Notes:

1 Includes buildings and parking

2 Energy Use Intensity: energy use per square foot. Generally, the lower the number the more efficient the building is.

Site EUI measures the amount energy consumed by the building on site per square foot of space

Source EUI measures the amount of energy consumed by the building plus losses incurred in energy production, transmission and delivery to the site per square foot of space

3 Includes Scope 1 emissions (direct - produced on site by the building's energy use) and Scope 2 (indirect - produced off-site at energy generating facility).

4 Blank cells indicate data not available at time of publication.

5 K-12 schools and office buildings are the only building categories owned by the City that are eligible for ENERGY STAR scores.
