**P R O C E E D I N G S**

(Sitting Members: Hugh Russell, H. Theodore Cohen, Pamela Winters, Tom Sieniewicz, Catherine Preston Connolly, Steven Cohen.)

HUGH RUSSELL: Let's get started.

This is a meeting of the Cambridge Planning Board, and the first item on our agenda is the review of Board of Zoning Appeal cases.

LIZA PADEN: One of the cases is 52 Church Street listed as a Sign Variance. This sign exceeds the height limit of 20 feet, and it's internally illuminated and the dimensions exceed the 30 inches. So this is The Sinclair in Harvard on Church Street. And The Sinclair is the new venue where you go up a flight of stairs and it's set back from the street and it has a very art deco sign.

The Cambridge Historical Commission has

1 reviewed it and they are in support of it. I  
2 actually have another copy for this end of  
3 the table.

4 TOM SIENIEWICZ: So, Liza, it's set  
5 back from Church Street considerably as I  
6 understand it?

7 HUGH RUSSELL: 30 feet maybe.

8 LIZA PADEN: Yes, about 20 feet set  
9 back. And they do have a performance  
10 schedule that will be up in a marquis sign.  
11 They're actually going to use the moveable  
12 letters that hang on the sign board.

13 HUGH RUSSELL: So, Historical  
14 Commission didn't choose to find a formal  
15 storage warehouse which consists of the first  
16 three or four floors of that building?

17 LIZA PADEN: No.

18 I didn't know if anybody on the Board  
19 had a comment about it or not.

1                   HUGH RUSSELL: Right. I would think  
2                   this would fall in the general category of  
3                   the Historical Commission does design review  
4                   in Harvard Square and they're tough.

5                   (Steven Winter Seated.)

6                   LIZA PADEN: Yes.

7                   Yes, Pam.

8                   PAMELA WINTERS: This is  
9                   Mr. Rafferty's case. Is he here tonight?

10                  LIZA PADEN: No, he's not here yet.

11                  TOM SIENIEWICZ: Mr. Chair, I'm sure  
12                  that the Zoning Board will take into  
13                  consideration all the particulars, but the  
14                  particulars of the way of where this is on  
15                  the site, it is set back significantly from  
16                  Church Street, down an alley -- a service  
17                  alley, so to my eye it may warrant some  
18                  consideration for Zoning relief on that  
19                  basis, and I would like to send that message.

1 I agree, the Historical Commission is the  
2 toughest when they do design review, but  
3 ultimately I don't want the Zoning Board to  
4 stand on ceremony in particular with this  
5 site.

6 HUGH RUSSELL: Okay.

7 LIZA PADEN: Are there any other  
8 cases that the Board wants to look at?

9 H. THEODORE COHEN: What is the  
10 Somerville Avenue sign?

11 PAMELA WINTERS: That's the one I  
12 was just going to ask, too.

13 LIZA PADEN: Okay. This is going  
14 back to the building where Pier 1 Imports  
15 used to be. Yes, Pier 1 Imports. So this is  
16 the next proposal. This is for a Sleepy's.  
17 And their proposal is to put in a sign that's  
18 above the second floor sill line which is  
19 what the height limit is. And here's some

1 more of the plans here.

2 HUGH RUSSELL: So this doesn't  
3 actually show the sign?

4 PAMELA WINTERS: Ted, you have the  
5 sign?

6 H. THEODORE COHEN: Yes.

7 PAMELA WINTERS: Let's see.

8 HUGH RUSSELL: Is it dimensionally  
9 conforming?

10 LIZA PADEN: Let me see what they  
11 finally came in with because they changed  
12 their mind a number of times.

13 H. THEODORE COHEN: So there are two  
14 signs?

15 LIZA PADEN: Right. So what they  
16 did do is they kept the letters at 30 inches,  
17 which is the maximum it can be for internally  
18 illuminated, and the entire sign is 40 square  
19 feet. It's the location that they're looking

1 for to be above the second floor sill line.

2 HUGH RUSSELL: This design doesn't  
3 have an established sign between the first  
4 and second floor.

5 PAMELA WINTERS: This is another  
6 Mr. Rafferty?

7 LIZA PADEN: No.

8 PAMELA WINTERS: No? Sorry, no,  
9 you're right.

10 H. THEODORE COHEN: Wasn't there a  
11 ZBA case last week or a couple weeks ago for  
12 Pot Belly?

13 LIZA PADEN: Yes. Pot Belly's has  
14 asked for a fast order food signage. Their  
15 signage will be on the ground floor. This  
16 building tenant -- there was another building  
17 tenant, Walgreens, and they received the  
18 Variance from the Board of Zoning Appeal for  
19 the location, I believe, but not the -- the

1 Walgreens was asking for size and internal  
2 illumination and they didn't get those parts  
3 of the Variance. I believe the location on  
4 the building was granted a Variance.

5 H. THEODORE COHEN: Do we know what  
6 all three enterprises' signs will look like  
7 together?

8 LIZA PADEN: Yes.

9 HUGH RUSSELL: Not on one drawing.

10 LIZA PADEN: Not on one drawing, no.

11 HUGH RUSSELL: Well, since Bill  
12 isn't here, he would ask for that drawing or  
13 at least for that drawing to be available to  
14 the Zoning Board so they can understand what  
15 the whole building is like. It seems to me  
16 there's a risk of this where they're seeming  
17 really jumbled with a lot of signage.

18 LIZA PADEN: Yes.

19 HUGH RUSSELL: And I'm kind of

1 surprised that signs this big are conforming  
2 in size.

3 LIZA PADEN: Well, it's 40 square  
4 feet and they have enough retail frontage on  
5 that building. And the building owner has  
6 allocated a certain amount to each tenant.

7 HUGH RUSSELL: They have two signs.

8 LIZA PADEN: There's a lot of  
9 signage on this building. It has Somerville  
10 Avenue. It has White Street. And because of  
11 the way sign allocation is measured, there's  
12 an alley overlooking the garage parking and  
13 that's considered to be a frontage, so that  
14 is included.

15 HUGH RUSSELL: I can't tell from  
16 what's before us.

17 LIZA PADEN: Okay.

18 HUGH RUSSELL: You know, what --

19 H. THEODORE COHEN: Seems like a

1 huge amount of signage for one building.

2 LIZA PADEN: Okay.

3 STEVEN COHEN: But that's  
4 exacerbated that -- the building wasn't well  
5 designed for signage. And I think further  
6 exacerbated by the fact that many of these  
7 signs are what we call formula retail, in  
8 short contrast to the other case, which is  
9 again a distinctive and unique retailer here.  
10 You know, Sleepy's well, that could be any  
11 place and it's going to make the whole  
12 building look like a suburban mall, but I  
13 don't know that there's anything under the  
14 code that we can say or do about that.

15 HUGH RUSSELL: Right. The pull for  
16 me is that this may actually be an okay place  
17 to put a sign.

18 STEVEN COHEN: You know, in a  
19 multi-tenant building we really should be

1           evaluating each individual sign in the  
2           context of the entire building signage.

3                   HUGH RUSSELL: So we could recommend  
4           that the Zoning Board, and if they took that  
5           to heart, they might bounce it back to us  
6           and, say okay, then we'll get you to what you  
7           need to do, and then I don't think we should  
8           fail to make a recommendation at this time  
9           because we presume they're going to be heard.

10                   LIZA PADEN: On the 23rd, this  
11           Thursday.

12                   CATHERINE PRESTON CONNOLLY: Just to  
13           clarify, though, the only relief they're  
14           looking for is the height, the location, not  
15           the amount of signage?

16                   LIZA PADEN: Correct.

17                   HUGH RUSSELL: Right.

18                   PAMELA WINTERS: So, I had a  
19           question about -- I left my glasses at home

1           tonight. And this is Mr. Rafferty's case,  
2           155 Webster Ave.?

3                   LIZA PADEN: Okay.

4                   PAMELA WINTERS: Converting the  
5           single-story commercial structure on a lot  
6           containing three-family dwelling units.  
7           Could you tell us a little bit more about  
8           that, Liza?

9                   LIZA PADEN: So this development  
10          requires -- this proposal requires a Special  
11          Permit from the parking regulations. They  
12          are, excuse me, they are -- I'm sorry,  
13          there's only one parking space and they're  
14          required to have one for each unit. And  
15          they're requesting to have four dwelling  
16          units and they'll only have one space --

17                   PAMELA WINTERS: I see.

18                   LIZA PADEN: -- on their lot.

19                   And a Variance for lot area per

1 dwelling unit is the other one.

2 HUGH RUSSELL: I'm guessing from the  
3 description there's no new construction, just  
4 using the existing buildings?

5 ATTORNEY JAMES RAFFERTY: There's a  
6 square structure on the lot that's been there  
7 for 70 years and it was a corner grocery  
8 store. It was the candy store, and it's been  
9 unused. And so the owner hired Mr. Ellsworth  
10 to come up with a very attractive but  
11 admittedly small dwelling unit, but it's  
12 trying to make some functional use out of the  
13 structure which has been nothing more than a  
14 storage shed but it sits rather prominently.  
15 So it did look like there was an opportunity  
16 to create something there.

17 LIZA PADEN: So do you want to pass  
18 on any comments or leave it to the Board of  
19 Zoning Appeal?

1                   HUGH RUSSELL: It strikes me that  
2                   this is the only thing the Board of Zoning  
3                   Appeal deals with. It's, you know, it's a  
4                   reasonable use. It's just how does it fit?  
5                   Is there a huge parking problem here that one  
6                   more unit will cause an enormous disruption?  
7                   Who knows, but that's what they'll find out.

8                   LIZA PADEN: Yes, okay.

9                   PAMELA WINTERS: Great.

10                  LIZA PADEN: Any other BZA cases  
11                  anybody want to look at?

12                  HUGH RUSSELL: Okay, thank you.  
13                  Here's the paperwork.

14                  LIZA PADEN: Okay.

15                  HUGH RUSSELL: Do we have any  
16                  meeting transcripts?

17                  LIZA PADEN: We haven't gotten any  
18                  meeting transcripts since the last meeting.

19                  HUGH RUSSELL: Okay.

1                   LIZA PADEN: I'm going to fill in  
2                   for Brian.

3                   HUGH RUSSELL: So would you update  
4                   us then, please.

5                   LIZA PADEN: Okay. So the next  
6                   meeting is May -- I'm sorry, the next meeting  
7                   is June 4th and that will be a public hearing  
8                   for the Harvard Inn to convert to the  
9                   dormitory use that was touched on during the  
10                  Town Gown comments. It will also be the 240  
11                  Sidney Street which is a residential  
12                  development in Cambridgeport. And the  
13                  Phillips, Et Al Zoning Petition which is  
14                  Special Zoning District 2, a Zoning Amendment  
15                  District, and the standards in that Zoning  
16                  District.

17                  On June 11th we're going to have more  
18                  discussion on the K2-C2. I think it's going  
19                  to focus on Central Square.

1           June 18th is the Kaizer Zoning Petition  
2           for a Special District 8A which is in  
3           Cambridgeport. And there is Councillor  
4           Kelley's Zoning Petition to create a new  
5           Ordinance to allow for flat roofs to be  
6           converted to allow the collection of water  
7           and diversion from the storm drains. I'm  
8           sorry, diversion from the sewer drains so  
9           that rainwater run off -- we'll have the  
10          public hearing. It's like now I've described  
11          the whole petition to you.

12                 And July 9th, again, would be the  
13          Kendall Square/Central Square evening as that  
14          comes up.

15                 And in July we'll be back to two  
16          meetings a month.

17                         HUGH RUSSELL: And so the 9th and  
18          the 16th?

19                         LIZA PADEN: The 9th and 16th in

1 July. And then August 6th and 20th. And for  
2 people looking ahead, September 3rd and 17th.

3 HUGH RUSSELL: Okay, thank you.

4 Okay. The next item on our agenda is  
5 Planning Board case 276, 33 Cottage Park  
6 Avenue which we heard a lot of testimony in  
7 April.

8 Roger, did you want to kind of give us  
9 a picture?

10 ROGER BOOTHE: Yes. The Board -- is  
11 this working? The Board mentioned at the  
12 last meeting, especially some of the new  
13 members, that they would like a little more  
14 information to start off the hearings about  
15 the type of relief being sought and so forth.  
16 And while the two hearings we're coming up  
17 against now already started, we thought it  
18 would be good to have a little preamble on  
19 both of those.

1           So it's starting off with Cottage Park  
2 Avenue. There's a plan on the wall behind  
3 Steve there. I'm going to go over and point  
4 to it.

5           So this is a plan of area of focus on  
6 the Fawcett Oil site. Here's Massachusetts  
7 Avenue here, Cottage Park Avenue here,  
8 Brookford, Whittemore, and the Linear Park  
9 along here. So you see there's some larger  
10 buildings and the asphalted areas that serve,  
11 that were the Fawcett Oil site. It's quite a  
12 large piece of this part of the neighborhood.  
13 The Linear Park, of course, was set up in the  
14 '80s when the Red Line extension was in  
15 place, and some of the neighbors have been  
16 here a long time, and some of the Board  
17 members will remember that there was a whole  
18 discussion about whether that should be a  
19 park or parcelled off. And thank goodness I

1 think it was made into a wonderful park.

2 And then there were a series of special  
3 districts set up to try to deal with the fact  
4 that along what used to be a rail corridor,  
5 there were a lot of light industrial sites,  
6 like the one in question tonight. And so the  
7 idea was to have a sort of transitional  
8 Zoning that will allow continuation of some  
9 of those light industrial uses until which  
10 time as the conversion to residential would  
11 make sense. And there have been a number of  
12 cases along the Linear Park where that's  
13 happened. Normally the cornerstone of the  
14 project right down here along Linear Park was  
15 permitted probably 15 years ago. I'm not  
16 sure exactly what the date was on that. And  
17 this is a couple of larger buildings fit in  
18 with smaller contextual homes that were there  
19 all along. And then some people noted during

1 the hearing on the Fawcett Oil case that  
2 right across the way, the former Cambridge  
3 Lumber site has been permitted for  
4 transitional housing. And I know you can't  
5 see it that well from this distance, but the  
6 footprint, though those buildings are to this  
7 aerial photograph here. So more of an  
8 approach with the -- the Fawcett Oil site is  
9 definitely the largest one and probably the  
10 most complex in terms of all issues that the  
11 Board has been hearing about. And the  
12 hearing -- and we probably discussed some  
13 more tonight. So that's some of the context.

14 Todd, did you want to add anything to  
15 some of the background on that?

16 UNIDENTIFIED SPEAKER: The Norberg  
17 site? The Norberg site.

18 ROGER BOOTHE: What about it?

19 UNIDENTIFIED SPEAKER: You didn't

1 describe it for members who are new. And how  
2 it --

3 ROGER BOOTHE: I don't know what  
4 point you're trying to make. I just want to  
5 say that's the context for the Special  
6 Permits that are being sought.

7 HUGH RUSSELL: So the permits that  
8 are being sought are actually design review  
9 permits and so there aren't, you know, it's  
10 not a question of setbacks or floor area or  
11 uses. All of that is conforming. It's just  
12 review of the design and the criteria. We  
13 list it fairly briefly in the application in  
14 which we got in March.

15 So since we last met, we've received  
16 some new plans. So I presume that the  
17 Petitioner wants to present those to us?

18 ATTORNEY JAMES RAFFERTY: That's  
19 correct. Good evening, Mr. Chairman. While

1 Ms. Speakman is setting up, just to go over a  
2 couple items for the Board.

3 For the record, I'm James Rafferty with  
4 an address at 130 Bishop Allen Drive. I'm  
5 appearing on behalf of the applicant Robert  
6 Fawcett, Jr., who is seated in the front row.  
7 His family owns the property. This  
8 Applicant -- the design team is  
9 Mr. Boyes-Watson and Ms. Speakman, the  
10 traffic consultant, and David Biancavilla is  
11 the engineer. And our landscape architect is  
12 also present this evening because there has  
13 been a request that she give us some details.

14 It really is a project that we've spent  
15 a lot of time on, and it's encouraging that  
16 there's a high level of interest in this  
17 site. We were grateful that last evening we  
18 extended an invitation to update neighbors to  
19 see these plans so they wouldn't have to

1 experience them for the first time in this  
2 presentation. And 20 of our neighbors came,  
3 and we had a good, healthy exchange and once  
4 again we were able to hear concerns. And the  
5 concerns, I think, are -- can be categorized  
6 into two areas:

7 One deals with the overall design and  
8 massing of the multi-family building. And as  
9 there has been from the outset, there's a  
10 legitimate concern about traffic. Traffic  
11 distribution, the impact of traffic on  
12 residential streets. So we're hoping to  
13 demonstrate tonight how we've addressed both  
14 of those things. It may be of some interest  
15 to the Board, I don't know if Board members  
16 ever wonder what happens after an Applicant  
17 leaves here, after a night we had last month,  
18 everyone has a role on this side of the room.  
19 And my role happens to be to tell people now

1 relax, go home, and have a good night's sleep  
2 and we'll think about everything that was  
3 said and we'll begin to synthesize and try to  
4 understand the best way to proceed forward.  
5 We had a unique opportunity here, however,  
6 because I don't know if you noticed, likely  
7 there's been a local cinematographer who has  
8 been attending the meetings and I discovered  
9 that there was a You Tube video of the  
10 Planning Board hearing in April. I don't  
11 know if any of you have had an opportunity to  
12 go on You Tube. I must say you all look  
13 wonderful. Really, you have family and  
14 friends over some night, you should really  
15 show it.

16 One thing about those things, though,  
17 you're convinced everything you said was so  
18 smart and then you listen to yourself, and  
19 nothing against you, Mr. Cohen, you're a new

1 member, but you may want to watch that before  
2 the next hearing. But at any rate, you can  
3 come away with the conclusion that we were  
4 asked to look at this site and say, what is  
5 it that could be done differently? Because  
6 of this language is Special District 2, that  
7 talks about the form that's consistent with  
8 the neighborhood, and I'm kind of  
9 paraphrasing here. And we all know it, and  
10 we identified it off the bat, and Mr. Cohen  
11 spoke first. And what you asked us to do, if  
12 you looked at this question, show us what  
13 you've done. And if you -- you know, look at  
14 other alternatives and share them with us.  
15 So we've been, a project team meets and says  
16 well, what do we do now? I say to them well,  
17 look, you just want to get a permit and be  
18 over and be done with. You heard what they  
19 said. Give them what they want and you get

1           yourself a permit. And that's tempting and  
2           lawyer talk, but on our team we have  
3           Mr. Boyes-Watson, and I say this with all  
4           sincerity, he was resistant. He's been  
5           studying this site and he's convinced that  
6           simply cutting the building in half wouldn't  
7           work. So he had all types of other ideas  
8           that needed to go to the heart of this thing,  
9           and we spent weeks looking at those things  
10          and pricing those things, and at the end of  
11          the day, you know, it just -- we weren't  
12          getting too far. And the answer was, you  
13          know, we've got to go see Community  
14          Development shortly and show them what we  
15          come out with. Why don't we divide this  
16          building in two and go see Community  
17          Development. And we did that.

18                    Mr. Boyes-Watson came and his associate  
19                    and Mr. Fawcett came and we sat with

1 Mr. Boothe and Mr. Dash and we said here's  
2 what we got. We think this is what the  
3 community wants out of this project. And the  
4 building was divided in two and you started  
5 to see a few changes and all that. And  
6 Mr. Boyes-Watson out of nowhere says, you  
7 know what we should do here -- and he was too  
8 far to kick him because you don't do that.  
9 You're still not going to fix the problem  
10 here because the problem here is the context  
11 drops off at the end of Cottage Park and at  
12 the end of Whittemore. And you've got to  
13 build the residential context at the edges of  
14 this site and then you have to -- you could  
15 put the building along the park and it could  
16 be a fabulous building. And cutting that  
17 building in half is a hollow gesture that  
18 will do nothing for anyone. It will create  
19 two buildings, each one with one elevator.

1 You lose the efficiencies if one elevator is  
2 out. And no one will ever experience it, and  
3 it's a lose/lose. And he starts tracing out  
4 on paper, and he talks about a Brattle Circle  
5 cluster of homes around the green and all  
6 that. And, you know, to the Fawcetts' credit  
7 they said, well, can we lease them? What  
8 will they cost to build? How is it all going  
9 -- and we really worked long and hard. I  
10 shouldn't say -- we, Ms. Speakman and  
11 Mr. Boyes-Watson did. They came up with this  
12 plan. We were late in getting it to the  
13 Board. Our apologies. We got it out Friday  
14 and we distributed it to the community on  
15 Friday and got it out to them.

