Central Square Station Accessibility Improvements

Cambridge Transit Advisory Committee Presentation

November 2, 2023

Agenda

- Project Overview
- Proposed Improvements
- Anticipated Construction Impacts
- Outreach Efforts
- Next Steps

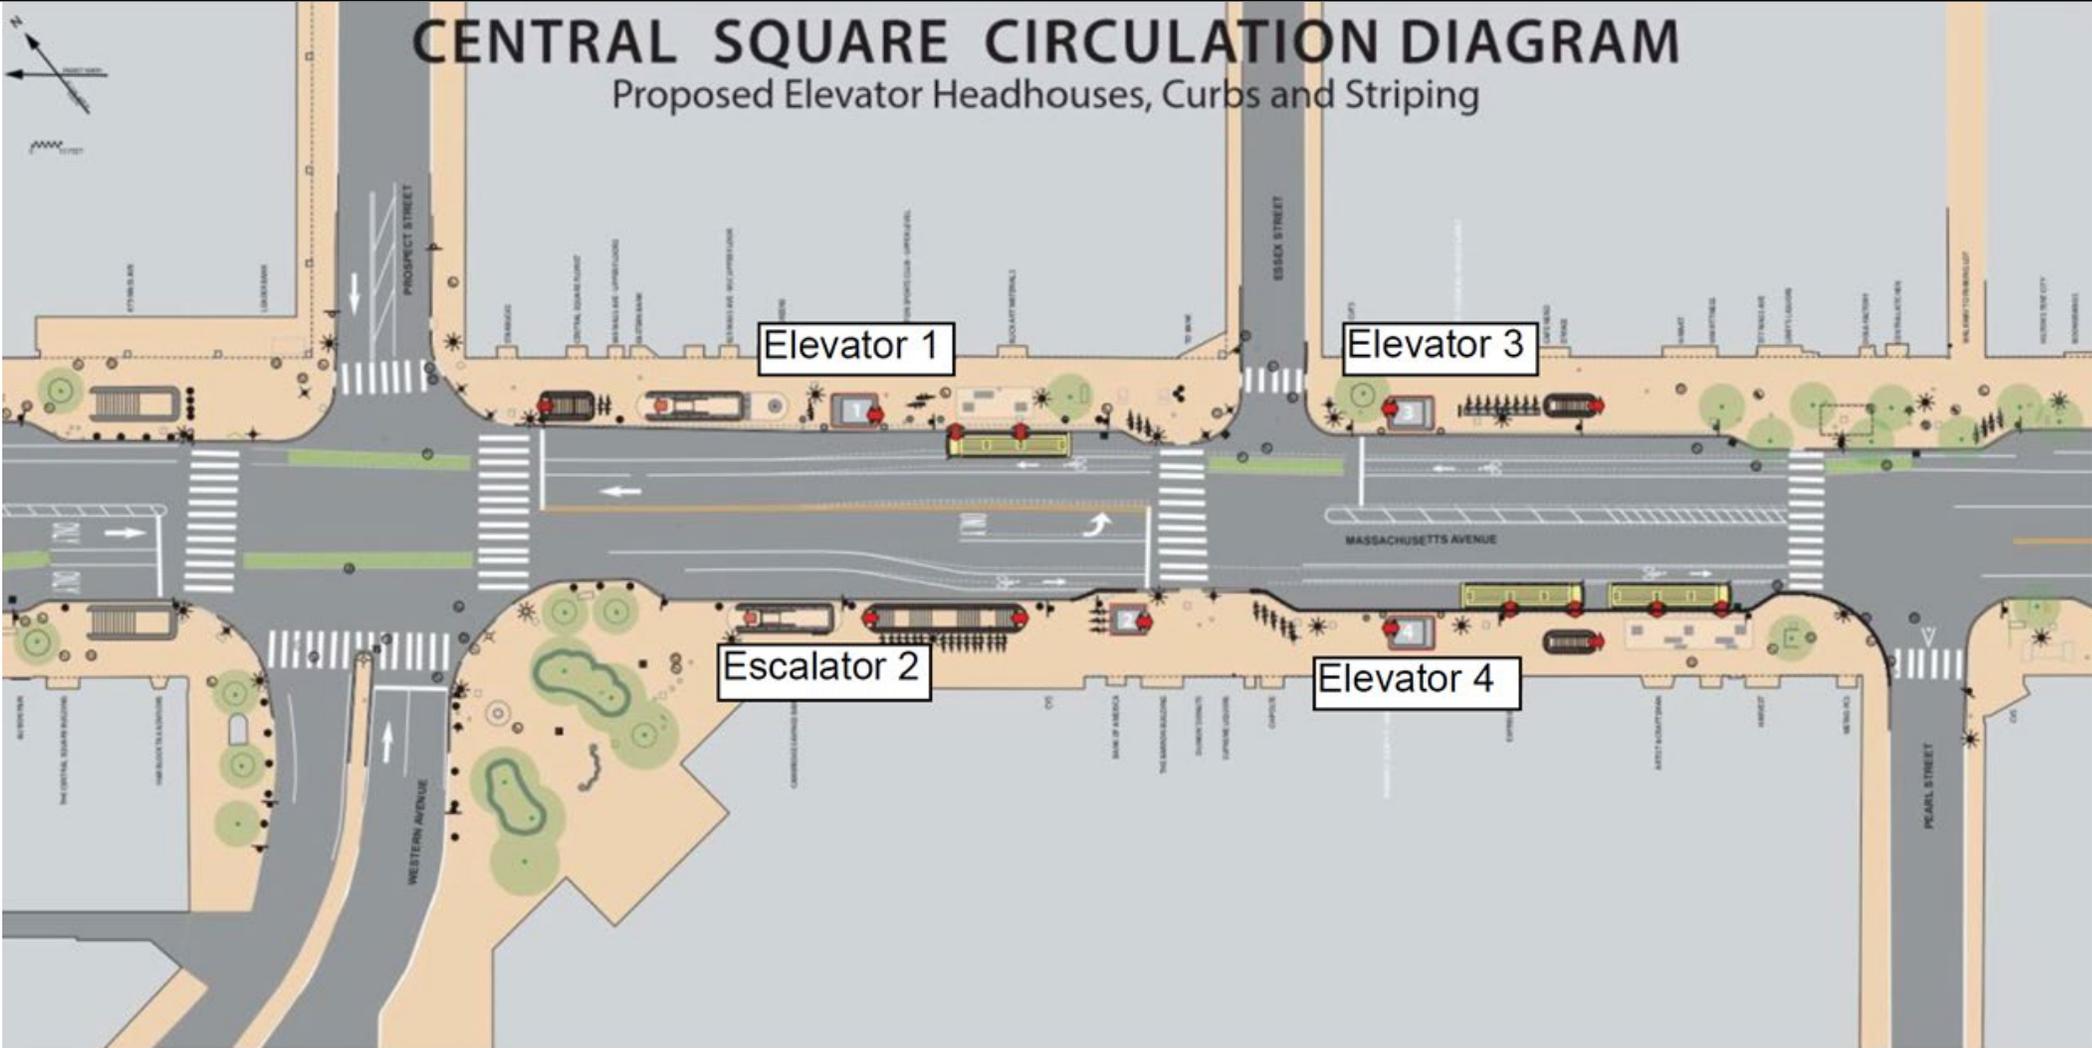

Project Overview

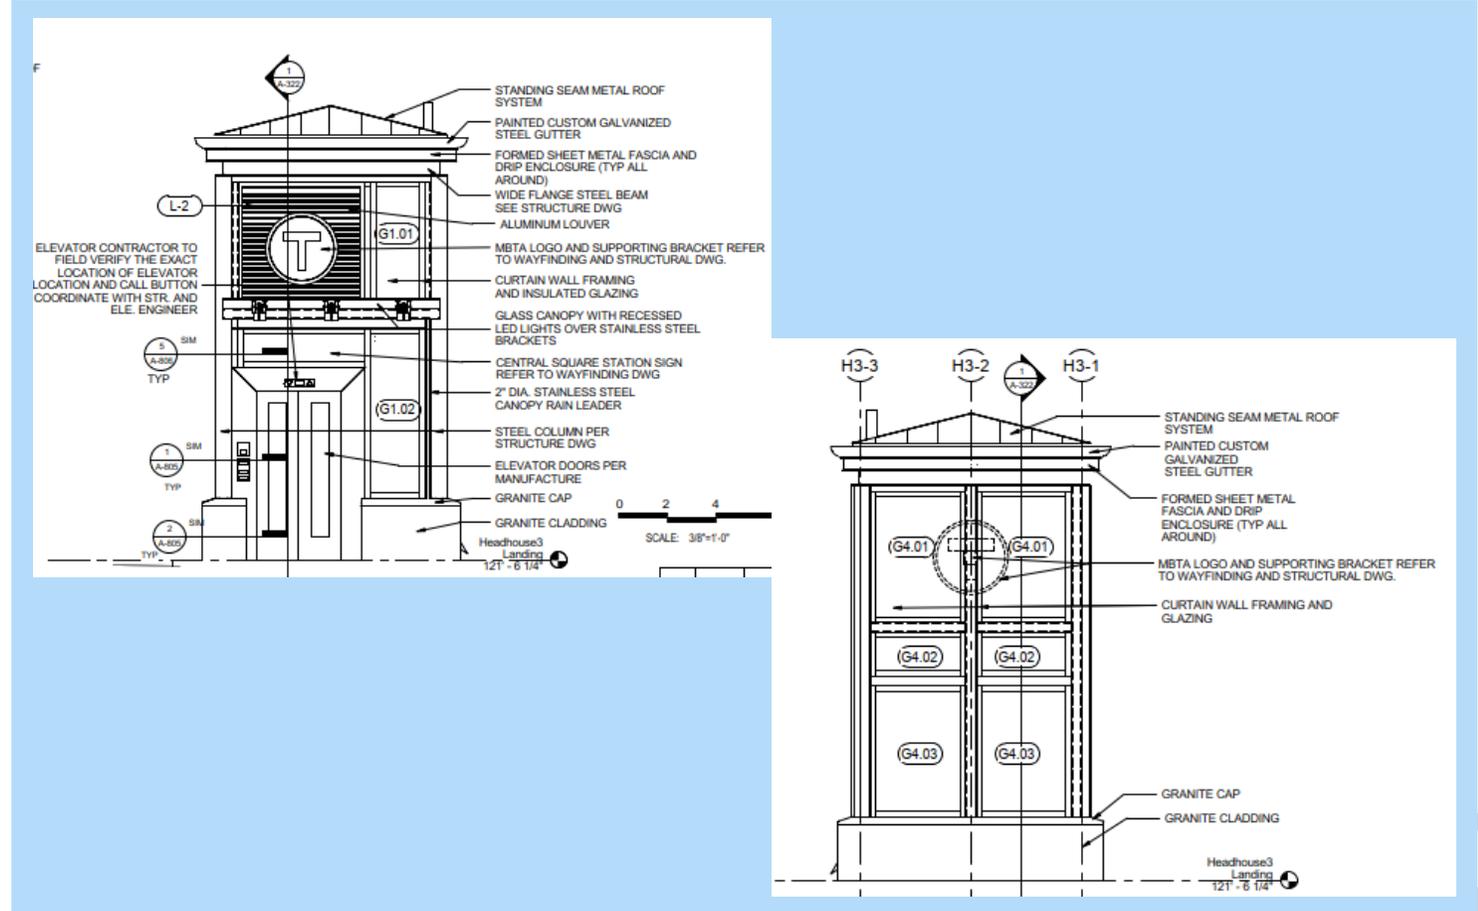

- Need for redundant elevators and accessibility improvements compliant with federal and state codes
- Additional improvements to the station
- Rider Benefits
 - Easier access to Red Line platforms
 - Additional station access points
 - More reliable elevator service
 - Improved rider experience and safety
 - Station modernization

Proposed Improvements

Proposed Headhouse Design

Station Brightening Repairs

Miscellaneous

- Tiles
- Concrete
- Plaster
- Tactile Warning Strip
- Benches
- Tactile tread warning surface
- Scratched Stainless Steel at FDC
- Corroded Doors

