# **Special Permit for Modification of Permitted Uses in Alewife Overlay Districts**

- **20.94** *Modifications to Permitted Uses*
- 20.94.1 Additional Permitted Uses. In any base office or industrial district all uses listed in Section 4.35 Retail Business and Consumer Service Establishments shall be permitted by special permit from the Planning Board (if not otherwise allowed as of right in the district), subject to the following limitations unless the limitations are specifically waived by the Planning Board upon its finding that the purposes set forth in Section 20.92 above have been met:
  - 1. No individual establishment may exceed 10,000 square feet in area.
  - 2. The retail use shall be located on the first floor or basement of the building in which it is located.
  - 3. The total Gross floor Area devoted to retail uses may not exceed 10% of the Gross Floor Area of the buildings constructed or authorized on the lot.
- **20.92** *General Purpose.* It is the purpose of this Section 20.90 to augment existing base district zoning regulations to respond to the unique problems and pressures for change in the Alewife area. The regulations contained in this Section 20.90 provide for more careful public scrutiny of future development proposals and provide an opportunity to shape the form and character of that development in ways that will benefit both individual property owners and the general interests of the larger commercial and residential neighborhood as a whole.

These regulations are intended to harness the opportunities presented with the redevelopment of private property in ways that will:

- 1. Encourage forms of development, mix of uses, and range of improvements that will facilitate and encourage walking, biking and transit use and reduce the growth of auto trips in an area already burdened with regional vehicular traffic passing through to other destinations in the metropolitan region;
- 2. Preserve and enhance the capacity to store floodwater, recharge groundwater and manage the collection and disposal of stormwater in ways that add to the quality and visual appeal of the built environment as well as to the quality of the water itself;
- 3. Minimize the negative impact of new development on the adjacent Cambridge Highlands residential neighborhood while introducing new amenities and services that will benefit the residents of that neighborhood;
- 4. Integrate the entire area through the creation of new pedestrian paths, roadways, green spaces and bridges that will facilitate movement within the several Districts and beyond to the Cambridge Highlands, North Cambridge and Neighborhood Nine neighborhoods and the Fresh Pond Reservation;
- 5. Introduce a significant component of residential living and support retail services to enhance the area's appeal for all persons who come to work, shop as well as live within the Districts; and
- 6. Create an identity and sense of place for the Alewife Districts that parallels the development of the historic urban centers that characterize much of Cambridge.

## **Special Permit for Building Construction in Flood Plain Overlay District**

- **20.73** Applicability. No structure or building shall be erected, constructed, expanded, substantially improved, or moved and no earth or other materials shall be dumped, filled, excavated, transferred or otherwise altered in the Flood Plain Overlay District unless a special permit is granted by the Planning Board.
- **20.75** *Criteria.* The Planning Board shall grant a Special Permit for development in the Flood Plain Overlay District if the Board finds that such development has met all of the following criteria in addition to other criteria specified in Section 10.43:
  - 1. No filling or other encroachment shall be allowed in Zone A areas or in the floodway which would impair the ability of these Special Flood Hazard Areas to carry and discharge flood waters, except where such activity is fully offset by stream improvements such as, but not limited to, flood water retention systems as allowed by applicable law.
  - Displacement of water retention capacity at one location shall be replaced in equal volume at another location on the same lot, on an abutting lot in the same ownership, on a noncontiguous lot in the same ownership, or in accordance with the following requirements.
  - 3. All flood water retention systems shall be suitably designed and located so as not to cause any nuisance, hazard, or detriment to the occupants of the site or abutters. The Planning Board may require screening, or landscaping of flood water retention systems to create a safe, healthful, and pleasing environment.
  - 4. The proposed use shall comply in all respects with the provision of the underlying zoning district, provisions of the State Building Code, Wetlands Protection Act, and any other applicable laws.
  - 5. Applicants for development in the Alewife area shall be familiar with area-specific and general city-wide land use plans and policy objectives (e.g. *Concord-Alewife Plan, A Report of the Concord Alewife Planning Study,* November 2005; *Toward a Sustainable Future, Cambridge Growth Policy,* 1993, *Update,* 2007; Section 19.30 Urban Design Objectives of this Zoning Ordinance) and shall demonstrate how their plan meets the spirit and intent of such documents in conjunction with the requirements of this Section 20.70 Flood Plain Overlay District and Section 20.90 Alewife Overlay Districts 1-6.
  - 6. The requirement of Section 20.74(3) has been met.

## **General Criteria for Issuance of a Special Permit**

- **10.43** *Criteria.* Special permits will normally be granted where specific provisions of this Ordinance are met, except when particulars of the location or use, not generally true of the district or of the uses permitted in it, would cause granting of such permit to be to the detriment of the public interest because:
  - (a) It appears that requirements of this Ordinance cannot or will not be met, or
  - (b) traffic generated or patterns of access or egress would cause congestion, hazard, or substantial change in established neighborhood character, or
  - (c) the continued operation of or the development of adjacent uses as permitted in the Zoning Ordinance would be adversely affected by the nature of the proposed use, or
  - (d) nuisance or hazard would be created to the detriment of the health, safety and/or welfare of the occupant of the proposed use or the citizens of the City, or
  - (e) for other reasons, the proposed use would impair the integrity of the district or adjoining district, or otherwise derogate from the intent and purpose of this Ordinance, and
  - (f) the new use or building construction is inconsistent with the Urban Design Objectives set forth in Section 19.30.