16           Tonight what I'd like Mr. Boyes-Watson  
17 to do is walk the Board through the process  
18 what you asked, what Mr. Tibbs asked, Can you  
19 show us what you came up with? And I think

1           frankly, when you understand the  
2           relationships that have been created here in  
3           terms of trying to create the context here  
4           that is simply missing, I mean Cottage Park  
5           Avenue dead ends into an oil distribution  
6           with a chain link fence to the other streets,  
7           total asphalted place. You've seen from  
8           looking at the site plan what we've done  
9           here. We've created context at the end of  
10          Cottage Park Ave. by creating ten dwelling  
11          units contained in five townhouses. So those  
12          five townhouses allowed the building, the  
13          multi-family building to get reduced. And  
14          Mr. Boyes-Watson will walk you through the  
15          reduction of that change. And there are the  
16          first -- now allowed us to have a setback on  
17          the park of over 25 feet, and there was some  
18          surprise. In fact, we were surprised on our  
19          part when we met with Inspectional Services

1 when figuring out the Zoning envelope here  
2 that was a side yard. There was a suspicion  
3 that we cooked the books here, but that's a  
4 side yard for a whole range of geometric  
5 reasons for where the streets are and what's  
6 a front and what's a side. And we had the 12  
7 and a half feet, but we had to get there  
8 because we had to be 50 feet off the park and  
9 certain height and 35 feet. So it worked,  
10 but it was quickly pointed out in this  
11 hearing I think by members, it feels, it  
12 feels like it should be a rear yard. So by  
13 taking the ten units out, the first thing we  
14 were able to do is get that building off the  
15 park which is now 25 feet and it feels a rear  
16 setback on the park.

17 The second thing is the height of the  
18 building on the Cottage Park Ave. edge is  
19 reduced to three feet.

1 MARK BOYES-WATSON: Three stories.

2 ATTORNEY JAMES RAFFERTY: Three  
3 stories.

4 And what you'll hear tonight, too, is  
5 an attempt, and it's more than just an  
6 attempt, it's really an effort to create  
7 separate identities for two buildings. We  
8 anticipate the building on the Cottage Park  
9 Ave. side will have an address box and it  
10 contains about 25 or 30 of the units.

11 There's the third thing that's  
12 happening in this building in addition to the  
13 setback, and the reduced height is a notch  
14 that's created in the middle of the building.  
15 And Mr. Cohen, who frankly directed us and we  
16 saw that as a bit of a shortcoming, it was  
17 the least flattering edge of the building.  
18 We made a case of how unflattering a site it  
19 faced so that that edge wasn't our most

1 sensitive edge. It was a place where we put  
2 things where you might not otherwise, you  
3 know, want to put them, but that worked for  
4 parking. That worked for a bunch of stuff.  
5 But it was unrelenting. There was really no  
6 break. So Mr. Boyes-Watson explored that  
7 break both in terms of the functionality  
8 it's going to create at the ground floor a  
9 notch in a way that becomes a single  
10 corridor, single loaded corridor on floors  
11 two, three, and four. So actually an  
12 elevation in rendering you can really  
13 appreciate. And the site plan, you don't get  
14 to see the impact it has, but it goes to the  
15 point of, you know, if we just simply broke  
16 the building at that point, it would do very  
17 little, cost the building a lot of  
18 functionality, and we'd still have the  
19 building over on the Cottage Park edge.

1 Cottage Park Ave. edge, and we wouldn't be  
2 able to create the circulation. So those are  
3 the big moves.

4 On the site side I want to point out  
5 one of the benefits of the way the property  
6 has been subdivided. You recall that the far  
7 western edge of the site, we left a little  
8 land to buffer the proposed residential  
9 houses from the Grey's parking lot and that  
10 has -- and that is a great opportunity to  
11 create another point of access into the  
12 Linear Park. And that's a point of access  
13 that I think speaks to the shortcomings of  
14 the adjacent point of access, which is kind  
15 of a dirt path on the Grey's Site which was a  
16 challenge with the baby carriage. And I  
17 think the Chair noted challenges with the  
18 bicycle. But we're going to be able to  
19 create a point of access there, so we'll now

1 have two points of access on the site. But  
2 that isn't merely an accommodation or a  
3 remedy for the residents of the buildings  
4 that's for the entire neighborhood above it:  
5 Madison, Harrison, Magoun, they're not going  
6 to be able to have a defined portal into the  
7 park at that location as a result of the way  
8 we created the subdivision. It's worth  
9 noting on the subdivision we have recorded a  
10 subdivision plan, those are five separate  
11 lots of 5,000 square feet.

12 Mr. Fawcett told some neighbors last  
13 night that he has an offer on the top lot,  
14 right there from a buyer. Gentleman was  
15 actually here at the prior hearing. He has  
16 an offer from him, and that gentleman's  
17 intention is to construct a single-family  
18 home. He now has an offer for the site. One  
19 of these lots for a property owner, proposed

1 owner who wants to build a two-family home.  
2 So we haven't designed those units because  
3 we're not going to build those units.  
4 They're literally going to be sold to third  
5 parties. If those two conveyances were to  
6 occur, we've only got two lots left and the  
7 economics of this site, the highest and best  
8 house is for best units. It could be  
9 combined as townhouses if someone bought two  
10 lots or three lots. The reality is yes, it  
11 could. I'm not convinced that's very  
12 inconsistent with the overall development  
13 pattern of the neighborhood. It is  
14 different, but it really creates a  
15 residential edge at Whittemore, and that  
16 frankly was the inspiration of what was  
17 lacking at the Cottage Park Ave. edge which  
18 caused Mr. Boyes-Watson to make that change.  
19 Building-wise it's a very exciting story.

1           And I think if you watch the You Tube video,  
2           you'll see that this is a highly responsive  
3           movement.

4                     The most remaining nagging issue, of  
5           course, is traffic. And there's a, there's a  
6           range of views on traffic. But we have to  
7           acknowledge, and we have said consistently  
8           when we left here, we worked with our traffic  
9           engineers and even had discussions with the  
10          City Traffic Department about the possibility  
11          of creating two separate parking lots. One  
12          that would have a physical separation so  
13          traffic from the east would only be able to  
14          feed into a parking lot that serviced those  
15          three streets. Cottage Park had months and  
16          Tyler Corp., and then traffic on the west  
17          would go to a fixed parking lot that could  
18          only be accessed through the streets at  
19          Whittemore, Magoun, Madison, and that

1 neighborhood. What we heard back and what  
2 our traffic engineer was emphatic about, the  
3 city confirmed that was not ideal that the  
4 theory behind mitigating, the impact of this  
5 traffic was to have multiple points of access  
6 and multiple points of distribution. Now we  
7 have one street that isn't in the  
8 distribution network and, frankly, there's  
9 little we can do about that. That's a  
10 decision, a court order, that's impacted and  
11 we've been told we should do more about it.  
12 I would respectfully suggest that is within  
13 the municipality to make changes in that if  
14 they see fit. It's not within our ability to  
15 do so. So we have designed the building that  
16 does allow for access as many streets that  
17 come into the site. But the one thing we've  
18 done again is to put in a control gate so  
19 that the other principle of traffic

1 management that surfaced in our most initial  
2 meetings with the Traffic Department were not  
3 to allow for a scenario of where we have cut  
4 through traffic for the site. That the  
5 project wouldn't create an opportunity for  
6 traffic on the western side and the  
7 Whittemore Ave. edge to be able to cut  
8 through to avoid intersections on Mass. Ave.  
9 and cut through. As you recall, we had two  
10 gates at the edges before, controlled gates  
11 for parking. We kind of winced that people  
12 said it's a gated community like in Florida.  
13 That was the furthest from our mind. We're  
14 trying to prevent -- but reasonable people,  
15 and people said it to have some impact. We  
16 relocated the gates to the interior of the  
17 site. If you were to drive or walk around  
18 the site edge, you wouldn't see the gates and  
19 maybe, maybe that takes away the gated

1 feeling that was causing some concern. So we  
2 have located the gate.

3 UNIDENTIFIED AUDIENCE MEMBER: Could  
4 you show where the gate is?

5 ATTORNEY JAMES RAFFERTY: We're  
6 putting the gate right in that direction  
7 right there. It would be a controlled gate,  
8 a clicker or a transponder or something. So  
9 it is true that residents of the building,  
10 both multi-family building, and presumably  
11 the townhouses as well, would be able to  
12 access the site. And our traffic engineer is  
13 here today. It's a 67-unit building with  
14 five streets that distribute it. Traffic  
15 gets measured, as you know, on trips  
16 generated per hour, particularly peak hour  
17 trips. This won't make me popular, but the  
18 numbers are not that high. That's just what  
19 the facts show when you look at the traffic

1 analysis. But if you live on these streets,  
2 it's not to suggest that there aren't other  
3 factors taking place. The Emerson project is  
4 putting 16 or 18 units there. So people on  
5 Cottage Park Ave. are legitimately feeling we  
6 are going to experience a different volume.  
7 What the traffic study did show, however, is  
8 that the dance studio and the oil  
9 distribution business today generates a  
10 significant amount of traffic. In the case  
11 of the oil distribution business, the  
12 employees who arrive there and leave in those  
13 oil trucks, as well as the administrative  
14 staff that is there are different hours but  
15 they generate a high level volume of traffic.  
16 So traffic will be changed. It will be  
17 different, but it will be manageable. And  
18 these are people who will be living there.  
19 And we at the end have concluded that simply

1 closing off another street here, reducing the  
2 street access points from four to five simply  
3 will not create the solutions that are  
4 necessary.

5 I'm going to conclude because I don't  
6 want to be accused of stealing all of  
7 Mr. Boyes-Watson's thunder. But the  
8 pedestrian connections, and I challenge  
9 people to study this plan, to envision what  
10 Cottage Park Ave. looks like where there's a  
11 continuous sidewalk now that comes down  
12 passed these and Linear Park. Cottage Park  
13 Avenue ends as a chain link fence right  
14 there. And if you're on a bike or walking,  
15 good luck getting from that point to an  
16 access point on Tyler Court behind a  
17 dumpster. If you live on Edmund Street,  
18 you're not going to be looking over a parking  
19 lot anymore. You're going to be looking over

1 a residential unit. If you're confident  
2 enough, adaptive reuse of a nice masonry  
3 building, you're not looking over the back of  
4 what was an ice house and now is the dance  
5 studio. You're going to be looking into a  
6 courtyard and a green space. The renderings  
7 by Mr. Boyes-Watson really show the  
8 transformative effect of this development at  
9 taking an area that's devoid of any open  
10 space, any green space, any permeable space,  
11 and really creating a wonderful neighborhood.

12 So, we're literally excited to be here  
13 because we do think that this, this plan is  
14 actually -- and we've been at this a long  
15 time. This is really -- this exercise has  
16 led us to a place that we feel very good  
17 about in terms of the project itself. We  
18 know we need to continue to work with the  
19 neighbors and to remain vigilant on the

1 traffic issues, but we think the design here  
2 is the one that meets the criteria.

3 I would only close by reminding the  
4 Board that associated with the multi-family  
5 Special Permit in Special District 2. The  
6 last provision in the language 17.24.3, No.  
7 4, and I don't know if Board members have  
8 seen it, it says for additional Special  
9 Permit criteria in consideration  
10 multi-faceted, the Planning Board should  
11 consider as a criterion, the development of  
12 residential units of various sizes and with  
13 various number of bedrooms with specific  
14 attention to three and more bedroom units  
15 with the overall goal of providing growing  
16 units suitable for diverse household sizes.  
17 We have ten, three-bedroom units. All those  
18 townhouses are three bedrooms, and seven more  
19 in the main building.

1           But when you consider the home  
2           ownership opportunities that get created on  
3           Whittemore, the range of units which would be  
4           accessible through an elevator and the  
5           multi-family building, and the  
6           townhouse-style units that are quite ideal  
7           for families, I would say that we not only  
8           meet that test, we exceed it in a very  
9           significant way. And that that is a critical  
10          an element in the Board's determination as  
11          any other factors. And I think between the  
12          criteria of the multi-family Special Permit  
13          and the urban design guidelines of Article 19  
14          which you're asked to apply for this project,  
15          you should have little difficulty in  
16          concluding that both of the applications for  
17          Special Permits are warranted.

18                   Thank you very much.

19                   MARK BOYES-WATSON: Good evening.

1 I'm Mark Boyes-Watson from Boyes-Watson  
2 Architects, 30 Bowes Street in Somerville.

3 I have more slides maybe less words.  
4 And so I'm going to maybe just let most of  
5 these slides go. Some of you both in the  
6 Board and the neighbors have seen many of  
7 these, and just letting -- so just quickly  
8 just going back to the side as Jim described.  
9 Let me just go back. I want to take that one  
10 more section, the existing conditions photo.

11 So we have the asphalt. The -- this is  
12 the Norberg lot by the way. This is the  
13 Norberg lot here. Is it just here? Yes,  
14 just here. No, this whole thing.

15 Anyway, this actually shows clearly  
16 what Jim said. See the like light version of  
17 this? That's the better theme that's being  
18 subdivided into four parcels. And the rest  
19 of this, all that, basically the whole thing

1           there's no green space at all over the lot.

2                     There are three buildings on the lot.

3           This is the Fawcett Oil. This is the garage.

4           And this is the access.

5                     So here we are, we're just looking

6           across the site. We're looking one way east

7           and the other side west.

8                     This is the ice house. And this is the

9           now converted Emerson Lot.

10                    Here we're looking -- this is the

11           garage building. And you're saying this is

12           wintertime shot showing the Linear Park. Now

13           it's fairly matured. It has gotten up there

14           so it's a great many (Inaudible).

15                    This is looking back towards Edmunds

16           Street. Keep going.

17                    So what I think the Board had asked and

18           so I'm going to quickly do, is sort of give a

19           little bit of the history of, as Jim said,

1 we've been working on this for a little  
2 while. And this was the earliest -- we never  
3 formally presented this to the Board. But as  
4 you see, this is 104 units with the original  
5 SD-2 Zoning to reduce the residential  
6 development. Think about 12 years ago  
7 between the property owners and the  
8 neighborhood. And we had designed a pair of  
9 buildings with 104 units in it in a park-like  
10 landscape that related to Linear Park. Then  
11 there was a move to down zone the site, and  
12 in fact the site was eventually down zoned.  
13 As part of that process, we shrank the  
14 building down to 77 units. And here you see  
15 that configuration. And what you see is a  
16 couple of ideas here of always trying to  
17 resolve these street conditions and trying to  
18 create the linkages. So some ideas have  
19 stayed consistent. But, again, what Jim was

1 referring to is context issues still remained  
2 an issue.

3 We were here last time showing you this  
4 scheme which we're now at 67 units. That's  
5 in the main building. There are still these  
6 out-parcelled capacity for eight units here.  
7 But this is a 67-unit building. Very compact  
8 building. And then we took on board your  
9 comments about massing, and that brings us to  
10 when we went to the Planning Board and this  
11 was looking at splitting the building. You  
12 see the dotted line underneath. And actually  
13 there's no windows that face our site here.  
14 The Linear Park's here. And there you can  
15 see sort of what Jim was referring to. Does  
16 that really make anything any different? And  
17 so we've moved on to this current scheme.  
18 And Jim rightly pointed out so what, the  
19 fundamental ideas here remain. That you, you

1 connect, you resolve as many issues relative  
2 to the streets coming into the site as you  
3 can, remembering that Whittemore is a two-way  
4 street. It dead ends as a two-way street  
5 right here. This Magoun is a one-way street  
6 coming down. So there's a really weird  
7 condition here. So we have, you know,  
8 resolved kind of the ends. But the big idea  
9 is that the context that we create in terms  
10 of streetscape, we do at both ends, not just  
11 at one end. So we actually create the  
12 context that actually doesn't really exist,  
13 because this is a bare site. This is a bare  
14 site. This is a gas recharge facility. This  
15 is a condominium building that's converted  
16 into a warehouse -- converted into an  
17 industrial building which has like a blank  
18 wall here. This is an Emerson lot. So it's  
19 kind of interesting. So we didn't have a

1 one- and two-family neighborhood, but I think  
2 that's the context that all of the neighbors  
3 kind of want to feel this building belongs  
4 there. So we decided let's go there and find  
5 that neighborhood and then place our building  
6 in that context, that new created context.

7 So I think I can just skip over here.  
8 So I'm just going to walk through those  
9 renderings of the site. And in fact do we --  
10 I'm just going to pop this up because I get  
11 lost on this site. And so I am just going to  
12 put that way up so I can show you where we  
13 are each time because I get lost. I've never  
14 designed such a big site in Cambridge before.  
15 So here we go.

16 So where we are here, we're looking  
17 down -- this is the Emerson Loft building,  
18 the corner of the Emerson Loft building. So  
19 right now this is taken looking from here

1           into here. So you're seeing on the right the  
2           first of the houses we've created that house.  
3           You're seeing that house is that house. And  
4           what you're seeing is right now the garage  
5           building is right here. So now you're seeing  
6           the Linear Park. And in fact, this path  
7           leads straight in. There's an existing path  
8           up to the Linear Park that's right behind  
9           that garage building that dead ends into the  
10          back blank wall of it. We're getting  
11          multi-use path that links the sidewalk system  
12          of Cottage Park right up to Linear Park and  
13          takes you to Davis Square.

14                 On the left here you see there's two  
15          pairs of houses that create -- this pair of  
16          houses that create this little courtyard  
17          here.

18                 So here we're looking, we're standing  
19          right here. And we're looking down here and

1 we're starting to see the multi-family  
2 building. What Jim was referring to is that  
3 we have -- part of what we did in terms of  
4 the response to your comments about massing  
5 is to see where it would be really  
6 advantageous us to change the masses, change  
7 the spirit of the building, change how it  
8 appeared. So what happens down on this  
9 courtyard, this is appearing as a three-story  
10 building, and you can see the view. There's  
11 the house left and right. The frame. And  
12 here's the Linear Park existing trees behind.  
13 So this stuff up here is actually a full 30  
14 feet back from this corner slot.

15 Here we're now actually entering from  
16 Tyler Court. So here we're standing right  
17 here and we're looking between this building  
18 and this building and we're seeing the  
19 multi-family building in the back. So Tyler

1 Court's behind my back. And this is gonna  
2 lead out to Edmunds Street. And here you see  
3 the multi-family building again.

4 This is just making a turn as you come  
5 down Cottage Park and looking into this  
6 courtyard.

7 And so now I'm just walking down the  
8 back -- actually I've walked down, I've  
9 walked down here and this is where all of our  
10 parking -- not all of our parking. A lot of  
11 the parking for the multi-family building is  
12 here. Jim was referring to this. This is  
13 what we call the notch in the building. So  
14 I'm actually looking from here back in this  
15 direction. I'm seeing this house, that house  
16 as I look down this way, and I'm seeing that  
17 way in. So you're parking along here and  
18 you've got a change in the paving pattern  
19 here, and it takes you in and you go through

1 a little thing and there's leasing office and  
2 etcetera, etcetera. And right opposite in  
3 the panel I'll show you later, is the main  
4 common room for the project that lead you out  
5 to the court that abuts the Linear Park.

6 Here we're now at the other end of the  
7 site and we're looking down whatever this  
8 street is here. Magoun. Sorry. Looking  
9 down Magoun. So I just want to just be clear  
10 again. So this house exists and you'll see  
11 it's got a few side-by-side photos. So  
12 that's the last house. So that is actually  
13 -- is it just showing right there? Just  
14 there. And then -- so this house here is  
15 this house, and then here you're looking down  
16 the end of terminating the view down Magoun.  
17 Now these are just -- I'm just sketching here  
18 because these are not part of the project.  
19 These are the out-parcelled single, one- and

1 two-family 5,000 square foot lots.

2 Again, you see Linear Park in the  
3 background.

4 And just to refresh, the connections to  
5 the Linear Park that we're making, there's a  
6 sort of easterly connection that we saw at  
7 Cottage Park. The westerly connection that  
8 would lead you over to Alewife is right going  
9 to be over here. I'll show you where that is  
10 on the other side. Our site starts here.  
11 And what you're seeing there is one, two,  
12 three of those one- and two-family lots.  
13 That's that, that house there is this house  
14 here. So that house is on the left. And  
15 there in the far distance about a hundred  
16 feet back from the setback again, and that's  
17 the way that we've done this, the  
18 multi-family building is framed, it's well  
19 back from this streetscape and this

1 streetscape, framed through these buildings  
2 down to it. It actually happens to terminate  
3 the access of Whittemore right there.

4 Okay. Let's keep going.

5 Lastly this is a wintertime kind of  
6 rendition of -- this is the Linear Park and  
7 then she has a very mature set of trees here.  
8 And here you're looking -- it's hard to  
9 distinguish, but that's the courtyard of our  
10 building. So that's that courtyard. This  
11 shot is taken from here looking like that.  
12 So here you're seeing the closest of the  
13 elevations right here looking into the  
14 courtyard area. In the summertime you  
15 probably couldn't see much from that view.