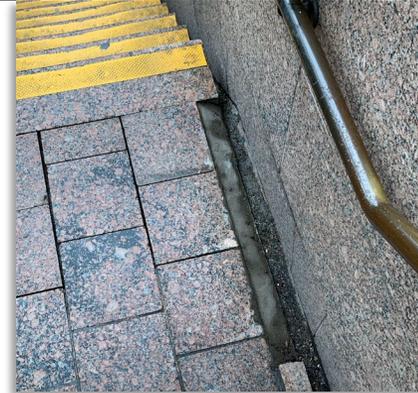

Cracked concrete and damaged plaster

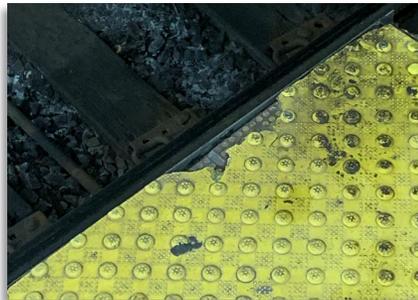

Cracked floor tile & damaged patch work

Large crack in wall tiles

Broken & missing granite tiles

Damaged Tactile Warning Strips

Damaged & scratched Benches

Worn out tactile tread warning surface cover on staircase

Scratched Stainless Steel Panels

Corroded Doors & Frames

Cleaning & Painting of Interior Surfaces

Ceilings

- Concrete
- Metal Fins
- Plaster

Walls

- Porcelain Tiles
- Mosaic Tiles
- Conc. Columns
- Granite
- Plaster

Floors

- Tiles
- Granite

Miscellaneous

- Peeling Paint
- Graffiti
- Tactile warning strips

Ceiling Perforated Metal Fins

Granite

Outbound Platform

Graffiti

Peeling Paint

Ceiling Signage & Lighting
Decorative Metal Frame

Porcelain Tiles

Inbound Platform

Stained Tactile Warning
Strips

Mosaic Tiles

General cleaning

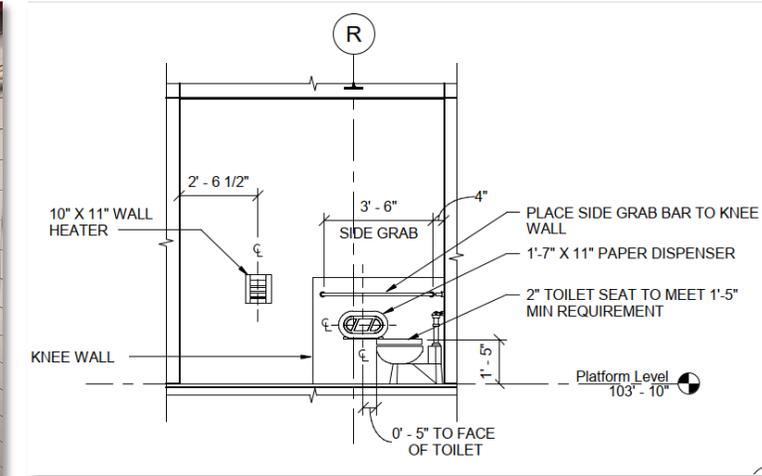

Public Restroom Improvements

- Public unisex restroom located on outbound platform
- General cleaning & painting required
- Updates to achieve accessibility compliance include:
 - Replacement of electric unit heater in the public restroom
 - Adjustment of fixture locations to meet ADA and/or MAAB requirements, including raising toilet seat height, toilet paper dispenser, rear grab bar, sink, and mirror

View of left side of restroom

View of right side of restroom

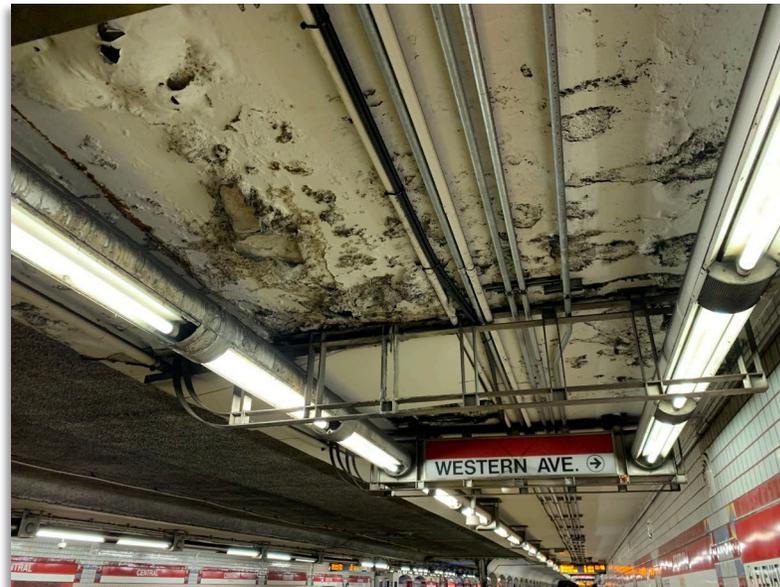

Water Leaks

- Water ponding mitigation
- Trench drain maintenance

Water damage and stalagmite in ceiling

Heavy water damage with bubbling and peeling paint apparent water infiltration issue at ceiling

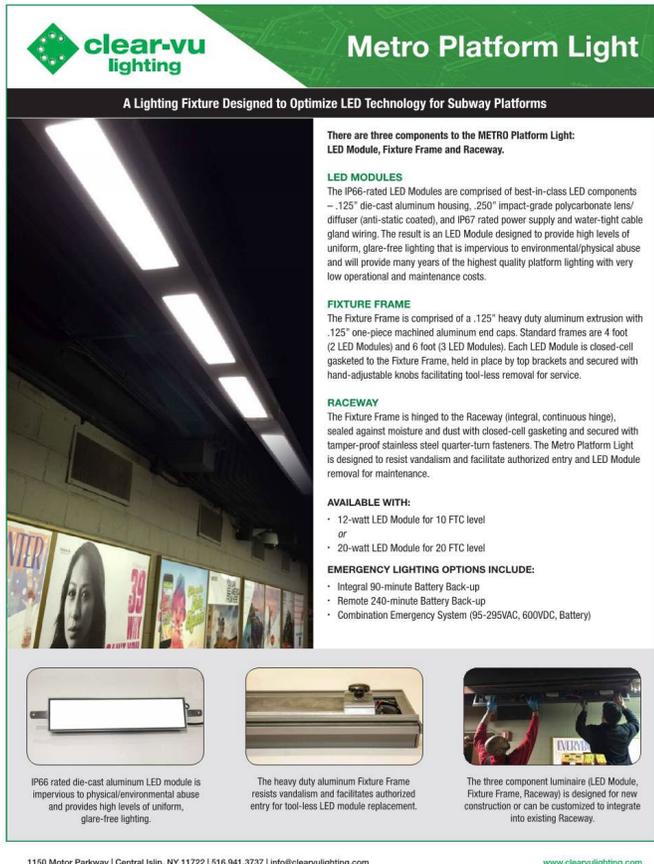

Water damage in ceiling

Water ponding on floor

Platform Lighting Retrofit

- Retain existing housings
- Replace fluorescent lamps with new LED modules

clear-vu lighting Metro Platform Light

A Lighting Fixture Designed to Optimize LED Technology for Subway Platforms

There are three components to the METRO Platform Light: LED Module, Fixture Frame and Raceway.