### 19.30 Citywide Urban Design Objectives [SUMMARIZED]

Objective	Indicators
New projects should be responsive to the existing or anticipated pattern of development.  Development should be pedestrian and bicycle-friendly, with a positive relationship to its surroundings.	<ul> <li>Transition to lower-scale neighborhoods</li> <li>Consistency with established streetscape</li> <li>Compatibility with adjacent uses</li> <li>Consideration of nearby historic buildings</li> <li>Inhabited ground floor spaces</li> <li>Discouraged ground-floor parking</li> <li>Windows on ground floor</li> <li>Orienting entries to pedestrian pathways</li> <li>Safe and convenient bicycle and pedestrian access</li> </ul>
The building and site design should mitigate adverse environmental impacts of a development upon its neighbors.  Projects should not overburden the City infrastructure services, including neighborhood roads, city water supply system, and sewer system.	<ul> <li>Location/impact of mechanical equipment</li> <li>Location/impact of loading and trash handling</li> <li>Stormwater management</li> <li>Shadow impacts</li> <li>Retaining walls, if provided</li> <li>Building scale and wall treatment</li> <li>Outdoor lighting</li> <li>Tree protection (requires plan approved by City Arborist)</li> <li>Water-conserving plumbing, stormwater management</li> <li>Capacity/condition of water and wastewater service</li> <li>Efficient design (LEED standards)</li> </ul>
New construction should reinforce and enhance the complex urban aspects of Cambridge as it has developed historically.	<ul> <li>Institutional use focused on existing campuses</li> <li>Mixed-use development (including retail) encouraged where allowed</li> <li>Preservation of historic structures and environment</li> <li>Provision of space for start-up companies, manufacturing activities</li> </ul>
Expansion of the inventory of housing in the city is encouraged.	<ul> <li>Housing as a component of large, multi-building development</li> <li>Affordable units exceeding zoning requirements, targeting units for middle-income families</li> </ul>
Enhancement and expansion of open space amenities in the city should be incorporated into new development in the city.	<ul> <li>Publicly beneficial open space provided in large-parcel commercial development</li> <li>Enhance/expand existing open space, complement existing pedestrian/bicycle networks</li> <li>Provide wider range of activities</li> </ul>

#### Concord-Alewife Plan Goals for Triangle (intended to provide general guidance)

- Encourage more transit-oriented development. Allow higher density and height to take advantage of proximity to Alewife Station.
- Continue to allow commercial development to be focused in this area, while also encouraging housing close to the T station.
- Create a pleasant, walkable connection between Alewife Reservation and Fresh Pond Reservation consistent with the Alewife Reservation Master Plan and the Fresh Pond Master Plan.
- Create public access to the Alewife Reservation from Cambridgepark Drive.
- Reduce auto mode share within the Triangle.
- Improve bicycle and pedestrian connections among the Minuteman Trail, Belmont Path, Linear Park, and a future pathway along the Watertown rail line.
- Improve signage and enhance access to the multiuse trail from Alewife Station.
- Encourage development of additional housing close to Alewife Station while continuing to support commercial development.

#### Concord-Alewife Design Guidelines – Areawide & Triangle (intended to provide general guidance)

- Break up large blocks into smaller blocks, of sizes similar to those in surrounding Cambridge neighborhoods.
- Vary the design of individual buildings to create an architecturally diverse district.
- Street level facades should include active uses such as frequent residential entrances; neighborhood-serving retail; services for public or commercial offices; and community spaces.
- Encourage awnings/ canopies to provide shelter and enliven ground-floor façades.
- Utilize low impact development principles in building and site design.
- Use site design that preserves future rights-of-way identified in the Circulation Concept Plan.
- Improve existing streets to meet City standards, including streetscape improvements.
- Strengthen bicycle and pedestrian links to adjacent areas.
- Screen service areas from major streets.
- Parking below-grade is preferred. If above-grade parking is provided, it should be designed so
  that is it not visible from public streets and pathways; line structured parking with active uses
  along important public ways.
- Design and locate lighting and signage in support of the district's pedestrian-friendly quality.
- Use site design to minimize shadows on other buildings or on public streets, open spaces, parks, and plazas.
- Create a pedestrian-friendly environment along Cambridgepark Drive.
- Provide small setbacks (5 to 15 feet) from the right-of-way for café seating, benches, or small open spaces.
- Provide pedestrian links that strengthen physical connections to Alewife Reservation, consistent with its master plan.
- Create building height / façade setbacks between 85' and 105'.
- Site new development to preserve right-of-way for future crossing of the railroad tracks to connect the Triangle and Quadrangle.
