BOARD OF ZONING APPEAL FOR THE CITY OF CAMBRIDGE

GENERAL HEARING

THURSDAY DECEMBER 12, 2024 6:30 p.m.

Remote Meeting via

831 Massachusetts Avenue Cambridge, Massachusetts 02139

> Jim Monteverde, Chair Steven Ng, Vice Chair Virginia Keesler Daniel Fernando Hidalgo Thomas Miller

> > City Employees Stephen Natola

Precision, Speed, Reliability 617.547.5690 transcripts@ctran.com

INDEX CASE PAGE CONTINUED CASE BZA-180779 -- 41 HAMPSHIRE STREET 2ND SIX MONTH EXTENSION REQUEST - VARIANCE ONLY 5 Original Hearing Date: 05/05/23 Decision filed on 07/14/231st Extension Expires 1/14/25 REGULAR AGENDA 7 BZA-1139935 -- 43 CAMERON AVENUE BZA-1140111 -- 203-5 PEMBERTON STREET 16 BZA-1141278 -- 23 ELLSWORTH AVENUE - UNIT 1 23 BZA-1142420 -- 18 CLINTON STREET 33 BZA-1140668 -- 41 CONCORD AVENUE 84 BZA-1140091 -- 325 BINNEY STREET 95 BZA-1143100 -- 14 GREENOUGH AVENUE 113

1 PROCEEDINGS 2 3 (6:30 p.m.) Sitting Members: Jim Monteverde, Steven Ng, Virginia 4 5 Keesler, Daniel Hidalgo, and Thomas Miller 6 7 JIM MONTEVERDE: Welcome to the December 12, 2024 8 meeting of the Cambridge Board of Zoning Appeal. My name is Jim Monteverde, and I am the Chair. 9 10 Pursuant to Chapter 2 of the Acts of 2023 adopted 11 by the Massachusetts Court, and approved by the Governor, 12 the City is authorized to use remote participation at 13 meetings of the Cambridge Board of Zoning Appeal. This meeting is being video and audio recorded and 14 15 is broadcast on cable television Channel 22 within 16 Cambridge. 17 There will also be a transcript of the 18 proceedings. 19 All Board Members, applicants, and members of the public will state their name before speaking. All votes 20 21 will be taken by roll call. 22 Members of the public will be kept on mute until

```
1
     it is time for public comment. I will give instructions for
    public comment at that time, and you can also find
2
     instructions on the City's webpage for remote BZA meetings.
 3
               Generally, you will have up to three minutes to
 4
 5
     speak.
 6
               I'll start by asking Staff to take Board Members
7
    attendance and verify that all members are audible.
8
               STEPHEN NATOLA: Virginia Keesler?
               VIRGINIA KEESLER: Present.
9
10
               STEPHEN NATOLA: Steven Ng?
11
               STEVEN NG: Present.
12
               STEPHEN NATOLA: Daniel Fernando Hidalgo?
13
               DANIEL HIDALGO: Present.
               STEPHEN NATOLA: Jim Monteverde?
14
15
               JIM MONTEVERDE: Present.
16
               STEPHEN NATOLA: Thomas Miller?
17
               THOMAS MILLER: Present.
18
               JIM MONTEVERDE: Thank you.
19
20
21
22
```

1 2 (6:32 p.m.)3 Sitting Members: Jim Monteverde, Steven Ng, Virginia 4 Keesler, Daniel Hidalgo, and Thomas 5 Miller 6 JIM MONTEVERDE: First case tonight is a continued 7 This is BZA Case 180779 -- 41 Hampshire Street. 8 this one requested a Six Month Extension of the variance. 9 However, a statute was passed by the Legislature that 10 affects this. 11 And in effect what it does: it allows permits to 12 be -- to remain for two years, not the previous one. really don't need to extend anything unless the client 13 specifically requests it. 14 15 So I have little speech to make here. 16 "We are aware of the Permit Extension Act of 17 Chapter 238 of the Acts of 2024. It is up to you, the 18 proponent, whether you want to select to" -- I'm sorry, I can't read my own writing -- "select an extension from the 19 20 BZA or rely on the two-year extension allowed by Chapter 238 of the Acts of 2024." 21 22 And I believe we have correspondence for their --

```
Are they accepting the two-year extension, or do
 1
     we need to vote for the extension?
 2
 3
               STEPHEN NATOLA: I think it's just happens.
 4
               JIM MONTEVERDE: We don't need to vote? It's all
 5
     done?
 6
               STEPHEN NATOLA: Yeah, I think it just happens.
 7
               JIM MONTEVERDE: No vote? All done. Wasn't that
     easy? Have to thank the Legislature for that one.
 8
 9
               All right. Then we sign this, and we'll move on.
10
     There we go.
11
12
13
14
15
16
17
18
19
20
21
22
```

```
1
 2
     (6:33 p.m.)
 3
     Sitting Members: Jim Monteverde, Steven Ng, Virginia
 4
                       Keesler, Daniel Hidalgo, and Thomas
 5
                       Miller
 6
               JIM MONTEVERDE: And our first regular case is BZA-
 7
     1139935 -- 43 Cameron Avenue. Is there anyone joining us
 8
     tonight who wants to wish to -- speak about this one?
 9
               STEPHEN NATOLA: You can unmute. Yeah, we're
10
     unmuted now.
11
               JIM MONTEVERDE: All right. Can you introduce
12
     yourself and --
13
               JASON KRUPP: Sure. Hi. My name is Jason Krupp.
14
     This is my wife.
15
               HANNAH QUAN: My name is Hannah.
16
               JASON KNUPP: Hannah Quan or Hao Quan. And we
17
     recently purchased this home in Cambridge that requires
     extension -- extensive renovation. We're planning on moving
18
19
     with our two children to this new location.
20
               HANNAH QUAN: And this is our architect who is
21
     going to present for us today.
22
               DAVID HARMON: Hi. My name is -- I just have a
```

```
1
     short, two-minute presentation. It's just my name is David
2
    Harmon.
              T --
 3
              HANNAH QUAN: Are we starting?
               DAVID HARMON: Should I just present, or --
 4
 5
               HANNAH QUAN: Oh, yeah. Do we just do
 6
     introduction, or should we just present now?
7
               JIM MONTEVERDE: Yeah. After you've introduced
     any speakers, then you can go ahead and present to us just
8
9
    why you're here tonight and what relief you are seeking.
10
               DAVID HARMON: Yep.
11
               HANNAH QUAN: Okay. Thank you.
12
               DAVID HARMON: Yep. I'm the architect on this
    project. I helped Hannah and Jason redesign the house. I'm
13
14
     a licensed architect of 20 years, with a focus on
15
     residential work, and the goal is to accommodate their
    multigenerational family. They have a typically complicated
16
17
    modern family and they're trying to change this 19th century
18
    house to accommodate it.
19
               You know, there were many problems doing this.
     It's renovating an old house, and as you probably know, it's
20
21
    difficult to say the least. All [unclear] are deficient,
22
    and often illegal for today's standards.
```

So, you know, our main effort was to be as conservative as possible, protect the original building, and make it work. And to make it work required some additional square footage.

We're asking for a small addition at the rear yard and increase of about 76 square feet in footprint on two floors, and to accommodate new baths and a more open kitchen living experience. And this new addition on the back is unseen from the street.

And then the second thing we're asking for is a new dormer, and this dormer is -- will allow the third floor to be -- to work.

Currently, there's a lot of -- there's a staircase there and it's just inefficient; it doesn't even work, and to make this -- to have access to the third floor, you need to actually create a dormer. Otherwise, the stair goes into the middle of the floor plan, and it just doesn't work in the space.

So dormers are seen around Cambridge, and it's a typical kind of addition request that is expected to make a third floor that's using an attic space function adequately.

So we wouldn't be here if we didn't think this

1 additional square footage was essential for functional 2 reasons. We're certainly grateful for the opportunity to 3 have our request heard at this permitting process, and we welcome any further questions as to how we came to our 4 conclusions. 5 6 Thanks for everything. 7 JIM MONTEVERDE: I'm just asking Staff to bring up 8 a survey. So -- and there we have it. So I think in terms of the relief you're seeking, 9 10 under the Table of Dimensional Requirements, you are 11 increasing the gross floor area beyond the Ordinance, you're increase the gross floor area ratio beyond the Ordinance, 12 and then I believe -- oops, where did the survey go? 13 14 15 STEPHEN NATOLA: Not the survey --16 JIM MONTEVERDE: No, the survey please. Just so 17 we understand. You need to relief from the rear yard setback? 18 19 STEPHEN NATOLA: Right. 20 JIM MONTEVERDE: And also the -- do you need any 21 side yard setback relief for the addition? 22 HANNAH QUAN: We don't have a side addition.

JASON KNUPP: No. The new addition is up -- is within the confines of the building footprints. We're not extending --

JIM MONTEVERDE: Okay. So it's not -- it's not within the side yard setback? So it's only the rear setback, that you would be --

JASON KNUPP: Right.

JIM MONTEVERDE: Okay. Very good. Thank you for your presentation. Any questions among Members of the Board? If not, I will open it up to public commentary.

We have no correspondence in the file, either for or against. So I'll open it up to anyone calling in.

Any members of the public who wish to speak should now click the icon at the bottom of your Zoom screen that says, "Raise hand." If you're calling in by phone, you can raise your hand by pressing *9 and unmute or mute by pressing *6.

I'll now ask Staff to unmute speakers one at a time. You should begin by saying your name and address, and Staff will confirm that we can hear you. After that you will have up to three minutes to speak before I ask you to wrap up.

```
1
               JIM MONTEVERDE: All right. No one seems to be
2
     calling in, so I will close public testimony.
 3
              Any discussion among Members of the Board?
    not, let me ask my fellow Board Members a question, and that
 4
    has to do with the size of the deck. Does anyone have any
 5
 6
     concerns, or is everything okay the way it is?
               Can you go to the upper floor plan? Basically,
7
8
     the width of the deck goes across the entire length of the
9
     -- nope, keep going. Nope. Yep. Keep going. Keep going.
10
     There you go.
11
               Any discussion among Members of the Board about
     the dimensions of the deck, or are we okay? Anyone?
12
    Hearing no comment, I'm assuming everything's fine.
13
               STEVEN NG: No, Jim, Steven Ng here. Could we see
14
15
    that elevation?
16
               JIM MONTEVERDE: Yep. Give us a second. Here.
17
    Keep going. Next one, I think. Now, hold on.
18
               STEVEN NG: No, I think it's previous.
19
               JIM MONTEVERDE: I think you passed it.
               STEVEN NG: Yeah.
20
21
               JIM MONTEVERDE: There we go.
22
               STEVEN NG: Okay. Yeah, the plan looks a little
```

1 -- you know, without the gable there. So no issues from me.

JIM MONTEVERDE: Okay. All right. Anybody else have any comment, discussion? Members of the Board? If not, I will move to a motion. And this is a special permit.

So the Chair makes a motion to grant relief from the requirements of the Ordinance under Sections 5.31, and that it specifically for floor area, the gross floor area ratio and the rear setback, and Section 8.22.2.d for a Nonconforming Structure, and 10.40 for a Special Permit.

And let me run through those criteria. That is:

- a) It appears the requirements of this Ordinance cannot or will not be met. That is correct.
- b) Traffic generated or patterns of access or egress would cause congestion, hazard, or substantial change. It will not.
- c) The continued operation of or the development of the adjacent uses as permitted in the Ordinance would be adversely affected. They will not.
- d) Nuisance or hazard would be created to the detriment of the health, safety, or welfare of the occupant of the proposed use. It will not.
 - e) And for other reasons, the proposed use would

```
1
     impair the integrity of the district or adjoining district.
    And it will not.
2
               So we find that it meets all the criteria of
 4
     Section 10.43, the criteria for a Special Permit.
 5
               On the condition that the work proposed conform to
 6
     the drawings entitled "43 Cameron Avenue," prepared by
7
    David Harmon Architecture and dated 10/07/2024; initialed
8
     and dated by the Chair.
9
               And further, that we incorporate the supporting
10
     statements and Dimensional Form submitted as part of the
11
     application.
12
               On a voice vote, please, from the Board Members?
13
               Steven?
               STEVEN NG: In favor.
14
15
               JIM MONTEVERDE: Thank you. Virginia?
               VIRGINIA KEESLER: In favor.
16
17
               JIM MONTEVERDE: Thank you. Daniel?
18
               DANIEL HIDALGO: In favor.
19
               JIM MONTEVERDE: Thank you.
20
               THOMAS MILLER: In favor.
21
               JIM MONTEVERDE: And Jim Monteverde in favor.
22
               [All vote YES]
```

JIM MONTEVERDE: That's five in favor. Relief is granted. HANNAH QUAN: Thank you. JASON KNUPP: Thank you very much. JIM MONTEVERDE: You're welcome.

1 2 (6:45 p.m.)3 Sitting Members: Jim Monteverde, Steven Ng, Virginia 4 Keesler, Daniel Hidalgo, and Thomas 5 Miller 6 JIM MONTEVERDE: Okay, 6:45. Next case is BZA-7 1140111 -- 203-5 Pemberton Street. 8 Anyone calling in who wishes to talk to us about Pemberton Street? 9 10 STEWART ROBERTS: Yes, I would. This is Stewart 11 Roberts, the architect for the project. I'd like to just 12 quickly present what we'd like to do. Can you hear me? 13 JIM MONTEVERDE: We can. Thank you. Go right ahead. 14 15 STEWART ROBERTS: Okay, good. So Megan and Nate 16 have a brand-new daughter, who's about a couple of months 17 old. And they'd like to make some renovations to their unit 18 so that it works better for them. 19 There essentially are three things that they want There are some renovations to the second floor, 20 to do. 21 primarily so that they can improve the bathroom. 22 They'd like to add a sliding-glass door to the

living room to improve the light, and then they live right next to the railroad. So they're interested in doing soundproofing.