LED MODULES
The IP66-rated LED Modules are comprised of best-in-class LED components - .125" die-cast aluminum housing, .250" impact-grade polycarbonate lens/diffuser (anti-static coated), and IP67 rated power supply and water-tight cable gland wiring. The result is an LED Module designed to provide high levels of uniform, glare-free lighting that is impervious to environmental/physical abuse and will provide many years of the highest quality platform lighting with very low operational and maintenance costs.

FIXTURE FRAME
The Fixture Frame is comprised of a .125" heavy duty aluminum extrusion with 125" one-piece machined aluminum end caps. Standard frames are 4 foot (2 LED Modules) and 6 foot (3 LED Modules). Each LED Module is closed-cell gasketed to the Fixture Frame, held in place by top brackets and secured with hand-adjustable knobs facilitating tool-less removal for service.

RACEWAY
The Fixture Frame is hinged to the Raceway (integral, continuous hinge), sealed against moisture and dust with closed-cell gasketing and secured with tamper-proof stainless steel quarter-turn fasteners. The Metro Platform Light is designed to resist vandalism and facilitate authorized entry and LED Module removal for maintenance.

AVAILABLE WITH:

- 12-watt LED Module for 10 FTC level or
- 20-watt LED Module for 20 FTC level

EMERGENCY LIGHTING OPTIONS INCLUDE:

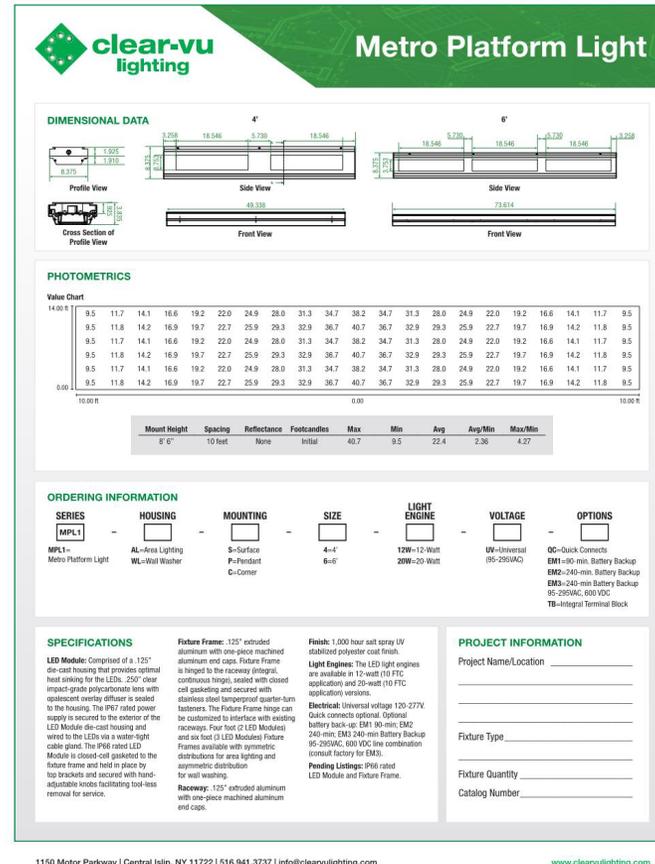

- Integral 90-minute Battery Back-up
- Remote 240-minute Battery Back-up
- Combination Emergency System (95-295VAC, 600VDC, Battery)

IP66 rated die-cast aluminum LED module is impervious to physical/environmental abuse and provides high levels of uniform, glare-free lighting.

The heavy duty aluminum Fixture Frame resists vandalism and facilitates authorized entry for tool-less LED module replacement.

The three component luminaire (LED Module, Fixture Frame, Raceway) is designed for new construction or can be customized to integrate into existing Raceway.

SPECIFICATIONS

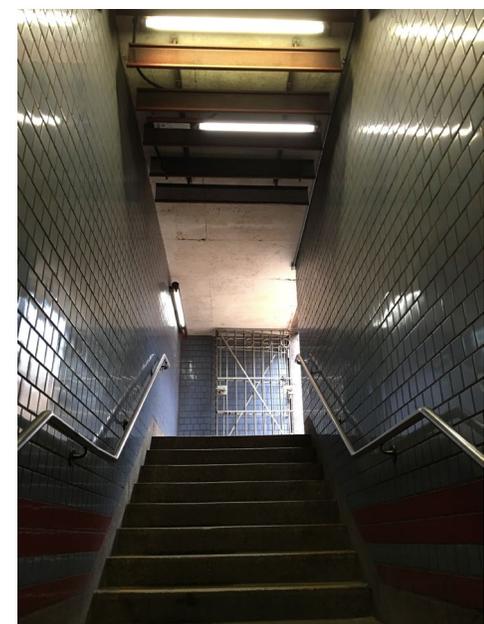

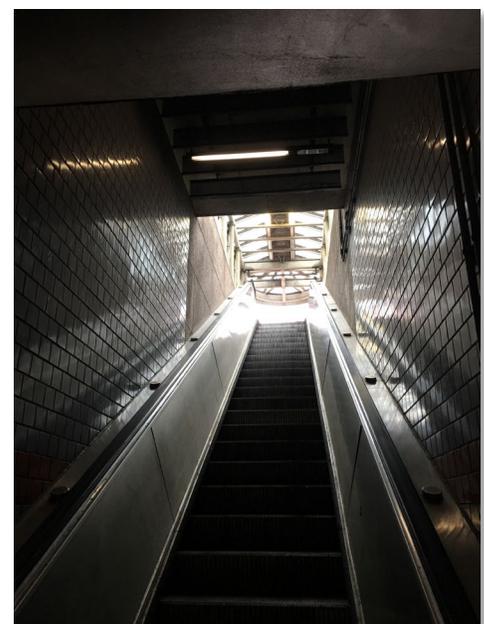

Due to the Continuous Improvement Policy at Metalumen, we reserve the right to change our specifications without notice.