16 Just to reiterate, there's sort of --  
17 right now this site, Whittemore terminates,  
18 Magoun comes down, Brookford continues to  
19 terminate. The sidewalk systems all die out

1 as they reach the site, right? And Edmunds  
2 doesn't even make it across here so the site  
3 will peter out here. Tyler actually has no  
4 sidewalk. And so if you go to the next  
5 slide, what our strategy here is first of  
6 all, that by connecting everything back up  
7 with proper sidewalk systems, Edmunds only  
8 has a sidewalk on one side. We connected to  
9 that sidewalk. We loop it back round and up  
10 so that Cottage Park has a continuous  
11 sidewalk system and links back to Edmunds,  
12 here down to the other side of Cottage Park  
13 and links. And because you could walk  
14 through that existing opening that Jim was  
15 referring to here, but there's no sidewalk up  
16 here. And there's no sidewalks here. We  
17 don't control the land. So the idea is that  
18 for pedestrian movement will get everybody up  
19 on to the car. And that connection is opened

1 and now instead of that you have this and it  
2 leads you straight to Davis Square and Mass.  
3 Ave. Just going round Brookford remains  
4 closed.

5 As you come down then all of the  
6 streets, this end in site, they -- right now  
7 that -- it's a clear on here, is that right  
8 here you would walk -- you walk through this  
9 parking lot, the Grey's parking lot and  
10 there's a little sort of place you can get on  
11 here and you can walk up on to the Linear  
12 Park right there. So we are formalizing that  
13 through that 20-foot reserved area here. And  
14 a nice pathway through that green space there  
15 that leads you to the point and gets you back  
16 on to that same existing point where you can  
17 get on the Linear path. So the whole  
18 community at this end of the site can get up  
19 on the Linear Park. The whole community on

1 this end of the site can get up onto Linear  
2 Park using this site.

3 Just a little bit more detail and  
4 quickly. And so not showing, and so what's  
5 happening here is show you how the parking  
6 works. And so we basically have parking  
7 here, along here. There's that gateway.  
8 Parking under the building here and here.  
9 The parking for these is right here.

10 As Jim explained, the idea of the  
11 building as you will, it will functionally  
12 break into two ends. There's a fire door  
13 right here. But basically this is what we  
14 call the Cottage Park end, and this is the  
15 Whittemore. And we intend that these have  
16 separate addresses. And although the  
17 building obviously shares resources,  
18 etcetera, the identity of the buildings are  
19 from what their street presence is. So you

1 have this 33 Cottage Park Street presence  
2 here, and the -- what it will be two -- we're  
3 discussing what this might end up like being  
4 Two Whittemore at the other end.

5 As you go up, I just want to point out  
6 a couple of things, is that the -- there  
7 you're seeing that notch that goes all the  
8 way back to the corridor and lights the  
9 corridor here. What you're seeing as you go  
10 up on to this floor, these are all changes to  
11 the massing that we did. We basically sort  
12 of bitten away at this building to try and  
13 bite in the places that give the most  
14 efficacy. You're continuing to see the  
15 Linear Park is here and the fourth floor is  
16 set back at least 50 feet here from the  
17 Linear Park.

18 Here you see that, where that roof is,  
19 that fourth floor has been removed at the

1 Cottage Park end, and you'll see the big  
2 notch. We're up here on the fourth floor on  
3 this slide.

4 And this kind of just -- very quickly  
5 flick through again. Just going very fast,  
6 we've basically done this. This is existing  
7 and proposed juxtaposed.

8 So just to go back over that idea of  
9 the -- so here you have the Cottage Park  
10 elevation of the multi-family component. And  
11 so you're facing here. You're facing east.  
12 And here at the other end you have the  
13 Whittemore end. You have the Whittemore  
14 elevation. And this, it shows that's the  
15 full 25 feet back over whatever.

16 Yes, Jim.

17 ATTORNEY JAMES RAFFERTY: Masonry.

18 MARK BOYES-WATSON: Yes. So the  
19 idea here is to pick up a little bit more

1 masonry. We're referencing lightly. This is  
2 a bit smaller than the Emerson building short  
3 of kitty-corner over here. We're sort of  
4 picking up a little bit of that atmosphere as  
5 you come down Cottage Park and you pass the  
6 Emerson building and we sort of increase the  
7 amount of masonry on this facade. It's still  
8 picked up as an element of the building  
9 elsewhere, but it's more minor things that  
10 you're seeing. You see us deliberately  
11 differentiate these kind of buildings and  
12 slightly different character while still  
13 belonging to the same building.

14 This is the -- so this is this facade  
15 that faces the Linear Park. You will see the  
16 two wings that are coming here. You'll see  
17 that sort of missing fourth floor and our  
18 courtyard garden in here and our common rooms  
19 are down here.

1           This is the elevation what I think Hugh  
2           Russell described as the stealth elevation  
3           last hearing where you got your parking and  
4           there's that notch that's -- I showed you the  
5           illustration of.

6           KELLY SPEAKMAN: That's it.

7           MARK BOYES-WATSON: The traffic  
8           study -- the traffic study because although  
9           all the massing has changed, the issues of  
10          the traffic have actually remained the same,  
11          remembering that what we did is we took ten  
12          units out of the -- out of the multi-family  
13          dwelling and into the small one. So the  
14          question is do we need to talk about traffic  
15          in specific or do we answer questions?

16          ATTORNEY JAMES RAFFERTY: We don't  
17          have any new information, but I do think if  
18          there's question afterwards about, you know,  
19          I think the trip distribution is an

1 interesting analysis as well as the vehicle  
2 trip generation. We could save Mr. Ham  
3 (phonetic) for questions if that's  
4 appropriate.

5 HUGH RUSSELL: Okay. I think that's  
6 acceptable to us.

7 So does that conclude your  
8 presentation?

9 ATTORNEY JAMES RAFFERTY: Well, we  
10 do have our landscape architect. I know last  
11 time the suggestion so maybe we could ask  
12 just to briefly --

13 LESLIE FANGER: Thank you. I'm  
14 Lesley Fanger from PSC Group and I'm the  
15 project landscape architect.

16 First I just want to reiterate what the  
17 existing condition is on the site right now.  
18 It's basically an industrial building and  
19 parking. And the one attribute that it does

1           have are the perimeter trees that exist along  
2           the property line. And just through benign  
3           neglect they've been allowed to grow up into  
4           some nice, mature trees that every one of  
5           them will remain as part of this proposal  
6           except for maybe one along Cottage Park.  
7           There's a lot of trees there, and 99 percent  
8           of them are going to remain.

9                        So what I'm going to do is just walk  
10           you starting in the west sort of around the  
11           site. As we travel along Whittemore Ave.,  
12           the first thing you'll notice is the access  
13           to the Linear Park that has been discussed.  
14           But also the existing trees that have  
15           recently been planted, the cherries and the  
16           pears are going to continue into the site  
17           along with the sidewalk as well. So there  
18           will be some continuity along the streetscape  
19           going into the site and extending through.

1           Also as part of the requirement for  
2           development we have to plant so many trees.  
3           And in this case there are 60 surface parking  
4           spaces, and we're required to plant six,  
5           three-and-a-half-inch caliper shade trees.  
6           Well, we're proposing to plant ten shade  
7           trees, exceeding requirement by four. And in  
8           addition to that we're planting another 34  
9           ornamental trees that will really help to  
10          reforest what is now an empty site and help  
11          to really beautify the neighborhood and  
12          provide something nice for the residents as  
13          well.

14                 So as we continue along the north  
15          property line, remember all of those trees  
16          are going to remain, and we're going to  
17          reinforce those trees by planting a buffer of  
18          accommodation of evergreen and deciduous  
19          plant materials; shrubs and so forth, that

1 will help to buffer in between the parking  
2 area and the adjacent land uses. And that's  
3 pretty much going to be the case along the  
4 entire property line along the north.

5           When we enter into the two-family  
6 neighborhood that's being created along  
7 Cottage Park, Cottage Park is going to do the  
8 same thing. It's going to be continued. The  
9 character of the road will be continued so  
10 that when you're looking down Cottage Park,  
11 you're going to see trees and a sidewalk, go  
12 all the way through, and out to I believe  
13 it's Edmunds.

14           The residential or the two-family units  
15 will be buffered along the edge with the  
16 similar plant materials. We're suggesting  
17 lilac and some viburnum. In areas where it's  
18 really tight up against the existing adjacent  
19 buildings, we're proposing to do a hedge of

1 hews that are very narrow and sort of  
2 columnar and when put together can be sort of  
3 a green wall but still allow space in back of  
4 the two-family units.

5 So when we come around to the east and  
6 northeast again, we have that access into the  
7 Linear Park. So you really have a real  
8 neighborhood asset going through our site and  
9 into the Linear Park.

10 So say you are taking along -- a walk  
11 along the Linear Park, what are you going to  
12 see? Well, you'll see the parking area,  
13 Cottage Park coming along. You will see a  
14 little bit of the parking lot. You will see  
15 the back yards of the two-family units which  
16 will basically be lawn and maybe some  
17 plantings that they might choose to plant.  
18 You'll also see some ornamental trees that  
19 will help to provide sort of a separation

1           between the two-family and the multi-family  
2           providing nice yard area. And then along the  
3           Linear Park, again, we're going to replace  
4           the fence along this southern property line  
5           all the way to Grey's and all the way along  
6           to Cottage Park. And that will be sort of  
7           screened using a combination of evergreen  
8           shrubs like rhododendrons and some oak leaf  
9           hydrangea in combination and provide a nice  
10          buffering at the closest point to the  
11          multi-family building. So that will help,  
12          you know, you'll be up a little bit while  
13          you're along the Linear Park, but you'll be  
14          looking down on a nice view of plantings with  
15          the building behind and some lawn areas.

16                 Then as we continue on, your view opens  
17                 up because the building is set back away from  
18                 the Linear Park quite a distance. And we've  
19                 taken the opportunity to create a place where

1 the residents can be outdoors. We've kept it  
2 very simple, just three trees; they're tulip  
3 poplars and they're beautiful straight  
4 trunks. They make masts out of them because  
5 they're nice and straight. And they have  
6 really beautiful flowers that can't always be  
7 appreciated from the ground, but because  
8 you're going to be looking down from the  
9 Linear Park or down from the apartment,  
10 you'll see these cupped shaped tulip flowers.  
11 Very nice. So it's a very simple design. We  
12 have nice patios for the residents. And then  
13 a similar sort of balanced design with  
14 evergreen along the common property line  
15 between the Linear Park. And then we come  
16 back to the parking area and we're doing some  
17 low impact storm water management by placing  
18 a rain garden here that takes all of the  
19 water from the parking lot and infiltrates it

1 back into the ground which is very popular  
2 method for dealing with storm water. And  
3 we'll plant that with various, there are  
4 some -- there's a tree and various grasses  
5 and some ornamental shrubs and so forth. And  
6 then we're back to the west. We come full  
7 circle. And, again, we're having a nice  
8 combination of flowering trees. And in this  
9 case they're crabapple trees with an  
10 understory of flowering viburnum and yellow  
11 twig dogwood. And let's see, there's one  
12 other aspect that's quite nice, is that we  
13 have sort of nice decorative pavement places  
14 that help to warn people that whoever is  
15 driving through the parking lot, they know  
16 that this is a pedestrian way and they should  
17 slow down. And it also creates a little  
18 center garden space that has some roses at  
19 the back edge to create a screening between

1 the parking and the multi-family house or  
2 multi-family building. Excuse me.

3 I'm happy to answer specific questions  
4 about plant materials if you like.

5 PAMELA WINTERS: Hi. I have a  
6 question about watering systems.

7 LESLIE FANGER: Yes.

8 PAMELA WINTERS: And can you tell me  
9 a little bit about that?

10 LESLIE FANGER: I believe there is a  
11 plan for irrigation although we're not  
12 specifically showing that in this proposal  
13 right now. Most of the plant materials are  
14 native and don't require a whole lot of  
15 watering once they're established. And  
16 common lilac, viburnum, those sorts of  
17 things. But you do need to water them.

18 PAMELA WINTERS: You need to water  
19 them before they get established.

1                   LESLIE FANGER: Correct. Right.

2                   STEVEN COHEN: I have a question  
3                   about the hardscape. We asked last time  
4                   about the fence which was originally a chain  
5                   link fence. Are you responsible for the  
6                   fence?

7                   LESLIE FANGER: Well, the choice for  
8                   replacing the fence along the southern  
9                   property line, I think we talked a bit about  
10                  that, and decided that a black vinyl-coated  
11                  chain link was an appropriate fence for along  
12                  with this area. It's used in all of the  
13                  parks. They're standard fencing. And this  
14                  being, you know, part of the park system, we  
15                  felt it was appropriate.

16                  HUGH RUSSELL: How tall?

17                  LESLIE FANGER: Six feet.

18                  STEVEN COHEN: Can you just explain  
19                  to me the rationale for the black chain link

1 fence rather versus, you know, a more  
2 decorative wood fence or some such thing?

3 ATTORNEY JAMES RAFFERTY: Well, I  
4 could speak to that.

5 Two things: One, is that there is in  
6 the Bishop petition there's a requirement  
7 here that the fence be able to see through.  
8 It's an unusual district. It has a  
9 requirement like that. And as we looked at  
10 different fence types, we began to look at  
11 what was a common fence material at Fresh  
12 Pond frankly which we thought had some  
13 elements, and the vinyl. And there is the  
14 fence, the same fencing that's used in a  
15 number of green open spaces in Cambridge. So  
16 we selected that.

17 MARK BOYES-WATSON: The notion was  
18 also, and always was, that -- about that  
19 fence is that it's, it's kind of -- I mean,

1           you might say why isn't that a black picket  
2           fence or something like that? And I think  
3           the idea is that this has nothing to do with  
4           the front yard. This -- I mean, there's  
5           always this tension on the Linear Park, and  
6           it's whether you're here or anywhere else in  
7           the city, about whether you're fronting it or  
8           backing into the Linear Park. And I think  
9           we're hedging our bets with this building. I  
10          think we front on it more than most buildings  
11          do. But nevertheless I think when it comes  
12          to that fence, what we're basically saying is  
13          that we want vines and materials to basically  
14          bury the fence so there's a sense of visual  
15          continuity of the green space. So that's why  
16          we don't have a more formal space. That's  
17          the idea. So that's why I think when Jim  
18          references like the more park-like  
19          landscapes, using the black vinyl which has

1           become sort of Cambridge's standard that's  
2           why we think that's a good selection.

3                     STEVEN COHEN: And the rationale for  
4           the fence being six feet tall?

5                     MARK BOYES-WATSON: Is it now? I  
6           can't remember what it is. It is now.

7                     Do we know do we control that fence?

8                     ATTORNEY JAMES RAFFERTY: The fence  
9           is barbwire now on the top. So we don't  
10          intend to use the barbwire.

11                    STEVEN COHEN: Not even black  
12          barbwire?

13                    ATTORNEY JAMES RAFFERTY: Depends  
14          how the hearing goes.

15                    KELLY SPEAKMAN: Can I add the  
16          Linear Park is actually six feet higher than  
17          our courtyard naturally and the grade slopes  
18          down. So when you're standing on there, a  
19          six-foot fence is actually below your eye

1 level. So even though it's a tall fence,  
2 there's a big, steep grade drop right there.  
3 It won't feel six feet taller than when  
4 you're walking along.

5 STEVEN WINTER: Thank you.

6 Mr. Chair, I concur with your  
7 perspective on the fence. I think the fence,  
8 six feet is mighty high. However, that's an  
9 old railroad path so --

10 KELLY SPEAKMAN: Yeah, the path is  
11 six feet up.

12 STEVEN WINTER: And I guess my  
13 question for is what would that -- what would  
14 the fence look like from the path? What  
15 would you see?

16 LESLIE SPEAKMAN: You'd see the top  
17 rail basically. You would be looking down at  
18 the top rail.

19 STEVEN WINTER: Looking down on it?

1                   LESLIE SPEAKMAN: Yeah, because  
2                   you're up that much higher than the grade  
3                   level. And the grade level is six feet  
4                   higher than --

5                   STEVEN WINTER: Okay.

6                   The two other questions: The lilac and  
7                   the viburnum, thank you very much for that.

8                   LESLIE FANGER: Oh, good.

9                   STEVEN WINTER: Are they planted  
10                  freestanding or are they attached to some  
11                  kind of a structure to grow on?

12                 LESLIE FANGER: They're going to be  
13                  planted directly in the ground. There's no  
14                  structure. They're going to be planting beds  
15                  and so forth.

16                 STEVEN WINTER: And the last  
17                  question I have is this may not be your  
18                  specific responsibility, but are these,  
19                  pathway access from the neighborhood to the

1 park, are they lit by the proponent and is  
2 the lighting maintained by the proponent?

3 LESLIE FANGER: There's going to be,  
4 there's going to be lighting as part of the  
5 project. And I think that the -- are the  
6 paths -- I don't think we've gotten that far  
7 but it's something that could be considered I  
8 think.

9 STEVEN WINTER: Thank you.

10 HUGH RUSSELL: I assume the path  
11 itself is a dawn to dusk?

12 ATTORNEY JAMES RAFFERTY: The  
13 signage at the Linear Park is.

14 HUGH RUSSELL: Yes. That doesn't  
15 mean that people can't get there. The path  
16 itself -- is the path itself illuminated?

17 ATTORNEY JAMES RAFFERTY: Yes.  
18 Well, there are some street lamps along the  
19 way.

1                   H. THEODORE COHEN: I have a sort of  
2                   a joint traffic, landscaping question. If  
3                   you can leave that up there.

4                   If the City, that's the ultimate  
5                   entity, were to do something about Brookfield  
6                   Street (sic), you've got a tree there now,  
7                   and I just don't understand how would the  
8                   opening of Brookfield work with the  
9                   landscaping and with the traffic around the  
10                  building. Has anyone given that any thought?

11                  MARK BOYES-WATSON: Well, I, think  
12                  you know, at various times we've not had a  
13                  tree here. The -- if we were to open  
14                  Brookford, which we do not intend to, but  
15                  were it to be opened, it would give access so  
16                  that it could be one of those, it could be  
17                  another route. And obviously this design  
18                  does not anticipate it being a primary route  
19                  into the site. So it would be a place that

1 cars could come and go, but and it would also  
2 be controlled by the cut through control.  
3 But maybe that tree is not optimally located  
4 should such an eventuality occur.

5 UNIDENTIFIED AUDIENCE MEMBER:

6 You've got to move the gate.

7 MARK BOYES-WATSON: The gate is  
8 right there.

9 UNIDENTIFIED AUDIENCE MEMBER: You  
10 would be able to cut through if you move the  
11 gate.

12 MARK BOYES-WATSON: Better not open  
13 it.

14 HUGH RUSSELL: So it seems to me  
15 that there -- if the City Council decides to  
16 open Brookford Street, then you may have to  
17 make some changes in your plans.

18 STEVEN COHEN: Mr. Chair, I was  
19 going to address the parking issues later,

1 but since Brookford Street has come up, you  
2 know, there's a -- there's going to be a  
3 traffic impact here. The Traffic Department  
4 has nevertheless given a seal of good  
5 housekeeping here. Vanasse Associates  
6 assures us that we're going to be okay, and  
7 -- but we all know that, you know, changes in  
8 development cause repercussions in traffic,  
9 and I think as a Board under those  
10 circumstances, what we want to do is make  
11 sure that an Applicant has done all that is  
12 reasonably possible under the circumstances  
13 to address that concern. And every time I  
14 look at this plan and I see Brookford Street  
15 there I'm, you know -- well, we've heard that  
16 the solution here is to have as many points  
17 of access, multiple points as possible. And  
18 Brookford Street just sits there and it just  
19 seems to me that it should be open and it

1 should help relieve, you know, any potential  
2 traffic burden here. Now Mr. Rafferty has  
3 said that that's not up to the Applicant,  
4 that's up to the City. What do I know about  
5 Brookford Street is what I've heard at these  
6 hearings, and my understanding is that the  
7 impediment of opening Brookford Street is  
8 actually a court order which I presume arose  
9 from a private lawsuit involving the owner of  
10 this site and the residents of Brookford  
11 Street.

12 ATTORNEY JAMES RAFFERTY: I could  
13 correct that because that is not --

14 STEVEN COHEN: Is that not the case?  
15 Well, that's what we asked the last time.  
16 What is the history here and why in fact can  
17 nothing be done?