So basically, the issue on the second floor where most of the work is taking place is their existing bathroom is only about 3.5' wide. And so what we'd like to do is move one of the walls over so that they can have a goodsized bathroom.

And that means taking a couple of existing windows and moving them over. When we move them over, coincidentally, they would center on the gable, which happens to match what they did on the unit that's next door, that I'm not quite sure why this was built that way, but just by moving those windows over, that gives us room to do the bathroom for them.

Then on -- this is the -- would be on the south side. This is the back yard, which fronts onto the railroad.

We also would like to change out a door that's to the first floor, so that that would be a sliding-glass door.

And that's really -- that will give them a better connection to their back yard and bring a little bit more natural light

1 into the plan.

JIM MONTEVERDE: Okay. Thank you.

STEWART ROBERTS: Then on the west side, there are three windows. Currently one window is low and the other two are -- have a little bit higher sill.

And as part of the renovations, we need to put a wall in between two of the windows, so we'd like to just take the two windows that have a higher sill and bring them down so that they match the sill of the lower window.

And that is because it's just going to look funny inside if we have a wall that comes in between this sort of palladium window kind of setup. So it's just to make it so that it works a little bit better on the interior.

And I would mention because they're next to the railroad here, one of the big concerns is soundproofing.

You know, they have a train that goes by every 15 minutes, so we're planning on putting in triple-glazed windows that have the highest sound reduction coefficient that we can find and doing some soundproofing to the walls as well.

So there's now -- so it's just -- it's just moving windows, changing windowsill height, putting in a sliding-glass door. There's no changes to the footprint or anything

1 else.

JIM MONTEVERDE: Okay. Thank you. Yes, that was the summary I was headed for. This is all about openings on the perimeter that sit in the rear and left side setbacks.

STEWART ROBERTS: Yep.

JIM MONTEVERDE: That's why you're before us tonight. Okay. Thank you for your presentation.

Any questions from Members of the Board?

If not, public comment. We have one letter in the file from James and Susan Zall, 203 Pemberton Street, Unit 6, who are writing in support.

We also have a letter from the -- we have the letter from the proponents, which I really don't think counts. That's okay.

And we have a letter from the condo association approving the exterior modifications.

So, and that's all we have in the file. I will open it up to public comment for anyone calling in.

Any members of the public who wish to speak should now click the icon at the bottom of your Zoom screen that says, "Raise hand." If you're calling in by phone, you can raise your hand by pressing *9 and unmute or mute by

pressing *6.

I'll now ask Staff to unmute the speakers one at a time. You should begin by saying your name and address, and Staff will confirm that we can hear you. After that you will have up to three minutes to speak before I ask you to wrap up.

STEPHEN NATOLA: No members of the public are raising their hands.

JIM MONTEVERDE: All right. No one's raised their hand. So I will close public testimony. Any discussion among Members of the Board?

If not, I will move on to a motion. This is also a special permit. The Chair makes a motion to grant relief from the requirements of the Ordinance under Sections 5.31, and that is specifically for the rear- and left side setbacks.

From Section 8.22.2.c for a Nonconforming Structure and 10.40 for a Special Permit. I will read that criteria again.

- a) It appears the requirements of this Ordinance cannot or will not be met. That is correct.
 - b) Traffic generated or patterns of access or

```
1
     egress would cause congestion, hazard, or substantial
2
     change. It will not.
 3
               c) Continued operation of or the development of
 4
     the adjacent uses as permitted would be adversely affected.
 5
     It will not.
               d) Nuisance or hazard would be created to the
 6
7
     detriment of the health, safety, or welfare. It will not.
8
    And
9
                e) For other reasons, the proposed use would
10
     impair the integrity of the district or adjoining district.
11
    And it will not.
               So it meets all the criteria of Section 10.43 for
12
    a Special Permit.
13
               On the condition that the work proposed conform to
14
15
    the drawings entitled "Purmort/Roberts Residence," prepared
16
    by Johnson Roberts Associates Architects" and dated -- looks
17
     like 25 January, 2024.
18
               Is that correct, or is that June?
19
               Mr. Roberts, are you there?
20
               STEWART ROBERTS: Yeah, I honestly don't know what
    the date is.
21
22
               JIM MONTEVERDE: Okay. Stephen, can you just grab
```

```
1
     a sheet? Let's see if we can focus in on the date. My
     smart-aleck assistant thinks he can read it.
2
 3
               STEPHEN NATOLA: June 25, Jim.
 4
               JIM MONTEVERDE: 25 June, 2024. Thank you.
 5
     Initialed and dated by the Chair.
 6
              And further, that we incorporate the supporting
7
     statements and Dimensional Forms submitted as part of the
8
    application.
9
              Board Members, on a voice vote, please? Tom?
10
               THOMAS MILLER: In favor.
11
               JIM MONTEVERDE: Thank you. Daniel?
12
               DANIEL HIDALGO: In favor.
13
              JIM MONTEVERDE: Thank you. Virginia?
              VIRGINIA KEESLER: In favor.
14
15
               JIM MONTEVERDE: Thank you. Steven?
16
               STEVEN NG: In favor.
17
               JIM MONTEVERDE: Thank you. And Jim Monteverde in
     favor.
18
19
               [All vote YES]
20
               JIM MONTEVERDE: Thats five in favor. Relief is
21
    granted.
              Thank you.
22
               STEWART ROBERTS: Great. Thank you.
```

```
1
 2
     (7:00 p.m.)
 3
     Sitting Members: Jim Monteverde, Steven Ng, Virginia
 4
                       Keesler, Daniel Hidalgo, and Thomas
 5
                       Miller
               JIM MONTEVERDE: Next case is BZA-141278 -- 23
 6
 7
     Ellsworth Avenue, Unit 1. Anyone calling?
 8
               SARAH RHATIGAN: Good evening, Mr. Chairman.
 9
               JIM MONTEVERDE: Sarah, is that you?
10
               SARAH RHATIGAN: It is. Sorry, I didn't --
11
               JIM MONTEVERDE: There you go.
12
               SARAH RHATIGAN: -- mean to interrupt you.
13
               JIM MONTEVERDE: No, there you go. Go right
     ahead.
14
15
               SARAH RHATIGAN: Okay, great. For the record,
16
     Sarah Rhatigan, Trilogy Law LLC, at 12 Marshall Street in
17
     Boston. I'm here representing the petitioners, Michael
18
     Green, and Laura Carey, who live at 23 Ellsworth Avenue,
19
     Unit No. 1.
20
               Thank you so much, and we will try to keep in line
21
     with the Board's quick pace here this evening. That is our
22
     goal.
```

If you could advance the slide, I'm not sure if it's Stephen or Olivia working slides today, just to the first image.

This is a -- what I consider a great forward case involving a request to construct or actually to expand -- widen a basement window that is located on the side setback exterior wall on the right side of this home that you're seeing on the screen.

Next slide, please?

JIM MONTEVERDE: Right side setback, if you can go on the --

SARAH RHATIGAN: Right-side setback, yep. And we'll see it right here.

Oops, I'm sorry, if you don't mind stopping on the site plan for a second.

So again, this is a three-unit condominium. And Mike and Laura live in the first floor, and there's some basement living areas where their family room is.

And if you see on the plot plan here, that on the right side of the structure, you'll see there's some existing window sills that are noted in black. That's about 2.9' from the side setback, or actually it's a bit more

there, I'm sorry. It's probably more closer to 4' at the location that is in question, which is the front-most basement window.

Next slide, please?

We're showing all elevations, just to give the Board a chance to see what's happening here. The front window change is allowed as-of-right, as you know, and this also by the way has been reviewed and approved by Mid Cambridge Neighborhood Conservation District.

Next slide, please?

So here is the elevation that requires a special permit under Section 8.22.1.d, I believe. The bottom image is the existing elevation, and you can see the arrows pointing to a basement window that is in that location currently.

And then if you look at the top image, that's the proposed elevation. As you see, the proponent is expanding the width of that to allow for some more light to a family room in the basement.

This is not an egress window; it's not getting any deeper. This is essentially a window for light for the room -- the interior room.

Next slide, please?

Here we are showing you the floor plans. So the change, again, is in the basement. And you can see where the room is indicated as "Family Room." And then on the right side of the structure there is showing you the location where the widened window will be installed.

Next slide, please?

This is just another version of the plan; I think showing room designations. Sorry, we mistakenly gave you an electrical plan, which you don't need to do. Here we go.

This is the image we wanted to show you, just in terms of the location of these windows. They are sort of at the -- just above the eye level of folks inside but, as you can see, we'll make a big difference for the family that's sort of -- you know, children who are getting older and larger and need to some more room to stretch out in their home.

Next slide, please?

JIM MONTEVERDE: And Sarah, from the existing to the proposed plan, it looks like it goes from four bedrooms to five, is that correct?

SARAH RHATIGAN: I believe so, yes.

1 JIM MONTEVERDE: Yep. 2 SARAH RHATIGAN: Exactly. And all those interior 3 renovations are all as-of-right --4 JIM MONTEVERDE: Mm-hm. 5 SARAH RHATIGAN: -- modifications, just some 6 interior reconfiguration of space. 7 JIM MONTEVERDE: Okay. 8 SARAH RHATIGAN: Next slide, please? 9 Sorry they're oriented the wrong way, but if you 10 can clip them; thank you. 11 This is just some images of the -- of the home. So you can see that here's the front existing condition, so 12 that window will be larger. And again, that's without 13 Zoning approval. 14 15 Next slide down? 16 Thank you. From here, you get a great view of the 17 area in question. And so, you can see at the front here there's a solid wood fence that divides 23 Ellsworth and the 18 19 neighbor to the right. 20 So this area is really, you know, kind of 21 protected from view so there won't be are you sort of light 22 spillage or privacy concerns either in either direction.

1 It's really shielded from the neighbor, and mainly from the 2 street as well. Next slide? 3 4 Here's a view from the interior looking out towards the street, just giving you a different view of what 5 the window is like in its location. 6 7 Next slide? 8 I think this is just the Assessor map. And that's 9 it. 10 So for these special permits, I hope you will agree that it's a nice request. It will make a big 11 12 difference for the owner. It is in a setback, so it does 13 require relief under that special permit provision. But this is an instance where we don't think that 14 15 the increased width of that window will have any effect or 16 negative effects in any way for neighbors or for the 17 neighborhood. 18 JIM MONTEVERDE: Okay. 19 SARAH RHATIGAN: Thank you very much. 20 JIM MONTEVERDE: Thank you. Any questions from Members of the Board? 21 22 If not, public commentary we have three letters in

```
1
     the file: Kyle Huffman and Tom Cummins from 25 Ellsworth
2
    Avenue, in full support.
 3
               I'm going to summarize, as usual. Saya Dempsey
 4
     and Danny Erker from 21 Ellsworth, Unit No. 3, also in full
     support; Susan Moody and Andy Stone also of 21 Ellsworth, in
 5
     full support; and no correspondence speaking against.
 6
7
               Do we have anybody calling in?
8
               Oh, sorry. Any member of the public who wishes to
     speak should now click the icon at the bottom of your Zoom
9
10
     screen that says, "Raise hand."
               If you're calling in by phone, you can raise your
11
    hand by pressing *9 and unmute or mute by pressing *6.
12
13
               I'll now ask Staff to unmute speakers one at a
     time. You should begin by saying your name and address, and
14
15
     Staff will confirm that we can hear you. After that you
16
     will have up to three minutes to speak before I ask you to
17
    wrap up.
18
               Anybody out there?
19
               STEPHEN NATOLA: Cynthia Hibbard.
20
               CYNTHIA HIBBARD: Hi. My name is Cynthia Hibbard.
21
     I and my husband George live in Unit No. 2 at 23 Ellsworth,
22
     right upstairs from Mike and Laura.
```

And I just wanted to say Mike and Laura are wonderful neighbors they've involved us in the planning for this project. They've answered our questions, and we are in full support of the project and the relief for the window.

JIM MONTEVERDE: Great. Thank you for calling in.

And that's it for public calling in.

Any discussion among Members of the Board?

If not, I will move on to a motion. This is a special permit.

The Chair makes a motion to grant relief from the requirements of the Ordinance under Sections 5.31; that's specifically the new window opening in the right-side setback; Section 8.22.1.d, a Nonconformance; 8.22.2.c, Alterations to a Nonconforming Structure; and 10.40 for a Special Permit.

And the criteria for the special permit being:

- a) It appears the requirements of this Ordinance cannot or will not be met. That is correct.
- b) Traffic generated or patterns of access or egress would cause congestion, hazard, or substantial change. It will not.
 - c) Continued operation of or the development of

1 the adjacent uses as permitted in the Zoning Ordinance would
2 be adversely affected. It will not.

d) Nuisance or hazard would be created to the detriment of the health, safety, or welfare of the occupant. It will not. And lastly,

e) For other reasons, the proposed use would impair the integrity of the district or adjoining district. And it will not.

So it meets all the criteria of Section 10.43 for a Special Permit.

On the condition that the work proposed conform to the drawings entitled "23 Ellsworth Unit 1 Renovation," prepared by Soza Architecture and dated October 14, 2024.

Oh, I also want to mention that, as Sarah mentioned, we do have a letter in the file from the Mid Cambridge Neighborhood Conservation District in approving the modification, and also a letter from the Condominium Association. So those documents will be initialed and dated by the Chair.

