

July 31 2019 CRZTF Meeting  
Prompts for individual reflection

Name: \_\_\_\_\_

Take a few minutes to think about the following questions and note your answers. Please refer to the number of the objective you are referring to when appropriate. The planning team will collect these responses.

1. Is this the set of land use and development objectives that this group's zoning recommendations should aim to achieve?
2. Which objectives are most important to you?
3. Are there objectives that are missing or should be framed differently?
4. Which objectives will be more or less challenging for property owners to achieve? For example, challenges for new construction vs alterations, for projects at different project scales, etc.
5. What are the tradeoffs (urban design, historic preservation, transportation, housing or economic development, etc.) required to meet these objectives?

(feel free to use the space on the back)