18 ATTORNEY JAMES RAFFERTY: Well, I  
19 apologize. It's my understanding that a copy

1 of the Court decision was provided to the  
2 staff and has been shared with the Board.  
3 But the litigation providing Brookford Street  
4 was a civil action brought against the  
5 property owner, at the time was Fawcett.  
6 There had been a building, former ice house,  
7 at that location, at the end of Brookford  
8 Street. So much in the same way that there's  
9 a building -- the garage building blocks the  
10 access today into Linear Park, there was a  
11 building there. And this was a case brought  
12 from the '70s. And when the building burnt  
13 down, then the owners of Fawcett Oil created  
14 an opening and started using Brookford  
15 Street. And I say this from having read the  
16 decision and the facts set forth in the  
17 Court's order without any firsthand  
18 experience. And that's what led to the  
19 enforcement action by the City. And the

1 Court concluded that because the ice house  
2 had been there for decades, maybe 70 or 80  
3 years, that the property owner, Fawcett, had  
4 lost the common law right of access and  
5 egress on to the public way by virtue of the  
6 placement of the building in that location.  
7 That's the decision. It's decades old.  
8 There's been talk about well, that only  
9 applied because it was a commercial use and  
10 now that it's residential it doesn't apply.  
11 If you were to read the order, and I hope  
12 Board members get an opportunity to do that,  
13 you'd see that that isn't the distinction of  
14 the operative decision. It had to do with  
15 the placement of the building for nearly 100  
16 years at the end of the -- on the site that  
17 precluded access on to Brookford Street. So  
18 the Court similarly ruled on a fence -- that  
19 the city placed a fence at the end of Cottage

1 Park Ave. and attempted to restrict access  
2 onto Cottage Park Ave. as well. And the  
3 conclusion in the order says that the City  
4 had a reasonable interest in restricting  
5 commercial vehicles from Cottage Park Ave.  
6 But the property at the Cottage Park Ave. And  
7 did enjoy the common law rights of access and  
8 egress to the public way that it abuts.

9 STEVEN COHEN: Mr. Rafferty, did the  
10 order say that the City had the right to  
11 block off Brookford Avenue or did it not  
12 require the parties to block off Brookford  
13 Avenue?

14 ATTORNEY JAMES RAFFERTY: I'm doing  
15 this --

16 STEVEN COHEN: The distinction.

17 ATTORNEY JAMES RAFFERTY: Yes.  
18 Well, what the order said was that the  
19 Applicant didn't have the right to access

1 Brookford Street because its right of access  
2 had been forfeited. And I'm paraphrasing.  
3 But that was the legal theory I read about.  
4 I suspect there are people in the room here  
5 who have a stronger understanding and view of  
6 this as they live on Brookford Street.

7 I saw the order most recently when it  
8 appeared on the agenda of the City Council a  
9 few weeks ago. And it was, I think, sent to  
10 the City Council. It was referred to the  
11 Council's Ordinance Committee for their  
12 hearing tomorrow night on the Phillips  
13 Petition which is a petition that is aimed  
14 solely at this site. So I imagine it will be  
15 the subject of deliberation at the Ordinance  
16 Committee. But that's why when I say that  
17 it's not within our ability to open the  
18 street, there is a standing order that says  
19 that this property does not enjoy the

1 benefits of access of onto Brookford Street.

2 STEVEN COHEN: Well, it doesn't have  
3 the right of access, but there's no  
4 prohibition of access and that seems to be a  
5 matter subject to the control of the City.

6 ATTORNEY JAMES RAFFERTY: Well, I  
7 think that's probably correct. But I'm going  
8 to hesitate to characterize an order that  
9 I've only read once or twice as to what's set  
10 forth. I do think it's a worthy exploration  
11 for the City's Solicitor's office and the Law  
12 Department. If the Board needs advice on it,  
13 I think they would be well served to get it.  
14 The City was a party in that action.

15 HUGH RUSSELL: Any other questions  
16 at this time?

17 TOM SIENIEWICZ: I have a question  
18 that relates to traffic and landscaping as  
19 well, and forgive the level of detail on this

1 question, but it is coming down to the detail  
2 especially where this property abuts the  
3 public way. I see that the perspective  
4 drawings are promising the characteristic of  
5 the entry and the exit. I don't know what  
6 the correct answer is, but the site plan  
7 seems to suggest that the public way and the  
8 driveways are all rendered in the same color  
9 and that they appear to be all part of a  
10 roadway and network system. The perspective,  
11 particularly the view down Cottage Park  
12 looking south here, shows the entrance to the  
13 site with a curb cut and a sidewalk that does  
14 not dip down. So this is a very different  
15 feeling about how you would be entering a  
16 precinct that would have a large building.  
17 And I just want to understand in which way  
18 does the proponent see the multi-family? Is  
19 it part of the street network system? Or is

1           it on its own site that's accessed through a  
2           curb cut?

3                     MARK BOYES-WATSON:  So, maybe I can.  
4           I think that's -- I think that the answer is  
5           that we saw this -- there's already had lots  
6           of streets.  So we saw that the privacy being  
7           the Cottage Park here.  And actually if we  
8           went to the site plan, the -- these actually  
9           -- we see this as a driveway.  And partly one  
10          of our primary goals is to get this sidewalk  
11          to work well with the connections of the  
12          Linear Park.  We also -- these are only about  
13          -- how wide are these?

14                    DAVID BIANCAVILLA:  These are 18.

15                    MARK BOYES-WATSON:  18.  These are  
16          sort of filing -- so then deliberately you're  
17          supposed to be like chugging like five miles  
18          an hour on these.  So it is a difficult site  
19          for deciding where the curbs are and where

1           they aren't. That was the decision we made.  
2           And I think the key idea. We are -- we  
3           didn't really go over in the plan, but we  
4           have 100 percent bicycle parking in here.  
5           We're right next to the Linear Park. I know  
6           that traffic is an issue and we know that  
7           traffic is an issue in Cambridge. And we're  
8           all encouraged by the fact that vehicle  
9           ownership is falling in Cambridge and bicycle  
10          and walking is increasing. So we intended  
11          from the very first touch of this project to  
12          somehow everything we did in this project  
13          would reinforce the goal of people walking  
14          and biking, connecting to that new park. We  
15          are, in a site that doesn't have in itself  
16          any inherent joys, that Linear Park is a  
17          great asset. So we always knew that and we  
18          wanted to make sure that was a beautiful  
19          connection.

1                   ATTORNEY JAMES RAFFERTY:  If I could  
2                   follow up on that, Mr. Sieniewicz, and that  
3                   has become a critical issue in our  
4                   discussions with DPW and the Community  
5                   Development Department.  One of the more  
6                   challenging comment about this is a gated  
7                   community.  We actually looked in the earlier  
8                   iterations, the public street ends -- can you  
9                   show where Cottage Park ends?  We had a  
10                  scheme that had a gate right there, because  
11                  that's where the public way ends.  But if --  
12                  the way the site functions and has for  
13                  decades, is that vehicles on Cottage Park  
14                  Ave. come through the private property and up  
15                  to Tyler.  Particularly some residents of the  
16                  condominium building on Mass Ave. whose  
17                  garage access is on the back of the building,  
18                  and I personally witnessed, those people come  
19                  down Cottage Park Ave., through private

1 property, and connect into their garages.

2 The city's trash truck at the end of  
3 Edmunds Street comes through the private  
4 property. So this became is this an  
5 extension? Is this a private way? Do we  
6 want to extend the public way? So it becomes  
7 a bit of a hybrid. We want to calm the  
8 traffic, but we don't want to gate it off.  
9 And we want people who live on Cottage Park  
10 to be able to walk through this site into the  
11 Linear Park. We want people on bicycles to  
12 do it. And frankly, people who live in the  
13 Emerson Condominiums might choose to exit but  
14 instead of going up Cottage Park, there's  
15 actually advantages, they could choose to go  
16 out Tyler Court depending on the direction  
17 they were heading. So we made the conscious  
18 decision not to place the gate at the edge,  
19 because what you really have here are three

1 streets; Cottage Park -- can you show where  
2 Edmunds is? And Tyler, are all dead ends  
3 into private property. And we, and as we  
4 studied the site and analyzed it with the  
5 Traffic Department, the conclusion was it  
6 should have a connectivity. And we should  
7 provide a framework for vehicles and  
8 pedestrians and bicycles to do that. So this  
9 plan is an attempt to do achieve that.

10 MARK BOYES-WATSON: Interesting.

11 Actually also, then and just to I think going  
12 on to that, Tom, and this, we ride up on the  
13 sidewalk here. Because there isn't really a  
14 need for a sidewalk across here. You know,  
15 Inspectional Service consider that a front.  
16 So here the sidewalk, we ride over a sidewalk  
17 to get into our site in a typical curb cut  
18 and existing curb cut. So this one was an  
19 odd ball and that's the one where we don't.

1           And we also don't know about Tyler  
2           which it has no sidewalks. And Tyler is  
3           treated you don't ride up on a sidewalk here.  
4           And as we come around here, this sidewalk  
5           detours around there, right? So we don't  
6           actually -- we actually -- on Edmunds,  
7           because again we don't control. It's not  
8           really well defined in here. But what we are  
9           doing is continuing this Edmunds sidewalk  
10          passed -- it stops right there right now, and  
11          we are bringing it and we are creating a  
12          proper curb cut here. And so in an attempt  
13          to say should this tidy up one day, that we  
14          would have done our part.

15                   TOM SIENIEWICZ: So this end of the  
16                   site will look and feel like a public way  
17                   even though you're crossing private property,  
18                   right?

19                   MARK BOYES-WATSON: Yes. So the

1           only exception -- so you ride over -- you go  
2           over a curb cut detail here. You don't here.  
3           Which is this is just a 20-foot right of way,  
4           Tyler. So there's no room for sidewalk, 20-  
5           foot right of way. You ride a sidewalk here.  
6           So this is the exception. And actually at  
7           one point we did have a raised intersection  
8           here. You know, it's sort of one of those  
9           traffic calming things like we have in the  
10          city. We don't show it right now. I mean  
11          this easily could be there, but it's not  
12          shown.

13                    ATTORNEY JAMES RAFFERTY: One of the  
14           things that came up in the meeting with the  
15           neighbors last night is the width of what we  
16           might consider Cottage Park Extension is  
17           narrower than Cottage Park. So I think, and  
18           you know, we're subject to collaboration with  
19           the City and others on this, the thinking was

1           that it would be a bit of a hybrid, that you  
2           might -- I mean, obviously it's not going to  
3           be maintained by the City. It's not -- I'm  
4           assuming we're going to be plowing it. I  
5           assume, you know, issues around parking and  
6           the like are going to be private enforcement  
7           and not the city. So like so many other  
8           places, we have those private courts and  
9           private ways around town. This property has  
10          more vestiges of that but still has the  
11          permeability but it's an ongoing discussion.

12                        H. THEODORE COHEN: Can we follow up  
13                        on that? Can you put up the image with the  
14                        parking?

15                        So people who would be coming down  
16                        Cottage Park or coming in from Tyler Court  
17                        will have to go into the horseshoe area?

18                        MARK BOYES-WATSON: Yes, through  
19                        here.

1 H. THEODORE COHEN: If they're in  
2 the multi-family --

3 MARK BOYES-WATSON: Yes.

4 H. THEODORE COHEN: -- will go into  
5 the horseshoe area and then park in that side  
6 presumably?

7 ATTORNEY JAMES RAFFERTY: Yes.

8 H. THEODORE COHEN: Now you've got  
9 parking spaces at the end of Brookford, what  
10 would be the end of Brookford. And as I  
11 understand it, though, you've got gates on  
12 both sides. How are those -- those people  
13 who are parking there will have to go in  
14 through the gates?

15 MARK BOYES-WATSON: Yeah. The idea  
16 is that the only gate is one gate. It's  
17 right there. And the idea of that gate is  
18 anybody who is a resident on this parcel will  
19 have a clicker that gets through that gate.

1 The reason for the gate -- it may be that  
2 there's sort of contorted layout of the  
3 streets would be enough to stop people coming  
4 through, but people are pretty inventive.  
5 Because we wouldn't have that gate except to  
6 prevent people who would not in -- not  
7 residents of this site, from making those cut  
8 throughs which would throw off all the  
9 traffic planning and all the other ideas. So  
10 really that's why we call it a control gate.  
11 So it's actually I could just as easily, if I  
12 came through here, I could park here just as  
13 easily as I could park here because I  
14 wouldn't be able to go through that gate.

15 H. THEODORE COHEN: But if you came  
16 in through the Whittemore side you could park  
17 in that area up above the notch without  
18 having to go through the gate?

19 MARK BOYES-WATSON: You could. In

1 fact, the parking is distributed -- just like  
2 we have those two building identities, the  
3 parking is distributed to work more or less  
4 like that. So if they end up in timing  
5 spaces, I don't know if it's decided whether  
6 they do that or not. So the number of spaces  
7 at each end of the (inaudible) are roughly  
8 right for the usage. But it is important  
9 that our notion is that if I want to go to  
10 Harvard Square and I parked here, I would be  
11 able to do this.

12 H. THEODORE COHEN: And now, is the  
13 parking going to be assigned?

14 ATTORNEY JAMES RAFFERTY: Yes. The  
15 current thinking is that given this scheme,  
16 that would be a necessity. That you'd want  
17 people in the Whittemore Ave. building having  
18 adjacency to the parking lot in front of it  
19 and abutting it, and the balance of the

1 building would take advantage of parking  
2 there. We've been able to identify parking  
3 at the edge by Edmunds which serves nicely  
4 for the duplex properties.

5 H. THEODORE COHEN: Right.

6 And what's the parking going to be on  
7 in the building?

8 MARK BOYES-WATSON: There's six  
9 spaces and a handicapped space here and here  
10 under the building.

11 H. THEODORE COHEN: And the facade  
12 now does not call for any garage doors?

13 MARK BOYES-WATSON: It does not.

14 H. THEODORE COHEN: Can they be put  
15 in?

16 MARK BOYES-WATSON: You know, the  
17 trouble with those garage doors is that they  
18 rattle the whole building structure and  
19 they're also management problem because you

1 don't really know what's going on behind the  
2 garage doors. And I know that that's a  
3 little bit of a sensitive issue. Remember  
4 that this is a gas, re-gasification plan, and  
5 this is the blank wall of the old warehouse  
6 building. So it's -- we think it's much  
7 better to just keep it simple.

8 H. THEODORE COHEN: Well, and I mean  
9 from my point of view that's the least  
10 attractive aspect of the facade and, you  
11 know, the skinny pole's just holding it up.  
12 If something could be done with that, I think  
13 it would be a great improvement. Certainly,  
14 you know, if it's, you know, assigned spaces  
15 and you're talking about 10 or 12 people,  
16 there seems to me there must be some other  
17 solution that could enclose that or cover it  
18 up somehow.

19 MARK BOYES-WATSON: Okay.

1                   HUGH RUSSELL: One thing that  
2 happens when you do that is you tend to lose  
3 -- it takes more space because you've got the  
4 frames of the doors and so you may have to --  
5 it's --

6                   H. THEODORE COHEN: Well, they seem  
7 to have extra space in their sketches.

8                   MARK BOYES-WATSON: Yeah, I mean, I  
9 think that what we could do there -- I mean,  
10 we can look at the first one. But one of the  
11 things that I found is that is true, what we,  
12 it's a one-foot post there, but changing the  
13 ratio of the amount of the facade that comes  
14 on down would help and we could look at on  
15 how those -- this is actually -- is, that's  
16 the square space there is it helps with that  
17 car door. But we could look at that. We  
18 could look at getting a bit more meat in  
19 there. I think the advantage here there's

1 not at lot of it. There's only just -- you  
2 know, there's not that many spaces here. But  
3 I think we could redistribute this space here  
4 and get those piers to start to read more  
5 like part of the facade.

6 H. THEODORE COHEN: Well, I think  
7 whatever you could do would be an  
8 improvement. So if you could think about  
9 that.

10 CATHERINE PRESTON CONNOLLY: One  
11 other thing we asked about at the last  
12 hearing was a statement from the fire  
13 department.

14 PAMELA WINTERS: I was just going to  
15 ask that same question.

16 CATHERINE PRESTON CONNOLLY: So do  
17 we have a response that indicates that this  
18 is a circulation that they think serves the  
19 neighborhood well?

1                   DAVID BIANCAVILLA: For the record,  
2                   David Biancavilla. I'm the sole engineer for  
3                   the project at BSC Group.

4                   We did run the standard Cambridge  
5                   turning radiuses for the fire trucks down  
6                   Cottage Park, around the horseshoe, out  
7                   behind the back of the building and out  
8                   Whittemore. We were able to make those turns  
9                   very easily. So the site has been designed  
10                  with the fire trucks in mind for access. We  
11                  have not met with the fire department at this  
12                  point yet. Typically we do that during the  
13                  DPW process. But we're comfortable that  
14                  we're going to meet those requirements.

15                  HUGH RUSSELL: Any other questions?

16                  So, the hearing has not been closed and  
17                  the question I guess before us, for the Board  
18                  is, do we want to hear other testimony and do  
19                  we want to restrict the public testimony to

1 certain subjects? Which would be getting  
2 comments on the specific changes that have  
3 been made, which I think really are the  
4 changes that were outlined by Mr. Rafferty in  
5 the beginning; the creation of the duplex  
6 structures at the right side of the site and  
7 the access through to the Linear Park at the  
8 left-hand side of the site. I mean, those  
9 are the big changes to me. Now there some  
10 architectural changes also to the building.  
11 The three-story height as seen from the  
12 extension of Cottage Park. And the notch in  
13 the back that nobody will see unless they  
14 actually are living in the building.

15 So do we want to hear some testimony?

16 H. THEODORE COHEN: I think we  
17 should. I think it's been significant  
18 changes and I'd like to hear what the public  
19 thinks about the changes. But I agree that

1 we don't want to just hear, you know, what  
2 we've heard a month ago. You know, that we  
3 don't want anything -- you know, we've heard  
4 the people about what they think about the  
5 size. But I would like to hear now what they  
6 think about the reconfiguration.

7 STEVEN WINTER: I concur.

8 PAMELA WINTERS: I'd also like to  
9 know what the City thinks. Maybe what Roger  
10 and the City thinks about the changes, too.

11 Do you have any comments, Roger?

12 ROGER BOOTHE: Want to do the  
13 hearing first?

14 HUGH RUSSELL: Why don't we actually  
15 hear from you first and I would ask Sue  
16 Clippinger if she has any comments she wants  
17 to make.

18 ROGER BOOTHE: Yes, we have met  
19 several times, and I think feel that they've

1           been very responsive, especially the strategy  
2           of cutting back on the massing of the  
3           building, having more of a setback from the  
4           Linear Park makes a big difference, I  
5           believe. And trying to integrate the ends of  
6           the streets so that they feel more like a  
7           part of the neighborhood. I think it was a  
8           major change that we felt was a good idea and  
9           we felt was responsive to what we were  
10          hearing from the neighbors. And certainly I  
11          think the landscaping approach seems  
12          extremely well thought out. And so I'm very  
13          comfortable with the project the way it  
14          stands now.

15                   HUGH RUSSELL: Okay.

16                   Sue, did you want to make any comments?

17                   SUSAN CLIPPINGER: You know, I think  
18                   the change to adding the connection to the  
19                   Linear Path, the western part of the project,

1 is a very positive change and very responsive  
2 to issues of keeping that connection both for  
3 the community and for the project. And I  
4 think the proponent has spoken several times,  
5 you know, of our basic concept of having the  
6 multiple access/egress points so that traffic  
7 is distributed as much as possible among  
8 those streets without allowing cut through  
9 from between Whittemore and Tyler Court. And  
10 that that's been maintained, which has been  
11 basic to our belief all along. So those  
12 public connections that were being asked  
13 about between Cottage Park and Edmunds and  
14 Tyler Court are all important parts of  
15 providing that flexibility of access.

16 HUGH RUSSELL: Thank you.

17 Okay. And so I will then ask: Does  
18 anyone wish to speak? So why don't you, sir,  
19 start.

1 WILLIAM FOX: And I want to say one  
2 thing and then I won't say much more. As it  
3 old you the last time, traffic is our  
4 problem. The color of all these blanks that  
5 are shown this, I can't see them from where I  
6 live so I'm objected to that. It doesn't  
7 matter. What color cars are you going to run  
8 up and down in there? Are you going to make  
9 those all green cars or are you gonna --  
10 that's the important factor of anybody living  
11 in a neighborhood is to get hit with a car.  
12 Now, I don't want to get killed. I want to  
13 live at least ten more years. I've lived  
14 there since '55 and I can -- they -- Rafferty  
15 got up and spoke to the court order. Do you  
16 really want to see the court order? And do  
17 you want to read it what it says? Cottage  
18 Park is restricted to commercial traffic.

19 HUGH RUSSELL: Excuse me, sir,

1           you're not --

2                   WILLIAM FOX:  It's two orders, not  
3           one order.  And I went to Court with this  
4           order.

5                   HUGH RUSSELL:  Excuse me, we're  
6           asking you to comment on the changes --

7                   WILLIAM FOX:  Okay.

8                   HUGH RUSSELL:  -- to the plan.

9                   WILLIAM FOX:  The changes -- well,  
10          all you did was bring more traffic to Cottage  
11          Park Ave.  We're only -- it's 10 seconds'  
12          drive from their property to Mass Ave., 10  
13          seconds.  And I've driven it so many times.  
14          And there's a dog leg.  And you can't see  
15          traffic coming off of Mass. Ave.  When you go  
16          up -- many times I've backed out and started  
17          to go up Cottage Park and the --

18                   HUGH RUSSELL:  Excuse me, sir,  
19          you're --

1 WILLIAM FOX: -- their plans that  
2 took all the traffic. Are they going to make  
3 this a public street all the way? Or are  
4 they going to make it public from Cottage  
5 Park and then the rest of it it's private?