And further, that we incorporate the supporting statements and Dimensional Form submitted as part of the application.

```
1
               Board Members, on a voice vote, please to grant
2
    the relief? Steven?
 3
               STEVEN NG: In favor.
               JIM MONTEVERDE: Thank you. Virginia?
 4
 5
              VIRGINIA KEESLER: In favor.
 6
               JIM MONTEVERDE: Thank you. Daniel?
7
               DANIEL HIDALGO: In favor.
8
               JIM MONTEVERDE: Thank you.
               Thomas?
9
10
               THOMAS MILLER: In favor.
11
               JIM MONTEVERDE: Thank you. And Jim Monteverde in
12
    favor.
13
               [All vote YES]
               JIM MONTEVERDE: That's five in favor; the relief
14
15
    is granted.
16
               SARAH RHATIGAN: Thank you very much.
17
               JIM MONTEVERDE: You're welcome. And Sarah, we'll
18
    talk to you again in four minutes.
19
               SARAH RHATIGAN: Okay. I won't go away.
20
               JIM MONTEVERDE: There you go.
               SARAH RHATIGAN: Thanks.
21
22
```

```
1
2
     (7:15 p.m.)
 3
     Sitting Members: Jim Monteverde, Steven Ng, Virginia
                       Keesler, Daniel Hidalgo, and Thomas
 4
 5
                       Miller
 6
               JIM MONTEVERDE: Okay. Next case is BZA-1142420,
7
     18 Clinton Street.
8
               Sarah, are you presenting this one?
9
               SARAH RHATIGAN: Yes, I am. Thank you.
10
               JIM MONTEVERDE: Can you --
11
               SARAH RHATIGAN: Mr. Chair --
12
               JIM MONTEVERDE: -- before you start, go ahead,
13
    sorry.
               SARAH RHATIGAN: I was just going to identify
14
15
    myself for the record in this --
16
               JIM MONTEVERDE: Yep.
17
               SARAH RHATIGAN: -- portion of the hearing.
18
               JIM MONTEVERDE: Okay.
19
               SARAH RHATIGAN: Sarah Rhatigan, Trilogy Law LLC,
20
    12 Marshall Street in Boston. And I'm here representing the
    petitioner, which is 18 Clinton LP. Asha Daniere is the
21
22
    Principal and is my client, and the person who will be
```

```
1
     residing in this rear unit. And --
2
               JIM MONTEVERDE: Okay.
 3
               SARAH RHATIGAN: -- also with me is SKA.
 4
     for these long introductions, but members of the SKA team
    are here as well. It's a full room in the house. They'll
 5
 6
     introduce themselves when we get there.
7
               JIM MONTEVERDE: Yep.
8
               SARAH RHATIGAN: Thank you, Mr. Chairman.
9
               JIM MONTEVERDE: So we heard this case previously.
10
               SARAH RHATIGAN: Yes. Or you were -- I believe
11
     you were on that Board, and from my notes, I don't believe
12
     that any of your other Board Members were present in January
     2023, when this case was presented.
13
14
               JIM MONTEVERDE: That may be. But we did -- as a
15
    Board we did see this presentation previously.
16
               SARAH RHATIGAN: Yes.
17
               JIM MONTEVERDE: We did grant the relief
18
     requested.
19
               SARAH RHATIGAN: Yes.
20
               JIM MONTEVERDE: You're back, as I read it,
21
    because of a potential groundwater issue, which I'm sure you
22
    will describe in your presentation --
```

1 SARAH RHATIGAN: Correct. 2 JIM MONTEVERDE: -- that involves, I'm assuming, 3 lifting the rear addition up. And at that point, as I -- I4 get confused, because as I read the -- or I think there's some level of confusion, I read the correspondence from 5 6 people who have written in objecting to the change. 7 So one is if you could be as specific as possible 8 to explain the change and physically how it changes the what 9 was proposed previously. 10 And then help at least me understand how much -if this is increasing in height, exactly how much this is 11 12 increasing. Because I -- in the correspondence, I get anywhere from 18" to 4'. So there seems to be some 13 confusion. 14 15 SARAH RHATIGAN: Yes. Yep. Understood. Yep. 16 JIM MONTEVERDE: If you can take it away, please. 17 SARAH RHATIGAN: So I am going to take it away. 18 And I will try to be as efficient as I can with our time, 19 but I do want to make sure I give you --20 JIM MONTEVERDE: That's all right. SARAH RHATIGAN: -- just a brief -- a brief --21 22 JIM MONTEVERDE: We follow.

1 SARAH RHATIGAN: -- a brief history and --JIM MONTEVERDE: Yep. 2 3 SARAH RHATIGAN: -- the other -- the other thing 4 is that I -- I -- I sent a letter sort of responding to what 5 I thought was some of the maybe confusion about what was 6 going on. But I submitted it late yesterday, and I'm not sure if Board Members had a chance to read it. 7 8 JIM MONTEVERDE: It is in the file. 9 SARAH RHATIGAN: It is in the file? I'm --10 JIM MONTEVERDE: Yeah. 11 SARAH RHATIGAN: -- glad to see that. So let me 12 -- let me charge ahead here. So you're absolutely right, the BZA granted relief to allow for Asha -- Asha and her 13 14 team to renovate the home. 15 So in this -- on the screen you see the yellow 16 home. And this is the home that existed there, and it's a 17 long -- we'll look at another picture that gives you a 18 better view of it. 19 It was originally multifamily. She lived in this when she was a very young child and had, like, I think maybe 20 21 six or seven units by the time her mom sadly passed away. 22 And Asha eventually was able to acquire the property from

relatives and start this project.

The rear portion of the unit is -- the rear portion of this home is where Asha is planning to move into with her kids once this whole project is done. It's an extremely expensive undertaking, as folks know.

When they applied for the construction permit that was allowed under the BZA plans, their stormwater engineer was doing test pits in the rear portion of the lot, which was where the rear portion needed a new foundation, because there was going to be a basement put in here.

The rear portion was essentially an old carriage house that was slab on grade, so there was nothing underneath it. When they did the test pit, they were surprised by this water level, you know, bubbling up all over. The structural engineer -- or structural, the civil engineer advised, "It would be crazy to pour your foundation in the water, and that's what your plans are showing. You know, you may want to reconsider that."

So the team started to evaluate, you know, can we do this? Back and forth conversations with Inspectional Services, and there was essentially a miscommunication, misunderstanding.

They had been advised that there was a new flood resilience provision that was -- that had recently been passed and not yet implemented, which allows for an owner that has a flood risk, you know, under the new flood viewers, to raise up a home that the height increase that's required in order to bring the first level of the home up to get out of a flood risk area, that that could be done as-of-right.

And the misunderstanding was that the team was told verbally that they could raise up the level of the foundation at the rear of the structure as-of-right as a change in the field without requiring any Zoning approval.

That's how we got here today and in the circumstance that we are. Once it became -- once the foundation was poured -- again, this is on the mistaken understanding -- and then I think once the conditions on site were seen by the neighbors who were like, "Wait a minute, this isn't what we thought it was going to be."

Then the area inspector started, you know -conversations began at that point, and then the contractor
was told to stop work at the rear until we could come back
to the Zoning Board to get permission to do what we're going

```
1
     to do, or what we would like to do.
 2
               So -- I'm sorry, if you could advance a slide, I
 3
     said I was going to be brief and I'm not, I'm -- I'm --
 4
               JIM MONTEVERDE: No, that's --
 5
               SARAH RHATIGAN: -- trying to be brief, okay. So
 6
 7
               JIM MONTEVERDE: Take all the time you need to do.
               SARAH RHATIGAN: -- here -- okay. So here's the
 8
 9
           We have -- throughout these plans you'll see BZA
10
     approved plan, and then the proposed, the revised plans.
11
               So what you see at the top of the screen, I'm
12
     looking down because I thought this was the best way to kind
     of orient folks.
13
14
               The dark at the back, the dark-colored roof,
     pitched roof, that two-story lower structure, that is the
15
16
     area in question. Everything else about the project remains
17
     the same. There's no -- essentially no need for discussion.
18
     It's all one attached structure, but that section of the
19
     back is why we're here.
20
               So you can see between the BZA-approved render and
21
     then the lower photo, which is our revised image, what's
22
     happened is because we've raised the bottom of the
```

foundation up to bring it out of the water table, the whole height of the structure increased.

And I think that one of the reasons for perhaps some confusion with our neighbors is when we initially filed our application on November of this year requesting the modification, we filed a set of plans that simply brought the foundation up, but it kept the same pitch roof.

JIM MONTEVERDE: Right.

SARAH RHATIGAN: And the increase in height was 4 -- I think on our original Dimensional Table was 4.3.

JIM MONTEVERDE: Mm-hm.

SARAH RHATIGAN: We essentially did this as a placeholder to try to get into a hearing as quickly as we could, and then Asha immediately, you know, got our team together, and then we were meeting repeatedly trying to engineer a way to bring the height of this rear structure down however we could.

The architectural team is here to describe the efforts that were made, because I don't want to misspeak, but let me kind of jump ahead. Stephen is reading my mind here by going to the slide.

So from the front elevation, what we're looking at

here is on the left side -- again, the front part of the house stays the same. This is just showing the very rear portion of this building.

The blue dashed line is the existing conditions. It's what the house has been for decades and decades in its same location at its same height. And it's what the BZA approved at the hearing in 2023.

On the right side, where you see the area of relief that's dashed in red, this is the proposed change in the height of the rear structure. This is after redesigning, you know, the interior spaces to bring it down as much as we could.

So the effect of that: they basically resulted in a 1' increase in the overall, you know, height to the highest point of that rear structure. And then they changed the roof design so instead of it being a pitch like this, it's now got a flat portion and then it's essentially -- I don't know, you call it a mansard or -- but it slopes down on the left side lot line, and then we'll see in another image it also slopes down to the rear, trying to reduce -- again, as much as possible all the impacts on -- on neighbors.

```
1
               They needed to keep some -- you know, they needed
2
     to change this roof angle in order to not lose the usability
 3
     of the upper floor. They reduced all the ceiling heights as
 4
    much as they, but they needed to have -- you know, a knee
 5
    wall height that was, I think something like five, six --
 6
     and again, I'm sorry, the architects are going to take that
7
    part of the presentation.
8
               JIM MONTEVERDE: That's okay. And the --
 9
               SARAH RHATIGAN: Um--
10
               JIM MONTEVERDE: -- change in the roof profile was
11
12
               SARAH RHATIGAN: And the ch --
13
               JIM MONTEVERDE: -- really to allow the building
14
     structure to -- am I understanding correctly, the building
15
     structure is being raised? The floor elevation is being
16
    raised?
17
               SARAH RHATIGAN: Yes.
18
               JIM MONTEVERDE: And that --
19
               SARAH RHATIGAN: Yes.
               JIM MONTEVERDE: -- modified roof profile is
20
21
     allowing the proponent to basically have the same amount of
22
    usable area they had on their upper floor before when the
```

```
1
    whole structure was lower?
2
               SARAH RHATIGAN: Yes.
 3
               JIM MONTEVERDE: Basically.
 4
               SARAH RHATIGAN: Technically, I think that the
     space up there is -- is more constrained. So there's more,
 5
     like the --
 6
7
               JIM MONTEVERDE: Mm-hm.
8
               SARAH RHATIGAN: You know, there's areas where
    it's at 5'6" to --
9
10
               JIM MONTEVERDE: Okay.
11
               SARAH RHATIGAN: You know, but it is -- all the --
12
     the gross floor area numbers are the same. There's some
13
     loss of use of space, but it's -- Asha's determined she can
14
     live with that, because she's doing her utmost to try to
15
     really bring this down.
16
               JIM MONTEVERDE: So --
17
               SARAH RHATIGAN: Do you --
               JIM MONTEVERDE: And then before we --
18
19
               SARAH RHATIGAN: Yeah.
20
              JIM MONTEVERDE: -- anybody else, I'm just asking
21
     Stephen to go to the elevation, and I think the neighbors
22
    were, at least what I read, seen this one, where --
```

```
1
               SARAH RHATIGAN: Great.
               JIM MONTEVERDE: -- the lower elevation, and in
 2
 3
     that front elevation we were looking at, there were two
     dimensions; 3'4 and 9" which becomes 4', and that is the
 4
     difference, and it's that particular elevation that some of
 5
 6
     the correspondence, they were objecting to this now; you
 7
     know, it has a window in it, but somewhat blank wall that
 8
     now is 4' greater than what was in the original proposal.
               I think that's the one that I read that I was
 9
10
    confused about the 4' or 18". I think now I understand.
11
               SARAH RHATIGAN: Yep.
               JIM MONTEVERDE: That is the 4'. That is the
12
     façade that these people are looking at that they --
13
14
               SARAH RHATIGAN: I agree with you.
15
              JIM MONTEVERDE: -- are taking objection to?
16
    hm.
17
               SARAH RHATIGAN: Yep.
18
               JIM MONTEVERDE: Okay.
19
               SARAH RHATIGAN: There was one letter that
20
     referred to 6', which I'm -- I'm not, -- that's inaccurate,
    and I'm not sure --
21
22
               JIM MONTEVERDE: Right.
```

```
1
               SARAH RHATIGAN: -- where that comes from.
2
               JIM MONTEVERDE: Okay. But this is the correct --
 3
               SARAH RHATIGAN: And then again also, and -- and I
 4
     think that you understand this, but I'll just repeat it that
 5
     as you see in this photo, the increase in total height is 1'
 6
     from the original set of plans.
7
               JIM MONTEVERDE: Yes.
8
               SARAH RHATIGAN: The BZA-approved plans.
9
               JIM MONTEVERDE: Yep.
10
               SARAH RHATIGAN: And so, what they -- what the
11
     folks at 20 Clinton Street are talking about is that, you
     know, the side -- they're seeing more siding at the plane
12
13
     that's closer to their home.
14
               JIM MONTEVERDE: Correct.
15
               SARAH RHATIGAN: By 4'.
16
               JIM MONTEVERDE: And in the modified proposal, is
17
     there still basement space under the rear addition?
18
               SARAH RHATIGAN: Yes.
19
               JIM MONTEVERDE: So that really drives it to be
     raised up because of the water condition that you mention?
20
21
               SARAH RHATIGAN: Correct. Yep.
22
               JIM MONTEVERDE: Okay.
```

