

# The Port Infrastructure Improvements Project

SHARED STREET DESIGN: CHERRY STREET

CLEMENT MORGAN PARK

Share your thoughts on future shared streets in The Port and open space improvements at Clement Morgan Park

## VIRTUAL OPEN HOUSE

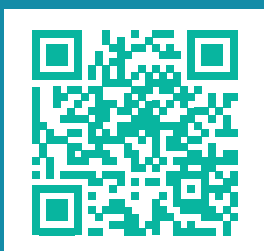

Thursday, March 30 | 6-8 p.m.

Register here: [tinyurl.com/PortProjectOpenHouse](https://tinyurl.com/PortProjectOpenHouse)

See and talk about our designs for five shared streets\*, and discuss ideas for improving Clement Morgan Park at our Virtual Open House.

*\*Suffolk, Worcester, Pine, Eaton & Cherry streets*

Can't attend?  
Scan the QR  
code to the  
right to view  
plans and share  
your feedback:

To learn more about the project, share feedback, or read the information in Español, Português, 普通话, or Kreyòl Ayisyen, scan the QR code or visit [cambridgema.gov/theport](https://cambridgema.gov/theport)

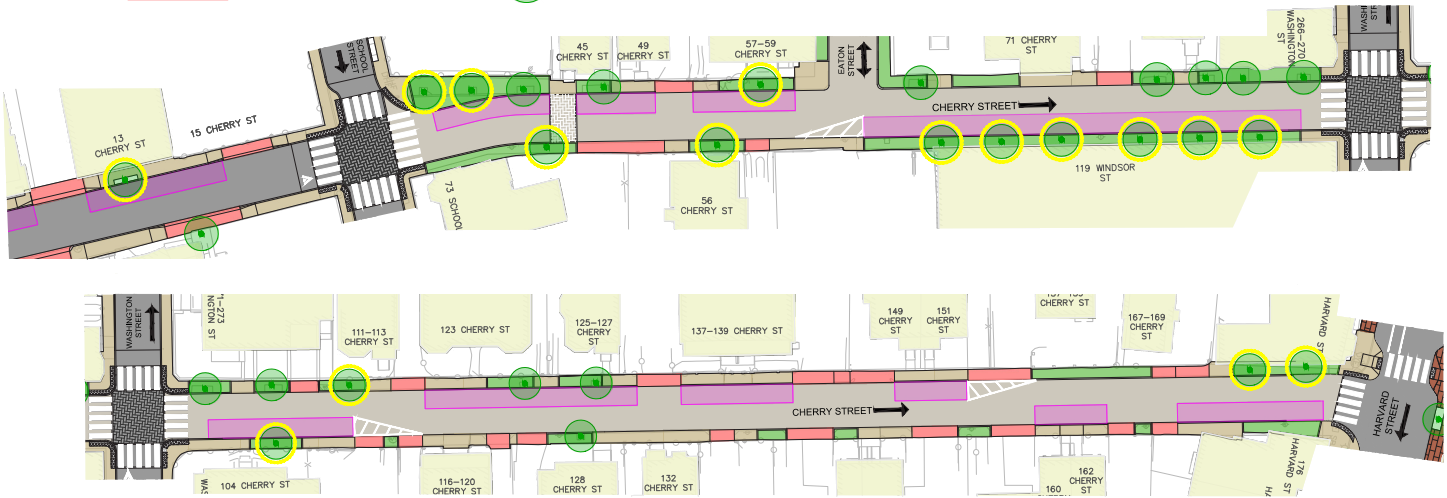

Questions or comments may be directed to:  
Jerry Friedman, Supervising Engineer, DPW

# See our design for making your street a “shared street” and share your input at the Virtual Open House.

## SHARED STREET DESIGN: CHERRY STREET

### LEGEND

*\*Design subject to change*

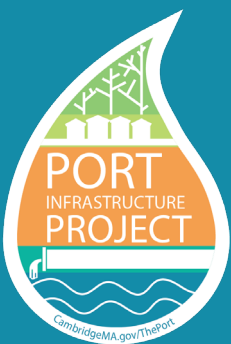

### WHAT IS A “SHARED STREET”?

A shared street is a street where pedestrians are given priority and share the road with low-speed vehicles. All users become increasingly aware and respectful of fellow users. Residents may see the following on a shared street:

- Pedestrians are prioritized with an accessible path in a shared space
- Much of the sidewalk area is replaced by new trees and planting areas
- Level, accessible connections are provided between homes and the street

### WHAT ARE THE BENEFITS?

Shared streets create an accessible route that is shared by pedestrians and slow-moving vehicles. Removing the narrow, substandard sidewalks allows for more green space and new trees. Shared streets are also a great way to promote neighborly interaction and community building.
