter

Remove trash/debris

Repair erosion

Restore Vegetation

Mow grass

Remove woody vegetation/invasive plants