6 HUGH RUSSELL: Yes.

7 WILLIAM FOX: It's still one road  
8 all the way through. And the traffic, they  
9 just told you, they've stood and watched  
10 traffic come from other ways down Tyler Court  
11 and up Cottage Park. Are they otherwise --  
12 they come all the ways all the time. If you  
13 want to come down and stand on the street and  
14 see what happens, not what they saying --

15 HUGH RUSSELL: Excuse me, sir,  
16 you're not listening to me.

17 WILLIAM FOX: Okay, let me stop.

18 HUGH RUSSELL: Yes. Because you're  
19 talking -- you're making the points that

1           you've made before.

2                   WILLIAM FOX: Before, yeah.

3                   HUGH RUSSELL: That many people have  
4           made before. What we're asking --

5                   WILLIAM FOX: What you're asking me  
6           is did they change anything? No. They put  
7           more traffic on the same spot.

8                   HUGH RUSSELL: Okay, thank you.

9                   THE STENOGRAPHER: Sir, can you  
10          state your name, please?

11                   WILLIAM FOX: Oh, My name is William  
12          Fox. I've lived on Cottage Park for 55, 60  
13          years now.

14                   THE STENOGRAPHER: Okay, thank you.

15                   WILLIAM FOX: And I was there when  
16          there was only two cars. I'm just saying  
17          there were two cars. And the saturation now,  
18          it's just outrageous. It's outrageous. I  
19          mean, even the Board should see it. Look at

1           it. I couldn't, I couldn't say any more.

2                   HUGH RUSSELL: Yes, sir.

3                   ROBERT CYR: Robert Cyr, C-y-r.

4                   What right does it give them to use 33  
5           Cottage Park Ave.? since 40 years ago it was  
6           One Tyler Court. They do not abut Cottage  
7           Park Ave.

8                   HUGH RUSSELL: Excuse me, sir,  
9           that's not responsive to the testimony  
10          question.

11                  ROBERT CYR: All right. Now, one  
12          quick question. At the end of Cottage Park  
13          Ave., that's going to be a handicap spot for  
14          the people that are going into the new  
15          Emerson building, 16. That's going to be a  
16          handicap right at the end of the street  
17          because they have to park on the other side  
18          of Cottage Park Ave. and then come in from  
19          the -- right at the fence. Right at the end

1           they get into their building. And that's  
2           going to be a handicap. Now what happens if  
3           traffic is going through like that? I mean,  
4           it's, you know, it's a problem. They have  
5           to, that's where the elevator's going to be  
6           at the end of the Cottage Park Ave. for that  
7           building. So they have to come across the  
8           street because they have to park on the other  
9           side, and then go into their building. And  
10          that could be a big problem for somebody  
11          handicapped.

12                    HUGH RUSSELL: Yes, Young Kim.

13                    YOUNG KIM: My name is Young Kim. I  
14           live at 17 Norris Street.

15                    Two things: One, is the traffic. I  
16           don't think it was ever pointed out that  
17           Whittemore is a one way going out to Alewife  
18           Brook Parkway in the evening. So right now  
19           there is a big backup right along there from

1           there to Mass. Avenue.

2                   HUGH RUSSELL: Excuse me, you're not  
3           responding to our question. I want to make  
4           it very clear. I'm not -- we're interested  
5           in what people think is this better than the  
6           last thing or is it worse, is it no change?  
7           I don't -- we don't want to hear the same  
8           arguments. We heard those.

9                   YOUNG KIM: I didn't think that it  
10          was.

11                   HUGH RUSSELL: So if you start  
12          talking about traffic, then it has to be  
13          related to that change.

14                   YOUNG KIM: Okay. Then to that  
15          change, it is shame to lose the green space  
16          which is now turned into parking lot. I  
17          think that's a step backwards. And that if  
18          there's any way to make it like underground  
19          parking lot and restore the green space, that

1 would be a very good point.

2 HUGH RUSSELL: Thank you.

3 THOMAS FLYNN: Mr. Chairman, I have  
4 one question.

5 HUGH RUSSELL: Yes.

6 THOMAS FLYNN: You're limiting the  
7 questions that we can speak on. I handed to  
8 every Board member 240 signatures with a list  
9 of items that you quoted last time that you  
10 wanted to see changed, and the proponents  
11 have talked about everything on that list  
12 with the exception of going even into  
13 Brookford Street. And we can't talk about  
14 it? Whatever they talked about we should be  
15 able to come up with your answer. Now if you  
16 want to hold it to a tight that we can talk  
17 about the color of the building, the size of  
18 the building, the building hasn't changed in  
19 size. It's still 266 feet long. You sent

1           them out with homework and they came back  
2           with the same length building.

3                   THE STENOGRAPHER: And your name,  
4           please?

5                   THOMAS FLYNN: Tom Flynn.

6                   JONATHAN MILLMAN: Can I follow up  
7           on that question?

8                   HUGH RUSSELL: Sure.

9                   JONATHAN MILLMAN: Jonathan Millman,  
10          9 Cottage Park Avenue. I was wondering if  
11          they can go back to the nice presentation to  
12          show the overview of the neighborhood. It  
13          speaks to the size of the building.

14                   HUGH RUSSELL: Sure. Can you put  
15          that slide up, please?

16                   MARK BOYES-WATSON: I think maybe  
17          Roger's is the best. I'm not sure we have  
18          one.

19                   JONATHAN MILLMAN: You have an

1 overview of the --

2 KELLY SPEAKMAN: That was my last  
3 presentation and I don't have it.

4 JONATHAN MILLMAN: I saw it.  
5 Somebody put it up. If you didn't put it up,  
6 somebody put it up. No, no, I mean the  
7 actual photograph.

8 KELLY SPEAKMAN: Today?

9 ATTORNEY JAMES RAFFERTY: The Google  
10 Earth photo?

11 KELLY SPEAKMAN: The traffic  
12 pedestrian one? I'll get it.

13 JONATHAN MILLMAN: There you go.  
14 First, I'd like to correct a misstatement  
15 that was made by one of the presenters who  
16 said that in fact the neighborhood is not  
17 characterized by small two- and three-family  
18 houses. I think if you see the picture, you  
19 could see that it overwhelmingly is two --

1 one-, two-, and three-family houses. So the  
2 question is how does this new plan conform to  
3 that neighborhood? How does the size of that  
4 building conform to this neighborhood? It's  
5 a valid question.

6 HUGH RUSSELL: Okay.

7 Does anyone else wish to speak?

8 THOMAS FLYNN: You didn't answer my  
9 question, Mr. Chairman. Can we comment on  
10 what the proponents came out with tonight?

11 HUGH RUSSELL: You can comment on  
12 what has been new in the testimony tonight,  
13 yes.

14 THOMAS FLYNN: All right. For No. 1  
15 my name is Thomas Flynn, lifetime resident on  
16 Madison Avenue. The size of the building,  
17 you sent them back to come back with a number  
18 of different designs, at least that's the way  
19 I understood. Come back with different

1 proposals. They took the building and nipped  
2 the front off so they can get the further  
3 distance back from Linear Park. And put five  
4 units, five duplex units off to the side.  
5 That's all they did. Move the building down.  
6 If you look at your plan, it shows an  
7 overlay. Match them up. The building's the  
8 same size.

9 Second of all, the accesses. The more  
10 accesses the better. Brookford street should  
11 be open. 240 people in that petition signed  
12 it AND said it should be opened. And now  
13 this gentleman here asked why it was closed?  
14 Closed for non-use. They took away their  
15 rights to it. But yet they allowed them to  
16 buy the property, being the Norberg property.  
17 It had an access. Tear down a building in  
18 between. And now they broke the 100 year  
19 non-use to another entrance. But they can't

1 use Brookford Street. I don't understand  
2 that one. 100 years that land was divided.  
3 All of a sudden you buy the adjoining lot  
4 tear it down, and I've got my driveway. And  
5 to top it off it's a curb cut. It's not a  
6 driveway for a complex as I brought up to  
7 Mr. Rafferty who is the city czar on curb  
8 cuts.

9           The other one is traffic. I'm hearing  
10 that we're using old standards for the  
11 traffic as far as future. There's 2300 units  
12 going in North Cambridge that are either  
13 proposed, under permit, or in the last five  
14 years. 2300. That's not going to affect the  
15 traffic a bit. I don't know what school you  
16 went to as far as traffic, but me I add it  
17 up. There's a problem. And to top it off  
18 using the future numbers of one percent  
19 increase. No. It should be ten percent

1           increase.

2                   And the planting, they talk about the  
3           trees they're saving. Norway maples. The  
4           city don't even consider them a tree any  
5           longer. I'm on the committee for public  
6           planting. They would never plant a Norway  
7           maple.

8                   And the fence, six foot tall? That's  
9           very inviting to the neighborhood or to  
10          somebody on Linear Park. At least the  
11          Cambridge lumber project, the guy is working  
12          with the neighborhood. Working with the  
13          Linear Park, making access to his site. They  
14          want to wall it off on the other side. And  
15          if you look at them plans, the size of  
16          Emerson Loft building, on one of the sheets,  
17          compare that to the Fawcett building, it's  
18          about a third. It's 16 units. 16 times 3 is  
19          48 to me. Not 50 or 67. No. The building's

1 way out of scale, too big, too many units.

2 Thank you.

3 HUGH RUSSELL: Thank you.

4 Does anyone else wish to speak? Yes,  
5 Ma'am.

6 ANN McDONALD: Ann McDonald, 24  
7 Columbus Ave. I'll keep it short. But I  
8 think that the -- to reiterate what Tom just  
9 said, the idea that we were going to see  
10 options, I'm surprised that what was  
11 presented today is one option and that there  
12 was a hollow gesture towards splitting it in  
13 half but no discussion of any other options.  
14 And the fact that the thing is entitled, "The  
15 Building," suggests to me that's the  
16 assumption that was made all along, is "the  
17 building" is staying. "The building" can be  
18 clipped, but it's "the building." And then  
19 there really isn't an exploration of how else

1 this could feel like part of our neighborhood  
2 rather than the site, you know. Us and them.  
3 So I really look forward to ways that we can  
4 work together to bridge that so that it isn't  
5 just a little cluster at the end that keep us  
6 appeased instead of thinking about what's in  
7 the middle.

8 Thank you.

9 HUGH RUSSELL: Yes.

10 JULIA BISHOP: Julia Bishop, 9  
11 Cottage Park Ave. I'll try to stay on topic.  
12 I want to talk about the townhouses on  
13 Cottage Park Ave. I know the residents that  
14 shared the street with me. Would love to see  
15 townhouses at the end of the street as  
16 opposed to more of the building in the  
17 original project. Cottage park Ave. has been  
18 the focus of a lot of compromise and  
19 concessions throughout this whole project.

1           A year ago in January we were basically  
2           offered, and you saw that today on one of the  
3           slides, a kind of a cul-de-sac on Cottage  
4           Park Ave. to try to eliminate a lot of extra  
5           traffic given we have the Emerson project  
6           coming online. We're going to have 23  
7           parking spaces right at the property line,  
8           the Fawcett property line. We were said we  
9           could have that if we would go to 89 units.  
10          If we would agree to 89 units, that is what  
11          we would get. Cottage Park Ave. residents  
12          turned that down because our neighbors down  
13          the other streets weren't getting an offer.  
14          And because they would have to absorb our  
15          traffic if we went for the cul-de-sac, we  
16          would love it. But our neighbors were not  
17          going to get that concession. And we said  
18          no. We stand united. We said no.

19                 Anyone sitting in this room that cannot

1 believe the traffic is still an issue. That  
2 this project and the streets that move away  
3 from this project about Mass. Avenue, a major  
4 commuter route, Routes 2 and 16. That's the  
5 piece that, you know, the ownership of cars  
6 might have dropped in Cambridge and that's  
7 great if they have. That does not talk about  
8 the commuter traffic that is a part of our  
9 daily life. You can't get off Cottage Park  
10 Ave. and take a left-hand turn to Arlington  
11 during rush hour. I can't get on my street  
12 if I come home too late at night and take a  
13 left-hand turn on Cottage Park Ave. from  
14 Mass. Ave. It's unrealistic. I don't know  
15 where the numbers are coming from, but I'm  
16 just telling you, and I invite you again, and  
17 maybe some of you took me up on my invitation  
18 the last time, come and get in the line of  
19 traffic between four o'clock and seven

1 o'clock every night in our neighborhood if  
2 you really want to understand why. This  
3 neighborhood has stood so strong and wants to  
4 continue talking about parking and traffic.  
5 It is a major problem, and I don't see that  
6 this really alters it. I see a shell game.  
7 I see that we've moved things around a little  
8 bit and we still have the same traffic. And  
9 I appreciate Mr. Cohen's comments because for  
10 anyone to now look at this project and  
11 question why that one street should be left  
12 closed is missing the boat. And you have a  
13 united neighborhood that is not going to  
14 stand for it.

15 To the other issue, to the other issue,  
16 this gate pass key thing. I have spent three  
17 years calling the city about the lack of snow  
18 removal on Tyler Court. If that's gonna be a  
19 city or a private removal once this gets

1 built, I don't know, but we call -- me and  
2 Mr. Flynn call regularly to say well, Tyler  
3 Court's got snow on it. You can't go -- you  
4 can't use Tyler Court. You're using the  
5 parking lot that abuts Tyler Court.  
6 Fawcett's own trucks got stuck this year.  
7 They were stuck. They couldn't get through  
8 because cars were parked on Tyler Court. So  
9 there's major infrastructure that's missing  
10 there. So this idea that we're gonna have  
11 all this flowing of traffic, well, I hope  
12 that works. But you are eliminating the flow  
13 of one major street which is the longer  
14 street than the, two Edmunds and Cottage Park  
15 together. And this pass key idea, all we  
16 need is for the pass key or some part of it  
17 to not work and then we have something, a  
18 gate that's broken and people who are gonna  
19 have access. And if it's any -- getting that

1 fixed is anything like getting the city to  
2 remove snow off of Tyler Court, it will never  
3 get fixed.

4 I think that's it, thank you.

5 HUGH RUSSELL: Yes, sir, in the  
6 back.

7 BOB MCGOWAN: My name is Bob  
8 McGowan. I live at 22 Brookford Street in  
9 Cambridge. I'm a lifelong member of  
10 Cambridge, too. Lifelong resident.

11 I like what they've done with the  
12 Cottage Park as far as the two-family homes  
13 that they had at the end. I like the  
14 setbacks from Linear Park. I like that  
15 they've moved the building, the four-story  
16 back further away from the Cottage Park and  
17 Linear Park. I like the facades that they've  
18 put up on the sides trying to keep in with  
19 the landscape of what they already have on

1 both sides. As far as Brookford Street,  
2 you've also received a letter from Brookford  
3 Street residents asking you to stay and  
4 comply with the court order and we're hoping  
5 that does come about, too.

6 Other than that, I like what they've  
7 done with the Linear Park and the paths and  
8 all that stuff. And I think there's plenty  
9 of traffic to get out of the streets. I  
10 think the fire access, even you know, they've  
11 left off -- but when we had the fire at  
12 Fawcett, they were able to get up the road on  
13 Linear Park and use that to get fire  
14 apparatus up there, too.

15 So that's it.

16 HUGH RUSSELL: Thank you.

17 Yes, sir.

18 JOHN ATHANESOPOULOS: John

19 Anthanesopoulos,

1 A-n-t-h-a-n-e-s-o-p-o-u-l-o-s.

2 So I'm not going to get into details  
3 about the traffic which is -- a lot of my  
4 neighbors brought up. One thing I just  
5 wanted to say about this rendition here, and  
6 I think it's somewhat misleading, is they  
7 didn't draw in the parking lot there for the  
8 Emerson because that would give it a  
9 different flavor. So there is about, I don't  
10 know, 20 plus cars that are going to be  
11 parked there all the time. So I think that's  
12 critical especially as you visualize it.

13 Now with respect to changes to the plan  
14 the way we propose it. I'm a proponent for,  
15 you know, opening Brookford and have  
16 permanent barriers to direct traffic.  
17 Meaning I would not like to see traffic going  
18 through this place. So if you're, you know,  
19 if you're restricting it. If you live in a

1 certain area you should only park in that  
2 area and there should be no access to the  
3 rest of it with your car. And furthermore  
4 one thing that I heard these gentlemen talk  
5 about is how wonderful it's going to be for  
6 bikes and people to walk through, but you  
7 know, if you're going to be socially  
8 conscious about that, is where are the bikes  
9 going to be parked? Somebody mentioned about  
10 having these the garage underground or  
11 next-door that's going to look ugly maybe  
12 just put bicycles there. Fill it up with  
13 bicycles, give opportunity and promote use  
14 bikes instead of cars, and that could  
15 alleviate some of the traffic in this area as  
16 well, you would have that, bike racks.

17 HUGH RUSSELL: They actually do have  
18 bicycle rooms inside the building --

19 ATTORNEY JAMES RAFFERTY: Right.

1                   HUGH RUSSELL: -- for every -- one  
2                   bike space.

3                   JOHN ANTHANESOPOULOS: But that  
4                   would change the intent to have it.

5                   HUGH RUSSELL: It's already there.

6                   JOHN ANTHANESOPOULOS: Anyway that's  
7                   my comments.

8                   HUGH RUSSELL: Yes, Ma'am.

9                   THERESA WALKER: Hi. I'm Theresa  
10                  Walker. I'm at Three Magoun Street and I  
11                  have notes on my phone, sorry.

12                  I just thought it was interesting  
13                  hearing the language from the landscape  
14                  person using the word buffer. And when I  
15                  look at the site map and I'm looking at the  
16                  top part where Brookford dead ends, that's  
17                  what it looks like to me. It is a buffer. I  
18                  am also, like what Ann said, that the two  
19                  ends, the edges, they appear to me an

1 illusion. Basically what it seems like  
2 you're doing, you're hiding the huge gigantic  
3 building that of course everybody has heard  
4 does not conform to the, you know,  
5 residential area of the neighborhood. So I  
6 like what they have done so far, but I still  
7 don't think it's enough. I think they're  
8 just hiding the fact that there's a huge  
9 building there.

10 As Julia said, you can't make any left  
11 turns on to Magoun, on to Edmunds, on to  
12 Cottage Park. You can't make the left turns  
13 to go into Arlington. I mean, traffic is and  
14 it will be an issue. I don't think that this  
15 whole site is, you know, integrated well with  
16 the neighborhood because of this buffering.  
17 And she also mentioned there's green wall.  
18 Just the use of those words doesn't feel like  
19 that it's a part of our neighborhood. And

1 the fact that somebody mentioned that there's  
2 less cars in Cambridge which is great, but I  
3 don't know how you're going to guarantee that  
4 the residents of this property are either  
5 going to have no cars. How you're going to  
6 guarantee that they are going to use bikes,  
7 and that they are going to use Linear Park?  
8 How are you going to make sure that they're  
9 going to use the subway? I don't know if  
10 there's going to be restrictions or -- I just  
11 don't understand how the rental company is  
12 going to, you know, make sure that those  
13 streets have less cars in our neighborhood.

14 Thank you.

15 HUGH RUSSELL: Yes, sir.

16 PAUL ROBERTSON: Paul Robertson, 45  
17 Magoun Street. Owner of 45 Magoun Street.

18 It took these presenters over an hour to  
19 present the problems. The newest problems:

1 The size of the building, the location of the  
2 building, the traffic. Brookford Street was  
3 closed for commercial traffic years ago. Is  
4 this building going to create less traffic?  
5 Of course not. I asked my grand -- I asked  
6 -- I have six grandchildren, but I asked the  
7 one that we're grooming -- I'm second  
8 generation developer, my son's a third, and  
9 we have the fourth coming. There's six  
10 grandchildren. And I asked them what  
11 building doesn't fit in this picture? And  
12 the two-year-old pointed to the building.  
13 And thank God the 14-year-old pointed to it  
14 also. So, you know, it's a problem. The  
15 problem is that it's landlocked with the  
16 park. The traffic can get in, but it really  
17 can't get out. Certain times, three to five  
18 in the evening, go down Whittemore you have  
19 to be let out by the police officer. I know

1           you're sick of hearing it.

2                   HUGH RUSSELL: Excuse me. Well,  
3           we're trying to run a meeting and do our  
4           business. And we don't want things --

5                   PAUL ROBERTSON: The building's  
6           still 265 feet long.

7                   HUGH RUSSELL: Okay.

8                   PAUL ROBERTSON: Mr. Walker made --  
9           an architect for 40, 50 years. He commented  
10          about people carrying --

11                   UNIDENTIFIED AUDIENCE MEMBER:  
12          Groceries.

13                   PAUL ROBERTSON: Their groceries to  
14          their unit. Look at the size of the  
15          building. And also in the state of  
16          Massachusetts if a building doesn't comply  
17          and it takes away from your value in the  
18          neighborhood, it doesn't belong. Or  
19          compliance. Don't build it if it's not gonna

1 be an asset to the neighborhood. This is not  
2 an asset. It's going to devalue our  
3 property. We have a vested interest in our  
4 neighborhood. The developer is not  
5 experienced. The financier held out a big  
6 carrot and the developer took a big bite.

