Plan for how to communicate EAP discussions: at the end of meeting, agree on recommendations based on discussion conclusions, and communicate these recommendations to all by e-mail following meeting?

- 1) What are expected increases based on opening of schools, k-12 and colleges?
- 2) Youth athletic league. Somerville is reported to have city-mandated training for coaches that requires distancing or masking – can this approach increase safety adherence?
- 3) Who is in charge of safety protocols for out-of-school supervisors of remote learning? Last week we concluded to recommend that CPSD safety guidelines be applied for these workers and students.
- 4) BioBot proposal for Cambridge and implementation in Somerville.
- 5) Update on fall community testing (Assembly Row?) and flu clinic plan. (Nancy/Claude)
