- 

### **For Reference:**

#### ***What is the role of the Climate Committee?***

*The Climate Committee has three roles that help the City reduce climate change impacts, reduce greenhouse gas emissions, increase equity, and serve as a partner to and example for other communities:*

- 1. Provide feedback and ideas to the City on ways to reduce and live with climate change while prioritizing the needs of the most at-risk populations.*
- 2. Share information about City climate programs with community members, listen to community concerns, and raise feedback with City staff so programs effectively serve all community members.*
- 3. Stay informed about the City's climate goals and provide accountability and feedback on barriers and opportunities to improve effectiveness.*