1 SARAH RHATIGAN: And the basement living space is, 2 you know, critical to the program to making it feasible for 3 family to reside in the rear unit. JIM MONTEVERDE: Okay. Anything else you --4 5 SARAH RHATIGAN: So --6 JIM MONTEVERDE: -- want to present? 7 SARAH RHATIGAN: The -- I mean, I -- as long as -let's see, I think that maybe it's helpful to look at the 8 9 other images briefly. 10 JIM MONTEVERDE: Yep. 11 SARAH RHATIGAN: Just to make sure, you know, 12 other Board Members in case they had any questions at all. Maybe if you were to go to slide -- kind of covered a lot of 13 14 this, but maybe if you could start on page 7 of the PDF? 15 Great. 16 Asha, did you want to take the floor, just to go 17 through the elevations? 18 AXEL RAMIREZ-PALACIO: Yeah, good evening, Members of the Board. Axel Ramirez-Palacio here from SKA. 19 20 So pretty much the same information that Sarah 21 just mentioned with the elevation behind. This one, you can 22 see the main drive to raise the building was the water

1 mantel that is represented here on the dashed blue line on 2 the border along each elevation. We, as Sarah said -- I mean, I'm going to repeat this information, the pole was just to raise the building 4 5 that was really high, and we did a lot of effort to reduce 6 the height of the big impact of removing the level, the level 0, reducing ceiling heights, engineering framing for 7 8 floors and roof, and that's when we came just to --9 Oh, and by the way, this elevation you can see the 10 rear elevation as well. We had an eave as well, so that 11 really reduced the amount of the volume of siding on the 12 rear of the house. But I think we can see that in the next 13 sheet. 14 Next sheet, please? One more. But this presents the front of the 15 16 This is the elevation that Sarah just presented. house. 17 Could we go to the next sheet, please? 18 This is the side of the house. 19 Could we go to the next one, please? This is the elevation that Sarah explained. 20 21 Could we go to the next one? That will be the

22

rear elevation, please.

You can see here the render of what was the BZA approved. That was the original height of the building. On the el -- in the render below, you can see the new height of the siding, and then with the hip roof that we added on the back, the impact of the siding is not as severe.

We can go to the next step. This is the elevation showing there.

And same here. That's the area of relief and the shape of the roof versus the new roof, compared to the previous approved.

And you can see as well the two corner -- triangle corners that the additional siding on the -- is very minimal.

And as well the area of relief on the window, that was removed. We can see in the proposed BZA set, the windows were one removed, the other one was relocated to add privacy to the rear neighbor.

And you can see in the upper elevation that we have the interior of the room showing the 6' heigh person, showing the -- that we were adding privacy from that window to the neighbors.

22 Next?

This, Sarah --

SARAH RHATIGAN: I'll -- yeah, I was just going to -- oh, go ahead, Axel, I'm sorry.

AXEL RAMIREZ-PALACIO: Yeah, existing conditions of what it is right now. And I would like to point [out] the center building, the center picture, top center. Those — the big framing with the white and yellow triangle, those are the existing elevations of the former — the current rear building.

And they're really close to the property line.

And they may need to be reinstalled. So that is what gave us release (sic) to -- the time to do the new building to maintain the setback location, the current kind of existing setback location.

And we can go to the next.

SARAH RHATIGAN: I'll take it from here.

So when we -- I tried to provide some information in our letter about outreach efforts, because we were aware that there were concerns from folks at 21 and 23 Bigelow, and then from 20 Clinton Street.

Asha did a lot of work trying to communicate with neighbors. Some folks were responsive, some were not. But

```
1
     the -- we wanted to at least provide some factual
 2
     information to the Board to help get a sense of, you know,
 3
     distances from buildings to the area in question.
               And so, just provided this area map, which shows,
 4
 5
     you know, the folks at the rear are quite a distance away
     from the area where there's what we think is a pretty
 6
 7
    minimal increase in some elevation there. So 47 plus feet
 8
     away.
               And then the 20 Clinton Street folks are a little
 9
10
     closer at 24'11" from wall to wall and in their living
11
     space.
               And then there's some yard area in between 20
12
13
    Clinton Street and this area that is in the next images, if
14
     you could move the slide forward.
15
               Actually, I'm sorry. I'm skipping over. We have
16
     some sun studies. Steve -- Steven (phonetic), would you
17
    mind --
18
               STEVE HOHEB: Yeah, I can -- I can take a look.
19
               SARAH RHATIGAN: -- referring to those? Thank
20
     you.
21
               STEVE HOHEB: Yeah. Steve Hoheb from SKA here.
```

Our solar study shows the proposed raise in the building

22

height. It's the 1' increase. It also shows the previous BZA-approved solar study.

And so, from our calculations, in the summer our overall shadow length is only increasing by about 4", and then during our winter months, because of the low angle of the sun, it increases by 26".

One thing our shadow study doesn't really show effectively is just the number of trees in that neighborhood, which I believe the Google Maps aerial photo shows more effectively.

But you can see here in our summer solstice and our winter solstice study the additional heights to the building are somewhat minimal.

One thing we're also not showing is the equinox projections. But those are -- have been rounded up to about 11" due to the increase of the overall height.

SARAH RHATIGAN: Next slide, please?

And then we just -- we pulled some photos from -- this is the area between 20 Clinton Street and our property. So if you see the yellow siding there, that's the -- that's that rear portion of the structure on 18 Clinton Street.

And so, there's reference I think in one or two of

the letters too, like their patio and yard area and worries about losing sun.

These photos are taken from before any construction was done, and it's a pretty shady area. These are also -- some of these are sunken patios, so they're sort of at the basement level of that property, which -- you know, makes sense that these would be shaded areas.

Next slide, please?

And then the last photo is just a photo of -- from the work site looking down at the property to see, you know, that they may be getting a bit more sun now that the structure is temporarily dismantled, but that even now it is still a shady area with some trees.

And, you know, in saying this, of course, you know, we're not in any way trying to be disrespectful of the folks that live at 20 Clinton Street at all. And they have been, you know, making efforts to talk to Asha about this.

But under the circumstances, we feel that the benefits of being allowed to make a modification that's really, you know, necessary and required for good engineering for the site, and also minimizing impacts that could be felt, you know, further beyond this site in terms

of affecting groundwater by--quote, unquote-- building in the water.

We really feel like a special permit in this situation is called for. And there's justification in the Ordinance for providing that.

One thing I would point out: The Flood Resilience provisions that we initially thought that the project would fall under, they don't apply to groundwater, which was not clear at the time.

But after learning of the Stop Work Request, we met with DPW and with Kara Falise, who's the person there who administers that provision.

And she explained to us that currently DPW just regulates water that flows in the streets, if you will and then doesn't recede.

But the concerns are still the same, which is to try to avoid homeowners building into flooding conditions, which are expected to only get worse with increased rainfall from storms such a yesterday's.

But thank you. We've talked a lot, and if you have any questions, we'd be happy to answer them.

JIM MONTEVERDE: Any questions from Members of the

```
1
    Board?
2
               If not, I have a couple.
 3
               From the photo that you showed, kind of the
 4
    progress construction photo, the new foundation, the raised
     foundation has been poured, correct?
 5
 6
               SARAH RHATIGAN: Correct?
7
               JIM MONTEVERDE: And it's been framed up to the
     ground floor level, correct?
8
9
               SARAH RHATIGAN: I believe that's true.
10
               JIM MONTEVERDE: I think that's what -- I'm
     looking at your photograph. That's what the photograph
11
12
     shows.
13
               SARAH RHATIGAN: Okay, great. That's correct.
14
               JIM MONTEVERDE: Whenever these photos were taken.
15
     So that much was in place before you were told, or the
16
    client was told to stop. Right?
17
               SARAH RHATIGAN: Correct.
18
               JIM MONTEVERDE: So that's in place?
19
               SARAH RHATIGAN: Yes.
20
               JIM MONTEVERDE: And then one question, Sarah, for
21
    you and for your design team: assuming that the letters
22
    that came through from the abutters who seem to be taking
```

exception to the increase of the -- by the way I was going to say "blank façade" that's not fair, but the mass of the building I think in this particular view on the right-hand side, right where in the previously approved is a pitched roof. And then it becomes a taller, much flatter, less articulated façade with the hip roof then on top of it, and I think the corresponding rear -- sorry, side yard that faces the neighbor is also --

Can you that elevation, Stephen? Do you have that one?

Question for the design team: have they tried anything, or has any effort been made to ameliorate the concerns of the -- that the neighbors have spoken about?

Can you go down one more, I think? That works.

Just about -- I don't know what to do, but you know, that increase in -- it looks like clapboard-sided blank wall.

SARAH RHATIGAN: Yeah.

JIM MONTEVERDE: Is there --

SARAH RHATIGAN: I mean I can -- I can answer generally, and then ask Axel to answer more -- in more technical language, but I'm -- I know and sat through several meetings of a lot of discussion of trying to figure

1 out every conceivable way to lower the overall height and to 2 lower the pitch --3 JIM MONTEVERDE: Yeah. 4 SARAH RHATIGAN: -- again, as much as possible 5 without losing kind of critical space. 6 JIM MONTEVERDE: Mm-hm. SARAH RHATIGAN: And Axel, if you wanted to just 7 8 mention what those --9 AXEL RAMIREZ-PALACIO: Yeah. 10 SARAH RHATIGAN: -- what those entailed. 11 AXEL RAMIREZ-PALACIO: Absolutely. Yeah. We 12 really tried to do as much as we can to that try to reduce the height of the back unit, you know, like reducing ceiling 13 14 height, I mentioned before engineering -- we've been talking 15 with the structural engineer to make really thin structural 16 floor framings for Level 1 and Level 2, and even for the 17 roof. 18 So we're reducing the second and the -- hm? 19 That's it, yeah, the second floor we reduced the original 20 perimeter wall that was close to 6' to 5' right now. And we 21 reduced the big -- the roof -- the shape of the roof to 22 reduce it.

In total, we reduced the maximum height mostly like 3'. And from the original eave's height, we reduced like 4.5'.

But we're really tight on the program that we have on the second floor with room, bathrooms with that wall coming. The hip on the back really adds, I mean, some challenges sun wise, but I mean I think it's something that we could -- we successfully we can achieve it to add that hip roof to impact less the rear neighborhood.

SAM KACHMAR: We're still 12 people of 33 with height restriction.

AXEL RAMIREZ-PALACIO: Hm?

SAM KACHMAR: We're 12 people out of 35 (sic) with height restriction?

SARAH RHATIGAN: Yeah. And I actually was just about to kind of reiterate what Sam was just saying, which is, this is a two-story, you know, a low two-story portion of the building.

So we're at -- requesting to be at 20' -- I'm sorry, 23'4.5" whereas, you know, if you move 7' in from the setback, one could construct a 35' tall addition in this location, which I would argue would be much more impactful

```
1
     on this neighbor than what we've proposed.
 2
               JIM MONTEVERDE: Mm-hm. Okay. Any other
 3
     questions from Members of the Board?
               STEVEN NG: Yeah. Can the architect tell us what
 4
     the floor-to-floor heights are, starting with the lower
 5
     level?
 6
 7
               SAM KACHMAR: Yes. The lower level is close to
     7'. That is matching the Unit A, the front unit.
 8
 9
               STEVEN NG: Okay.
10
               SAM KACHMAR: On Level 1, we go close to 8'. And
11
     on Level 2, all the perimeter walls are at 5'. And this lot
12
     is the top of the roof. The hip is -- we have it on one of
     the elevations, I can see it right now.
13
14
               Could we go to the -- one of the back elevations,
15
     or front elevation please?
16
               Could you maximize on the top of the flat roof?
17
     We have the slope there. Could you maximize that some more,
18
     please? That's all we have.
19
               Correct. We changed from 712 to 612, to reduce
     the pitch of that roof.
20
               JIM MONTEVERDE: I was looking -- sorry, this is
21
22
     Jim Monteverde again, just to answer Steven's question.
```

```
1
     There was a building section submitted previously. It cut
     through the -- it was a longitudinal, long direction, cut
2
     through the original aisles, cut through the addition.
 3
               Is there one of those in the set that was
 4
     submitted? I'm just flipping through the set.
 5
 6
               SARAH RHATIGAN: Yeah, I'm sorry. I don't think
     that we did provide one.
7
8
               JIM MONTEVERDE: Mm-hm.
9
               SARAH RHATIGAN: And -- you know, inadvertent just
10
     from the speed with which we were trying to pull things
11
     together.
               JIM MONTEVERDE: So just trying to answer Steven's
12
    question again. Steven, do you --
13
14
               STEVEN NG: Yeah, I see the section. It's -- in
15
     the packet, it's page 34, I guess. Yeah.
16
              ASHA DANIERE: That -- just to be clear, that's
17
    now out of date. That was before we did all the work to
18
     reduce --
19
               JIM MONTEVERDE: Right. Yeah, that's -- it's
    marked up here, and in our file, it says, "old."
20
21
              ASHA DANIERE: Yeah.
22
              JIM MONTEVERDE: So I assume that was --
```

```
1
              ASHA DANIERE: But it shows you where we started.
 2
     So maybe that's helpful.
 3
               JIM MONTEVERDE: No. Steven, did you get your
     question answered?
 4
 5
               STEVEN NG: Yeah. I'm kind of interpolating it.
     Yeah.
 6
 7
               JIM MONTEVERDE: Right.
 8
               STEVEN NG: Thank you.
              JIM MONTEVERDE: Okay. Any other questions for
 9
10
    members? If not, I have one. Yeah, in the file, I'm just
     -- I have the original file, which basically says -- Sarah,
11
     do you know the date of when we heard this initially?
12
13
               SARAH RHATIGAN: I -- February -- I know it's
     February of 2023.
14
15
               JIM MONTEVERDE: Yeah. And I see an extension.
16
               SARAH RHATIGAN: Yes, there was an extension --
17
              JIM MONTEVERDE: April 28.
18
               SARAH RHATIGAN: -- granted. Yep.
19
              JIM MONTEVERDE: Yep. So that was April 28. And
20
     then I see -- and I'm just, where I'm getting to is so then
    we have the letter from Hancock Associates which is
21
22
    basically your surveyors, Civil Engineers, and they're the
```