7 HUGH RUSSELL: Excuse me, sir.

8 PAUL ROBERTSON: And they're choking  
9 on it. I'm finished.

10 HUGH RUSSELL: Back in the back  
11 corner.

12 BEVERLY COURTNEY: Beverly Courtney,  
13 Brookford Street. C-o-u-r-t-n-e-y. I'm a  
14 lifelong resident of Cambridge. I have lived  
15 in North Cambridge 76 years.

16 I've lived there for 76 years in North  
17 Cambridge. Brookford Street has never been  
18 an open street. Never, never. Plus the fact  
19 that where were these people 30 years ago

1           when we were going through this? We're still  
2           going through it 30 years. I'm satisfied  
3           with what they've done and I wish they would  
4           go ahead and do it and end it.

5                        HUGH RUSSELL: Thank you.

6                        Yes, sir, in the middle.

7                        MIKE PHILLIPS: Hi. My name is Mike  
8           Phillips and I live at 57 Madison Ave.  
9           Phillips with two L's. I'll stay on topic.  
10          There are some things I like about the  
11          changes and some things I don't. I'll start  
12          with the positive and end strong is what I  
13          figured.

14                      I like the duplex townhouses that are  
15          being added. I would like to see more of  
16          that. They -- I'd like the duplex  
17          townhouses -- (inaudible).

18                      I like the concept of the smaller  
19          buildings. I like to see more of that. Does

1 idea of that. However, the drawing shows the  
2 path leaving their property and still being  
3 constructed there. So I think the Board  
4 should just make sure that they are either  
5 working with grates or have easements or  
6 something. I'd like it to not end with the  
7 path that turns into dirt again. It will  
8 eliminate the angle but we'll still have the  
9 same problem with access to the actual bike  
10 path.

11 You asked about lighting, and I believe  
12 the traffic and parking memo of March 5th  
13 asks that the proponent light the access to  
14 the Cottage Park side. And I assume that  
15 today that would also apply here getting onto  
16 the Linear path. We've not really heard  
17 anything about lighting so you might want to  
18 ask about that.

19 The chain link fence I would say

1 contrasts that with Cambridge Lumber. And  
2 you know that the Linear Park elevation does  
3 vary. It is high in some places and comes  
4 back down a bit.

5 Parking lot material, I don't know what  
6 that is. I didn't look closely, but it would  
7 be nice if it wasn't just plain asphalt,  
8 something greener. And I don't see a  
9 sidewalk along the back of the building in  
10 terms of getting pedestrians through the site  
11 in the back, but that might just be my eyes.

12 And then to wrap up, you know, I will  
13 say enthusiastically, you might say  
14 presumptuously, submitted to you in writing a  
15 list of the things that you asked about. I  
16 would just encourage you to review that and  
17 see if you're satisfied with those answers  
18 you have or have not received from the  
19 proponent. I think there's a lot lacking

1           there. I would also continue to encourage  
2           towards meeting with the developer. The  
3           meeting last night was, I guess I'll say  
4           cathartic in some ways, but not entirely  
5           unproductive I think you would say. And I  
6           think together this is our chance to make  
7           this great neighborhood all the better.

8                         So, thank you.

9                         HUGH RUSSELL: Thank you.

10                        Yes, sir.

11                        JEFF SUAREZ: Jeff Suarez,  
12           S-u-a-r-e-z. I live at 38 Brookford Street.  
13           I've seen the plans kind of aerate over time  
14           and I think this is an improvement. I think  
15           I like a lot of the green that's been added  
16           and I think, you know, it does blend better  
17           with the neighborhood. I'd like to disagree  
18           with the gentleman up front who said that  
19           this would devalue the land. I don't think

1           that you can tell me that having a parking  
2           lot is going to be better for my property  
3           value than having a developed space with  
4           trees and, you know, nice space for people to  
5           access the Linear Park. So I'm happy with  
6           the direction that things are going.

7                        HUGH RUSSELL: Okay.

8                        Anyone else?

9                        JOHN WALKER: My name is John  
10           Walker. I live at 150 Whittemore Ave., and  
11           traffic is a problem, especially a problem  
12           where I live. But I'd like to say what  
13           they've done, the work that they've done  
14           since we met the last time, is better. That  
15           we have the nice soft edge as you enter from  
16           Whittemore. We actually had that the last  
17           time. But this time you also have the soft  
18           edge on Cottage Park which is good. And it's  
19           set back more room from the bike path. And

1 I've walked the bike path and tried to  
2 envision what the building would look like if  
3 it were there. And it's substantial. I  
4 complimented the Board last week about the  
5 work that you did with Cambridge Lumber. And  
6 if you walk down there at nighttime, the  
7 project is stunning and, you know, I think  
8 it's really beautiful. And I feel sorry that  
9 people are going to buy those units and  
10 they're going to be looking at this. That's  
11 what they'll get. So they're at a  
12 disadvantage. But over the years when I  
13 worked with developers and design projects  
14 that go ahead or don't go ahead or blow up or  
15 are incredibly successful, there are always  
16 concessions made where reasonable people do  
17 reasonable things. And I can remember  
18 working with the developer where nothing was  
19 going right. And after the meetings that we

1 had he burst out into laughter in a parking  
2 lot and said that this is crazy. And I said,  
3 well, what are you going to do? He said, I'm  
4 going to build a single-family house on the  
5 lot and leave. Because it's more important  
6 for me to do another project and turn it  
7 over, do another one and turn it over. And  
8 Mr. Lee will turn over Harvey Street in a  
9 year. And he'll be gone. He'll have another  
10 project going. And sometimes you beat your  
11 head against the wall and you have to admit  
12 that, you know, maybe it's just too big.  
13 And, you know, I haven't done a lot of big  
14 work in residential work in Cambridge. I've  
15 done other buildings, university buildings,  
16 but the Zoning envelopes which I'm sure  
17 you're all familiar with, and Cambridge has a  
18 very complex way of figuring out what you can  
19 build in, and I kind of think they're filling

1 the envelope and to break that into two  
2 buildings, well something else has to give.  
3 There's always limitations in Zoning.  
4 Usually in the suburbs it's parking. The  
5 minimum site requirements. Every Zoning has  
6 its own unique aspects. But there's always a  
7 limiting factor that's a deal breaker. And I  
8 think it's hit the deal breaker. And that's  
9 why it keeps coming back as a single  
10 building. Frankly, I don't know how to fix  
11 it. My initial thing was this should have  
12 been townhouses. You know, a road going  
13 through. Maybe a little Louisburg Square in  
14 the middle with townhouses in the back,  
15 townhouses in the front. Everybody owns  
16 their own property. It would be beautiful.  
17 Like Mass. Avenue after Huntington and before  
18 Tremont Street it has that little opening  
19 with the bow front townhouses going around.

1           And if you go up to North Arlington and Mill  
2           Street, the corner of Mill and Mass. Avenue,  
3           they've done a very nice townhouse project on  
4           that corner. Nowhere near the classiness of  
5           the Mass. Avenue in Roxbury, but it's nice  
6           nonetheless. And then you walk around  
7           Cambridge and every place you go it's  
8           stunning what people have done with old  
9           properties. And this thing looks to me like  
10          a mattress factory or a fabrication plant or,  
11          you know, last time I thought it was a hay  
12          and feed. You know, the detail, there's no  
13          details at all on the building. And it's  
14          just, it's just -- it's a box. It's a box  
15          for living. And thank God I'm not in the  
16          box. I'm down the other end. I'll take my  
17          little two-family with all the traffic.

18                    Thank you.

19                    HUGH RUSSELL: Thank you.

1           Okay, do we want to take a break now  
2           and then come back and discuss this?

3           CHARLES TEAGUE: I have one more  
4           comment, please.

5           HUGH RUSSELL: Mr. Teague.

6           CHARLES TEAGUE: Charles Teague, 23  
7           Edmunds Street. I was going to -- I want to  
8           point to that so I'm going to walk over  
9           there. But in the meantime if you could find  
10          your little North Cambridge map is the next  
11          thing. But I think this was a -- I think you  
12          asked whether this is better or worse. And I  
13          think this is worse. And I just don't -- I  
14          live here. I experience the garbage trucks  
15          where you have to get out and move our cars  
16          because they come through here. And to make  
17          this narrower than Cottage Park, doesn't make  
18          any sense. This is either, this is either a  
19          -- this is either access or it is not, and

1           it's always been access. So to make it  
2           narrower and then to have this crazy  
3           little -- another set of intersections  
4           through here. I experience all this. They  
5           may be able to get a -- fire engines over  
6           here, but this is madness. And this has been  
7           used when Fawcett had their second fire on  
8           the site. Remember the first fire burnt down  
9           the building that almost opened Brookford  
10          Street. So I just don't -- and this is all  
11          parking. So this, this is -- this I live  
12          with. This is the loop. And now you're  
13          going to have people backing out of those  
14          spaces. It doesn't make any sense. It  
15          doesn't make any sense that this is narrow.  
16          It doesn't make any sense here. And as, as  
17          much as -- I want the whole site to be  
18          townhouses, but these townhouses are just  
19          ornaments on a dead tree. You know, there's

1 no difference. We're just -- they're just  
2 camouflaging this giant building. And the  
3 point -- the point is that we told them at  
4 the very beginning years ago, townhouses. We  
5 sent a memo. We made a model. And when you  
6 unplug the model and you plug in townhouses,  
7 it's seamlessly integrated into the  
8 neighborhood. And they don't understand that  
9 we're not talking about the color or the  
10 shape or the size of the building. We're  
11 actually talking about the community and  
12 integration with the community, and that goes  
13 to the map here. And last night we were told  
14 that we need large rental apartment  
15 buildings. We have 1500 large rental  
16 apartment buildings coming within a half  
17 mile. We don't need any more large rental  
18 apartment buildings especially on this site  
19 which is embedded in the neighborhood. The

1 large rental apartment buildings belong where  
2 they are, up in the Alewife, up next to the T  
3 where Rich McKinnon's building. This is not  
4 the place to be jamming this thing in. This  
5 is a neighborhood and we want a community.  
6 And that is -- this is not what's supposed to  
7 be here.

8 Thank you.

9 HUGH RUSSELL: Yes, sir.

10 TOM WOJSIESHOWSKI: My name is Tom  
11 Wojsieshowski, W-o-j-s-i-e-s-h-o-w-s-k-i.

12 I just wanted to make a comment on the  
13 changes. The townhouses are welcome but  
14 clarify for me the ones down on the end might  
15 become something else? Is that what I heard?  
16 On the left side?

17 MARK BOYES-WATSON: These are, these  
18 are 5,000 square foot lots for sale.

19 TOM WOJSIESHOWSKI: Which could be

1 joined together?

2 MARK BOYES-WATSON: You could join  
3 all three and buy them.

4 TOM WOJSIESHOWSKI: Okay, so that's  
5 a problem.

6 This is going to be built by you folks?

7 MARK BOYES-WATSON: Part of the  
8 project.

9 TOM WOJSIESHOWSKI: That's good.

10 I would reiterate what other people  
11 have said, the big building is still the big  
12 building. It hasn't gotten any smaller. It  
13 doesn't fit the neighborhood. And the  
14 presentation tonight took great pains to say  
15 what used to be there in terms of Fawcett  
16 Oil, what used to be on the boards in terms  
17 of a larger building, and I just want to  
18 create a palliative to that strategy which is  
19 a classic strategy, bring a loud, smelly goat

1           into the room and try to discuss things and  
2           then put a slightly smaller goat in the room  
3           and say oh, we've done it.

4           Thank you.

5           HUGH RUSSELL: Okay.

6           Anybody else?

7           (No Response.)

8           HUGH RUSSELL: Good. So should we  
9           take a break and come back.

10          (A short recess was taken.)

11          HUGH RUSSELL: All right, we're  
12          going to resume.

13          So we have two different visions of  
14          what might happen on this lot. There's a  
15          vision that's been articulated by some of the  
16          previous speakers that this should be a  
17          two-family house development. And then  
18          there's a vision of what's up there on the  
19          wall, that fixes that. Now as I recollect,

1 the City Council was presented with a  
2 petition 10 or 15 years ago Zone this  
3 Residence B and they did not do that. And  
4 the Zoning for this area has been changed,  
5 was changed roughly 10 or 12 years ago. I've  
6 forgotten exactly when it was. And it was  
7 been changed to three years ago to reduce the  
8 development that's in response to the first  
9 proposal.

10 But the law in the Zoning Ordinance  
11 doesn't say you have to build two-family  
12 houses. So my question is does this project  
13 meet the standards for the design review  
14 permits that we have to apply? And it's not  
15 my question that whether we should ignore  
16 those standards. And I think what you see on  
17 that plan is that the two-family density  
18 produces, you know, uses up a lot of the land  
19 to both ends. If you make it all two-family,

1           you're going to have a lot less development  
2           on the site. Many people here will think  
3           that's absolutely the right thing to do, but  
4           that's not what the Zoning permits.

5                     The Zoning permits larger buildings.  
6           And the reason it permits larger buildings is  
7           because it wants to -- Zoning policy of the  
8           City is to convert this from an industrial  
9           use to a residential use. And it is felt,  
10          and I think it's been proven, that you need a  
11          level of density to make that happen in the  
12          marketplace.

13                    So how should we proceed?

14                    TOM SIENIEWICZ: Mr. Chair, I think  
15           what I'd like to do is go through the  
16           criteria and discuss criteria point on point  
17           if it's not, if other Board members think  
18           it's not too laborious, have some discussion,  
19           make some findings about the criteria so that

1 we can go on record saying here's our view  
2 about a particular criteria that's been put  
3 before us and the public gets a chance to  
4 understand how this Board makes an assessment  
5 about a conformance to the City's Ordinances.  
6 That's what I would recommend.

7 PAMELA WINTERS: I think that's a  
8 good idea.

9 HUGH RUSSELL: Okay, so the -- if  
10 people have the application, about the fourth  
11 page in there's a section called Supporting  
12 Statement for a Special Permit. And so the  
13 -- one of the requirements is a -- one of the  
14 pieces is the general standards for a Special  
15 Permit that the requirements of the Ordinance  
16 can be met, and the finding we would make is  
17 that it does conform with the Zoning  
18 requirements of the district.

19 The second is traffic generated or

1 patterns of access or egress would not cause  
2 congestion, hazard, or substantial change in  
3 established neighborhood character.

4 TOM SIENIEWICZ: Well, this  
5 obviously warrants some discussion.

6 I mean we appreciate the perspective  
7 that many, many community members have taken  
8 the time to come out tonight to express both  
9 at the last hearing, and despite our  
10 admonition, it's obviously one of the central  
11 issues of concern over this project and so a  
12 few comments on the record. The way in which  
13 the plan has been modified to allow for  
14 multiple ways for cars to move through the  
15 site, but also with an understanding that it  
16 would be horrible if this became a shortcut  
17 as this neighborhood is obviously  
18 overburdened with regional traffic rather  
19 than just neighborhood traffic. An example

1 of that understanding is the keyed or gated  
2 gate in the center the site to prevent that  
3 shortcut. So, there's ways in which this  
4 project in particular is trying to deal with  
5 not only its specific traffic burdens but  
6 also to begin to ameliorate some of the  
7 congestion issues in the neighborhood. And  
8 we can be specific if you want on the record,  
9 but that's my feeling of making this  
10 assessment of what I've got before.

11 HUGH RUSSELL: Right. I think it's  
12 important that the actual amount of traffic  
13 generated in the peak hour corresponds to  
14 like one car every ten minutes down each of  
15 the five streets if they were evenly  
16 distributed, which I really don't think they  
17 will be because it would be certain ways at  
18 certain times that will be better.

19 And secondly that the traffic generated

1 by the residential project is in quantities  
2 similar to the traffic that was generated by  
3 the most recent use. So that we're not  
4 causing congestion or hazard or in the  
5 congested situation and it's not going to  
6 change that.

7 CATHERINE PRESTON CONNOLLY: Hugh,  
8 if I could go one step further on that, I  
9 think that it's worth noting that encouraging  
10 residential density in Cambridge actually  
11 helps alleviate some, you know, admittedly  
12 marginal but some regional commuting traffic  
13 demand by making it feasible for the workers  
14 in Cambridge to live closer and to do things  
15 like take the T and bike to work. And that  
16 by creating those housing opportunities,  
17 we're balancing all the other work we do with  
18 permitting office and labs in the city.

19 STEVEN COHEN: Mr. Chair, if we're

1 addressing the traffic issue now, I feel  
2 obligated to address the question of  
3 Brookford Street once again. As I expressed  
4 it earlier, I think, you know, that's  
5 important for an Applicant to do everything  
6 that's reasonably possible. And as I look at  
7 this plan, and as we've heard from many of  
8 the neighbors here, it just seems to be a  
9 shortcoming in the overall plan here, that  
10 the potential traffic cannot be further  
11 distributed along Brookford Street. And I  
12 find it difficult to address the subject  
13 because neither I nor anybody here I think  
14 has actually read the court order, and we  
15 don't fully clearly understand what the  
16 parameters are here. I would say for myself  
17 anyway that ideally frankly, I would be  
18 inclined to condition a final decision on  
19 access to Brookford Street and thereby, you

1 know, put the onus on the Applicant and  
2 ultimately the City to make any of that  
3 happen. I do understand now that there is  
4 apparently a petition before the City  
5 Council. I've heard that tonight for the  
6 first time and I think I would suggest and  
7 recommend to the Board tonight that at very  
8 least if you don't go the route of a  
9 condition, that at the very least that we  
10 express in some appropriate fashion our  
11 professional opinion and request to the City  
12 Council that they do take whatever steps are  
13 necessary and proper to open access to  
14 Brookford Street and, you know, to express  
15 our opinion that to do so would be the  
16 appropriate thing to alleviate or, you know,  
17 appropriately share the traffic burden within  
18 this neighborhood. I think we've heard a  
19 number of things. I think your point was

1 exactly right on on the Zoning issue and the  
2 massing and the height of the setback.

3 That's exactly right on. But the other big  
4 issue that we hear has been traffic and I, I  
5 think that we would be remiss not to address  
6 the question of Brookford Street.

7 H. THEODORE COHEN: Well, I too  
8 would like to see Brookford Street opened and  
9 it being part of the project or take into  
10 consideration the project, and I would  
11 support the concept of asking the proponent  
12 and the City to investigate it as quickly and  
13 thoroughly as possible. I can't really  
14 envision, though, making it a condition since  
15 they do have access through other streets,  
16 and there is, as you say, we haven't seen a  
17 court order but there is, it's been  
18 represented that there is a court order  
19 preventing the use of Brookford Street. And

1           so I just, you know, would be very hesitant  
2           to condition something -- condition that  
3           approval in something that we don't know  
4           whether it can be achieved or not.

5                        I did want to follow up on the traffic  
6           issue in that, you know, I do live in North  
7           Cambridge and I know what traffic is like  
8           there during rush hour, but it really is not  
9           from this area where it's coming from. The  
10          traffic is backed up on Mass. Ave. It's due  
11          to Route 2. It's due to Route 16. It's due  
12          to Alewife Brook Parkway. It's due to a lot  
13          of things, and, you know, I don't think it's  
14          due to any really great extent in the traffic  
15          that's going in and out of this project and  
16          these streets. And so I think that having  
17          reviewed the traffic reports and the  
18          historical use of the property and the  
19          historic traffic, I don't see that this is

1 going to significantly change what has  
2 happened historically, and so I don't think  
3 -- the traffic which is indeed a problem,  
4 there's no question about that it's going to  
5 be changed in any significant way by this  
6 project.

7 STEVEN WINTER: Mr. Chair. Steve, I  
8 concur with you that Brookford Street is very  
9 puzzling in a lot different ways. And I  
10 don't completely understand the issue myself.  
11 However -- and I would -- any dialogue on how  
12 to open the street I think would be good. I  
13 think the street should be open. But I don't  
14 think we can ask the proponent to take an  
15 obligation to address a judicial issue. I  
16 just don't think we can do that. So I don't  
17 mind it being on the table for discussion,  
18 but I do think it's a little onerous to ask  
19 the proponent.

1 letters from the Traffic Department relate to  
2 our final decision, but I would certainly  
3 hope and expect that her recommendations be  
4 incorporated as conditions to any final  
5 decision.