Heating: Rigid extruded aluminum body, integral LED thermal pad. **CR:** 80+ for 3500K, 80 minimum for all other options. **Color Rendering Index (CRI):** 80 minimum for all options. **Weight:** 2.1 kg (4.6 lbs) / 1.4 kg (3.1 lbs) for 2 ft / 1.2 ft. **Dimensions:** 100 (4.33) total height, 70 (2.75) lens height, 95 (3.74) lens width. **Optical System:** Wet Flux, LED. **Beam Maintenance:** Minimum 50,000 hours with 100% lumen maintenance. **Beam Spread:** 120° beam spread. **High Performance:** High performance LED lighting technology. **Temperature:** Maximum ambient temperature 50°C (122°F). **Material:** Anodized aluminum. **Finish:** MA: Satin Aluminum, MW: White, MB: Black, BW: Black, BK: Black, CC: Custom Finish. **Options:** SP: Surge Protection, P: None (factory default). **Warranty:** 5 years. **Approvals:** Approvals: CE, ENEC, UL, IEC, VDE, TUV, SAA, FCC, RoHS, REACH, WEEE, EN60598-1, EN60598-2-1, EN60598-2-2, EN60598-2-3, EN60598-2-4, EN60598-2-5, EN60598-2-6, EN60598-2-7, EN60598-2-8, EN60598-2-9, EN60598-2-10, EN60598-2-11, EN60598-2-12, EN60598-2-13, EN60598-2-14, EN60598-2-15, EN60598-2-16, EN60598-2-17, EN60598-2-18, EN60598-2-19, EN60598-2-20, EN60598-2-21, EN60598-2-22, EN60598-2-23, EN60598-2-24, EN60598-2-25, EN60598-2-26, EN60598-2-27, EN60598-2-28, EN60598-2-29, EN60598-2-30, EN60598-2-31, EN60598-2-32, EN60598-2-33, EN60598-2-34, EN60598-2-35, EN60598-2-36, EN60598-2-37, EN60598-2-38, EN60598-2-39, EN60598-2-40, EN60598-2-41, EN60598-2-42, EN60598-2-43, EN60598-2-44, EN60598-2-45, EN60598-2-46, EN60598-2-47, EN60598-2-48, EN60598-2-49, EN60598-2-50, EN60598-2-51, EN60598-2-52, EN60598-2-53, EN60598-2-54, EN60598-2-55, EN60598-2-56, EN60598-2-57, EN60598-2-58, EN60598-2-59, EN60598-2-60, EN60598-2-61, EN60598-2-62, EN60598-2-63, EN60598-2-64, EN60598-2-65, EN60598-2-66, EN60598-2-67, EN60598-2-68, EN60598-2-69, EN60598-2-70, EN60598-2-71, EN60598-2-72, EN60598-2-73, EN60598-2-74, EN60598-2-75, EN60598-2-76, EN60598-2-77, EN60598-2-78, EN60598-2-79, EN60598-2-80, EN60598-2-81, EN60598-2-82, EN60598-2-83, EN60598-2-84, EN60598-2-85, EN60598-2-86, EN60598-2-87, EN60598-2-88, EN60598-2-89, EN60598-2-90, EN60598-2-91, EN60598-2-92, EN60598-2-93, EN60598-2-94, EN60598-2-95, EN60598-2-96, EN60598-2-97, EN60598-2-98, EN60598-2-99, EN60598-2-100.

WARRANTY

Metalumen will warrant defective luminaires for 5 years from date of purchase. Warranty is void if luminaire is installed and used according to specification. If defective, Metalumen will send replacement boards or drivers at no cost, along with detailed replacement instructions and instructions on how to return defective components to Metalumen.

Wayfinding

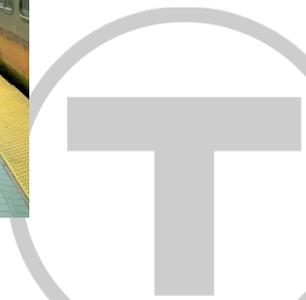

- Upgrading and replacing existing signs along the platform and surface level to current MBTA Wayfinding Standards
- Site Line Studies of variable message signs on new train cars