1 ones who were giving the observation about the test pit and 2 the -- basically dated April 2. So did you get this information after you went 4 through the process with the Board initially? Or --5 SARAH RHATIGAN: Yeah, so the BZA granted relief 6 in February of 2023. 7 JIM MONTEVERDE: Okay. 8 SARAH RHATIGAN: It took some time for Asha to 9 pull together financing to be able to advance to the next 10 stage, which is why she needed an extension from this Board 11 to the variance and special permit. 12 JIM MONTEVERDE: Okay. 13 SARAH RHATIGAN: And then the construction 14 documents were prepared and a building permit issued in 15 April 2024. The onsite work was happening about 16 contemporaneously with the time that the building permit was 17 issued. 18 JIM MONTEVERDE: Mm-hm. 19 SARAH RHATIGAN: But it started -- so the building permit issued while the team was now figuring out that they 20

potentially had an issue with the rear that they needed to

21

22

adjust to.

```
1
               JIM MONTEVERDE: Okay, so that the work --
2
               SARAH RHATIGAN: Their plans were -- yeah.
 3
     then plans were, were revised, and then there was a
 4
     submission in July to Inspectional Services showing the new
 5
    proposed, raised elevation of the rear portion of the
 6
     structure that was uploaded to the portal, you know, in
7
     connection with the construction documents.
8
               JIM MONTEVERDE: Okay.
 9
               SARAH RHATIGAN: But apparently, you know, through
10
    miscommunication it wasn't --
11
               JIM MONTEVERDE: Yep.
12
               SARAH RHATIGAN: -- it wasn't fully approved,
    although we thought this it was.
13
               JIM MONTEVERDE: The lesson learned, if I can make
14
15
     an observation --
16
               SARAH RHATIGAN: Mm-hm.
17
              JIM MONTEVERDE: -- is you always do the
18
     exploratory work before you get too far into your design or
19
     documentation, and sure as heck before construction
20
     commences.
21
               But it's just a lesson learned.
22
               Any other questions from Members of the Board
```

before we go to public comment?

THOMAS MILLER: Yes. There was a reference to a tree being removed in some of the correspondence. Can you explain to me where that tree was, and what happened with that?

SARAH RHATIGAN: Sure. As we're looking at this elevation right here, the tree was approximately 2' behind the rear structure, located on the neighbor's property on the 21 or 23 Bigelow Street side of the line, approximately 2' from the lot line.

But it was a very large tree. And so, there was an effort to try to figure out if the tree could -- if they could avoid, you know, disturbing the tree. Asha hired an arborist to come do investigations, but the problem was that the tree's roots had grown underneath her property and underneath the structure, compromising that structure.

And also, the tree is kind of looming over this rear portion of the -- of the building and was, you know, not going to be safe.

So if they had done nothing -- I mean, even if they had just, you know, done construction work, they would have needed to cut the roots at the -- at the property line

in order to, you know, essentially preserve the existing structure.

But obviously with the construction, you know, plans for the -- for the poured foundation, you know, the -- you know, the tree was not going to be able to be kept in place or saved.

THOMAS MILLER: Thank you.

JIM MONTEVERDE: Any other questions from Members of the Board?

If not, I'll go to public comment. Let me summarize some of the correspondence we have in the file. My last count was four in favor, four in opposition. But let me read through those.

We also have in the file, not speaking for or against but kind of the rationale for the change a letter I referred to from Hancock Associates, who are surveyors and engineers dated November 20 talking about the -- their observations from the test developers done, and their recommendation made that the basement elevation for the proposed Unit B along the back be no lower than the existing basement.

And that's based on the observed water table

elevation, which is what's raising the -- raising the structure here.

And correspondence from Cynthia MacDougall, 17
Bigelow; I put a question mark on this one because I can't understand if it's for or against, so I'll read it. It says,

"The change does not affect me; however, I can understand objections by my neighbors, as it changes the architectural design of the period when all these homes were built."

Next, we have Drazen Prelec and Danica Prelec, 19 Bigelow. They are -- cannot -- they are not supporting the proposal. In summary, it represents a significant change relative to what was originally approved, and it would have a negative impact on several back yards on Bigelow Street, which they say is further explained by another correspondence.

We have Sarah's letter of December 11, which she summarized for us.

We have a letter from Kate Olivier and Alexandra Irving of 23 Bigelow. This is they are sympathetic with Asha's situation, but "We do not support the new proposal

for this project. The impact to the higher structure will be substantial. Already we are one of the only yards with a structure right up to the property line, and this will further affect light, privacy, and the overall feel of the back yard."

support.

We have another correspondence from Patricia and David Wagner at 12 Clinton Street. And it says they are in support of the revised plans. They are grateful that the owner and their team have taken great care to ensure that their foundation accounts for flood risk and the neighbors' runoff.

Molly Howard at 15 Clinton writing in support.

Heather E. Cole from 19 Clinton writing in

Then we have a letter dated December 8, 20 Clinton Street, Units 5,6, and 7, basically writing to express their strong opposition for the revision to the part of the project that abuts their property.

Again, this one is saying in summary that "the proposed modification is a significantly taller and bulkier structure, with significant additional building wall area over the previously approved relief within the setback zone.

So the height of the façade of the property line, which directly faces our homes, is proposed to be increased by over 4' compared to the original structure, and the renovation previously approved by the Board. It will significantly reduce light and sunlight in the yards of the units and patio and living room of Unit No. 5."

Next is Patricia McGovern, 20 Clinton Street, Unit 4 writing to voice her concern that, "The revised plans place the big box light structure right next to our property. It seems impossible that that structure would be approved with the setback rules in Cambridge."

Amy Blitz, 20 Clinton Street, in support of the plans going forward, including the adding height to the building.

David Spillane - [unclear] and Linda Murphy, 21
Bigelow Street, abutters. "While we are happy to support
the 2023 proposal, we oppose the current request for
additional relief for the reasons outlined below." And it
goes on for a page and a half stating that they are in
opposition.

Sue Butler, who owns 14, 16, and 17 Clinton

Street. This one is in strong support of the proposal. And

```
1
     that is the commentary we have in the file.
2
               So I will open it to public comment. Any member
 3
     of the public who wishes to speak should now click the icon
 4
     at the bottom of your Zoom screen that says, "Raise hand."
 5
               If you're calling in by phone, you can raise your
 6
    hand by pressing *9 and unmute or mute by pressing *6.
7
               I'll now ask Staff to unmute speakers one at a
8
     time. You should begin by saying your name and address, and
     Staff will confirm that we can hear you. After that you
9
10
     will have up to three minutes to speak before I ask you to
11
     wrap up.
               Anybody out there?
12
13
               STEPHEN NATOLA: David Spillane?
14
               JIM MONTEVERDE: Mr. Spillane, are you on mute?
15
               DAVID SPILLANE: I am, thank you. can you hear
16
    me?
17
               JIM MONTEVERDE: There you go. Yep. can you
     introduce yourself please?
18
19
               DAVID SPILLANE: Yes, I can. My name is David
     Spillane. My wife, Linda Murphy, and I live at 21 Bigelow.
20
21
    We have submitted comments to the file, but I would like to
22
    sort of supplement those, you know, based on some of the
```

interesting conversation of this evening.

The rear portion of the 18 Clinton construction is located two inches from our property line. As is being discussed earlier, we've already suffered significant impacts from the construction, including loss of a 60' tall Elm tree that was the casualty of basement construction on the property.

Our hope and that of our neighbors is that we avoid additional and further impacts as a result of additional relief that might be granted by the Board.

I just want to say, and to emphasize, that we supported this project fully when it became before the Board in 2023 for special permits and variances.

Today, all of the direct abutters on Bigelow Street, the direct abutters on Bigelow Street, 19, 21, 23, and the four homeowners on Clinton Street at No. 20 who are directly affected, are in uniform opposition to the plan.

I recognize that many other neighbors have spoken in favor of the plan, but none of those neighbors are the direct abutters to the property, are directly affected by it.

I want to share a couple concerns. I should also

say that I have a 30-year history in Planning and
Development Review. I am not confused about any of the
height issues here, as earlier.

The first issue for me is the additional height being requested increasing the nonconformity in the setbacks. When the City issued its non -- it's Stop Work Order in October of this year, the construction of -- that has already been completed was six feet higher than that which was approved by the Board in '23.

What's not -- what's now proposed, as you know, is 4'1" higher at the property line than what had been previously proposed, approximately a half story higher directly at the property line.

The first floor of the building already constructed is 6' above grade at our property line. it was supposed to be at grade. All of the work that is now going forward is based on the given that 6' elevated level stays in place and all the mitigation is really looking from there up.

I -- perhaps now is not the time to discuss in detail here some of the renderings you looked at the earlier. I do want the highlight that the renderings that

purport to be from our back yard looking at the structure are inaccurate in a number of ways. I'd be happy to elaborate on that, but don't want to take time on it and try to complete my comments within the three minutes.

I'd like to ask the Board just to consider the precedent it sets. If a petitioner who's granted multiple variances, especially permits, returns to the Board in the middle of construction having violated the original permit to ask for new special permits and additional relief from the Ordinance.

My hope is that the Board will consider the combined impact of the relief it already granted together with the additional relief now requested in making its ruling.

The shadow studies you're looking at take it as a given that the relief you already granted back in 2023 is a given. What you're only looking at today is the additional shadow increases beyond that.

My final sort of concern I want to raise relates to the arguments concerning the water table. What kind of precedent does it set if a petitioner can claim the high water table as a sole justification for increasing zoning

```
1
     and nonconformity that impacts neighbors? This relief would
     surely apply to hundreds of properties across the city.
2
 3
               JIM MONTEVERDE: Mr. Spillane, I'm going to have
     to ask you to wrap up, please.
 4
 5
               DAVID SPILLANE: Yeah. Can you give me 30
     seconds?
 6
7
               JIM MONTEVERDE: 30 seconds.
8
               DAVID SPILLANE: I was just saying in closing that
9
     if you are lucky enough to have a high water table, you may
10
    be able to build higher on your property with impacts that
11
    will impact your neighbors, and surely this is not the
12
     intent of the Ordinance.
13
               Thank you for your time.
14
               JIM MONTEVERDE: Thank you for calling in.
15
               STEPHEN NATOLA: Rohit Karnik?
16
               UNIDENTIFIED SPEAKER: Can you hear me?
17
               JIM MONTEVERDE: Yes. Can you introduce yourself,
18
    please?
19
               ROHIT KARNIK: This is Rohit Karnik, 20 Clinton
     Street, Unit No. 5. So thank you for the opportunity to
20
21
     speak and to share our perspective. So I'm a resident of
22
    Cambridge for 18 years, and co-own Unit No. 5 and 20
```

Clinton, along with my wife. And I also reside there.

Just to point out 18 Clinton has been a rental property for many, many years. So we are one of the abutters, and 18 Clinton is really the front side of our home.

So our living room has no windows on three sides, and it has sliding doors that face 18 Clinton. There's a 6' wide patio, and then 18' to the building at 18 Clinton.

So -- so this building and structure in question is not facing a side window or a bedroom window, but it's really facing the front side of our home.

Now, if you look at the original building, there was already a façade right in front of our living room within a foot of our property one floor high. There was a gap to the left, and then the building in question. And the prior variance relief allowed that gap to be filled in, extending the rear building structure.

So the prior relief already allowed a 50' long façade within, like, a foot of 20 Clinton, and so, pretty much all of our yard and back of Unit No. 7 will have a building façade within a foot.

So prior approval time, we thought it was

renovation and so filling the gap seemed like a reasonable compromise, even though it created additional façade area.

But what is happening now is a complete reconstruction. The building was completely removed, being built ground-up. And the current proposal is further increasing the size of the building over this prior relief.

So this building sits directly to the front and also to the south of our yard and patio. It does not receive much sunlight, but it does receive sunlight until about noon and the sun is above this building in question.

So this proposal is going to make the façade taller and increase the shadow length by about 8' in winter. So the shadow calculations are incorrect because they do not account for the elevation of the living room or the patio.

So we live here, we do get sunlight on the patio even in winter, and the shadow is basically on the patio, and it's going to be extended 8' because the height increases by a foot, and the top gets 5' closer to our property. And even at equinox, it's going to be about 4'.

So this is a pretty significant impact, this higher façade and increased shadows for a small yard and a living room with no other windows on the other three sides.

1 So if we look at the original versus now, it's a 2 complete rebuild rather than a renovation. So why does it need to do to be within a foot of our property when there is 3 4 40' of space on the other side? 5 JIM MONTEVERDE: Mr. Karnik, I'm going to ask you to wrap up in the next couple seconds. 6 7 ROHIT KARNIK: Yeah. Just 30 seconds. 8 JIM MONTEVERDE: Yep. ROHIT KARNIK: So renovation is fine. And filling 9 10 in the gap already is going to have an impact, but this new 11 proposal is going to considerably worsen the impact. So some of the neighbors are supportive, but none of them are 12 going to be walled in by this construction. 13 So 18 Clinton is going to be a multimillion-dollar 14 15 property, but why should it come at our expense when it is 16 within the setback zone, and there's so much space on the 17 other side? 18 So thank you for listening. 19 JIM MONTEVERDE: Thank you for calling in. Anyone else? It seems that no one else is calling 20 in. I will close public testimony. Discussion among 21 22 Members of the Board?