6 HUGH RUSSELL: Right. That's what  
7 we normally do. Because I'd like to speak  
8 about Brookford Street because I think we  
9 cannot impose a condition on somebody to  
10 require that. And frankly, I don't believe  
11 it's necessary for the success of the  
12 project. The amount of traffic is low. It  
13 means a car will come every 12 minutes  
14 instead of every 10 minutes, and so that's  
15 not a substantial change. It clearly is a  
16 substantial change to the character of  
17 Brookford Street which has not been opened in  
18 memory of anybody here. It may never have  
19 been open. So, I would much prefer to let

1 the City Legal Department, the Council, and  
2 that process deal with this question and  
3 write a decision that says should Brookford  
4 Street be available, that the proponent has  
5 to make that connection. If the process  
6 through the Council results in that, then  
7 this proponent has to make the necessary site  
8 plan changes to make it work and work with  
9 the staff to implement that.

10 STEVEN COHEN: Would the Board  
11 consider incorporating into such a provision  
12 a recommendation that it be made available?

13 HUGH RUSSELL: Well, I don't know.  
14 I would not be prepared to make that  
15 recommendation myself. You know, I think --  
16 so, I don't know who else -- I think we're  
17 kind of evenly divided on that?

18 STEVEN WINTER: I would not --  
19 Steve, understanding as you do, much too

1 little about the issue. I don't think I  
2 could make that commitment.

3 PAMELA WINTERS: And there's a  
4 petition that's going before the Council, so  
5 it's their decision and they will have to do  
6 the homework to decide whether or not it's  
7 legal or not. It's not our, not our -- in  
8 our purview to do that.

9 STEVEN COHEN: No. I'm granting and  
10 conceding and getting the point, the legal  
11 point. But I would imagine that as the City  
12 Council is trying to decide what legal  
13 decision to make, that they would be  
14 interested in the Planning Board's assessment  
15 simply of the traffic issue, of the planning  
16 issue in essence. So if we made a  
17 recommendation, it wouldn't be a legal  
18 matter. It would simply be that, you know,  
19 access to the street would be beneficial, you

1 know, to the traffic patterns in the  
2 neighborhood.

3 HUGH RUSSELL: Well, we don't have a  
4 recommendation from the Traffic and Parking  
5 Department that says that. And I would be  
6 reluctant to make such a recommendation.

7 H. THEODORE COHEN: Conceptually to  
8 my point of view it would make sense to have  
9 Brookford Street opened and available to the  
10 project. And I think if we had full  
11 information, then I think it would be  
12 appropriate for us to make a recommendation  
13 to the City Council. But I agree with Hugh  
14 that we haven't heard from Traffic and  
15 Parking yet on the issue at all and so, you  
16 know, it's just sort of my personal feeling  
17 about it rather than being an informed, you  
18 know.

19 CATHERINE PRESTON CONNOLLY:

1 Mr. Chair, could I suggest that as the  
2 process goes through the City Council, that  
3 we ask the staff to provide us any updates,  
4 including any memos, that Traffic and Parking  
5 might provide to the Council so that if  
6 there's an opportunity for us to provide a  
7 letter to the City Council on the planning  
8 issues, we do so?

9 HUGH RUSSELL: Sure.

10 TOM SIENIEWICZ: I'll change the  
11 subject a little bit from that local street.  
12 I too agree that we don't have the facts in  
13 front of us to make a recommendation on  
14 Brookford Street. But I did note in the  
15 table, the Dimensional Table that the  
16 proponent is suggesting that they're going to  
17 provide twice the amount of bike parking at  
18 the facility that is required under the Base  
19 Zoning. And I know that some people might

1           argue that's a relatively minor thing, but I  
2           think that that's a significant understanding  
3           that the way in which people will be moving  
4           in and off of the site might be in ways,  
5           modes of transportation that don't rely on  
6           cars.

7                        HUGH RUSSELL: Right. Essentially  
8           jumping the gun on the Petition that we have  
9           in front of the Council. As several people  
10          have done that, and you've stated the reasons  
11          for that.

12                      Item C: Continued operation of or the  
13          development of adjacent uses permitted under  
14          the Zoning Ordinance would not be adversely  
15          affected by the nature of the proposed use.

16                      So this is a use. And I think the  
17          answer is as a good neighbor, it's the best  
18          use, that's the intent of the Ordinance in  
19          this district.

1           D: Nuisance or hazard would not be  
2           created to the detriment of health, safety,  
3           welfare of the occupant of the proposed use  
4           or the citizens of the city.

5           That's a curious provision, but it  
6           actually goes back to, I think, the 1924  
7           Supreme Court decision that legal -- or  
8           upheld the right of communities to create  
9           Zoning. That's the actual language that's in  
10          there.

11          STEVEN WINTER: Is it (inaudible)?

12          HUGH RUSSELL: Yes. You lawyers  
13          know more about it than I do.

14          And we haven't heard anything it's  
15          going to be nuisance or hazard. I think the  
16          traffic -- the word hazard also occurs in the  
17          traffic. So I think that's where we would  
18          address that.

19          For other reasons the proposed use

1 would not impair the integrity of the  
2 district or the adjoining district or  
3 derogate from the intent and purpose of the  
4 Ordinance.

5 CATHERINE PRESTON CONNOLLY:

6 Mr. Chair, I think as you recall about the  
7 rezoning of the neighborhood and the intent  
8 and purpose of this Ordinance, the Zoning as  
9 it applies to this site, really was to  
10 encourage exactly this kind of conversion  
11 from industrial to admittedly larger scale  
12 residential than exists in the adjoining  
13 neighborhood with the idea that it is a  
14 transition. And that it provides exactly the  
15 kind of good neighbor, residential to  
16 residential that the Council was looking for.  
17 And it does so at a scale that financially  
18 enables the conversion of a previously  
19 industrial site.

1                   HUGH RUSSELL: Okay. The next set  
2 of findings is found in the conformance with  
3 the citywide urban design objectives.  
4 Heights and setbacks provide suitable  
5 transitions to abutting or nearby residential  
6 Zoning District that are generally developed  
7 in low scale residential uses.

8                   And I think your -- because of the  
9 setback, the abutting buildings in the  
10 district have been two and a half to three  
11 stories. They've done what they need to do.

12                  STEVEN WINTER: Mr. Chair, the  
13 residential ledges on either side moving into  
14 the fabric of the community, and I think that  
15 the traffic distribution and flow I think  
16 also tries to do that to meet that need.

17                  STEVEN COHEN: Mr. Chair, I agree  
18 with what Steve says. I think it's the small  
19 scale structures on the two sides are an

1           important piece of this whole puzzle  
2           providing that transition, but I do want to  
3           address the parcel on the left where there  
4           are three separate parcels as configured in  
5           our plan. You know, it provides that  
6           transition to the single-family portion of  
7           the neighborhood, and I think that really is  
8           an important piece of making it work. If in  
9           fact the three parcels were combined, I think  
10          that would compromise precisely those factors  
11          which make the whole plan palatable to me  
12          anyway. And I guess I would suggest the  
13          possibility of a condition that requires that  
14          they not be combined or that at least that  
15          they be ultimately developed, as shown as  
16          three separate structures.

17                   HUGH RUSSELL: Unfortunately  
18           those --

19                   PAMELA WINTERS: Is that legal

1           though?

2                   HUGH RUSSELL: Well, it's not legal  
3           in the sense that those are not part of the  
4           application.

5                   STEVEN COHEN: It's owned by the  
6           Applicant?

7                   ATTORNEY JAMES RAFFERTY: No, it's  
8           not.

9                   STEVEN COHEN: It's not owned by the  
10          Applicant? How can you make representations  
11          on these plans then if they're not  
12          controlled --

13                  ATTORNEY JAMES RAFFERTY: It's  
14          subdivided. It is not the Applicant.

15                  STEVEN COHEN: So in other words  
16          we're looking at plans with -- that I mean  
17          you made representations about how they're  
18          going to be developed and sold.

19                  ATTORNEY JAMES RAFFERTY: Excuse me,

1 Mr. Chairman, we were very cautious at the  
2 outset. The initial submittal didn't have  
3 any footprints at all. What we have done is  
4 demonstrate what the setbacks are. Those are  
5 footprints for illustrative purposes to show  
6 what the setbacks are. What the distance  
7 from those buildings need to be from the  
8 street, from the rear, and from each other.  
9 It's subject to SD-2 Zoning. So we put  
10 footprints -- we consciously didn't even put  
11 in driveways because we weren't sure if they  
12 would be singles or ones or what the owners  
13 of those properties would do. So we've been  
14 clear. That land isn't part of the  
15 application. It's not part of the lot area.  
16 But we have been saying all along that it is  
17 land that's being sold and we have two offers  
18 on it.

19 STEVEN COHEN: We -- I think it's

1 funny use of the word We.

2 HUGH RUSSELL: So the -- I look at  
3 it and say we're creating four lots that are  
4 in conformance with Residence B, and that's a  
5 big step they have. It's not part of this  
6 application, but it is part of the overall  
7 development of this area and that was the  
8 right thing to do I think.

9 ATTORNEY JAMES RAFFERTY: We have --  
10 the subdivision plan is on record. We've  
11 created the four separate 5,000 square foot  
12 lots. So -- but beyond that they're four  
13 lots abutting the site.

14 STEVEN WINTER: Mr. Chair, what is  
15 the property currently Zoned for? Or what  
16 could a proponent build on that property by  
17 right if a proponent owned it?

18 HUGH RUSSELL: I don't know the  
19 answer to that question.

19

CATHERINE PRESTON CONNOLLY:

Mr. Chair, I might suggest it's not relevant as Mr. Rafferty has repeatedly told us those are separate lots. And I appreciate his clarification that the footprints we see there are illustrative but they're not part of this application.

STEVEN WINTER: I understand that they're not part of the application, but I still think the question's relating to the nature of it is what we are --

ATTORNEY JAMES RAFFERTY: I can address that.

HUGH RUSSELL: I believe that the ratio of dwelling unit to lot area is 2500?

ATTORNEY JAMES RAFFERTY: That's correct. The FAR is 0.5.

HUGH RUSSELL: 0.5.

ATTORNEY JAMES RAFFERTY: Minimum

1 lot size is 5,000 square feet.

2 HUGH RUSSELL: Right. So when you  
3 look at that, there is enough development in  
4 that to build eight units on all of that, all  
5 of those four lots.

6 ATTORNEY JAMES RAFFERTY: Correct.

7 HUGH RUSSELL: And so --

8 ATTORNEY JAMES RAFFERTY: I should  
9 point out that the three contiguous lots do  
10 theoretically have the potential to be  
11 acquired by a single land owner, in which  
12 case the six units that are permitted on  
13 those three lots could be contained in a  
14 footprint that was a row house, townhouse  
15 style, or some other form, but the fourth lot  
16 is not contiguous. It could not be combined.

17 HUGH RUSSELL: Right.

18 The next criterion is new buildings are  
19 designed and oriented in the lot said to be

1 consistent with the established streetscape  
2 on those streets on which the lot abuts.

3 This is a provision that -- the  
4 Applicant's said there's no established  
5 streetscape on this site, and yet what  
6 they've chosen to do is actually try to  
7 extend the adjacent streetscape into the  
8 property to terminate the views down Cottage  
9 Park Avenue and on the street. And so,  
10 however, we can't talk about Magoun Street  
11 because it isn't part of the application.  
12 But at least they're not building a big  
13 building out there. So....

14 TOM SIENIEWICZ: I would go one step  
15 further and say that certainly there's a  
16 pattern along the Linear Park of industrial  
17 scale buildings, and so the extent to which  
18 this is not on the street but on the Linear  
19 Park, on the former rail right of way, the

1 larger footprint is consistent with that  
2 pattern of larger structures on that right of  
3 way. And fortunately for us now we're  
4 looking at housing rather than industrial  
5 space.

6 HUGH RUSSELL: Excellent.

7 Next criteria relates to mixed use  
8 projects which doesn't apply.

9 And the next criterion is historical  
10 context. And, again, that does not apply.

11 And the next section is development  
12 shall be pedestrian and bicycle friendly.

13 And ground floor is where they face  
14 public streets, public parks, public  
15 accessible pathways shall consist of spaces  
16 that actively inhabited by people.

17 And that plan demonstrates that.

18 And the next is covered parking on  
19 lower floors of the building and on grade

1 parking, particularly we're located in front  
2 of a building as discouraged where the  
3 building faces the public street or public  
4 park or publicly accessible pathways.

5 In this case the on grade parking or  
6 parking for the building does not face any of  
7 those cited places, and that's one of the  
8 actual strengths of the seeing as how the  
9 parking has been split up and maneuvered  
10 around and hidden.

11 Ground floor shall be 25 to 50 percent  
12 transparent, and that is what they've shown  
13 on the ground floor fenestration.

14 Entries to buildings are located so as  
15 to ensure safe pedestrian movement. To  
16 encourage walking as preferred mode of  
17 travel. To use public transit for employment  
18 and earlier trips.

19 So I think, again, with the entries at

1 and the pathway system that connects to the  
2 Linear Park, they've achieved this.

3 Pedestrian bicyclists shall be able to  
4 access the site safely and convenient.

5 Bicycles shall secured storage facilities  
6 immediately located on-site and out of  
7 weather.

8 That has been met.

9 We -- probably what will happen is the  
10 decision that staff and fills in the actual  
11 citations of the building features. I'm not  
12 going to go there.

13 Building and its site shall mitigate  
14 adverse environmental impacts of a  
15 development upon its neighbor. Mechanical  
16 equipment is carefully designed, well  
17 organized, or visually screened,  
18 significantly buffered with neighbors.

19 That will probably end up as a

1 condition. They've made -- they've got a  
2 strategy of how to put small scale mechanical  
3 equipment that's up on the roof and it's  
4 being demonstrated.

5 STEVEN WINTER: Mr. Chair, could we  
6 pay particular attention to the sound and  
7 request specifically that the mechanical  
8 equipment meet sound, noise requirements in  
9 the city?

10 HUGH RUSSELL: That's a yes. That's  
11 also a standard condition.

12 STEVEN WINTER: Got it. Okay, yes.

13 HUGH RUSSELL: And one hopes they  
14 would actually go beyond the minimum  
15 requirements. Which they can do by the  
16 selection of the equipment.

17 Trash is handled to avoid impacts of  
18 noise, odor, or visual impacts on neighbors.

19 And they've cited they have two trash

1 containers enclosed in a six-foot fence. So  
2 I couldn't actually point them out so maybe  
3 somebody can point them out to me.

4 TOM SIENIEWICZ: Yes. Can we get  
5 the details on how the trash is handled?

6 KELLY SPEAKMAN: Right here is one.  
7 And then we had one down here, but we put a  
8 building there in the last three weeks.

9 HUGH RUSSELL: Right.

10 KELLY SPEAKMAN: And so we will put  
11 another one at this end of the site, but  
12 somewhere. We'll put one where it's in a  
13 fence and it's contained and out of the way  
14 that the people that live on this end of the  
15 building won't be able to access their trash  
16 and not have to go to the other one.

17 HUGH RUSSELL: Okay. So that will  
18 involve a condition that that be submitted  
19 for review by the Department.

1           Let's see, loading docks. There are no  
2 loading docks.

3           The storm water best management  
4 practices and water quality provisions and --  
5 are done. And they, I believe they have  
6 been -- in the actual text or text citations  
7 it's precisely what they've done.

8           STEVEN WINTER: And, Mr. Chair, we  
9 see that in the low impact development that  
10 they're using with the landscaping as well.

11          HUGH RUSSELL: That's the next  
12 criteria.

13          H. THEODORE COHEN: Mr. Chair, could  
14 I go back very briefly to the mechanical  
15 equipment. Just ask staff to take particular  
16 regard of the view from Linear Park, and that  
17 any mechanical equipment on the roof would be  
18 screened so it couldn't be viewed from Linear  
19 Park.

1 HUGH RUSSELL: Okay.

2 So the next criterion Steve has jumped  
3 the gun on. Is landscaped areas a required  
4 green open space? (Inaudible) probably  
5 reduce the rate of volume for runoff compared  
6 to the predevelopment conditions. Well, of  
7 course a single, perhaps this big would be  
8 better than present existing conditions. But  
9 they've gone way beyond that. And they have  
10 these existing permeable open space increased  
11 from 25 to 49 percent.

12 Structures designed to minimize shadow  
13 impacts on neighboring lots.

14 I think that's because of the  
15 relatively small height and the very large  
16 set back that there are not going to be  
17 shadow impacts.

18 DAVID BIANCAVILLA: Excuse me, Hugh.

19 When we redesigned it, we changed the open

1 space from permeable from 49 and it ended up  
2 being 46.4 percent.

3 HUGH RUSSELL: Thank you.

4 DAVID BIANCAVILLA: There was a  
5 slight reduction.

6 HUGH RUSSELL: Yes, I'm going off  
7 the original -- thank you for making that  
8 correction.

9 ATTORNEY JAMES RAFFERTY: Right.

10 HUGH RUSSELL: Next one has to do  
11 with a minimizing the need of structure of  
12 restraining walls and there aren't any  
13 structural retaining walls proposed.

14 Building scale and wall treatment,  
15 including provisions of windows, are  
16 sensitive to existing residential uses on  
17 adjacent lots.

18 And I think the point of this is the,  
19 is large windows looking right into somebody

1 else's house and that condition simply  
2 isn't -- doesn't occur here.

3 Outdoor lighting is designed to provide  
4 the minimal lighting necessary.

5 That's going to be a condition because  
6 I don't think we have a detailed submittal on  
7 that yet. So we're going to have to make a  
8 submission on the outdoor lighting and that  
9 would be reviewed by the staff.

10 Tree protection plan.

11 There is a tree survey and they're  
12 planting some new trees.

13 And next section is city  
14 infrastructure. The building and site design  
15 are designed to make use for the  
16 water-conserving plumbing and minimize the  
17 amount of storm water runoff. The best order  
18 of practice is storm water management.

19 You're using water conserving plumbing

1 fixtures, are you?

2 ROBERT FAWCETT, JR.: Absolutely.

3 HUGH RUSSELL: We'll put that in as  
4 a condition that's because --

5 ATTORNEY JAMES RAFFERTY: David, the  
6 best management practices.

7 HUGH RUSSELL: Plumbing fixtures.

8 ATTORNEY JAMES RAFFERTY: We're  
9 going to have them.

10 KELLY SPEAKMAN: We have to be LEED  
11 certifiable anyways.

12 ROBERT FAWCETT, JR.: For what it's  
13 worth I'm in the air conditioning and  
14 plumbing business so I'll make sure we get  
15 the right stuff.

16 ATTORNEY JAMES RAFFERTY: At a right  
17 price.

18 ROBERT FAWCETT, JR.: Regrettably it  
19 won't be oil fired though.

1                   HUGH RUSSELL: The capacity and  
2                   condition of drinking water and wastewater  
3                   infrastructure are adequate and that's the --  
4                   and they must be adequate. And so the  
5                   narrative says that they are probably going  
6                   to -- they've done tests that indicate that  
7                   there's enough water but they're going to  
8                   provide a loop-to-loop a water main through  
9                   the site which should put water pressures in  
10                  the neighborhood so it can be a condition.  
11                  Some of the stuff is stuff that actually gets  
12                  reviewed by the City's engineering  
13                  departments but....

14                  And then the last is the LEED  
15                  certification standards, and you are going to  
16                  do that?

17                  Yes.

18                  STEVEN WINTER: Mr. Chair, would we  
19                  make that a condition also that we generally

1 get the letters from Owen O'Riordan  
2 indicating that all the infrastructure  
3 engineering is as it should be. Do we need  
4 to do that here or is that part of the  
5 inspection by the City?

6 HUGH RUSSELL: It can happen either  
7 way. You know, if this were a much larger  
8 project, I think we'd want it that. But I  
9 think in this case this is appropriate.

10 STEVEN WINTER: Okay, that's fine.  
11 I get it.

12 HUGH RUSSELL: The City won't let  
13 them do it unless it happens. And I think  
14 part of -- well, part of this language is  
15 that somebody comes and says I'm not going to  
16 do it, then we have the ability to deny their  
17 Special Permit which puts a certain -- it  
18 encourages them to do it shall we say.

19 New construction shall reinforce and

1 enhance the complex curving aspects of  
2 Cambridge as it is developed historically.

3 Tom.

4 TOM SIENIEWICZ: Mr. Chair, I think  
5 the street extension that they're taking  
6 about that are incineration of the planning  
7 seem to build on the excentric byways of  
8 Cambridge in a way that it's also functional  
9 given the scrutiny we put the Applicant  
10 under. So I'd say that this plan is  
11 consistent with that. Also, again, the  
12 larger building seems to be consistent with  
13 that pattern of building along that  
14 (inaudible).

15 HUGH RUSSELL: Next criteria is  
16 expansion of interior housing is encouraged.  
17 And they -- they are a housing project, but  
18 in addition they cite the creation of the  
19 number of three-bedroom units which is really

1 unusual. And I don't know the exact number  
2 because it's changed I think.