Surface Level Signs

Platform Level Signs

Braille Signs

DOOR BRAILLE SIGN FACE ELEVATIONS DIRECTIONAL

ROOM ID

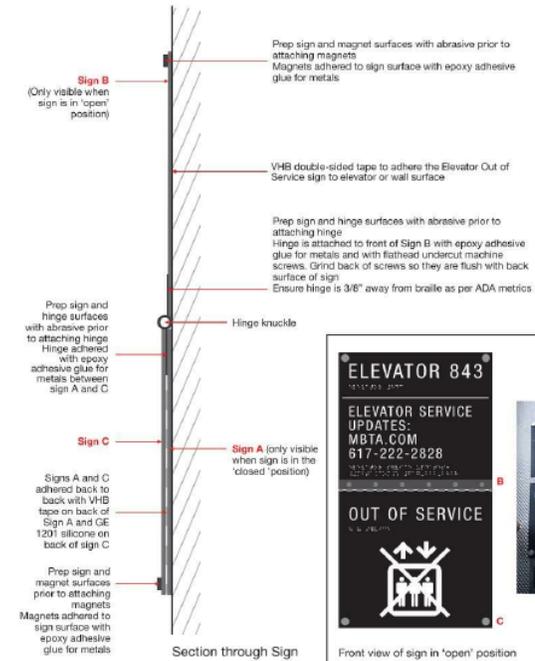

INFORMATIONAL

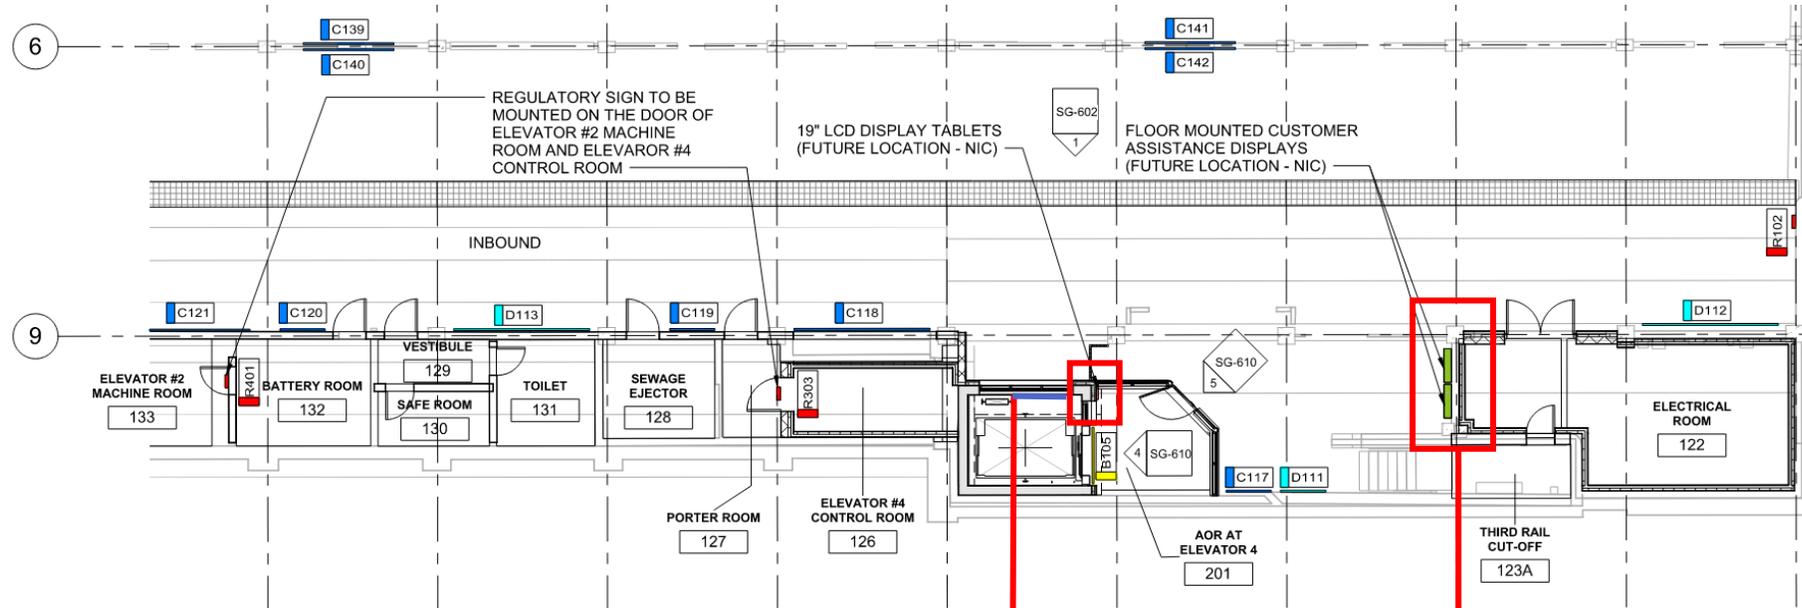

1 ELEVATOR OUT OF SERVICE SIGN
NOT TO SCALE

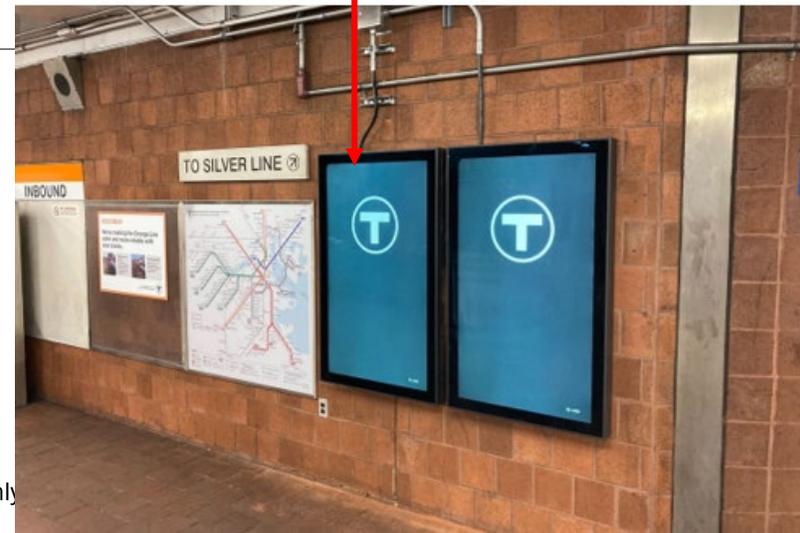

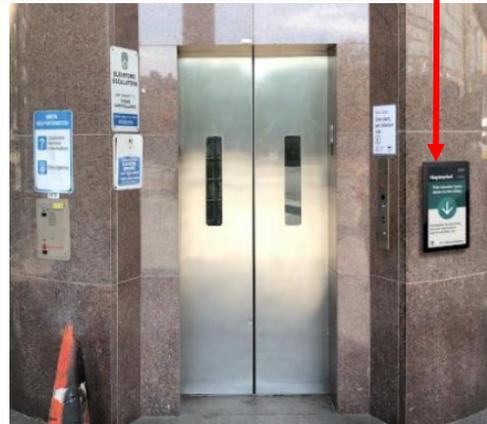

ELEVATOR OUT OF SERVICE TACTILE BRAILLE SIGN Open Position

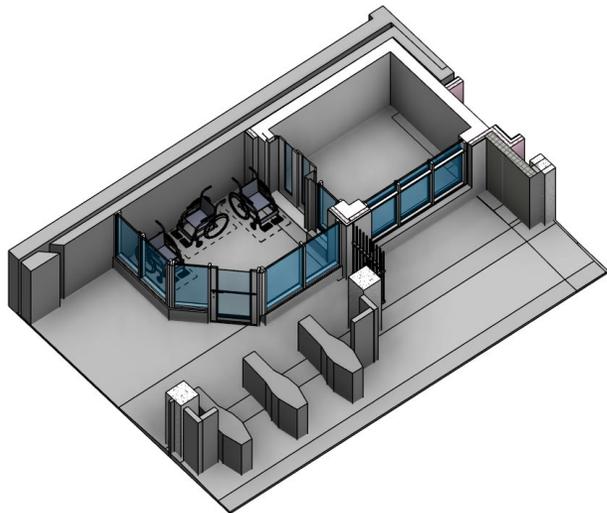

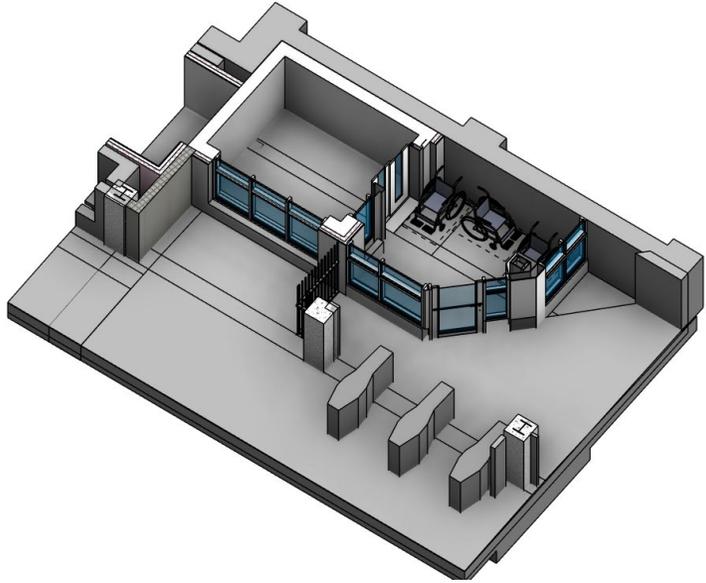

Display Screens