[Pause]

If not, I'll start. This one I am perplexed by.

I could -- if everyone can see the drawing that's on the

screen, which I think is the rear yard elevation. I could

see the revised height to the ridge to the top of the roof.

That seems relatively de minimis, but the modification to the profile, which is really what the -- I think the neighborhood correspondence that I read -- on both the side and the rear where it increases by a 4' height I believe, I am troubled by.

And looking at the plans, I can see that currently it looks like a basement level is three bedrooms, and it looks like two bedrooms on the main second floor level — living room, dining room, kitchen on the ground floor level on the basement having another bedroom and family room set up.

So I don't know how or if there's a way for the proponent to organize their program or if need be, reduce their program, so they can achieve the profile to be more in keeping with what was previously approved.

So I'm perplexed on this one, and I'd like to hear from other Board Members and hear their opinions. So at the

```
1
    moment, I am not favoring the relief requested. Anyone else
2
    have any comments?
               STEVEN NG: Jim, I think I -- I'm -- I see -- I
     can totally understand the direct abutters' concerns. I'm
 4
    not clear on, you know -- I'd like to see a new transverse
 5
 6
     section, new longitudinal section just so I can -- I don't
     know if there's any ways to mitigate that height need.
7
8
               But yeah, I'm just trying to see if there's other
9
    possibilities, trying to minimize that exposure on that side
10
     of the site.
11
               JIM MONTEVERDE: Yep. Okay. Anyone else?
    Members of the Board? Any other comments?
12
13
               THOMAS MILLER: I think I'm largely in the same
    place as you, Jim. I feel like there could be maybe some
14
15
    more creative thinking to address the concerns of the direct
16
    abutters her.
17
               JIM MONTEVERDE: Yeah.
                                       I've got to convince
18
    myself looking at drawings for a while that I'm not sure
     it's creative thinking; I'm sure it's going to be heartburn
19
     for someone. Something has to give here. And it's probably
20
21
     some programmatic space.
```

But so if I'm reading the tea leaves, that's three

22

```
1
    who have some concerns and maybe, you, if we move to a
2
    motion to vote, that would be a denial.
 3
               Sarah, are you with us?
 4
               SARAH RHATIGAN: Yes.
 5
               JIM MONTEVERDE: Daniel? I'm sorry. I'm sorry,
    wait a minute. Let Daniel jump in.
 6
7
               DANIEL HIDALGO: Yeah, just this is -- I'm really
8
     struggling with this one just because, you know, I feel for
9
     the applicants', you know, conundrum. But I totally see,
10
    understand what the neighbors are saying.
11
               And in part, you know, I don't have the
12
     architectural expertise to know that something could be done
     either creatively or, you know, altering -- altering the
13
14
     space --
15
               JIM MONTEVERDE: Yeah.
16
               DANIEL HIDALGO: -- to make it consonant with the
17
     original plans. So -- but I'm -- given my kind of
18
     uncertainty, I think I'll defer to you, Jim, and the others
19
    who have spoken about the desire to see a little bit more, I
20
     guess effort or explanation about what -- you know, other
21
    changes --
22
               JIM MONTEVERDE: Right.
```

1 DANIEL HIDALGO: -- that might advise us. JIM MONTEVERDE: So Sarah? 2 3 SARAH RHATIGAN: Well, the applicant would really appreciate a continuance to have an opportunity to review 4 5 this --6 JIM MONTEVERDE: Yep. 7 SARAH RHATIGAN: -- with the design team and see 8 what we might be able to do. ASHA DANIERE: I can just make one comment before 9 we wrap up? I know we --10 11 JIM MONTEVERDE: Just introduce yourself, please, for the record? 12 13 ASHA DANIERE: Asha Daniere, the proponent. One of the challenges -- well, there have been many -- but one 14 15 of the challenges in trying to get to a resolution that 16 works for everybody is lack of communication. So there are 17 very strong opponents, some who have just really refused to 18 have a conversation. 19 So I take the Board's direction. We need to go 20 away and do some more thinking, but I don't know how we'll ever get to resolution if I can't sit down and speak with 21 22 people.

1 But that's a big part of my struggle. 2 SAM KACHMAR: Yeah, Mr. Chairman --3 JIM MONTEVERDE: Well, I just, you know, as part of the process you need to make the attempt, and we've 4 5 certainly seen other cases and other instances where 6 neighbors do not want to participate, but you can show that 7 you've reached out and made every attempt to let them see 8 plans, see drawings, have a conversation, and then that all factors into a decision. 9 10 So don't let that stand in your way from trying to 11 reach out, and certainly enough of your neighbors have felt 12 comfortable to write in or call in and we're getting a sense from the abutters. 13 14 So we're going to make a motion to continue, then. SAM KACHMAR: Mr. Chairman, could I make one 15 16 comment, just before we wrap up as well? 17 JIM MONTEVERDE: Introduce yourself, Sam, for the 18 record? 19 SAM KACHMAR: Sam Kachmar from SKA Architects. 20 did reach out to Mr. Spillane, both via e-mail and phone 21 call multiple times, to no response. We have made a lot of

efforts to speak with all of the direct abutters that have

22

```
1
     any form of opposition, as well as the ones who have spoken
2
     in support of the project, and we will continue to do so.
 3
               JIM MONTEVERDE: Okay. Very good. Thank you.
 4
    All right. Motion. Let me make an --
 5
               SARAH RHATIGAN: Excuse me, Mr. Chairman?
 6
               JIM MONTEVERDE: Yes.
7
               SARAH RHATIGAN: Yeah. I was just going to ask
8
     about the date. We would love to be on the January 9
9
    hearing date that you referenced earlier, if that were
10
    possible.
11
               JIM MONTEVERDE: How about the thirtieth, Sarah?
12
               SARAH RHATIGAN: Um --
13
               JIM MONTEVERDE: Please? What's that again?
14
    tell me. I mean, I know you're under construction, I'm sure
15
    you don't want any delay.
16
               SAM KACHMAR: Right.
17
               [Side conversation]
18
               JIM MONTEVERDE: Yeah. We already have some cases
19
    on the ninth that are going to take a bit of time, so can we
    do the January 30?
20
21
               SARAH RHATIGAN: Just checking here with our team.
22
    Yes, we will --
```

1 JIM MONTEVERDE: Okay. 2 SARAH RHATIGAN: -- accept the January 30 date. 3 JIM MONTEVERDE: Thank you. Thank you. 4 Let me make a motion to continue this matter until January 30, 2025 on the condition that the petitioner change 5 the posting sign to reflect the new date of January 30, 2025 6 7 and the new time of 6 p.m. Also, that the petitioner sign a waiver to the 8 statutory requirements for the hearing. This waiver can be 9 10 obtained from Maria Pacheco or Olivia Ratay at the 11 Inspectional Services Department. I ask that you sign the waiver and return it to 12 13 the Inspectional Services Department by a week from this coming Monday. Failure to do so will de facto cause this 14 15 Board to give an adverse ruling on this case. 16 Also, that if there are any new submittals, 17 changes to the drawings, dimensional forms, or any 18 supporting statements that those be in our files by 5 p.m.

On the motion to continue this matter until January 30, 2025, by a voice vote of the Board Members, please? Tom?

on the Monday prior to the continued meeting date.

19

20

21

22

1 THOMAS MILLER: In favor. 2 JIM MONTEVERDE: Thank you. Daniel? DANIEL HIDALGO: In favor. 3 JIM MONTEVERDE: Thank you. Virginia? 4 5 VIRGINIA KEESLER: In favor. 6 JIM MONTEVERDE: Thank you. You are 11 12 continued. 13 ASHA DANIERE: Thank you. 14 SARAH RHATIGAN: Thank you. 15 JIM MONTEVERDE: Good luck. 16 SARAH RHATIGAN: Thanks. 17 18 19 20 21 22

1 2 (8:14 p.m.)3 Sitting Members: Jim Monteverde, Steven Ng, Virginia 4 Keesler, Daniel Hidalgo, and Thomas 5 Miller JIM MONTEVERDE: Next case is BZA-1140668 -- 41 6 7 Concord Avenue. This one's a Variance. 8 Anyone calling in for 41 Concord Avenue? 9 CHRISTIAN KLEIN: Sorry, Mr. Chairman, it took a 10 while to flip over to panelist mode. My name is Christian 11 Klein, and I'm the -- from Approach Architects. 12 JIM MONTEVERDE: Yep. Okay. 13 CHRISTIAN KLEIN: So I'm here representing --14 JIM MONTEVERDE: Go ahead. 15 CHRISTIAN KLEIN: -- Concord Avenue Trust. 16 are the owners of the property at 41 Concord Ave. This is a 17 multifamily house. It used to be a single-family, and we are seeking to make some modifications to the left side, 18 19 which are within the setback. 20 If you could advance the slide, please? 21 So what we are proposing to do is to remove an 22 existing deck entryway and steps that are on the side of the house and replace them with a new deck the same size and a new entryway that is slightly longer but not any wider, and new entry steps that, again, are a little bit longer but not as wide.

But we are not changing the nature of -- the extent of the nonconformity in regards to the setback, and all the expansion will be towards the front, and none of it would be made towards the side.

If you could, next slide, please?

So the red circle shows where we are. You can see the proximity to the side lot line. I don't know the history of why this was chosen to be the location for the entrance for the majority of the units in the building. But that's where it is.

And the photo on the right, you can just see the tightness of the space. you can catch a little bit of the stairs, the landing leading to the front entryway.

Next slide?

So what we're proposing, so on the top is what's existing. So the entryway has a door leading from the outside into the little entryway, which is very tight and then into the building, and what we are proposing to do is

to make that a little bit larger and change the door, so it opens out so that there is room in there. As you know, these days there's a lot more packages being delivered.

We would like some space there where things could be dropped off. And this also allows the outer door to be closed before the inner door is opened, which they cannot currently do.

And then the steps themselves, they are currently very steep. And so, we're looking to change the steps so that they would be code compliant.

You can go to the next.

And here you can see it from the side. You can see the size of the entryway with the single window. It will be expanded on the right to a double window.

At the same time, we're replacing the front steps, we're also going to be pouring the steps that lead to the basement unit. There's no change in elevation there, it's just making the steps less steep, so that they're a little bit safer.

Next slide?

And so, these are some photos from the application. You can see there's the landing on the front

door. Then backing up you can see the steps leading up to the front door, and then again that photo sort of skewed looking down the side of the building.

Next slide?

So the -- on the left is looking in throughout front door, so you can see the swing of the door leads all the way back to the -- there's just a thin bookcase at the end there for packages, so they're hoping to expand that.

Middle slide is looking to the left once you're in the entryway, so it's that existing door looking out, and then again turning and looking back out the front door.

Right now, packages tend to be left outside because it's -- there's just not room often insight.

Next slide?

And so, the existing other side entryway is in the side yard, which I why -- and we're putting a window facing the side yard, so those are both the reasons for why this is a variance.

In the absence of a variance, the enlargement to the entryway either couldn't take place, or it would need to happen on a side of the building where there currently is no entrance, which would involve reconfiguring this -- all of

the units on the interior on that first floor, which would be a considerable expense and imposition to the residents.

The position of the existing entrance on the side of the building is not typical for the district, and is rather unusual, which is why we're -- it's really the only reason that we're asking for this request. Were the shape of the building different, would it be farther away from the side lot line, we would not be needing a variance.

And then the next slide.

So how the relief can be granted, we're seeking an additional 5.9 square feet in that entryway that is within the side lot setback, and it will not be discernible from the street, it'll only be visible from the abutting properties on that side of the building. Public good will not be affected by this change.

The requested expansion of the entryway would it have been allowed if this had remained a single by special permit, if it had remained a single-family.