3 KELLY SPEAKMAN: 17.

4 HUGH RUSSELL: 17. There was a  
5 change --

6 PAMELA WINTERS: From 12.

7 HUGH RUSSELL: Yes.

8 Enhancement and expansion of open space  
9 amenities shall be appropriate for the  
10 development.

11 And here we have all felt the  
12 relationship to the Linear Park and the  
13 connections to it were crucial, but they've  
14 also created other open spaces of a smaller  
15 scale very visible from other points of view.

16 And the townhouse and multi-family  
17 permit criteria in Section 1047.4, and the  
18 first one is key features of the natural  
19 landscape should be preserved.

1           And they've determined that that's  
2           really the perimeter trees and they're  
3           preserving them.

4           Two, new buildings should be related  
5           sensitively to the recently built  
6           environment.

7           The location or orientation of massing  
8           of structures and development shall  
9           (inaudible) overwhelming the existing  
10          buildings in the vicinity of the development.

11          TOM SIENIEWICZ: I think this  
12          deserves some discussion. It's obviously the  
13          concern of many people who have spent their  
14          time to come out tonight and other nights to  
15          express their strong opinion about the  
16          massing of the building, and I've certainly  
17          heard that and read the letters as well. The  
18          position of this larger building behind both  
19          the gas plant and the other industrial

1 building, it hides it from the neighborhood  
2 to some degree and it is tucked in -- this  
3 larger building is tucked in behind the  
4 extensions of the traditional street patterns  
5 that have now emerged in this iteration.  
6 There's ways of which this larger building,  
7 the scale of this building has been designed  
8 in its site to deal with the pattern,  
9 existing pattern of this neighborhood as best  
10 it can while realizing the -- and not  
11 exceeding the allowable and development  
12 rights on the property. So, there's ways in  
13 which the proponent is trying very, very hard  
14 to take this larger building and also hide it  
15 or tuck it into the fabric in its least  
16 impactful way.

17 HUGH RUSSELL: I think the other  
18 thing is the actual architectural treatment  
19 of the elevations is it's not monolithic,

1           it's different things are happening as you go  
2           around which helps to relate it to the scale  
3           of other larger buildings.

4                       TOM SIENIEWICZ: Mr. Chair, I think  
5           we need also to address the condition of it  
6           being one building and two buildings because  
7           that's obviously a concern that was brought  
8           to us by the community, and it's something  
9           that the proponent tested and there was, you  
10          know, a couple hours ago a long discussion of  
11          the virtues of the larger building, a single  
12          building and the two buildings, and it  
13          extended beyond initially thought it would be  
14          the economics which would be the primary  
15          argument for that, but it seems that there  
16          are ways in which the planning of the  
17          building allows more light and air into the  
18          units. And the corridor in fact is also  
19          detailed so that there's light inside that

1 corridor. So there are ways in which the  
2 single building offers some advantages beyond  
3 just the economics in terms of the quality of  
4 life and the quality of the architecture and  
5 the quality of the building itself.

6 HUGH RUSSELL: And I think in  
7 addition the relationship between the ends of  
8 the building and the neighborhood if it's  
9 broken apart, then the building has to move  
10 closer and by whatever amount it's broken  
11 apart. And I think the study they showed of  
12 breaking it apart showed that you didn't get  
13 any benefit from the slice in the middle of  
14 space.

15 H. THEODORE COHEN: I also think  
16 having looked at some of the earlier plans  
17 and the way this building is tucked in behind  
18 the ice house and the other industrial  
19 buildings there was no particular reason to

1 break it into two buildings. It was visually  
2 not going to be perceived that way by anyone,  
3 and that actually if you're on Linear Park,  
4 the massing of the single building with the  
5 nice courtyard in the center, I think, is  
6 visually appealing as any of the other  
7 proposed possibilities of breaking it into  
8 two buildings.

9 STEVEN WINTER: Mr. Chair, may I ask  
10 the proponent are there efficiencies of scale  
11 involved in energy usage and energy  
12 footprints in terms of one building rather  
13 than two?

14 MARK BOYES-WATSON: By virtue of --  
15 it's interesting, because in balancing  
16 different things. But on balance if you  
17 reduce the exterior perimeter of the  
18 building, you will increase your energy  
19 efficiency. I would say, though, in this

1 case we have taken pains to vary the massing.  
2 So maybe as always in design, you're  
3 balancing these different things. So I would  
4 say there are definitely a single building  
5 has energy efficiencies that a broken down  
6 building would not.

7 HUGH RUSSELL: Shall we move on?

8 The location and (inaudible)  
9 landscaping of open space shall provide some  
10 visual benefit to abutters and passersby as  
11 well as functional benefits to the occupants  
12 of the development.

13 And, again, I think each of the three  
14 sides there are benefits.

15 STEVEN WINTER: I think so. This is  
16 a good time to indicate that the landscape  
17 design is a really exceptional effort to  
18 provide visual and natural attractiveness.

19 HUGH RUSSELL: Yes. The other thing

1           that's nice about the landscape design is  
2           that it's different things are happening in  
3           different places along Linear Park that -- so  
4           it's, you know, it could have been sort of  
5           monolithic landscape, and actually it's very  
6           small scale idiocentric, but that's a good  
7           thing to do here. And so that's another  
8           benefit.

9                         STEVEN COHEN: Mr. Chair, I just  
10           have one comment. I agree, I think it's a  
11           great landscape design. But going back to  
12           that fence for a moment, the six-foot fence.  
13           I think the point raised was good because of  
14           the differences in grade, it's not going to  
15           be perceived from the Linear Park as  
16           overwhelming per se. But I'm also struck by  
17           one of the neighbors who reacted to a  
18           six-foot fence as, you know, sort of walling  
19           out or walling in, as the case may be, the

1 new building. And I guess I'm still  
2 wondering about the need for a six-foot fence  
3 as opposed to perhaps a four-foot fence which  
4 presumably would serve the same function but  
5 visually would not create that same, you  
6 know, sense of barrier.

7 PAMELA WINTERS: But, again, though  
8 doesn't it, isn't it -- doesn't it slope down  
9 so that you get the feeling of a lower fence?

10 STEVEN COHEN: Well, if I understand  
11 it correctly, from the Linear Park, right,  
12 because of the difference in grade, it's not  
13 going to be overhanging the park. But still  
14 from whatever perspective that you do see the  
15 fence, you will see that it's a very tall  
16 fence. And, you know, if there's a function,  
17 if there's a need for that, by all means.  
18 But if there isn't a particular functional  
19 need for it, it would seem to me that a

1 four-foot fence would just, you know, feel  
2 less exclusionary, more open and inviting.  
3 And I think the openness was one of the  
4 things that we were trying to achieve there.

5 STEVEN WINTER: Mr. Chair, could we  
6 leave that to discussion with the Cambridge  
7 staff, City of Cambridge staff? Frankly I  
8 think the fence is large as well, but I'm not  
9 sure where to hang my hat to ask them to  
10 bring it down.

11 HUGH RUSSELL: Right.

12 One of the peculiar things about the  
13 Linear Park is that it is bounded by these  
14 high fences almost everywhere. And, yeah,  
15 it's easy for a kid to get over a four-foot  
16 fence and it's considerably harder for them  
17 to get over a six-foot fence. But there are  
18 breaks in that fence sections at the two  
19 connection points. You really don't want

1 people to -- so I think the idea of asking  
2 them to explore with the City the  
3 questionable height of that fence makes some  
4 sense. What would it be like if it was only  
5 four feet tall and it sends a very, I think  
6 it sends a somewhat different message.

7 STEVEN COHEN: I think so.

8 ROBERT FAWCETT, JR.: We're happy to  
9 explore that.

10 HUGH RUSSELL: Okay.

11 Parking areas, internal roadways,  
12 access, egress points shall be safe and  
13 convenient.

14 Well, I think the answer there is that  
15 it's been designed, you know, that the radii  
16 and the turning points and the sight  
17 distances and those kinds of things have all  
18 been designed into it. The Transportation  
19 and Traffic and Parking Department which does

1 comment when they feel that people have not  
2 succeeded, did not make that comment. So....

3 CATHERINE PRESTON CONNOLLY:

4 Mr. Chair, I'd like to actually encourage a  
5 condition that the proponent work with  
6 Traffic and Parking going forward as many of  
7 these changes to the circulation and parking  
8 layout haven't yet been thoroughly embedded  
9 with them is my understanding. And so I  
10 think while conceptually it's a good layout  
11 and it isn't a big change from the last one,  
12 you know, things like it was brought up that  
13 the way the parking's currently laid out,  
14 folks are going to be backing out into  
15 Edmunds Street, I think that we need them to  
16 be working with Traffic and Parking to make  
17 sure that works.

18 HUGH RUSSELL: Yes, it's kind of the  
19 fact that my letter from to Sue is dated two

1 months before the date of the plan.

2 You're willing to take that on, Sue?

3 SUSAN CLIPPINGER: Yes.

4 HUGH RUSSELL: Criteria 5 is parking  
5 area landscaping should minimize the  
6 intrusion of on-site parking so that it does  
7 not substantially detract the use and  
8 enjoyment of the proposed development and  
9 neighboring properties. That's essentially  
10 the same finding we made earlier about how  
11 the parking's been spread around and  
12 screened.

13 And then service for trash collection  
14 should be resident. We said before that we  
15 want to, we shouldn't have to be reviewed.

16 Jim, have I missed any criterion on my  
17 list?

18 ATTORNEY JAMES RAFFERTY: There is  
19 that added criteria that I brought the text

1 of it is in Special District 2 when  
2 evaluating --

3 STEVEN WINTER: 17.24.3?

4 ATTORNEY JAMES RAFFERTY: Yes. I  
5 have a copy of it if you like.

6 HUGH RUSSELL: Sure.

7 PAMELA WINTERS: Is this one of the  
8 newer ones?

9 ATTORNEY JAMES RAFFERTY: Yes.  
10 Particular attention to three-bedroom units.  
11 It starts there and I have to get the next  
12 page. Page 17, 6 and 7.

13 HUGH RUSSELL: The Planning Board  
14 shall consider as a criterion of the  
15 development residential uses of various sizes  
16 and with various numbers of bedrooms with  
17 specific attention to three or more bedroom  
18 units with the overall goal of providing  
19 units dwelling units for diverse household

1 sizes.

2 And so the answer is they're finding  
3 17, 67th of the project of three-bedroom  
4 units which is a --

5 STEVEN WINTER: Exceptional.

6 HUGH RUSSELL: -- a very substantial  
7 ratio.

8 All right, now we've made findings and  
9 under the General Rules about Special Permits  
10 if you meet the criteria, we are obliged to  
11 vote and to grant the permit.

12 So we're ready to make a motion?

13 TOM SIENIEWICZ: It may be good to  
14 briefly list some of the special conditions  
15 that we want to focus on. I think in  
16 particular we're interested, I was interested  
17 in five. One was to assure that there's  
18 access to the Linear Park across the site.  
19 They're promising I think 20 feet on the

1 western side. That's absolutely critical to  
2 my understanding of how this would work and  
3 what the public benefit of the development  
4 would be.

5 That there's public access across the  
6 extension of Cottage Park even though it's on  
7 private property. You know, I think that  
8 that needs to be cemented in our decision.

9 That the gate in recognition that the  
10 terrible burden that this community bears  
11 because of regional traffic, it's critical to  
12 me that this site never be used as a  
13 shortcut. So to that understanding that's  
14 the purpose of the gate mechanism, I would  
15 make that a condition of granting the Special  
16 Permit.

17 And I guess lastly I would say  
18 consideration of that fence height which was  
19 something that was of concern to a fellow

1 board member here, be a consideration and a  
2 condition.

3 Thank you.

4 STEVEN WINTER: Mr. Chair, is it  
5 true that these kinds of conditions are noted  
6 by staff and then reviewed to make sure that  
7 they're included prior to you signing the  
8 letter; is that correct?

9 HUGH RUSSELL: Yes. I read all the  
10 decisions and. So what the staff does is  
11 they keep notes about our whole discussion.  
12 So we may have said something along the way  
13 that didn't make it into the last half hour,  
14 but it will make it into the decision. We're  
15 only a quasi traditional body.

16 STUART DASH: We have redundant note  
17 takers.

18 HUGH RUSSELL: Yes. This would  
19 probably be quite a lengthy decision because

1 of the --

2 TOM SIENIEWICZ: So at the risk of  
3 dragging this out another 15 seconds, I --  
4 discussion about the fire truck got my  
5 attention and consideration that the  
6 proponent had yet to check in with the  
7 Cambridge Fire Department, and felt properly  
8 I believe that that happens at the permitting  
9 stage of the project, but that's something  
10 obviously that I think we're all concerned  
11 on, and we want to make sure that the fire  
12 department makes sure that the site works for  
13 them.

14 STEVEN COHEN: And, Mr. Chair, also  
15 just to revisit what seems to have been my  
16 obsession from an earlier phase of our  
17 discussion, I think we were going to include  
18 the statement that should the City Council  
19 permit the street to be opened, that that

1 would be, you know, acceptable.

2 HUGH RUSSELL: Yes, I would agree to  
3 that.

4 PAMELA WINTERS: Can I just make  
5 one --

6 STEVEN WINTER: Do we know what that  
7 is?

8 HUGH RUSSELL: Pam.

9 PAMELA WINTERS: I just wanted to  
10 make one, I'm glad that you -- Hugh, I'm glad  
11 that you mentioned that we, if the plan met  
12 all the criteria, that we are obliged to vote  
13 for it. I just wanted to say that this would  
14 not have been my preference for the use of  
15 this space. I would have loved to have seen  
16 a group of townhouses. Somebody had  
17 mentioned something like Louisburg Square or  
18 something that's a little more, oh, fitting  
19 in with the neighborhood perhaps. I don't

1 know. This would not have been my first  
2 preference. But they met the criteria and so  
3 we are obliged to vote for it. So I just  
4 wanted to put my two cents worth in about  
5 that.

6 HUGH RUSSELL: Okay. Any other  
7 comments?

8 So would someone like to make a motion  
9 to grant the Special Permits?

10 H. THEODORE COHEN: Sure.

11 I move that we grant the Special Permit  
12 under Article 10.40, a multi-family Special  
13 Permit under Article 10.47, 10.47.4, and a  
14 project review Special Permit under Article  
15 19.20 in accordance with the plans that were  
16 submitted and discussed at the Planning Board  
17 meeting this evening, and subject to all the  
18 terms and conditions and findings made by the  
19 Planning Board and discussed this evening.

1 And also that indication that the  
2 requirements of Section 17.24.3 with regard  
3 to granting a certain Special Permits have  
4 been met with regard to the size of units.

5 HUGH RUSSELL: Liza, who's --

6 LIZA PADEN: Everyone except for  
7 Tom.

8 HUGH RUSSELL: Okay. Because you  
9 missed one hearing.

10 Okay, so on the motion, all those in  
11 favor --

12 H. THEODORE COHEN: We need a  
13 second.

14 PAMELA WINTERS: We need a second.

15 STEVEN WINTER: Second.

16 HUGH RUSSELL: Steve is seconded.

17 And on the motion, all those in favor.

18 (Raising hands).

19 HUGH RUSSELL: And the six members

1           that were authorized to vote are voting in  
2           favor and the permit is granted.

3                         (Russell, H.T. Cohen, Winters,  
4           Winter, Connolly, S. Cohen.)

5                         HUGH RUSSELL: I'd like to have a  
6           discussion with the members of the Board  
7           about the two remaining items on our agenda.  
8           I think we have no choice but to open the  
9           Teague hearing and probably should continue  
10          that. And so I'd like to know what people  
11          think about 130 CambridgePark Drive.

12                        My preference would be to put it off to  
13          another time.

14                        H. THEODORE COHEN: I agree with  
15          that. It's late and --

16                        HUGH RUSSELL: Well, that's what I'm  
17          asking.

18                        H. THEODORE COHEN: Whatever we do  
19          the public ought to have a right to hear and

1 not necessarily at quarter of eleven or  
2 eleven.

3 HUGH RUSSELL: Right.

4 CATHERINE PRESTON CONNOLLY: On the  
5 other hand, Mr. Chair, I am sensitive to the  
6 fact that this would be the second time that  
7 we've had to bump this particular Applicant.

8 HUGH RUSSELL: Yes, and my opinion  
9 is that we should have never scheduled two  
10 major items of business in one meeting, and I  
11 -- unfortunately the, you know the -- Liza,  
12 I'm sure agrees that's a great principle, but  
13 it happens. I guess my feeling is that the  
14 Petitioner's willing to accept the  
15 postponement and I think we'll do a much  
16 better job if we do that. I don't know when  
17 that would be.

18 H. THEODORE COHEN: Well, June 11th  
19 is K2-C2 further. Could we take this up

1 first thing?

2 HUGH RUSSELL: Yes, let's do that.

3 LIZA PADEN: Okay. So this will be  
4 June 11th, Rich, at 7:20.

5 Does that work for you?

6 RICHARD McKINNON: Yes. We've just  
7 had the bad fortune to be behind Fawcett  
8 Street twice and I know that it's late. I  
9 now know exactly what every hair on the back  
10 of Jimmy Rafferty's hair looks like.

11 LIZA PADEN: You'll be 7:20 on the  
12 June 11th.

13 RICHARD McKINNON: You promise?

14 LIZA PADEN: I promise.

15 HUGH RUSSELL: You have to send more  
16 cookies to Liza I guess.

17 And I think we really need to open the  
18 Teague hearing?

19 LIZA PADEN: Yes, because we're at

1 65 days.

2 RICHARD McKINNON: You need me to  
3 sign?

4 LIZA PADEN: No.

5 RICHARD McKINNON: Okay. We're not  
6 there yet?

7 LIZA PADEN: Thank you, Rich.

8 RICHARD McKINNON: You bet, Liza.

9 LIZA PADEN: Mr. Teague.

10 HUGH RUSSELL: Mr. Teague.

11 LIZA PADEN: He's here. Let me find  
12 him, please.

13 HUGH RUSSELL: The Board is going to  
14 open the hearing at the Charles Teague, Et Al  
15 petition and people want to postpone the  
16 actual substantive hearing until a later  
17 date. So what date would that be?

18 H. THEODORE COHEN: There are two  
19 other Zoning petitions on June 18th.

1                   LIZA PADEN: June 18th has two  
2                   Zoning petitions. One is, as you said, one  
3                   is Special District 8A which is also the  
4                   location of 240 Sidney Street. And the other  
5                   is the discussion of changing roof lines for  
6                   collection of rainwater.

7                   HUGH RUSSELL: Have you scheduled  
8                   things yet? Published times for them?

9                   LIZA PADEN: Yes. 7:20 and 8:00.

10                  HUGH RUSSELL: Is that published or  
11                  not?

12                  LIZA PADEN: Yes.

13                  HUGH RUSSELL: We have -- so we  
14                  can't put Mr. Teague at the head of the list  
15                  then.

16                  LIZA PADEN: Well, unless you put  
17                  Mr. Teague at seven o'clock. Okay?

18                  STEVEN WINTER: I'm willing to do  
19                  that.

1                   HUGH RUSSELL: I think in fairness  
2                   to our intrepid videographer here.

3                   LIZA PADEN: So I'll work on getting  
4                   the BZA cases for June 11th, I'll hold them  
5                   until July 9th and see what I can work out  
6                   with Inspectional Services and see if I can  
7                   move that to work. And I will put  
8                   Mr. Teague's petition at seven o'clock on the  
9                   18th.

10                  HUGH RUSSELL: Okay.

11                  LIZA PADEN: Can you make the seven  
12                  o'clock on the 18th?

13                  CHARLES TEAGUE: Yeah, that's fine.  
14                  It's just -- I was just looking at the clock,  
15                  getting an early night tonight.

16                  LIZA PADEN: Thank you.

17                  HUGH RUSSELL: I don't know, 25  
18                  years ago when I was a kid, I could go to one  
19                  o'clock in the morning. Carolyn remembers

1           that.

2                           UNIDENTIFIED AUDIENCE MEMBER:  Yes,  
3           I remember it well.

4                           HUGH RUSSELL:  Okay.  So I believe  
5           we are adjourned.

6                           (Whereupon, at 10:55 p.m., the  
7           Planning Board Adjourned.)

1 ERRATA SHEET AND SIGNATURE INSTRUCTIONS

2 The original of the Errata Sheet has  
3 been delivered to Community Development  
4 Department.

5 When the Errata Sheet has been  
6 completed and signed, a copy thereof should  
7 be delivered to each party of record and the  
8 **ORIGINAL** delivered to Community Development  
9 Department to whom the original transcript  
10 was delivered.

11 **INSTRUCTIONS**

12 After reading this volume of Planning  
13 Board, indicate any corrections or changes to  
14 testimony and the reasons therefor on the  
15 Errata Sheet supplied to you and sign it. **DO**  
16 **NOT** make marks or notations on the transcript  
17 volume itself.

18 **REPLACE THIS PAGE OF THE TRANSCRIPT WITH THE**  
19 **COMPLETED AND SIGNED ERRATA SHEET WHEN**  
**RECEIVED.**