1 AREA 1 - SIGNAGE PLATFORM LEVEL PROPOSED PLAN
1/8" = 1'-0"

Areas of Refuge: Elevators 3 and 4

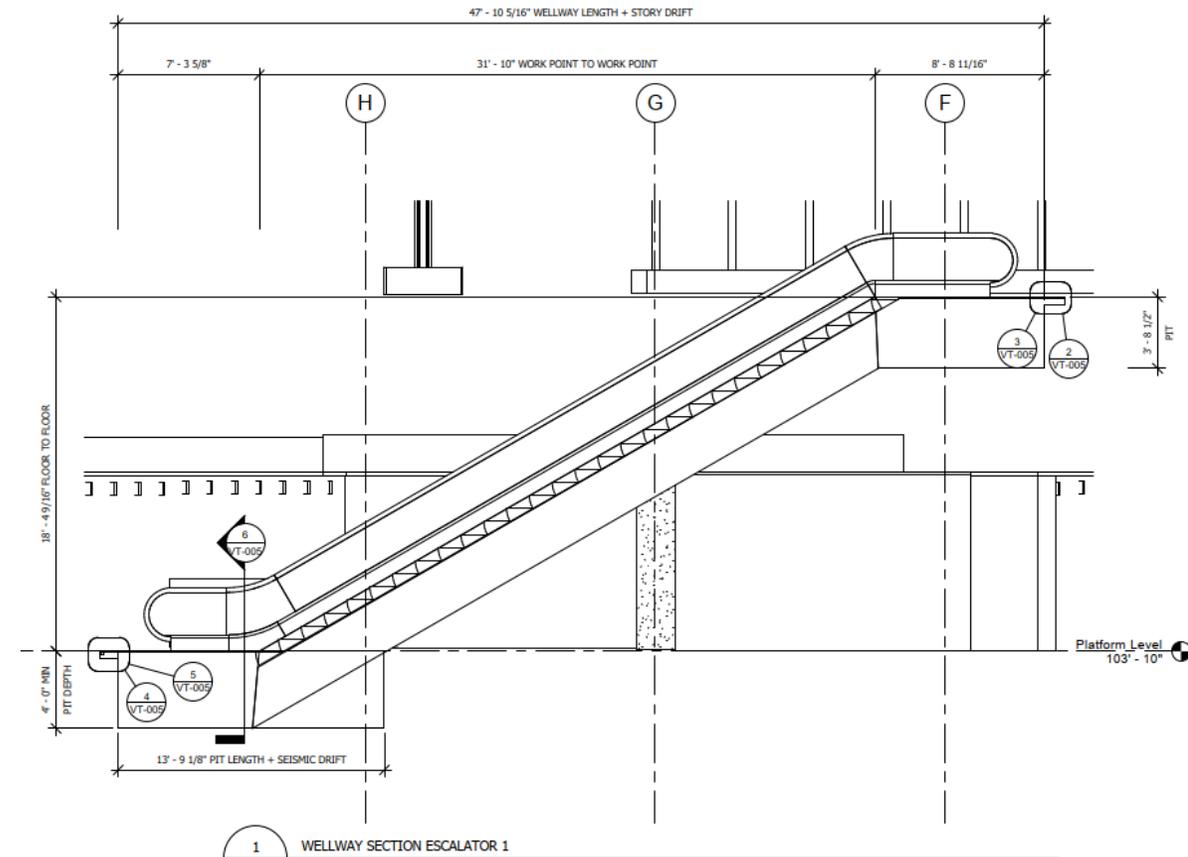

- Accessible spaces on each platform where riders can wait safely for emergency rescue and evacuation in the event that elevators are not operable in an emergency
- HVAC: smoke proof enclosure, fire rated & ventilated
- Electrical/Fire Alarm: lighting & two-way communication
- Swing Door with hold open & closer automatically released by the fire alarm