But it -- since it's multifamily, it does require a variance. It will not change the residential character of the house, and it will improve the egress and the safety access in the units.

```
1
               And it doesn't do anything to oppose the purpose
     of the design bylaw for the City of Cambridge.
 2
               And for those reasons, we are asking for your
 3
     approval of the Variance Request.
 4
 5
               Thank you, Mr. Chairman.
 6
               JIM MONTEVERDE: Thank you. And the proponent is
     -- it's a condominium, correct?
 7
 8
               CHRISTIAN KLEIN: It is a condominium, yes.
 9
               JIM MONTEVERDE: And the proponent is the Condo
10
     Trust?
11
               CHRISTIAN KLEIN: It's the -- yes, it's the Condo
            There are representatives here from CHARLESGATE.
12
     They're the managers of the property on behalf of the condo
13
     association.
14
15
               JIM MONTEVERDE: Yep. The reason I'm asking:
     typically, if it's a condominium, we just ask for a letter
16
17
     from the condo association approving the plans, the
     revision. But I'm assuming we don't need that because this
18
19
     is proposed by Trust itself, correct?
20
               CHRISTIAN KLEIN: That is -- that is my
    understanding.
21
22
               JIM MONTEVERDE: Okay. Let me -- give me one
```

```
1
     second.
2
               CHRISTIAN KLEIN: Thank you.
 3
               JIM MONTEVERDE: My assistant just disappeared.
 4
     So Mr. Klein, if you don't mind --
 5
               CHRISTIAN KLEIN: Mm-hm.
 6
               JIM MONTEVERDE: Just to cover all my bases, I'd
     like to make it a condition of the -- if we approve, give
7
8
     you the relief you're looking for that you submit a letter
     from the condominium association approving this
9
10
    modification. Would that be all right?
11
               CHRISTIAN KLEIN: We have no issue with that, no.
12
               JIM MONTEVERDE: Okay. Any questions from Members
13
    of the Board?
               If not, there is no correspondence in the file.
14
15
    And we will momentarily see if there's anyone on the next
16
    phone. Can we see if there's anyone calling in before I
17
    make my speech?
               STEPHEN NATOLA: No one's calling in.
18
19
               JIM MONTEVERDE: Anybody there? All right. No
     one's calling in. I will close public testimony. Any
20
    discussion among Members of the Board?
21
22
               STEVEN NG: Package management, that's a big thing
```

1 these days. 2 JIM MONTEVERDE: Say that again? 3 STEVEN NG: Package management -- a package room or shelf or something. 4 5 JIM MONTEVERDE: Oh, okay. Yep. Exactly. All right. And this is a -- one of our two variances for the 6 7 evening. So the variance we need to find, will be able to 8 have explained to us the hardship. But I think as I'm reading through that criteria, 9 10 it's really owing to the, you know, shape or topography of 11 such land or structures, and it's certainly about the structure and its position on the site, and the fact that 12 the existing entry enters from the side of the building and 13 that this is just a fairly minor improvement of the existing 14 15 entry circumstance. 16 So I will enter that as the hardship. 17 If no discussion, I will move on to a motion, 18 then. 19 The Chair makes a motion to grant relief from the requirements of the Ordinance under Sections 5.31 --20 21 DANIEL HIDALGO: Sorry, Jim? 22 JIM MONTEVERDE: Yep.

```
1
               DANIEL HIDALGO: Sorry, did you ask about special
     -- the public comment? Or maybe I missed that, but I just
 2
 3
               JIM MONTEVERDE: Yes. There was no one. No one
 4
 5
    calling in.
 6
               DANIEL HIDALGO: Oh, okay. Sorry. Sorry about
 7
     that.
 8
               JIM MONTEVERDE: I just decided not to make my
    usual soliloguy until I needed -- I found out if there was
 9
10
     someone there.
11
               DANIEL HIDALGO: Oh, okay. Got it.
12
               JIM MONTEVERDE: But there was no one calling in.
    So a motion.
13
               The Chair makes a motion to grant relief from the
14
15
     requirements of the Ordinance under Section 5.31 and that
16
    has to do with the left side setback, since this
17
    construction and the window will be in the left -- new
    window will be in the left side setback.
18
               And Section 8.22.3 for a Nonconforming Structure
19
20
    and 10.30 for a Variance. And those conditions, which we
    need to find all of the following are:
21
22
               a) a literal enforcement would involve a
```

substantial hardship. I think that is correct, because they wouldn't be able to improve this little entry, and the entry is minuscule as it stands.

- b) The hardship is owing to -- and as I said, it's really the topography of such land or structures, and it's really the structure's position on the land close to the property line and the fact that the building enters from the side and the existing entry is really de minimis and needs to be enlarged.
- c) And lastly that desirable relief may be granted without either substantial detriment to the public good or nullifying or substantially derogating from the intent or purpose of this ordinance, which is correct.

So it would meet all the criteria of Section 10.31 for a variance.

On the condition that the work proposed conforms to the drawings entitled, "41 Concord Avenue Condominium" prepared by Approach3, dated June 7, 2024; initialed and dated by the Chair.

And further, that we incorporate the supporting statements and dimensional form submitted as part of the application.

```
1
               Further, that the variance is granted
2
     incorporating the following condition: and that is that the
 3
    proponent will submit to Inspectional Services for the file
    a letter from the condominium association approving these
 4
 5
    plans.
 6
               On a voice vote, please?
7
               Steven?
8
               STEVEN NG: In favor.
9
               JIM MONTEVERDE: Thank you. Virginia?
10
              VIRGINIA KEESLER: In favor.
11
               JIM MONTEVERDE: Thank you. Daniel?
12
               DANIEL HIDALGO: In favor.
13
               JIM MONTEVERDE: Thank you. Tom?
               THOMAS MILLER: In favor.
14
15
               JIM MONTEVERDE: Thank you. And Jim Monteverde in
16
    favor.
17
               [All vote YES]
               JIM MONTEVERDE: Five in favor. The relief is
18
19
    granted.
20
               CHRISTIAN KLEIN: Thank you, Mr. Chairman.
                                                           Thank
21
    you to the Board.
22
               JIM MONTEVERDE: You're welcome.
```

1 2 (8:27 p.m.)3 Sitting Members: Jim Monteverde, Steven Ng, Virginia Keesler, Daniel Hidalgo, and Thomas 4 5 Miller JIM MONTEVERDE: Next case is BZA-1140091 -- 325 6 7 Binney Street. 8 Mr. Le Ray, are you joining us this evening to 9 present this to us? 10 CHARLES LE RAY: Yes, sir. I'm here. There was a 11 bit of a delay as I was getting promoted. 12 JIM MONTEVERDE: Okay. If you're with us, if you 13 could introduce yourself and begin. CHRISTIAN KLEIN: Certainly. Good evening. I'm 14 15 Charles Le Ray with Dain, Torpy, Le Ray, Wiest & Garner at 16 175 Federal Street in Boston, representing Moderna. 17 There's a little bit of a mistake on the form that 18 says the petitioner is ARE. ARE is the owner of the 19 building, and they've signed the ownership form, and have 20 agreed to the proposal. But the proponent is actually Moderna, who is the tenant of the entire building. 21 22 JIM MONTEVERDE: Okay.

CHRISTIAN KLEIN: With me tonight are Jamie Kinch, who's the Head of Corporate Real Estate for Moderna and Michael Vickers of DCL Boston; that's the company that designed but proposed sign.

A little background: Moderna was formed in Cambridge in 2010. The company grew rapidly, expanding to several additional locations in the city. Today it employs over 200 Cambridge residents.

And when Alexandria Real estate permitted a lab office building at 325 Binney a couple years back, Moderna saw this as an opportunity to consolidate scattered operations into a single location in a location that would also have room for growth.

So today, 325 Binney Street is Moderna's global headquarters and its center for innovation. Moderna is proud to be located in Cambridge, proud of the role it's playing in the city's growing life-sciences ecosystem, and proud of the company's cutting-edge work with MRNA vaccine therapies. These include vaccines for COVID-19, influenza, and RSV that are on the market, and also many more in the pipeline.

And so Moderna would like to celebrate its

presence in Cambridge by displaying its name on its global headquarters. The Zoning Ordinance Sign Regulations would limit us to a wall sign with an area of not more than 60 square feet and a height of not more than 20' with external illumination. This is because we're in the Industry A-1 District.

By contrast, if we were directly across the street in the MXD District, none of these restrictions would apply.

The problem is that a fully compliant sign would be essentially invisible. As you approach the building on Galileo Way, there are beautiful street trees on both sides of the read.

And Galileo Way, as you approach the building, arcs to the right to join Binney Street. So the trees that were on your left march across in front of you.

And there's also a lovely pocket park that's been recently renovated directly in front of the building between Binney Street and Galileo Way. It's got both mature and new plantings, and further obscures the view of the bottom floors in Moderna's building. So a compliant sign would be invisible.

We're seeking relief to locate a sign nearer the

top of the building where it would be visible above the trees and given the height and the need for the sign to be actually legible, we're asking for a somewhat larger sign.

As I think you know, Cambridge measures signs by the size of the smallest geometric shape that would encompass all of the elements. So in this case, it's a rectangle 5'9" tall, 24' 8" wide. That's an area of approximately 182 -- sorry, 142 square feet.

As you'll see when we get to the application materials, the letter use an open font with relatively narrow lines, and then there are blue bars below. So most of the sign area will be empty with the building's façade visible behind and around the letters.

And finally, the building's façade, this end of the building is not a flat wall. It reads like two rectangular masses coming through each other at an angle, or like fingers starting to interweave with each other. And so, -- and the building façade itself also has an articulation.

So if you look at this, and we'll see a larger version of this later, but you see each window has sort of a triangular shadow behind it. That's because that wall goes

in and out, in and out, in and out, as you go along.

And so, if we did a halo illumination like Amgen does at the building basically across the park, with a halo illumination you have lights at the back of your sign elements. They project onto the building façade, and the light then reflects off the façade past the sign elements towards the viewer. And so, the sign elements end up looking sort of like shadows or dark outlines, with the halo light around them.

But when you try to do that on an uneven wall, you have some lights that are closer, some lights that are farther apart. And so as you read across the suggest or across even individual letters, you get lighter and darker backlighting, night and you end up with sort of a very muddy, unpleasant look to it.

So for that reason, we're asking to do internal illumination.

And this design has evolved over many months in internal discussions, discussions with the DCL, the engineering team that designed the sign and with various stakeholders.

Page 100

Originally, we proposed it for the upper left-hand corner of the building, and because of the way that this façade sort of bends, that would have faced more towards -- more towards the engine building and the southwest of Galileo Way.

Whereas the current location on the right-hand façade points directly at the MXD District, and it's visible for a teeny sliver of the Industry B District that Amgen is in as you go basically along the edge of Galileo Way.

So if you look at the picture there, the original proposal was the upper left-hand corner. And the sign would have been bigger so that it would have read appropriately for the size of that area.

We moved the proposal to the right, reduced the size of the sign to what we think is adequate to be visible, but not overly large.

In terms of the Variance Standards, the first is a literal enforcement would be hardship. Well, a literal enforcement would put the sign down at the very bottom, and as I mentioned, it would be essentially invisible.

And it needs to be related to soil, shape, or topography. Well, there aren't any soil conditions, and

Page 101

this is an unusually shaped lot, but that's not really the issue either. It's the topography of the land and structures.

If we were on a hill, we'd be all set. The bottom of the building would be up above the trees. But because we're not on a hill, we're at the same level as the park and Galileo Way, we've got all these beautiful trees that are directly in the way blocking the view.

And we think relief can be granted without substantial detriment or nullifying the Ordinance. This is a really unique situation where you have a building facing the MXD District where the proposed sign would be allowed by right, and where it's blocked by a public park.

And in fact, if you put this sign across the street in the MXD District, it would be visible from residential neighbors behind us and to the sides of us, whereas at the current location, it's essentially only visible from the MXD District.

And so, we don't think it's injurious to the neighborhood, and you're not in danger of creating any sort of a bad precedent, because there just aren't other places where you've got a building facing the MXD District with a

public park in the way.

And, as you know, the file includes letters of support from Councillor Azeem, Councillor Toner, the Cambridge Chamber of Commerce, and East Cambridge Business Association.

And we were before the Planning Board two nights ago, and as some of you know, the Planning Board has a near perfect record of voting to recommend against sign variances. And in this case, they decided not to vote against this, to make no recommendation whatsoever, which as they told him was, "the happiest I've ever been to receive no recommendation."

And with that, we're -- why don't we go through the slides.

This one is the end of the building, and to the right you see the visibility map.

If we go to the next screen, the visibility map is larger.

So you can see where the sign location would be.

The green is where the sign will be very visible and easily read. As you get down into the orange, you're farther away so that you can see it, but farther away the harder it is to

read. And beyond that, it's not visible.

So as you see, it's really visible in the MXD District across the street and down Galileo Way and not in other areas.

Next slide, please?

So this is a rendering of what it would look like. And you can see here a little better the façade of the building; articulates in and out. And then to the left you see the -- where the two masses of this façade sort of push through each other, if you will.

Next slide, please?

This is a rendering of what it would look like at night. And we understand under the Cambridge General Sign Regulations we could not keep it illuminated after 11:00 p.m.

Next slide, please?

And this is a view from -- as it says, Broadway on Galileo. And so, you can see sign on the building there.

And obviously as you drive down Galileo Way or walk down the sidewalks closer to the building, the sign becomes larger and easier to read.

And next please?

And this is just an end-view rendering showing the sign on the building. And I think the next slide shows the sign in some detail. So here's the full sign. You see the height at 5'9" and the width at 24'8".

And the top of the sign, the top of the D would be 98'6'' above grade.

And that's the presentation.

JIM MONTEVERDE: All right. Thank you. Any questions from Members of the Board?

If not, I will summarize the correspondence we have in the file, and then open it up for public comments.

First, we have a letter from Heather Hoffman dated today, December 12 asking that the BZA "uphold the Sign Regulations and deny this request. You should not encourage this behavior by granting the request.

"The fact that the nearby MXD District allows such signs is a reason to get rid of the district's exemption from Article 7, not an argument in favor of spreading the exemption to places the City Council was forced to rescind, et cetera, et cetera."

And there is Councillor Burhan Azeem, dated November 26, writing in support of the proposal.

```
1
               There is a letter from Paul Toner, the Councillor,
     dated December 10, expressing support for the application.
2
               A letter from Dan Katz, 218 Thorndike Street dated
 3
    December 10. "Strongly encourage the Board to deny
 4
    Moderna's request." And it ends, "If the current
 5
     regulations are felt to be inappropriate, then the
 6
7
     regulations should be changed for everyone, not just
    Moderna."
8
               And from Jason Alves of the East Cambridge
9
10
    Business Association, dated November 14, offering their
11
     enthusiastic support.
               David Mayer, Cambridge chamber of Commerce dated
12
13
    October 30, expressing support.
               And that is the correspondence we have in the file
14
15
     summarized.
16
               Do we have anybody calling in?
17
               STEPHEN NATOLA: Yes.
               JIM MONTEVERDE: All right. Hold on. Let me do
18
19
    my thing.
20
               STEPHEN NATOLA: Jason Alves?
21
               JIM MONTEVERDE: Oop.
22
               JASON ALVES: Did you want to do your thing?
```

JIM MONTEVERDE: Go right ahead. Just state your name and introduce yourself.