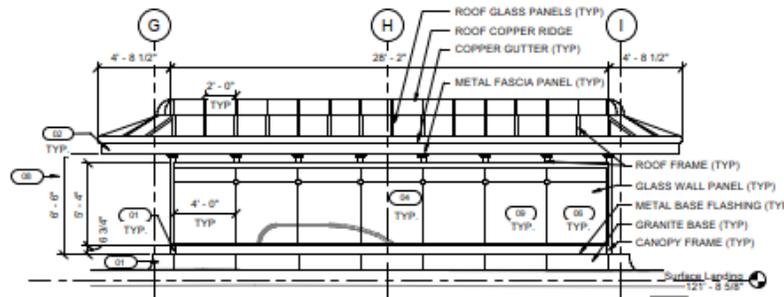

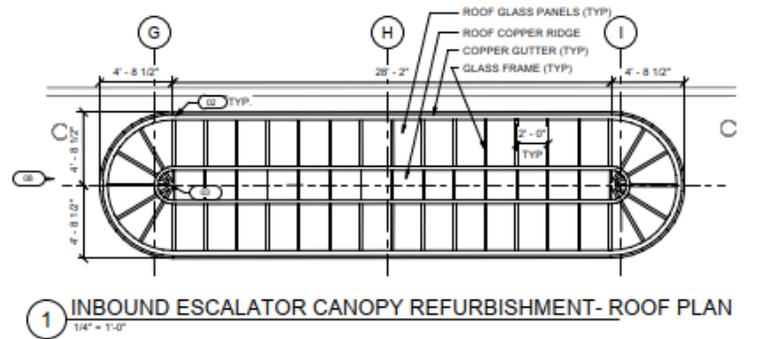

Escalator Modernization

- Inbound platform escalator to be modernized and all components to be replaced or inspected/reinforced as necessary
- Escalator to meet requirements of the MBTA design guidelines to the maximum feasible extent and/or ability
- Will mirror the newly replaced escalator in the Outbound platform

Inbound Escalator Canopy Refurbishment

- Roof glass will be removed, cleaned, and polished
- Chipped or broken glass will be replaced
- Rust will be cleaned from steel and entire canopy will be repainted
- Damaged gutter will be repaired
- Granite base joints will be raked and resealed

ELEVATION

. POLISH
ELS.
(NAME) AND

7. SYMBOLS SHOWING SPECIFIC WORK TYPE ON PHOTOS ARE FOR EXAMPLE ONLY. THE REFURBISHING

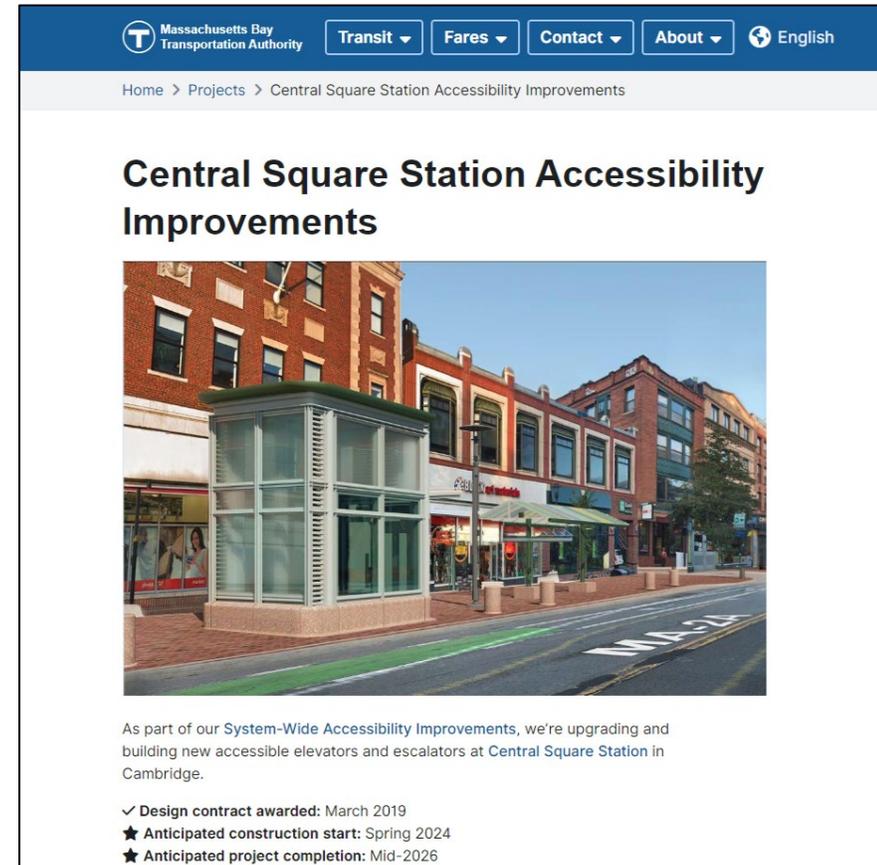

Anticipated Construction Impacts

- Work at platform level to be performed during the day behind safety fences
- Deliveries and removal of debris during overnight hours
- Minimal anticipated impacts to the Red Line
- Construction team will plan to:
 - Reduce and mitigate noise and traffic impacts
 - Possibly relocate bus stop
 - Provide pedestrian detours as needed
 - Maintain loading access to local businesses

Planned Outreach Efforts

- Pre-construction virtual public meeting once contractor is selected
- Briefings for relevant organizations including Central Sq. Business Improvement District
- Regular email updates to the project distribution list
- Updates to the project website based on anticipated work and impacts
- Responding to inquiries/concerns via the project inbox, CentralSquare@MBTA.com
- Coordination with MBTA operations to notify riders of service impacts

The screenshot shows the MBTA website header with navigation links for Transit, Fares, Contact, and About, along with an English language selector. The breadcrumb trail reads: Home > Projects > Central Square Station Accessibility Improvements. The main heading is "Central Square Station Accessibility Improvements". Below the heading is a photograph of a modern glass and metal transit shelter on a city street. Underneath the photo, a paragraph states: "As part of our System-Wide Accessibility Improvements, we're upgrading and building new accessible elevators and escalators at Central Square Station in Cambridge." Below this text are three bullet points: a checkmark for "Design contract awarded: March 2019", a star for "Anticipated construction start: Spring 2024", and a star for "Anticipated project completion: Mid-2026".

Next Steps

- Construction Notice to Proceed: Spring 2024
- Projected Project Completion: mid-2026

Please join our mailing list! You can sign up on the project website.

CentralSquare@MBTA.com

Appendix

Escalator Modernization

- A complete new replacement of the Inbound escalator would require the street level canopy structure along with all MBTA station equipment located underneath the existing escalator to be removed, including all electrical and fire command equipment currently housed within this space.
- In order to alleviate the need to remove and reinstall all aforementioned equipment, a “truss-retention” modernization has been designed to replace the escalator in its entirety, while leaving the existing truss in place.
- For the sake of continuity, the modernized escalator will be the same product as that installed on the Outbound platform in 2020.
- Like the Outbound escalator, certain pre-existing site conditions prohibit 100% adherence to the MBTA escalator design guidelines. The escalator will meet the MBTA design guidelines to the maximum ability as is allowable and feasible based on site and truss conditions.