JASON ALVES: Jason Alves. I'm the Executive

Director of the East Cambridge Business Association, 544

Cambridge Street. As you mentioned, we sent out a letter in support of this, and I think it's great that Moderna has chosen Cambridge as its headquarters. It's certainly something that the city should celebrate.

But we're supportive of the sign. I think it's kind of been stated you can't see the sign from anywhere except the MXD. It's -- the way the building's shaped, it's at an angle that faces all the buildings that are allowed to have this type of signage. I think there's lots of reasons that it makes it okay for these folks to have a sign as well.

So if you just, you know, I we sent a letter, but wanted to take a minute and offer some -- offer our verbal support for this application as well and hope that you find favor with it.

Thanks.

JIM MONTEVERDE: Thank you for calling in.

22 Anybody else?

STEPHEN NATOLA: Nope.

JIM MONTEVERDE: No one else? That's it? We will close public testimony.

Any discussion among Members of the Board? Let me start.

I took a ride around -- I'm concerned with it.

But I'm concerned anytime we have a request to place a sign at the top of a building. I took a ride around Kendall Square, and I noticed the signage that apparently is allowed in the adjacent block of buildings were primarily very simplified, which was interesting.

Google was represented up at the top of their new building with a simple, "G". Marriott Hotel was represented at the top of their building with a simple, "M". Whether those were illuminated at night, I don't know.

I didn't see many other signs up top. I saw one or two for some of the lab companies on their buildings.

Most of those were fairly understated, in that they we were, yes, up high, but they were usually close to the color of the façade. They were there. You just had to look for it, but it was there.

This one I think beside the size -- and I also

notice that there's a large sign for Moderna above their front entry, which -- behind the glass, which if illuminated or highlighted would seem to be quite visible from the street and not needing to be at the top of the building.

So at the moment, I object to the height of the sign or the fact that there's no other investigation of alternatives; for instance, I see on the elevations we have in front of us on one of the 3D views that there is an eyebrow parapet above the two-story glass at the entry that would, I think, resolve the issue of the being at the tree or above the tree level, and yet not be at the top of the building.

So yes, it would -- may require some relief for the height, but not be as high as this proposal.

So that's my speech. I don't know how anyone else feels, but at the moment I'm not feeling I could support this one.

Anyone else?

STEVEN NG: Yeah, Jim. It's Steven Ng. I'm going to have to disagree with you on the view of this application. I think the siting, or the location of the sign has been very thoughtful. It does not really impose

itself on noncommercial site lines.

I think the façade design, since it's a faceted face, I think the current intent of going with it internally illuminated letters and so forth are probably the right way to go, and it also -- and to me the glowing type signs, sometimes they seem more imposing than currently what's proposed. It would just illuminate the letters and the accent, dotted, dashed line below.

So I'm kind of in support of it, just because of when I do ride my bike down that main thoroughfare, it is well -- the trees are wonderful to have on the street, but really, I think to put up a sign there, you know, I think the only place is that face of the façade that's way up at the top.

And yeah, I think that's -- I think it's well thought-out, and I think it does what they want it to do, and it doesn't impose on the neighborhood, and -- you know, I think it's a way to support the business in Cambridge.

JIM MONTEVERDE: Okay. Thank you. Anyone else?
Any other Board Member have any comment?

VIRGINIA KEESLER: I agree with Steven, and I think the visibility map to me was convincing in terms of

```
1
    not finding the sign to be imposing on residential areas.
2
               JIM MONTEVERDE: Okay. Thank you. Daniel?
     Thomas?
 3
 4
               THOMAS MILLER: I agree with Steven also. And I
 5
     do think that it's one of the purposes that we need to bear
     in mind to encourage appropriate economic development.
 6
7
                And I -- to me it is meaningful that this is a
8
     company that's had a truly global impact, and we should be
    happy that they've chosen to locate in Cambridge.
9
10
               And I also agree this is just an unusual situation
11
     and given that they've done a very tasteful job of creating
12
     the sign.
13
               JIM MONTEVERDE: Thank you. Daniel?
14
               DANIEL HIDALGO: Yeah. I am -- I agree with this.
15
     I pass by this area all the time. And I think it's in
16
     keeping with the neighborhood, and I see the point about the
17
     trees. So.
18
               JIM MONTEVERDE: Okay. Very good. Let me move,
19
     then, to a motion. And this is a variance.
20
               The Chair makes a motion to grant relief from the
     requirements of the Ordinance under Sections 7.16.22.c and
21
22
    Section 10.30 for a Variance. And I think the proponent
```

```
1
     talked about the hardship because of the lot, the way that
     the building faces and the park in front of the building.
 2
 3
               On the condition that the work proposed conforms
     to the drawings entitled "Moderna, Cambridge, Building ID
 4
     Signage, " prepared by DCL Design Communications Limited and
 5
     dated -- undated. I'll put today's date on it -- initialed
 6
 7
     and dated by the Chair.
 8
                And further, that we incorporate the supporting
     statements and Dimensional Form submitted as part of the
 9
     application.
10
11
               Board Members, on a voice vote, please?
                                                        Thomas?
12
               THOMAS MILLER: In favor.
13
               JIM MONTEVERDE: Thank you. Daniel?
                                In favor.
14
               DANIEL HIDALGO:
15
               JIM MONTEVERDE: Thank you. Virginia?
16
               VIRGINIA KEESLER: In favor.
17
               JIM MONTEVERDE: Thank you. Steven?
18
               STEVEN NG: In favor.
19
               JIM MONTEVERDE: Thank you.
20
               JIM MONTEVERDE: And Jim Monteverde opposed.
21
               [Four vote YES, one vote NO]
22
               JIM MONTEVERDE: That's four in favor. And the
```

relief is granted. CHARLES LE RAY: Thank you all. JAMIE KINCH: Thank you. JIM MONTEVERDE: You're welcome.

1 2 (8:51 p.m.)3 Sitting Members: Jim Monteverde, Steven Ng, Virginia 4 Keesler, Daniel Hidalgo, and Thomas 5 Miller JIM MONTEVERDE: Next case is BZA-114310 -- 14 6 7 Greenough Avenue. 8 Richard Curl, or Daniel? RICHARD CURL: Richard Curl here. 9 10 JIM MONTEVERDE: Okay. Just introduce yourself 11 for the record. 12 RICHARD CURL: Yes. I'm the architect for the project at 14 Greenough. We're applying for a special 13 permit for a 3' x 18' single-story addition to an existing 14 15 single-family home that's currently nonconforming for a 16 side, rear setback. Our addition does not create any new 17 nonconformity. Yeah, let me start this. So the addition is the 18 19 part that's highlighted in red there. So we're not any 20 closer to the rear yard or closer to the side yard than the house is currently. It's not really visible from the 21 22 street, it's a single story.

```
1
               And you can flip to the next page.
2
               The page after that, we'll look at the elevations.
 3
               And so, this is the plan. So basically, what
    we're doing is we're expanding to increase the kitchen size.
 4
 5
               And then flip to the next one.
 6
               And you can see on the right, on the lower left
     the four windows. And then on the left it's that narrow
7
8
    window. So it's just a single-story adjacent with a small
9
    shed roof on top.
10
               And I'm happy to answer any kind of questions you
11
    have.
12
               JIM MONTEVERDE: And the relief you need to do to
    be able to do this is --
13
14
               RICHARD CURL: A special permit.
15
               JIM MONTEVERDE: Right. But why? Because you're
16
    in the --
17
               RICHARD CURL: Because the existing house is
    within both the side and rear setbacks.
18
19
               JIM MONTEVERDE: Right. So it's the side and rear
     setback that you're --
20
21
               RICHARD CURL: Correct.
22
               JIM MONTEVERDE: Okay. Any questions from Members
```

of the Board?

If not, I'll open it up to public commentary. We have no correspondence in the file. So let me open it up to anyone calling in. Anyone out there?

STEPHEN NATOLA: There's two people. No, you're all good.

JIM MONTEVERDE: Okay. There's no one calling in, so I will close public commentary. Any discussion among Members of the Board? Or are we ready for a motion? And this is a special permit.

All right. I will move to a motion.

The Chair makes a motion to grant relief from the requirements of the Ordinance under Sections 5.31, and that's specifically for the rear yard and right-side setback for the proposed addition. And under Section 8.22.2.d for a Nonconforming Structure and 10.40 for a Special Permit. And those requirements -- that criteria is:

- a) It appears the requirements of this ordinance cannot or will not be met. That is correct.
- b) Traffic generated or patterns of access or egress would cause congestion, hazard, or substantial change. It will not.

1 c) The continued operation of or the development 2 of the adjacent uses as permitted in the Zoning Ordinance 3 would be adversely affected. They will not. 4 d) Nuisance or hazard would be created to the detriment of the health, safety, and/or welfare. It will 5 not. And 6 7 e) For other reasons, the proposed use would 8 impair the integrity of the district or adjoining district. And it will not. 9 10 So it meets all the criteria for Section 10.43 for 11 a Special Permit. On the condition that the work proposed conform to 12 the drawings entitled, "Shirai - Da Costa Residence, 14 13 14 Greenough Avenue," prepared by Curl Architecture, dated 15 November 11, 2024; initialed and dated by the Chair. 16 And further, that we incorporate the supporting 17 statements and Dimensional Form submitted as part of the 18 application. 19 Board Members, on a voice vote, please? Steven? 20 STEVEN NG: In favor. 21 JIM MONTEVERDE: Thank you. Virginia? 22 VIRGINIA KEESLER: In favor.

JIM MONTEVERDE: Thank you. Daniel? DANIEL HIDALGO: In favor. JIM MONTEVERDE: Thank you. Thomas? THOMAS MILLER: In favor. JIM MONTEVERDE: Thank you. And Jim Monteverde in favor. [All vote YES] JIM MONTEVERDE: That's five in favor. Relief is granted. RICHARD CURL: Great. Thank you very much. JIM MONTEVERDE: You're welcome.

Board Members, if you could hang around for a moment?

So I wanted to give you all an update on the Dormer Petition for the revision to the Zoning Ordinance that we prepared and sent on its merry way to the City Clerk's Office.

So it wound its -- it was presented to the Ordinance Committee of the City Council. I think I told everyone about that. And at the end of that discussion, the Ordinance Committee asked Staff, that being the Law Department and the Community Development Department, to edit the petition as we had drafted it. And they did that.

And that actually was available to us late this afternoon. And I think it circulated that to everyone; hopefully everyone got it.

And that is to be presented to the full City

Council this coming Monday, and there's an opportunity for

public comment, either by writing in or by -- it'll be a

remote meeting, and I think you can join in electronically.

I think Bill and I have -- Bill Boehm and I have talked

about being there in person to speak.

I read what the Community Development -- the edits

```
they made, and I have -- I take no exception to it. They've -- we've got just about everything we were looking for.
```

One thing -- two things that changed based on comments from the [open that thing I sent you?] -- comments from the City Councillors who were members of the Ordinance Committee is one. It was separating additions from dormers.

Yeah, if you could drop down a bit. You go to the -- I think the second page or the third page.

No, the documents were on -- yeah, keep going. Keep going. Keep going.

Okay. Here are the changes. So when we wrote this up originally, I will admit that I inadvertently, or certainly didn't realize we were striking out not just construction of a dormer, but an addition.

So we -- when we were trying to specific that we were looking to create some as-of-right condition for dormers, we actually got rid of additions, inadvertently.

So what -- and so, Community Development saw that and some Councillors commented on the difference between an addition and a dormer, and I think what the Community Development has done here under paragraph h) is they left that verbiage in place where -- and I think this is just the

way the Ordinance reads now: it just takes out the word,
"dormer" so that you could do an addition now to a second
story of a single or two-family that would violate the yard
or height requirements, but if it violates the FAR or
anything else, you've got to come in front of the Board,
which was our intent.

THOMAS MILLER: Right.

jIM MONTEVERDE: And then it introduced paragraph
 i) which now has all the dormer verbiage that we created
 before. So that part I'm fine with. It's a little
 complicated, but I'm fine with it.

The -- can you go down a little further, Stephen?

The one other comment that changed -- edit, that

came from the Councillor is item 5). Where this originally

had said -- and we repeated the language that's in the

Dormer Guidelines now, that each dormer should have a

minimum of 50 percent glazing window, they wanted to reduce that.

City Councillors were concerned this was really on an energy efficiency discussion, which I kind of -- I gave up arguing about it, because I don't know that it has anything to do with the percentage of glass, it's more the

```
1
     energy performance of the whole component that you're
2
     constructing.
 3
               But Community Development interpreted it this way
     and said it'll have a minimum of 30 percent. This was
 4
 5
     reviewed by the Historic Commission and by the Planning
    Board, and they were both okay with it, so I don't feel like
 6
     falling on my sword for that. The rest of it worked fine.
7
8
               So if everybody is okay with this, then I will go
9
     on Monday. Hopefully I can speak, and basically say we the
10
    Board and me on behalf of the Board, support the edits, and
11
     ask the City Council to -- whatever they do, approve it.
12
               STEVEN NG: Sounds good.
13
               JIM MONTEVERDE: Everybody agree? Any objections?
               DANIEL HIDALGO: Sounds great to me.
14
15
               STEVEN NG: Yeah.
16
               JIM MONTEVERDE: If not -- and a lesson learned is
17
     anyone wanting to make a change, it takes you a year and a
18
           [Laughter] Got to love the democratic process.
19
               Okay. That was it. Thank you very much.
20
               COLLECTIVE:
                            Thank you.
               JIM MONTEVERDE: Enjoy your holidays, have a happy
21
22
    New Year, see you in January.
```

```
STEVEN NG: You too. Thanks.
 1
 2
               JIM MONTEVERDE: All right. Take care.
 3
               THOMAS MILLER: Bye.
               JIM MONTEVERDE: Bye-bye. Goodnight.
